Introduction

i  This revised Code of Practice has been prepared in accordance with section 118 of the Mental Health Act 1983 (‘the Act’) by the Secretary of State after consulting such bodies as appeared to him to be concerned, and laid before Parliament. The Code will come into force [on 1 April 2015].

Purpose and legal status of the Code of Practice

ii  The Code provides guidance to registered medical practitioners (‘doctors’), approved clinicians, managers and staff of providers and approved mental health professionals (AMHPs) on how they should proceed when undertaking duties under the Act.

iii  It gives guidance to registered medical practitioners and other professionals about certain aspects of medical treatment for mental disorder more generally.

iv  The guidance given in the Code to local authorities is given under section 7 of the Local Authority Social Services Act 1970 (duty to exercise social services functions under guidance of Secretary of State).

v  The people listed above to whom the Code is addressed must have regard to the Code. Departures from the Code could give rise to legal challenge – and a court, in reviewing any departure from the Code, will scrutinise the reasons for the departure to ensure that there is sufficiently convincing justification in the circumstances.

vi  The Code is not statutory guidance for others, including commissioners of health services, the police and ambulance services, and others in health and social services (including the independent and voluntary sectors) involved in commissioning or providing services to people who are, or may become, subject to compulsory measures under the Act. It should be beneficial to them in carrying out their duties. The Code should assist the Care Quality Commission and others responsible for inspecting or monitoring the quality of such services, including commissioners, local authorities, general practitioners and the Tribunal.

vii  It is intended that the Code will be helpful to patients, their representatives, carers, families, friends, advocates and others who support them.
Presentation

Throughout the Code, the Mental Health Act 1983 is referred to as ‘the Act’. Where there is reference to sections of other Acts, the relevant Act is clearly indicated. Where the Code refers to ‘the regulations’ it means regulations made under the Act.

The Code is intended to offer guidance on the operation of the Act and does not set out to explain each and every aspect of the Act and the regulations, orders and directions which go with it. The Code is divided into 40 chapters which are grouped into seven common themes to help readers navigate to what is of most interest or relevance to them.

To guide readers to more detailed information and explanation, references are given in the margins or footnotes to relevant legislation and to other reference material.

A list of relevant material is provided at the end of a chapter, where appropriate. References made and any links provided to material or organisations do not form part of the Code and do not attract the same legal status. The information is provided for assistance only and references made should not suggest that the Department of Health endorses the material.

Flowcharts are also included to illustrate the types of decisions that patients may need to make on particular issues.

References to patients, children and young people and commissioners

The Code refers throughout to ‘patients’ when it means people who are, or appear to be, suffering from a mental disorder. This use of the term is not a recommendation that the term ‘patient’ should be used in practice in preference to other terms such as ‘service users’, ‘clients’, ‘individuals’ or similar terms. It is a reflection of the terminology used in the Act itself.

When the Code refers to ‘children’ it means people under the age of 16. When it refers to ‘young people’ it means people aged 16 or 17.

References to ‘commissioners’ mean NHS commissioners – clinical commissioning groups or NHS Commissioning Board (NHS England) – and/or local authorities. The meaning of each reference depends on where commissioning responsibilities lie under the Act and other legislation (eg the National Health Service Act 2006). Further information about commissioning responsibilities is listed in the ‘Related material’ section at the end of the chapter.
The Care Quality Commission

xvi The Care Quality Commission (CQC) is responsible for reviewing (and where appropriate, investigating) the exercise of powers and the discharge of duties in relation to detention, community treatment orders (CTOs) and guardianship under the Act. The CQC is also responsible for the regulation of all registered healthcare providers, including mental healthcare providers, under the Health and Social Care Act 2008. CQC is committed to integrating its monitoring of the exercise of powers under the Act in its wider inspections of mental healthcare. Full roll out of the new regulatory model is planned from October 2014 and is the subject of separate detailed consultations being undertaken by CQC in Spring and Summer 2014.

xvii The Code currently informs CQC’s inspections but the planned changes will also include a new ratings system (inadequate/requires improvement/good/outstanding). The Code will be the starting point for CQC’s rating system and will help to identify what a ‘good’ rating looks like in the care and treatment of people subject to the Act. The integrated model of inspection will mean that a provider’s exercise of powers and discharge of duties under the Act informs its final CQC rating following an inspection. The intention is that, where the principles and guidance of the Code are not implemented, the CQC will consider using its regulatory powers to facilitate change and improvement in local services.

xviii Providers and professionals should not use the Code in isolation. They will also need to consider relevant developments in professional practice, National Institute for Health and Care Excellence (NICE) and professional guidelines, legislation and case law to ensure they are consistently delivering the highest standards of care and professional practice. The Code refers to relevant material not included in the Code but these references are not exhaustive. The new introduction and guiding principles encourage commissioners of services, health and care providers and professionals to deliver a holistic, whole person approach to care that is reflective of clinical best practice and quality. CQC in its monitoring of services will seek to ensure that this takes place.

Scope of the Code

xix The Code applies in the care and treatment of all patients in England who are subject to the exercise of powers and the discharge of duties under the Act, including patients who are detained, subject to CTOs or guardianship, or on leave under the Act.

xx The Act applies to England and Wales. Wales has its own Code that applies in Wales.¹

What to do if you think the Code is being inappropriately applied

Everyone has a role in ensuring that the Act and the Code are complied with. The Serious Case Review into Winterbourne View Hospital and subsequent investigations and reports by the CQC illustrated that this was not always the case. Commissioners, CQC inspectors, general practitioners and other health and social care practitioners and professional regulators all have an interest in identifying concerns about how the Act is being applied or whether it is being ignored. Patients in any of these organisations should raise any concerns they may have.

Patients, carers, family members and friends should also be able to raise any concerns they may have. Every local provider must therefore make reasonable efforts to raise awareness and understanding of the Code among patients, carers and family, particularly in relation to their rights under the Act.

Local service providers must also have clear policies in place setting out how patients, carers, family members, professionals, practitioners or other interested bodies can raise concerns about a patient’s treatment. This must include how the patient can, if required, take forward their complaint via the local Healthwatch or the Patient Advisory Liaison Service, the CQC, the Parliamentary and Health Service Ombudsman, the Tribunal or ultimately the Secretary of State for Health or Justice, as appropriate.

Related legislation

Mental Capacity Act 2005

There are many references throughout this Code to the Mental Capacity Act 2005 (MCA). The Code assumes that its readers are familiar with the main provisions of the MCA as it relates to the care and treatment of people with mental disorders who lack the capacity to take particular decisions for themselves, and does not attempt to explain them.

It will be difficult for professionals involved in providing care for people with mental health problems to carry out their work (including their responsibilities under this Act) without an understanding of key concepts in the MCA.

---

Care Quality Commission, Review of Compliance: Castlebeck Care Ltd. 2011.
3 For information on how to contact CQC see Related material in chapter 4.
In particular, they will need to be familiar with the principles of the MCA to understand when a person may lack capacity, to know when decisions can be taken in the best interests of people who lack capacity to take those decisions themselves, and the steps to be taken before doing so. They will also need to be familiar with the concepts of advance decisions to refuse treatment, lasting powers of attorney and donees of such powers (‘attorneys’), court-appointed deputies and independent mental capacity advocates (IMCAs).

Although patients’ capacity to consent to treatment does not by itself determine whether they can or ought to be detained under this Act, people involved in deciding whether patients should be detained under this Act will also need to understand how deprivation of liberty should be authorised. Deprivation of liberty in hospitals and care homes may be authorised under the deprivation of liberty safeguards added to the MCA by the Mental Health Act 2007 and the procedures for so doing. The Court of Protection may authorise deprivation of liberty in other settings.

In addition to the requirements of the Act, professionals (particularly those involved in discharging or treating patients in the community) should also consider the requirements of the Care Act 2014, which applies to the care and support arranged or provided by local authorities to patients in the community, such as patients subject to CTOs or guardianship.

Professionals should consider the principles that the Care Act introduces about the centrality of the patient and a holistic approach to care and support. These are very much in line with the guiding principles proposed in this Code.

The Care Act requires local authorities, NHS commissioners and providers, and housing services to work together to provide truly person-centred care and support. It places a particular emphasis on preventing people’s needs from getting worse. These duties are particularly important for people with mental illness who often require support from a number of agencies in order to promote their recovery and participate in society after leaving hospital or whilst on a CTO, guardianship or leave.

Using the Act

Chapter 1 Guiding principles
Chapter 2 Mental disorder definition
Chapter 3 Equality and human rights
1 Guiding principles

Why read this chapter?

1.1 It is essential that all those undertaking functions under the Mental Health Act (‘the Act’) understand the five sets of overarching principles. These must be considered when making decisions in relation to care, support or treatment provided under the Act. This chapter provides an explanation of the overarching principles and stresses that they inform decisions rather than determining them.

The five overarching principles are:

Least restrictive option and maximising independence: Where it is possible to treat a patient safely and lawfully without detaining them under the Act, the patient should not be detained. Wherever possible a patient’s independence should be maintained with a focus on recovery.

Empowerment and participation: Patients, their families and carers should be fully involved in decisions about care, support and treatment.

Respect and dignity: Patients, their families and carers should be treated with respect and dignity and listened to be professionals.

Purpose and effectiveness: Decisions about care and treatment must be appropriate to the patient, and must be performed to current national guidelines and/or current, available evidence based practice.

Efficiency and equity: Providers, commissioners and other relevant organisations should work together to ensure that the quality of commissioning and provision of mental health care services is equivalent to physical health and social care services.

Least restrictive option and maximising independence

1.2 Where it is possible to treat a patient safely without detaining them under the Act, the patient should not be detained. If the Act is used, detention should be used for the shortest time necessary, be delivered as close to the patient’s home or family as reasonably possible and enable the patient to maintain contact with family, friends, and their community.

1.3 Any restrictions must be necessary and proportionate, having regard to whether the purpose for the restriction can be achieved in a way that is less restrictive of the person’s rights and freedom of action.

1.4 Restrictions that apply to all patients in a particular setting (blanket restrictions) must have clear justification for the particular group that they apply to and should not be indiscriminate for the convenience of the provider.

1.5 Assessment, care and treatment under the Act should seek to enable patients to progress towards recovery and re-establish their independence as soon as is safely practicable.
Empowerment and participation

1.6 Patients must be given the opportunity to be involved in planning, developing and reviewing their own treatment and care to help ensure that it is delivered in a way that is as appropriate and effective for them as possible. The involvement of carers, family members and other people who have an interest in the patient’s welfare should be encouraged (unless there are particular reasons to the contrary) and their views taken seriously.

1.7 Patients must be given sufficient information, and the information must be given in a format that is easily understandable to them, to enable them to participate in decision-making as far as they are capable of doing so. Patients should be made aware of the support that an advocate can provide, including family members or friends or, if they are eligible, an independent mental health advocate (IMHA) (or an independent mental capacity advocate (IMCA) where relevant). A patient’s views, past and present wishes and feelings (whether expressed at the time or in advance), should be considered so far as they are reasonably ascertainable. There must be no unlawful discrimination.

Respect and dignity

1.8 Patients, their families and carers must be treated with respect and dignity. Practitioners performing functions under the Act should respect the rights and dignity of patients, their families and carers, while also ensuring their safety and that of others.

1.9 People taking decisions under the Act must recognise and respect the diverse needs, values and circumstances of each patient, including their age, disability, gender reassignment, marriage and civil partnership, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

Purpose and effectiveness

1.10a Care, support and treatment given under the Act should be given in accordance with up-to-date national guidance and/or current evidence-based practice from professional bodies, where this is available.

1.10b Patients should be offered treatment and care in environments that are safe (for them and for the public) and supportive, which enable practitioners to deliver a range of therapies with a focus on patient recovery, and other positive clinical and personal outcomes, where appropriate. Care plans for detained patients should focus on maximising recovery and ending detention as expeditiously as possible.
1.11 Commissioners, providers and professionals must consider the broad range of interventions and services needed to promote recovery after a patient leaves hospital, including housing and employment opportunities. Treatment should be appropriate to patients’ needs, taking account of their circumstances.

1.12 Physical healthcare needs must be assessed and addressed including steps to reduce any potential side effects associated with any treatments.

Efficiency and equity

1.13 Commissioners and providers, including their staff, should give equal priority to mental health as they do to physical health conditions.

1.14 Commissioners, providers and other relevant agencies should work together to prevent mental health crises and, where possible, reduce the use of detention through prevention and early intervention and by commissioning a range of services that are accessible, responsive and as high quality as other health emergency services.

1.15 Where patients are subject to compulsory detention, health and social care agencies must work together to deliver a programme of care that, as far as practicable, minimises the duration of detention, facilitates safe discharge from hospital and takes into account the patient’s wishes.

1.16 Commissioners, providers and other relevant organisations should establish effective relationships to ensure efficient working with accountability defined through joint governance arrangements. Joint working should be used to minimise delay in care planning needed to facilitate discharge.

Using the principles

1.17 All decisions must be lawful and informed by good professional practice. Lawfulness necessarily includes compliance with the Human Rights Act 1998 (HRA).

1.18 The principles inform decisions, they do not determine them. Although each principle must inform any decision made under the Act to which it relates, the weight given to each principle in reaching a particular decision will need to be balanced in different ways according to the particular circumstances of each particular decision.
2 Mental disorder definition

Why read this chapter?

2.1 This chapter provides guidance on the definition of mental disorder for the purposes of the Act. Mental disorder is defined in the Act as ‘any disorder or disability of the mind’. Examples of clinically recognised disorders or disabilities are given and it is made clear that difference should not be confused with disorder.

Guidance is provided on dependence on alcohol or drugs and learning disabilities and autistic spectrum disorders.

The Act applies to personality disorders in exactly the same way as it applies to mental illness and other mental disorders.

Definition of mental disorder

2.2 Mental disorder is defined for the purposes of the Act as ‘any disorder or disability of the mind’. Relevant professionals should determine whether a patient has a disorder or disability of the mind in accordance with good clinical practice and accepted standards of what constitutes such a disorder or disability.

2.3 Examples of clinically recognised conditions which could fall within this definition are given in the following box.
Clinically recognised conditions which could fall within the Act’s definition of mental disorder

- Affective disorders, such as depression and bipolar disorder
- Schizophrenia and delusional disorders
- Neurotic, stress-related and somatoform disorders, such as anxiety, phobic disorders, obsessive compulsive disorders, post-traumatic stress disorder and hypochondriacal disorders
- Organic mental disorders such as dementia and delirium (however caused)
- Personality and behavioural changes caused by brain injury or damage (however acquired)
- Personality disorders (see paragraphs 2.17 – 2.18 and chapter 21)
- Mental and behavioural disorders caused by psychoactive substance use (see paragraphs 2.7 – 2.11)
- Eating disorders, non-organic sleep disorders and non-organic sexual disorders
- Learning disabilities (see paragraphs 2.12 – 2.16 and chapter 20)
- Autistic spectrum disorders (including Asperger’s syndrome) (see paragraphs 2.12 -2.16 and chapter 20)
- Behavioural and emotional disorders of children and young people (see chapter 19)

(Note: this list is not exhaustive)

2.4 The fact that someone has a mental disorder is never sufficient grounds for any compulsory measure to be taken under the Act. Compulsory measures are permitted only where specific criteria about the potential consequences of a person’s mental disorder are met. There are many forms of mental disorder which are unlikely ever to call for compulsory measures.

2.5 Care must always be taken to avoid diagnosing, or failing to diagnose, mental disorder on the basis of preconceptions about people or failure to appreciate cultural and social differences. What may be indicative of mental disorder in one person, given their background and individual circumstances, may be nothing of the sort in another person.
2.6 Difference should not be confused with disorder. No-one may be considered to be mentally disordered solely because of their political, religious or cultural beliefs, values or opinions, unless there are proper clinical grounds to believe that they are the symptoms or manifestations of a disability or disorder of the mind. The same is true of a person’s involvement, or likely involvement, in illegal, anti-social or ‘immoral’ behaviour. Beliefs, behaviours or actions which do not result from a disorder or disability of the mind are not a basis for compulsory measures under the Act, even if they appear unusual or cause other people alarm, distress or danger.

Dependence on alcohol or drugs

2.7 Section 1(3) of the Act states that dependence on alcohol or drugs is not considered to be a disorder or disability of the mind for the purposes of the definition of mental disorder in the Act.

2.8 This means that there are no grounds under the Act for detaining a person in hospital (or using other compulsory measures) on the basis of alcohol or drug dependence alone. Drugs for these purposes may be taken to include solvents and similar substances with a psychoactive effect.

2.9 Alcohol or drug dependence may be accompanied by, or associated with, a mental disorder which does fall within the Act’s definition. If the relevant criteria are met, it is therefore possible, for example, to detain people who are suffering from mental disorder, even though they are also dependent on alcohol or drugs. This is true even if the mental disorder in question results from the person’s alcohol or drug dependence.

2.10 The Act does not exclude other disorders or disabilities of the mind related to the use of alcohol or drugs. These disorders – eg withdrawal state with delirium or associated psychotic disorder, acute intoxication, organic mental disorders associated with prolonged abuse of drugs or alcohol – remain mental disorders for the purposes of the Act.

2.11 Medical treatment for mental disorder under the Act (including treatment with consent) can include measures to address alcohol or drug dependence if that is an appropriate part of treating the mental disorder which is the primary focus of the treatment.
Learning disabilities and autistic spectrum disorders

2.12 Learning disabilities and autistic spectrum disorders are forms of mental disorder as defined in the Act.

2.13 Someone with a learning disability and no other form of mental disorder may not be detained for treatment or made subject to guardianship or a community treatment order (CTO) unless their learning disability is accompanied by abnormally aggressive or seriously irresponsible conduct on their part.

2.14 This ‘learning disability qualification’ only applies to specific sections of the Act. In particular, it does not apply to detention for assessment under section 2 of the Act.

2.15 The learning disability qualification does not apply to autistic spectrum disorders (including Asperger’s syndrome). It is possible for someone with an autistic spectrum disorder to meet the criteria for compulsory measures under the Act without having any other form of mental disorder, even if it is not associated with abnormally aggressive or seriously irresponsible behaviour. While experience suggests that this is likely to be necessary only very rarely, the possibility should never automatically be discounted.

2.16 For further guidance on particular issues relating to people with learning disabilities or autistic spectrum disorders (including further guidance on the learning disability qualification), see chapter 20.

Personality disorders

2.17 Apart from the learning disability qualification described above, the Act does not distinguish between different forms of mental disorder. The Act therefore applies to personality disorders (of all types) in exactly the same way as it applies to mental illness and other mental disorders.

2.18 No assumptions should be made about the suitability of using the Act – or indeed providing services without using the Act – in respect of personality disorders or the people who have them. What should inform decisions are the needs of the individual patient, the risks posed by their disorder and what can be done to address those needs and risks, both in the short and longer term (see chapter 21 for further guidance on personality disorders).
3 Equality and human rights

Why read this chapter?

3.1 Equality and human rights considerations are considered throughout the Code. Individual chapters explain relevant human rights issues and give good practice guidance. This chapter builds on this to highlight specific examples of good practice in service delivery and professional practice in relation to the Act, which advances equality and protects human rights.

Equality, human rights and health inequalities legislation

3.2 Commissioners and providers will need to consider the legislation and international conventions listed in Figure 1. NHS commissioners also need to ensure their policies comply with the duty to have regard to reducing health inequalities in the (section 13G in respect of the NHS Commissioning Board and section 14T for clinical commissioning groups in the National Health Service Act 2006) in the access to, and benefits from, healthcare.

</tr>
</tbody>
</table>
3.3 Human rights legislation provides a framework for delivering the best possible outcome for everyone who uses services. This means:
- putting human rights principles and standards into practice
- aiming to secure the full enjoyment of human rights for all
- ensuring rights are protected and secured.

3.3 In some instances, there will be consideration of competing human rights, which may require finely balanced judgments. Such decisions and the reasons for them should be clearly documented. The Human Rights Act (HRA) places a duty on public authorities to respect and protect people’s human rights. A wide range of bodies carrying out public functions, including the delivery of public services by private and contracted-out providers, have legal obligations to respect and protect human rights.

3.4 A human rights-based approach can be achieved by applying what has been described as the ‘PANEL’ principles:

- **P**articipation – enabling meaningful participation of key stakeholders in our policy development. Everyone has the right to participate in decisions which affect their human rights.

- **A**ccountability – ensuring clear accountability through the system for human rights. Accountability requires effective monitoring of human rights standards as well as effective remedies for human rights breaches. For this there must be appropriate laws, policies, institutions, administrative procedures and mechanisms of redress in order to secure human rights.

- **N**on-discrimination and equality – working to eliminate discrimination by embedding equality through our systems, processes and outputs. All forms of discrimination in the realisation of rights must be prohibited, prevented and eliminated. It also requires the prioritisation of those in the most marginalised situations who face the biggest barriers to realising their rights.

- **E**mpowerment – of all with knowledge, skills and commitment to realising human rights. Individuals and communities should know their rights. It also means that they should be fully supported to participate in the development of policy and practices which affect their lives and to claim rights where necessary.

- **L**egality – expressly applying the HRA and linking to international and European standards and bodies. A human rights-based approach requires the recognition of rights as legally enforceable entitlements and is linked in to national and international human rights law.
Equality Act 2010

3.5 The Equality Act makes it unlawful to discriminate (directly or indirectly) against a person on the basis of a protected characteristic or combination of protected characteristics. Disability is a protected characteristic under the Equality Act and includes a mental impairment that has a substantial and long-term adverse effect on the person’s ability to carry out normal day-to-day activities. Other protected characteristics include age, disability, gender reassignment, marriage and civil partnership, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

Public sector equality duty (PSED)

3.6 Under the PSED (section 149) public authorities including NHS commissioners, NHS providers and local authorities must have due regard to the need to:

• eliminate unlawful discrimination, harassment and victimisation
• advance equality of opportunity between people who share a protected characteristic and those who do not, and
• foster good relations between people who share a protected characteristic and those who do not.

3.7 Complying with the PSED may involve treating persons with mental health problems more favourably than others in order to achieve equality of access to services and outcomes.

Reasonable adjustments

3.8 The Equality Act places a duty on providers of services to the public, including NHS services, to make ‘reasonable adjustments’ for people with a disability (including mental impairment). Providers must take reasonable steps to avoid putting a person with a disability at a substantial disadvantage by changing a provision, criterion or practice, by modifying physical barriers, and/or by providing auxiliary aids and services.

3.9 The reasonable adjustments a person may need should be considered as part of a person-centred care planning process in all mental health service settings (see chapter 34). Figure 2 includes examples of reasonable adjustments:
Figure 2: Examples of reasonable adjustments

- Assessment for detention is undertaken by professionals with the appropriate specialist skills to assess the person based on their individual needs, e.g. adjustments if the person has a learning disability, an autism spectrum disorder or is deaf.
- Ensuring physical access is as accessible as possible e.g. through appropriate signage and lighting.
- Ensuring information for patients is in a format accessible to the person, e.g. using pictures and big print, or providing translations into the person’s first language.
- Ensuring there are adequate numbers of staff with the right skills and experience to communicate effectively with patients, e.g. staff who can use sign language or communicate in the person’s first language.
- Providing specific or additional training for staff who work with people with learning disabilities or autism spectrum disorders.
- Ensuring meetings are accessible to people, e.g. providing materials in an appropriate format and holding the meeting in an accessible venue. The provision of an independent mental health advocate (IMHA) can support a patient to participate in decisions about their care and treatment.

Monitoring and compliance

3.10 Commissioners and providers should have in place an ‘Equality and Human Rights Policy’ for service provision and practice in relation to the Act, which should be reviewed at Board (or equivalent) level at least annually. The policy should set out how the organisation complies with applicable human rights, equality and health inequalities legislation, and any priority areas for action.

3.11 Commissioners and providers should ensure that their local policies and standards (see summary in Annex B) comply with the applicable human rights, equality and health inequalities legislation.

4 Information for patients, nearest relatives, carers and others

Why read this chapter?

4.1 This chapter gives guidance on the information that must be given to patients, and their nearest relatives. It also gives guidance on communication with patients, their families and carers and other people.

Effective communication is essential in ensuring appropriate care and respect for patient’s rights, and those responsible for caring for patients should identify any communication difficulties and seek to address them. The Act requires hospital managers to take steps to ensure that patients who are detained or are the subject of a community treatment order (CTO) understand important information about how the Act applies to them.

This chapter gives guidance on the information that must be given to patients and their nearest relatives. It also gives guidance on communication with patients, their families and carers and other people.

Communication with patients

4.2 Effective communication is essential in ensuring appropriate care and respect for patients’ rights. It is important that the language used is clear and unambiguous and that people giving information check that the information that has been communicated has been understood.

4.3 Everything possible should be done to overcome barriers to effective communication, which may be caused by any of a number of reasons. For example, a patient’s first language may not be English. Patients may have difficulty in understanding technical terms and jargon or in maintaining attention for extended periods. For example, they may have a hearing or visual impairment or have difficulty in reading or writing, or have a learning disability. A patient’s cultural background may also be very different from that of the person speaking to them. Children and young people will need to have information explained in a way they can understand and in a format that is appropriate to their age.

4.4 Those with responsibility for the care of patients need to identify how communication difficulties affect each patient individually so that they can assess the needs of each patient and address them in the most appropriate way. Hospitals and other organisations should make people with specialist expertise (eg in sign language or Makaton) available as required. Often families, carers and advocates can help with or advise on best ways of communicating with a patient.
4.5 Where an interpreter is needed, every effort should be made to identify an interpreter who is appropriate to the patient, given the patient’s sex, religion or belief, dialect, cultural background and age. Interpreters need to be skilled and experienced in medical or health-related interpreting. The patient’s relatives and friends as intermediaries or interpreters is not good practice, and should only exceptionally be used, including when the patient is a child or a young person. Interpreters (both professional and non-professional) must respect the confidentiality of any personal information they learn about the patient through their involvement.

4.6 Independent mental health advocates (IMHAs) engaged by patients can be invaluable in helping patients to understand the questions and information being presented to them and in helping patients to communicate their views to staff (see chapter 6).

4.7 Wherever possible, patients should be engaged in the processes of reaching decisions which affect their care and treatment under the Act. Consultation with patients involves helping them to understand the issues, their own role and the roles of others who are involved in taking decisions. Ideally decisions should be agreed with the patient. Where a decision is made that is contrary to the patient’s wishes, that decision and the authority for it should be explained to the patient using a form of communication that the patient understands. Families, carers and advocates should be involved where the patient wishes or if the patient lacks capacity to understand.

Information for detained patients and patients on supervised community treatment

4.8 The Act requires hospital managers to take steps to ensure that patients who are detained in hospital under the Act, or who are subject to a community treatment order (CTO), understand important information about how the Act applies to them. This must be done as soon as practicable after the start of the patient’s detention or the CTO. This information must be given to patients subject to a CTO (‘community patients’) who are recalled to hospital at the time they are being recalled.

4.9 Information must be given to the patient both orally and in writing, including in accessible formats as appropriate (eg Braille, Moon, easy read) and in a language the patient understands. These are not alternatives. Those providing information to patients should ensure that all relevant information is transported in a way that the patient understands.

4.10 It would not be sufficient to repeat what is already written on an information leaflet as a way of providing information orally.

4.11 Patients should be given all relevant information, including on complaints, advocacy, legal advice, safeguarding and the role of the CQC. This information should be readily available to them throughout their detention or the period of the CTO.
Information about detention and CTOs

4.12 Patients must be informed:
- of the provisions of the Act under which they are detained or subject to a CTO and the effect of those provisions
- of the rights (if any) of their nearest relative to discharge them (and what can happen if their responsible clinician does not agree with that decision)
- for community patients, of the effect of the CTO, including the conditions which they are required to keep to the circumstances in which their responsible clinician may recall them to hospital, and
- that help is available to them from an IMHA, and how to obtain that help (chapter 6).

4.13 As part of this, they should be told:
- the reasons for their detention or CTO
- the maximum length of the current period of detention or CTO
- that their detention or CTO may be ended at any time if it is no longer required or the criteria for it are no longer met
- that they will not automatically be discharged when the current period of detention or CTO ends
- that their detention or CTO will not automatically be renewed or extended when the current period of detention or CTO ends
- the reasons for being recalled, and
- for patients subject to a CTO, the reasons for the revocation of a CTO.

4.14 Patients should also be told the essential legal and factual grounds for their detention or CTO. For the patient to be able to adequately and effectively challenge the grounds for their detention or their CTO, should they wish, they should be given the full facts rather than simply the broad reasons. This should be done promptly and clearly.

4.15 In addition, a copy of the detention or CTO documentation should be made available to the patient as soon as practicable and as a priority, unless the hospital managers are of the opinion (based on the advice of the authors of the documents) that the information disclosed would adversely affect the health or wellbeing of the patient or others. It may be necessary to remove any personal information about third parties.

4.16 Where the section of the Act under which the patient is being detained changes, they must be provided with the above information to reflect the new situation. The same applies where a detained patient becomes patient subject to a CTO.
**Information about recall to hospital whilst on CTO**

4.17a Where a patient is to be recalled to hospital (see paragraphs 29.42 – 29.65), the responsible clinician should give (or arrange for the patient to be given) oral reasons for the decision before the recall. The patient may nominate another person who they wish to be notified of the decision.

4.17b Where a conditionally discharged patient is to be recalled to hospital a brief verbal explanation of the Secretary of State’s reasons for recall should be provided to the patient at the time of recall unless there are exceptional reasons why this is not possible, eg the patient is violent or too distressed. The Secretary of State’s warrant will detail the reasons. The patient must also receive a full explanation of the reasons for his/her recall within 72 hours after admission in line with Health Service Guidelines HSG(93)20. Both written and oral explanation should be provided. Further information is available at paragraphs 29.49 – 29.59.

**Information about consent to treatment**

4.18 Patients must be told what the Act says about treatment for their mental disorder. In particular they must be told:

- the circumstances (if any) in which they can be treated without their consent – and the circumstances in which they have the right to refuse treatment
- the role of second opinion appointed doctors (SOADs) and the circumstances in which they may be involved, and
- (where relevant) the rules on electro-convulsive therapy (ECT) and medication administered as part of ECT (see paragraphs 25.18 – 25.24).
Information about seeking a review of detention or CTOs

4.19 Patients must be informed of their rights to be considered for discharge, particularly:
- of the right of the responsible clinician and the hospital managers to discharge them (and, for restricted patients, that it is subject to the agreement of the Secretary of State for Justice)
- of their right to ask the hospital managers to discharge them
- that the hospital managers must consider discharging them when their detention is renewed or their CTO is extended
- of their rights to apply to the Tribunal
- of the rights (if any) of their nearest relative to apply to the Tribunal on their behalf
- about the role of the Tribunal, and
- how to apply to the Tribunal.

4.20 Hospital managers should ensure that patients are offered assistance to request a hospital managers’ hearing or make an application to the Tribunal, and that the applications are transmitted to the Tribunal without delay. They should also be told:
- how to contact a suitably qualified legal representative (and should be given assistance to do so if required)
- that free legal aid may be available, and
- how to contact any other organisation which may be able to help them make an application to the Tribunal.

4.21 It is particularly important that patients are well-informed and supported to make an application to the Tribunal if they are on a CTO, do not otherwise have regular contact with their nearest relative or people who could help them make an application, or lack capacity.

4.22 Patients whose CTOs are revoked, and conditionally discharged patients recalled to hospital, should be told that their cases will be referred automatically to the Tribunal.

Information about the Care Quality Commission (CQC)

4.23 Patients must be informed about the role of the CQC and of their right to meet visitors appointed by the CQC in private. Patients should be told when the CQC is to visit their hospital and be reminded of the CQC’s role.

4.24 Patients may make a complaint to the CQC, and must be informed of the process for this. Support should be made available to patients to do this, if required (see paragraphs 4.50 - 4.54).
Information about withholding of correspondence

4.25 Detained patients must be told that their letters for posting may be withheld if the person to whom it is addressed asks the hospital managers to do so. Patients in high security psychiatric hospitals must be told about the other circumstances in which their correspondence may be withheld, the procedures that will be followed and of their right to ask the CQC to review the decisions taken.

Keeping patients informed of their rights

4.26 Those with responsibility for patient care should ensure that patients are reminded from time to time of their rights and the effects of the Act. It may be necessary to give the same information on a number of different occasions or in different formats and to check regularly that the patient has fully understood it. Information given to a patient who is unwell may need to be repeated when their condition has improved. It is helpful to ensure that patients are aware that an IMHA can help them to understand the information (see paragraph 6.11).

4.27 A fresh explanation of the patient’s rights should be considered in particular where:

- the patient is considering applying to the Tribunal, or when the patient becomes eligible again to apply to the Tribunal
- the patient requests the hospital managers to consider discharging them
- the rules in the Act about their treatment change (eg because three months have passed since they were first given medication, or because they have regained capacity to consent to treatment) (see chapters 23, 24 and 25)
- any significant change in their treatment is being considered
- there is to be a care programme approach review (or its equivalent)
- renewal of their detention, or extension of their CTO is being considered
- a decision is taken to renew their detention or to extend their CTO
- a decision is taken to recall a community patient or revoke a CTO, or
- a decision is taken to recall a conditionally discharged patient to hospital.

4.28 When a detained patient or a community patient is discharged, or the authority for their detention or the CTO expires, this fact should be made clear to them. The patient should be given an explanation of what happens next, including any section 117 after-care or other services which are to be provided.
Information for nearest relatives

4.29 The Act requires hospital managers to take such steps as are practicable to give the patient’s nearest relative a copy of any information given to the patient in writing, unless the patient requests otherwise. The information should be given to the nearest relative when the information is given to the patient, or within a reasonable time afterwards.

4.30 When a patient detained under the Act or subject to a CTO is given information, they should be told that the written information will also be supplied to their nearest relative, so that they have a chance to object.

4.31 The nearest relative should be told of the patient’s discharge from detention or CTO (where practicable), unless either the patient or the nearest relative has requested that information about discharge should not be given. This includes discharge from detention onto a CTO. If practicable, the information should be given at least seven days in advance of the discharge.

4.32 In addition, regulations require nearest relatives to be informed of various other events, including the renewal of a patient’s detention, extension of a CTO and transfer from one hospital to another.

4.33 These duties to inform nearest relatives are not absolute. In almost all cases, information is not to be shared if the patient objects.

4.34 In addition, there will occasionally be cases where these duties do not apply because disclosing information about the patient to the nearest relative cannot be considered practicable, on the grounds that it would have a detrimental impact on the patient that is disproportionate to any advantage to be gained from informing the nearest relative. This would therefore be a breach of the patient’s right to privacy under the European Convention on Human Rights (ECHR). The risk of this is greatest where the nearest relative is someone whom the patient would not have chosen themselves. Before disclosing information to nearest relatives without a patient’s consent, the person concerned must consider whether the disclosure would be likely to:

- put the patient at risk of physical harm or financial or other exploitation
- cause the patient emotional distress or lead to a deterioration in their mental health, or
- have any other detrimental effect on their health or wellbeing and, if so, whether the advantages to the patient and the public interest of the disclosure outweigh the disadvantages to the patient, in the light of all the circumstances of the case.
Communication with other people nominated by the patient

4.35 Patients may want to nominate one or more people who they would wish to be involved in, or notified of, decisions related to their care and treatment.

4.36 Patients may nominate an IMHA, another independent advocate, or a legal professional. They may also nominate a relative, carer, friend or other informal supporter or advocate.

4.37 The involvement of such friends, relatives or other supporters can have significant benefits for the care and treatment of the patient. It can provide reassurance to the patient, who may feel distrustful of professionals who are able to impose compulsory measures on them, or are relatively unfamiliar and unknown to the patient. People who know the patient well can provide knowledge of the patient and perspectives that come from long-standing and intimate involvement with the patient prior to (and during) their involvement with mental health services. They can provide practical assistance in helping the patient to transport information and views and may have knowledge of advance decisions or statements made by the patient (see chapter 9).

4.38 Professionals should normally agree to a patient’s request to involve carers, relatives, friends or other informal supporters or advocates. They should tell the patient whenever such a request will not be, or has not been, granted. Where a patient’s request is refused, it is good practice to record this in the patient’s notes, giving reasons for the refusal. It may not always be appropriate to involve another person as requested by the patient, for example where:

- contacting and involving the person would result in a delay in making the decision in question that would not be in the patient’s best interests
- the involvement of the person is contrary to the best interests of the patient, or
- that person has requested that they should not be involved.

4.39 Professionals should take steps to find out whether patients who lack capacity to take particular decisions for themselves have an attorney or deputy with authority to take the decision on their behalf. Where there is such a person, they act as the agent of the patient, and should be informed in the same way as the patient themselves about matters within the scope of their authority.
Involvement of carers

4.40 Carers are key partners with health and care services and local authorities in providing care, especially for relatives and friends who have mental disorders. In many instances, especially when a patient is not in hospital, the patient’s carers and wider family will provide more care and support than health and social care professionals. It is important for professionals to identify all individuals who provide care and support for patients, to ensure that health and care services assess those carers’ needs and, where relevant, provide support to meet them. Local authorities also have duties in the Care Act 2014 to assess adult carers’ current and future needs for support and, must meet eligible needs for support. The Children and Families Act 2014 also places a duty on local authorities to assess needs for support of both parent carers of disabled children and young carers.

4.41 Unless there are good reasons to the contrary, patients should be encouraged to agree to their carers being involved in decisions under the Act and to them being kept informed. If patients lack capacity to consent to this, it may be appropriate to involve and inform carers if it is in the patient’s best interests – although that decision must always be made in the light of the specific circumstances of the case.

4.42 In order to ensure that carers can, where appropriate, participate fully in decision-making, it is important that they have access to:

- practical and emotional help and support to assist them in participating, and
- timely access to comprehensive, up-to-date and accurate information.

4.43 Even if carers cannot be given detailed information about the patient’s case, where appropriate they should be offered general information, in an appropriate form, which may help them understand the nature of mental disorder, the way it is treated, and the operation of the Act.

Information for patients’ children

4.44 Paragraph 4.45 applies equally to children, young people or individuals with a learning disability who are supporting parents who have mental disorder. In considering the kind and amount of information which young people (especially young carers) should receive about a parent’s condition or treatment, the people giving the information will need to balance the interests of the child against the patient’s right to privacy and their wishes and feelings. Any such information should be appropriate to the age and understanding of the young person.

---

7 These duties are expected to become operational on 1 April 2015.
Hospital managers’ information policy

4.45 The formal duty to ensure that detained and community patients, and their nearest relatives, have been informed about their legal situation and rights falls to the hospital managers. In practice, it would usually be more appropriate for professionals working with the patient to provide them with the information. In order to fulfil their statutory duties hospital managers should have policies in place to ensure that:

- the correct information is given to patients and their nearest relatives
- information is given in accordance with the requirements of the legislation, at a suitable time and in an accessible format, where appropriate with the aid of assistive technologies and interpretative and advocacy services
- people who give the information have received adequate and appropriate training and guidance and, if relevant, have specialist skills in relation to people with learning disability, autism and/or children and young people
- a record is kept of the information given, including how, when, where and by whom it was given, and an assessment made of how well the information was understood by the recipient
- regular checks are made that information has been properly given to each patient and understood by them, and
- information must be provided in a format and/or language that the individual understands (eg Braille, easy-read or Moon).

Information for informal hospital inpatients

4.46 Although the Act does not impose any duties to give information to informal patients, these patients should have their legal position and rights explained to them.

4.47 Informal patients should be provided with relevant information (eg about how to make a complaint and consent requirements for treatment).

4.48 Informal patients must be allowed to leave if they wish, unless they are to be detained under the Act. Both the patient and, where appropriate, their carer and advocate should be made aware of this right with information being provided in a format and language the patient understands. Local policies and arrangements about movement around the hospital and its grounds must be clearly explained to the patients concerned. Failure to do so could lead to a patient mistakenly believing that they are not allowed to leave hospital, which could result in an unlawful deprivation of their liberty and a breach of their human rights.
Information for those subject to guardianship

4.49 Responsible local authorities are required to take steps to ensure that guardianship patients understand their rights to apply to a Tribunal and the rights of their nearest relatives. The same information must also normally be given to nearest relatives. More generally, local authorities (and private guardians) should do what they can to ensure that patients understand why they are subject to guardianship and what it means for them.

Information about complaints or if the Act is not being applied appropriately

4.50 A patient and persons supporting them (eg a patient’s nearest relative, family, carer, advocate or legal representative), especially a patient lacking capacity, must be supported to make a complaint if they think the safeguards of the Act are not being appropriately applied or they have concerns about the care and treatment being provided.

4.51 Staff should be aware that it can be particularly difficult for patients and those supporting them to take forward complaints due to their mental ill-health and fear that this may impact on the quality of care and support they receive. All efforts must be made to support patients (especially those lacking capacity) and those supporting them to make complaints without any negative impact on the quality of care and support provided.

4.52 It is usually best for initial concerns to be raised locally. All providers should have clear complaints policies and procedures. Patients and those supporting them (including nearest relatives, family, carers and advocates) must be given information about how to make a complaint to the hospital. The information must be in formats that these individuals can understand.

4.53 Information about how to make a complaint to the service commissioner, CQC or Parliamentary and Health Ombudsmen should also be readily available.

4.54 CQC is likely to ask providers to detail the information provided to patients and those supporting them about how to make a complaint (see contact details below).

5 The nearest relative

Why read this chapter?

5.1 This chapter gives guidance on the identification, appointment and displacement of nearest relatives under the Act. The ‘nearest relative’ for the purposes of the Act may not be the same person as the patient’s ‘next of kin’. The chapter gives guidance on what to do if there is no nearest relative and displacement of nearest relatives and appointment of acting nearest relative by the County Court.

Identification of the nearest relative

5.2 Section 26 of the Act defines ‘relative’ and ‘nearest relative’ for the purposes of the Act. It is important to remember that the nearest relative for the purposes of the Act may not be the same person as the patient’s ‘next of kin’. The identity of the nearest relative may change with the passage of time – eg if the patient enters into a marriage or civil partnership (see paragraphs 4.56 – 4.65).

5.3 The Act includes additional provisions to identify the nearest relative of a child or young person. For example:

- if the child or young person is subject to a care order (or interim care order) under the Children Act 1989, the relevant local authority will be the nearest relative, save for where the young person is married or in a civil partnership, in which case their spouse or civil partner will be the nearest relative (section 27 of the Act)
- individuals who have been appointed as guardians (section 5 of the Children Act 1989) or special guardians (section 14A of the Children Act 1989) and those named on a residence order (section 8 of the Children Act 1989) will be the child or young person’s nearest relative (section 28 of the Act)
- unmarried fathers will only be treated as the child or young person’s ‘father’ for the purpose of section 26 of the Act if they have obtained ‘parental responsibility’. This may be acquired through a number of routes such as a parental responsibility agreement, subsequent marriage to the mother of the child or young person or by obtaining a residence order. As from 1st December 2003, unmarried fathers can acquire parental responsibility for their children born after this date by registering themselves as the father on their child’s birth certificate.

5.4 Patients remanded to hospital under sections 35 and 36 of the Act, subject to interim hospital orders under section 38 or subject to special restrictions under part 3 of the Act (restricted patients – see chapter 22) do not have nearest relatives (as defined by the Act).

---

9 The section 26(2) requirement of parental responsibility only applies to patients under 18 who are not born to parents who are married or in a civil partnership.
Delegation of nearest relative functions

5.5 A nearest relative is not obliged to act as such. They can authorise, in writing, another person to perform the functions of the nearest relative on their behalf. The procedure for doing this is set out in the Mental Health (Hospital, Guardianship and Treatment) (England) Regulations 2008.10

Where there is no nearest relative

5.6 Where an approved mental health professional (AMHP) discovers, when assessing a patient for possible detention or guardianship under the Act (or at any other time), that the patient appears to have no nearest relative, the AMHP should advise the patient of their right to apply to the County Court for the appointment of a person to act as their nearest relative. If the patient lacks capacity to decide to apply themselves, the AMHP should apply to the County Court.

Appointment of acting nearest relatives by the County Court

Grounds for displacement and appointment

5.7 An acting nearest relative can be appointed by the County Court on the grounds that:

- the nearest relative is incapable of acting as such because of illness or mental disorder
- the nearest relative has objected unreasonably to an application for admission for treatment or a guardianship application
- the nearest relative has exercised the power to discharge a patient without due regard to the welfare of the patient or the interests of the public
- the nearest relative is otherwise not a suitable person to act as such
- the patient has no nearest relative within the meaning of the Act, or it is not reasonably practicable to ascertain whether the patient has a nearest relative or who that nearest relative is.

5.8 The effect of a court order appointing an acting nearest relative is to displace the person who would otherwise be the patient’s nearest relative.

5.9 However, as an alternative to an order by the court, it may sometimes be enough for the actual nearest relative to delegate their role to someone else (see paragraph 5.16).

Who can make an application to the court?

5.10 An application to displace the nearest relative may be made by any of the following people:
- the patient (or if the patient lacks capacity, the patient’s litigation friend, who could be an advocate or carer)
- any relative of the patient
- anyone with whom the person is residing (or was residing prior to admission),
- an AMHP.

Applications to the court by AMHPs

5.11 AMHPs will need to consider making an application for displacement or appointment if:
- they believe that a patient should be detained in hospital under section 3 of the Act, or should become a guardianship patient, but the nearest relative objects, or
- they believe that the nearest relative is likely to discharge a patient from detention or guardianship unwisely.

5.12 They should also consider doing so if they think that:
- a patient has no identifiable nearest relative or their nearest relative is incapable of acting as such
- they have good reasons to think that a patient considers their nearest relative unsuitable and would like them to be replaced
- and it would not be reasonable in the circumstances to expect a patient, or anyone else, to make an application.

5.13 AMHPs should bear in mind that some patients may wish to apply to displace their nearest relative but may be deterred from doing so by the need to apply to the County Court.

5.14 It is entirely a matter for the court to decide what constitutes ‘suitability’ of a person to be a nearest relative. Factors which an AMHP might wish to consider when deciding whether to make an application to displace a nearest relative on those grounds, and when providing evidence in connection with an application, could include:
- any reason to think that the patient has suffered, or is suspected to have suffered, abuse at the hands of the nearest relative (or someone with whom the nearest relative is in a relationship), or is at risk of suffering such abuse
• whether the patient is afraid of the nearest relative or seriously distressed by the possibility of the nearest relative being involved in their life or their care, or
• whether the patient and nearest relative are unknown to each other, there is only a distant relationship, or their relationship has broken down irretrievably.

This is not an exhaustive list.

5.15 In all cases, the decision to make an application lies with the AMHP personally.

5.16 Before making an application for displacement, AMHPs should consider other ways of achieving the same end, including:
• whether the nearest relative will agree to delegate their role as the patient’s nearest relative to someone else
• providing or arranging support to the patient (or someone else) to make an application themselves. This could include support from an independent mental health advocate (IMHA) (see chapter 6).

5.17 All local authorities should provide clear practical guidance to help the AMHP decide whether to make an application and how to proceed. Before producing such guidance, local authorities should consult with the County Court. Local authorities should ensure that they have access to the necessary legal advice and support.

Making an application

5.18 People making an application to the County Court will need to provide the court with the facts that will help it make a decision on the application. Exactly what will be required will depend on the type of application and the specific circumstances of the case.

5.19 When applying to displace a nearest relative, AMHPs should nominate someone to become the acting nearest relative in the event that application is successful. Wherever practicable, they should first consult the patient about the patient’s own preferences and any concerns they have about the person the AMHP proposes to nominate. AMHPs should also seek the agreement of the proposed nominee prior to an application being made, although this is not a legal requirement.

5.20 Local authorities should provide clear practical guidance to help the AMHP decide whom it is appropriate to nominate when making an application to displace a nearest relative.
5.21 If the patient has any concerns that any information given to the court on their views on the suitability of the nearest relative may have implications for their own safety, an application can be made to the court seeking its permission not to make the current nearest relative a party to the proceedings. The reasons for the patient’s concerns should be set out clearly in the application.

5.22 Hospital managers should provide support to detained patients to enable them to attend the court, if they wish, subject to the patient being granted leave under section 17 for this purpose.

5.23 If, exceptionally, the court decides to interview the patient (as the applicant), the court has the discretion to decide where and how this interview takes place and whether it should take place in the presence of, or separate from, other parties. The patient must be fully supported in this, including through the use of an advocate to support them.

5.24 If the court decides that the nearest relative should be displaced and finds the proposed replacement to be suitable, and the person is willing to act as nearest relative, the court will appoint them.
6 Independent mental health advocates

Why read this chapter?

6.1 Independent mental health advocates (IMHAs) provide an additional safeguard for patients who are subject to the Act. They do not replace any other advocacy or support services and work in conjunction with other services. They help qualifying patients to obtain relevant information and to understand their position including their rights and aspects of their treatment.

This chapter explains the role of IMHAs under the Act and other people’s responsibilities in making a patient aware of the help that an IMHA provides.

Purpose of independent mental health advocate services

6.2 Independent mental health advocacy services provide an additional safeguard for patients who are subject to the Act. IMHAs are specialist advocates who are trained specifically to work within the framework of the Act and enable patients to participate in decision-making, for example, by encouraging patients to express their views and supporting them to communicate their views appropriately. They are commissioned by the relevant local authority as identified under the Act. IMHAs should be independent of any person who has been professionally involved in the patient’s medical treatment.

6.4 Independent mental health advocacy services do not replace any other advocacy and support services that are available to patients, such as independent mental capacity advocates (IMCAs) or representatives for patients who lack capacity, but are intended to operate in conjunction with those services.

---

11 See section 130C(4A) of the Act.
Patients who are eligible for independent mental health advocacy services (qualifying patients)

6.5 Patients are eligible for support from an IMHA, irrespective of their age, if they are:
   • detained under the Act
   • liable to be detained under the Act, even if not actually detained, including those who are currently on leave of absence from hospital or absent without leave, or those for whom an application or court order for admission has been completed (but not those listed in paragraph 6.6 below)
   • conditionally discharged restricted patients
   • subject to guardianship, or
   • patients subject to community treatment orders (CTOs).

6.6 For these purposes, detention does not include being detained:
   • on the basis of an emergency application (section 4) until the second medical recommendation is received (see chapter 15)
   • under the ‘holding powers’ in section 5 (see chapter 18), or
   • in a place of safety under section 135 or 136 (see chapter 16).

6.7 Other patients (‘informal patients’) are eligible if they are:
   • being considered for a treatment to which section 57 applies (‘a section 57 treatment’), or
   • under 18 and being considered for electro-convulsive therapy (ECT) or any other treatment to which section 58A applies (‘a section 58A treatment’) (see paragraphs 19.80 - 19.87).

6.8 The Act calls patients who are eligible for the support of an IMHA ‘qualifying patients’.
The role of independent mental health advocates

6.9 The Act says that the support which IMHAs provide must include helping patients to obtain information about and understand the following:

- their rights under the Act
- the rights which other people (eg the nearest relative – see chapter 5) has in relation to them under the Act
- the particular parts of the Act which apply to them (eg the basis on which they are detained) and which therefore make them eligible for advocacy
- any conditions or restrictions to which they are subject (eg as condition of leave of absence from hospital (see chapter 27), as a condition of a community treatment order (CTO) (see chapter 29), or as a condition of conditional discharge)
- any medical treatment that they are receiving or might be given
- the reasons for that treatment (or proposed treatment), and
- the legal authority for providing that treatment, and the safeguards and other requirements of the Act which would apply to that treatment.

6.10 The Act enables IMHAs to help patients to exercise their rights, which can include representing them and speaking on their behalf, eg by accompanying them to review meetings or hospital managers’ hearings. IMHAs may also support patients in a range of other ways to ensure they can participate in the decisions that are made about their care and treatment and by helping them to make applications to the Tribunal.

6.11 The involvement of an IMHA does not affect a patient’s right (nor the right of their nearest relative) to seek advice from a lawyer. Nor does it affect any entitlement to legal aid. IMHAs may, if appropriate, help the patient to exercise their rights by assisting patients to access legal advice and supporting patients at Tribunal hearings.

Duty to inform patients about the availability of independent mental health advocacy services

6.12 Certain people have a duty to take whatever steps are practicable to ensure that patients understand that help is available to them from IMHA services and how they can obtain that help, as set out in the following table. This must include giving the relevant information both orally and in writing.

6.13 If a patient lacks capacity to decide whether to seek help from an IMHA, an IMHA should be introduced to the patient so that the IMHA can explain what help they can offer.
6.14 The person responsible for taking steps identified in the table should be aware that certain patients within each of the patient ‘types’ may need particular encouragement and assistance to seek the support of an IMHA. This would include people who lack or only have limited capacity (where an IMHA should be introduced to the patient), have sensory impairments, are from minority ethnic communities, or are under 18.

6.15 The relevant person must also take whatever steps are practicable to give a copy of the written information to the patient’s nearest relative, unless the patient requests otherwise (and subject to the normal considerations about involving nearest relatives – see paragraphs 4.29 - 4.34).

6.16 However, any information about independent mental health advocacy services should make clear that the service is for patients and is not an advocacy service for nearest relatives themselves.

6.17 The duty to give information to nearest relatives does not apply to informal patients, nor to patients detained in hospital under part 3 of the Act (although it does apply to those patients if they subsequently become community patients).

---

**Duty to provide patients with information about advocacy services**

Seeking help from an independent mental health advocate

6.18 A qualifying patient may request the support of an IMHA at any time after they become a qualifying patient. Patients have the right to access the independent mental health advocacy service itself, rather than the services of a particular IMHA, though where possible it would normally be good practice for the same IMHA to remain involved while the person's case stays open.

6.19 IMHAs must also comply with any reasonable request to visit and interview a qualifying patient, if the request is made by the patient's nearest relative, an approved mental health professional (AMHP) or the patient's responsible clinician (if they have one).

6.20 AMHPs and responsible clinicians should consider requesting an IMHA to visit a qualifying patient if they think that the patient might benefit from an IMHA's visit but is unable, or unlikely, for whatever reason to request an IMHA's help themselves. If a patient lacks capacity to decide whether to seek help from an IMHA, an IMHA should be introduced to the patient.

6.21 Before requesting an IMHA to visit a patient, they should, wherever practicable, first discuss the idea with the patient, and give the patient the opportunity to decide for themselves whether to request an IMHA's help. AMHPs and responsible clinicians should not request an IMHA to visit where they know, or strongly suspect, that the patient does not want an IMHA's help, or the help of the particular IMHA in question.

6.22 Patients may refuse to be interviewed and do not have to accept help from an IMHA if they do not want it. Equally, a patient may choose to end the support they are receiving from an IMHA at any time.

Independent mental health advocates' access to patients and professionals

6.23 Patients should have access to a telephone on which they can contact the independent mental health advocacy service and talk to them in private.

6.24 Clinicians, hospital managers (and local authorities for guardianship patients) should ensure that IMHAs are able to:
  • access wards and units on which patients are resident
  • meet with the patients they are helping in private, whenever it is appropriate, and
  • attend meetings between patients and the professionals involved in their care and treatment when asked to do so by patients.
6.25 When instructed by a patient, the nearest relative, an AMHP or the responsible clinician, an IMHA has the right to meet the patient in private. IMHAs also have a right to visit and speak to any person who is currently professionally concerned with a patient’s medical treatment, for the purpose of helping the patient as their IMHA.

6.26 Professionals should remember that the normal rules on patient confidentiality apply to conversations with IMHAs, even when the conversation is at the patient’s request. IMHAs have a right of access to patients’ records in certain cases (see paragraphs 6.27 - 6.35), but otherwise professionals should be careful not to share confidential information with IMHAs, unless the patient has consented to the disclosure or the disclosure is justified on the normal grounds (see chapter 10).

Independent mental health advocates’ access to patients' records

6.27 Where the patient consents, IMHAs have a right to see any clinical or other records relating to the patient’s detention or treatment in any hospital, or relating to any after-care services provided to the patient. An IMHA has a similar right to see any records relating to the patient held by a local authority.

6.28 Where the patient does not have the capacity (or in the case of a child, the competence) to consent to an IMHA having access to their records, the holder of the records must allow the IMHA access if they think that it is appropriate and that the records in question are relevant to the help to be provided by the IMHA.

6.29 When an IMHA seeks access to the records of a patient who does not have the capacity or the competence to consent, the person who holds the records should ask the IMHA to explain what information they think is relevant to the help they are providing to the patient and why they think it is appropriate for them to be able to see that information.

6.30 The Act does not define any further what it means by access being appropriate, so the record holder needs to consider all the facts of the case. But the starting point should always be what is in the patient’s best interests and not (for example) what would be most convenient for the organisation which holds the records.

6.31 In deciding whether it is appropriate to allow the IMHA access, the holder of the records needs to consider whether disclosure of the confidential patient information contained in the records is justified.

6.32 The key consideration will therefore be whether the disclosure is in the patient’s best interests. That decision should be taken in accordance with the Mental Capacity Act 2005 (MCA) (or, for children under 16, the common law).
6.33 Record holders should start from a general presumption that it is likely to be in the patient’s interests to be represented by an IMHA who is knowledgeable about their case. But each decision must still be taken on its merits, and the record holder must, in particular, take into account what they know about the patient’s wishes and feelings, including any written statements made in advance. (For further information on taking decisions in the best interests of people who lack capacity to make the decision themselves, please see the Code of Practice to the MCA.)\(^{12}\)

6.34 Records must not be disclosed if that would conflict with a decision made on the patient’s behalf by the patient’s attorney or deputy, or by the Court of Protection.

6.35 If the record holder thinks that disclosing the confidential patient information in the records to the IMHA would be in the patient’s best interests, it is likely to be appropriate to allow the IMHA access to those records in all but the most exceptional cases.

7 Attorneys and deputies

Why read this chapter?

7.1 This chapter gives guidance on the effect of the Act on the powers of donees of lasting power of attorney (attorneys) and deputies appointees under the Mental Capacity Act 2005.

Attorney and deputies can take decisions in relation to the welfare, property or affairs of a person subject to the Act that they are otherwise authorised to take, subject to the exceptions outlined in this chapter.

Powers of attorneys and deputies

7.2 In general, the fact that a person is subject to the Act does not affect the validity of any lasting power of attorney (LPA), nor the scope of the authority of an attorney or deputy (or the Court of Protection) to make decisions on their behalf. Children and young people under 18 cannot create a lasting power of attorney or make an advanced decision.

7.3 Attorneys and deputies can take any decisions in relation to the welfare, property or affairs of a person subject to the Act that they are otherwise authorised to take, with two exceptions:

- they will not be able to consent on the patient’s behalf to treatment which is regulated by part 4 of the Act, including neurosurgery for mental disorder and other treatments under section 57 (see chapter 24), and

- they will not be able to take decisions about where a patient subject to guardianship is to live, nor take other decisions which conflict with decisions that a guardian has a legal right to make (see chapter 30).

7.4 Being subject to compulsory measures under the Act does not prevent people creating new LPAs under the MCA if they have the capacity to do so. Nor does it prevent the Court of Protection from appointing a deputy to take decisions for them which they lack the capacity to make themselves.

7.5 In certain cases, conditions can be imposed on patients subject to the Act in relation to leave of absence from hospital, community treatment orders (CTOs) or conditional discharge. If an attorney or deputy takes a decision on the patient’s behalf which goes against one of these conditions, the patient will be taken to have gone against the condition. In CTO and conditional discharge cases, this might result in the patient’s recall to hospital being considered.
7.6 Attorneys and deputies are able to exercise a patient’s rights under the Act on their behalf, if they have the relevant authority under the LPA or the order of the court appointing them and the patient concerned lacks the capacity to do so themselves. In particular, personal welfare attorneys and deputies may be able to exercise the patient’s various rights to apply to the Tribunal for discharge from detention, guardianship or a CTO.

7.7 It is good practice, where practicable, for clinicians and others involved in the assessment or treatment of patients under the Act to try to find out whether the person has an attorney or deputy and to establish effective means of communication to ensure that the attorney or deputy is informed and, where relevant, consulted about the patient’s care. Information regarding the appointment of any registered LPA, attorney or deputy can be obtained through a search of the registers maintained by the Office of the Public Guardian.13

Relationship between the powers of attorneys and deputies and the role of nearest relatives

7.8 The rights of the nearest relative are not affected because a patient has an attorney or deputy.

7.9 Attorneys and deputies may not exercise the rights of the nearest relative, unless they are themselves the nearest relative (because the rights belong to the nearest relative, not the patient).

7.10 There may sometimes be a disagreement between a nearest relative and an attorney or deputy (eg over whether the attorney or deputy should exercise the patient’s right to apply to the Tribunal, or whether the nearest relative should make a discharge order). If so, it may be helpful for the two to discuss the issue, perhaps with the assistance of one of the professionals involved in the patient’s case. Ultimately they have different roles, and each must act as they think best. Specifically, an attorney or deputy must act in accordance with their authority and in the patient’s best interests.

8 Privacy, safety and dignity

Why read this chapter?

8.1 This chapter deals with privacy, safety and dignity in hospitals where patients are detained under the Act, including access to telephones and other mobile computing devices, access to the internet, and the use of searches.

Privacy, safety and dignity are important constituents of a therapeutic environment and hospital staff should respect a patient’s privacy as far as possible, while maintaining safety. Patients should have every opportunity to maintain contact with family and friends by telephone, and hospitals should ensure they have policies for the use of mobile phones and computing devices.

Sleeping and bathroom areas should be segregated to protect the needs of patients of different genders and transgender patients. The nature of engagement with patients and of therapeutic environments and the structure and quality of life on a ward are important in encouraging patients to remain in the ward and minimising a culture of containment. It also includes guidance on conducting personal and other searches, enhanced security, physical security and blanket locked door policy.14

Respect for privacy

8.2 Article 8 of the European Convention on Human Rights (ECHR) requires public authorities to respect a person’s right to a private life. This includes people detained under the Act. Privacy, safety and dignity are important constituents of a therapeutic environment. Hospital staff should make conscious efforts to respect the privacy and dignity of patients as far as possible, while maintaining safety, including enabling a patient to wash and dress in private and to send and receive mail, including in electronic formats, without restriction. Respecting patients’ privacy encompasses the circumstances in which patients may meet or communicate with people of their choosing in private, including in their own rooms, and the protection of their private property.

Private telephone calls and e-mail and internet access

8.3 Hospitals must make every effort to support the patient in making and maintaining contact with family and friends by telephone and to enable such calls to be made with appropriate privacy. Most wards contain coin-operated and card-operated telephones. Hospital managers should ensure that patients can use them without being overheard. Installing booths or hoods around them may help to provide the necessary level of privacy. Some patients may need help to make a phone call, but this does not lessen their right to speak to people in private.

14 For patients in high security hospitals, this chapter should be read in conjunction with The High Security Psychiatric Services (Arrangements for Safety and Security) Directions 2013 and associated guidance.
The principle that should underpin hospital or ward policies on all telephone use is that detained patients are not, of course, free to leave the premises and that individual freedom to communicate with family and friends should be maintained as far as is possible. Any restrictions imposed should be the minimum necessary to ensure that this principle is adhered to.

Hospital managers must have a policy for the possession and use of mobile phones and mobile computing devices (such as laptops and tablets). These should be proportionate to risk and not seek to impose blanket restrictions on all patients.

When drawing up their policy on the use of mobile phones and mobile computing devices, hospital managers should bear in mind the following points:

• given that mobile phones and mobile computing devices provide a readily available means of communication with family and friends and are in widespread use, most detained patients are likely to have one. It is unlikely to be appropriate to impose a blanket ban on their use except in units specifically designed to provide enhanced levels of security in order to protect the public. Such a restriction may breach article 8

• different considerations will apply to different locations within the hospital. There may be valid reasons for banning or limiting the use of mobile phones or mobile computing devices in some parts of the premises to which detained patients have access or certain types of mobile phone or mobile computing device, eg because of a perceived risk of interference with medical and other electronic equipment which could adversely affect the health of patients or because of intrusion into the lives of other patients or of individuals in the community

• it is necessary to recognise that each patient has a right to expect a peaceful environment, and that constant interruptions from ringing telephones have a potentially anti-therapeutic effect

• it may be reasonable to require mobile phones and mobile computing devices to be switched off except where their use is permitted and to restrict their use to designated areas to which detained patients have access

• many mobile phones and mobile computing devices have cameras and give access to the internet. This creates a potential for the violation of the privacy and dignity of other patients, staff and visitors to the ward and may constitute a security risk. It would therefore be appropriate to stipulate the circumstances in which photographs and videos can be taken, eg only with specific permission from hospital staff and the patient/s involved

• the difficulty in identifying when camera functions are being used may be an additional reason for restricting the areas in which phones may be used

• it is important to ensure that the hospital’s policy on the use of mobile phones and mobile computing devices can be enforced effectively, eg it may be appropriate in certain circumstances to confiscate phones from patients who consistently refuse to comply with the rules
• any decision to prevent the use of cameras or to confiscate a mobile phone or and mobile computing devices should be fully documented and be subject to periodic review

• there should be rules on when staff and visitors can bring mobile phones and mobile computing devices into a secure setting

• the normal rules governing the use of the hospital’s power supply to charge mobile phones or mobile computing devices may need to be varied for detained patients (given the restrictions with which such patients are faced)

• staff must be fully informed of the hospital’s policy, and steps must be taken to communicate it to all patients, carers, families and visitors, eg by displaying it clearly in each unit and providing it in format and language that a patient can understand, and

• the policy will need to be reviewed regularly and updated, where necessary, in the light of experience. It is good practice to involve patients, former patients and their carers in drawing up the policy.

8.7 Managers should also develop guidance on access by patients to e-mail and internet facilities by means of the hospital’s IT infrastructure. This guidance should cover the availability of such facilities and rules prohibiting access to illegal or what would otherwise be considered inappropriate material. A blanket restriction on access to the internet could breach article 8 if it cannot be justified as necessary and proportionate. For further details about not applying blanket restrictions see paragraphs 8.43 – 8.48.

Private property

8.8 Hospitals should provide adequate storage in lockable facilities (with staff override) of the clothing and other personal possessions which patients may keep with them on the ward and for the secure central storage of anything of value or items which may pose a risk to the patient or to others, eg razors. Information about arrangements for storage should be easily accessible to patients on the ward. Hospitals should compile an inventory of what has been allowed and stored and give a copy to the patient. The inventory should be updated when necessary. Patients should always be able to access their private property on request if it is safe to do so.
Separate facilities for men and women

8.9 All sleeping and bathroom areas must be segregated, and members of one sex should not have to walk through an area occupied by another sex to reach toilets or bathrooms. Separate male and female-only toilets and bathrooms must be provided, as should separate day rooms. In particular, women in-patients should not be placed in mixed gender environments because of the increased risk of sexual and physical abuse and risk of trauma for women who have had prior experience of such abuse.

8.10 If in an emergency it is necessary to treat a patient in an environment intended for the opposite sex, senior management should be informed, steps should be taken to rectify the situation as soon as possible, and staff should protect the patient’s privacy and dignity against intrusions – particularly in sleeping accommodation, toilets and bathrooms. Consideration should be given to the particular needs of transgender patients.

Separate facilities for other reasons

8.11 Arrangements for the patient’s accommodation should also consider the patient’s history and personal circumstances, including:

- history of sexual or physical abuse and risks of trauma
- the particular needs of transgender patients
- cultural or religious preferences
- mothers and babies during and after pregnancy, or
- other health conditions (physical disabilities, learning disabilities or sensory impairments).

8.12 If in an emergency it is necessary to treat a patient in an environment that does not fully meet their needs then senior management should be informed, steps should be taken to rectify the situation as soon as possible, and staff should protect the patient’s privacy and dignity against intrusions – particularly in sleeping accommodation, toilets and bathrooms.

Personal and other searches

8.13 Hospital managers should ensure that there is an operational policy on searching patients detained under the Act, their belongings and surroundings and their visitors. When preparing the policy, hospital managers should consider the position of informal patients. The policy should be clearly displayed and communicated to patients in a format and language they understand.
8.14 The policy should be based on the following clear principles:

- the intention is to create and maintain a therapeutic environment in which treatment may take place and to ensure the security of the premises and the safety of patients, staff and the public
- the authority to conduct a search of a person or their property is controlled by law, and it is important that hospital staff are aware of whether they have legal authority to carry out any such search
- searching should be proportionate to the identified risk and should involve the minimum possible intrusion into the individual’s privacy, and
- all searches will be undertaken with due regard to and respect for the person’s dignity and privacy.

8.15 The policy may extend to the routine and random searching without cause of detained patients, if necessary without their consent, but only in exceptional circumstances. For example, such searches may be necessary if the nature of the patients detained in a particular unit tend to have dangerous or violent propensities which means they create a self-evident pressing need for additional security.

8.16 Patients, staff and visitors should be informed that there is a policy on searching. Information about searches should be provided in a variety of formats to meet patients’ and visitors’ needs and should be readily available.

**Conducting personal and other searches**

8.17 The consent of the person should always be sought before a personal search of them or a search of their possessions is attempted. If consent is given, the search should be carried out with regard to ensuring the maximum dignity and privacy of the person. Undertaking a personal search in a public area will only be justified in exceptional circumstances.

8.18 Consent obtained by means of a threat, intimidation or inducement is likely to render the search illegal. Any person who is to be searched personally or whose possessions are to be searched must be informed that they do not have to consent.

8.19 A person being searched or whose possessions are the subject of a search should be kept informed of what is happening and why. If they do not understand or are not fluent in English, the services of an interpreter should be sought, if practicable. The specific needs of people with impaired hearing or a learning disability and those of children and young people should be considered.

8.20 A personal search should be carried out by a member of the same sex, unless necessity dictates otherwise. The search should be carried out in a way that maintains the person’s privacy and dignity and respects issues of gender, culture
and faith. It is always advisable to have another member of the hospital staff present during a search, especially if it is not possible to conduct a same-sex search.

8.21 A comprehensive record of every search, including the reasons for it and details of any consequent risk assessment, should be made.

8.22 Staff involved in undertaking searches should receive appropriate instruction and refresher training.

8.23 In certain circumstances, it may be necessary to search a detained patient or their possessions without their consent.

8.24 If a detained patient refuses consent, their responsible clinician (or, failing that, another senior clinician with knowledge of the patient’s case) should be contacted without delay in the first instance, if practicable, so that any clinical objection to searching by force may be raised. The patient should be kept separated and under close observation, while being informed of what is happening and why, in terms appropriate to their understanding. This is particularly important for individuals who may lack capacity.\textsuperscript{15} Searches should not be delayed if there is reason to think that the person is in possession of anything that may pose an immediate risk to their own safety or that of anyone else.

8.25 If a search is considered necessary, despite the patient’s objections, and there is no clinical objection to one being conducted, the search should be carried out. If force has to be used, it should be the minimum necessary.

8.26 The policy should set out the steps to be taken to resolve any disagreement or dispute where there is a clinical objection to a search.

8.27 Where a patient physically resists being personally searched, physical intervention should normally only proceed on the basis of a multi-disciplinary assessment, unless it is urgently required. A post-incident review should follow every search undertaken where consent has been withheld.

8.28 There should be support for patients and for staff who are affected by the process of searching. This may be particularly necessary where a personal search has had to proceed without consent or has involved physical intervention (see paragraphs 8.24 – 8.27 and chapter 26 on use of physical interventions).

8.29 Where a patient’s belongings are removed during a search, the patient should be advised why they have been removed, given a receipt for them, told where the items will be stored and when they will be returned.

8.30 The exercise of powers of search should be audited regularly and the outcomes reported to the hospital managers.

\textsuperscript{15} Separation of a patient under close observation in order to await the arrival of the responsible clinician is different to seclusion (which is defined at paragraph 26.101).
Hospital accommodation offering conditions of enhanced security

8.31 There are some detained patients who may be liable to present a particular danger to themselves or to others and who therefore need to be accommodated in wards or units specifically designed to offer enhanced levels of physical security. For patients detained under part 3 of the Act, this may be a requirement of a court or of the Secretary of State for Justice, but in many cases the decision will lie primarily with the patient’s responsible clinician.

8.32 When considering whether patients should be placed in, moved to or remain in such a ward or unit, responsible clinicians should, in consultation with the multi-disciplinary team, ensure that:

- they have carefully weighed the patient’s individual circumstances and the degree of risk involved, and
- they have assessed the relative clinical considerations of placing the patient in an environment with enhanced physical security, in addition to or as opposed to providing care by way of intensive staffing.

8.33 Treatment in conditions of enhanced security should last for the minimum period necessary. Where responsible clinicians have taken the decision to transfer a patient within a hospital to a ward with enhanced security, they should ensure that arrangements are made to facilitate the patient’s prompt return to a less secure ward when that enhanced security is no longer required.

8.34 Where responsible clinicians believe that patients no longer require conditions of enhanced security (or the current level of security), they should take steps to arrange their transfer to more appropriate accommodation. Where necessary, this may involve identifying another hospital that is willing and able to offer the patient suitable accommodation.

8.35 In the case of restricted patients, it will be necessary to seek the consent of the Secretary of State for Justice for a transfer to another hospital or, where the patient’s detention is restricted to a particular unit, for a move within the same hospital.

8.36 Managers of hospitals offering accommodation with enhanced levels of security should ensure that:

- accommodation specifically designated for this purpose has adequate staffing levels, and
- written guidelines are drawn up, setting out the categories of patient for whom it is appropriate to use physically secure conditions and those for whom it is not appropriate.
Physical security in other hospital accommodation

8.37a Hospital managers will need to consider what arrangements should be put in place to protect the safety of patients who are not subject to enhanced security.

8.37b Patients admitted to acute wards, whether or not they are formally detained there, will have complex and specific needs. In such an environment, ward staff must balance competing priorities and interests when determining what safety measures are necessary. This should not amount to a blanket locked door policy (see paragraphs 8.43 – 8.48 below).

8.38 The intention should be to protect patients, in particular those who are at risk of suicide, self-harm, accidents or inflicting harm on others unless they are prevented from leaving the ward. Arrangements should also aim not to impose any unnecessary or disproportionate restrictions on patients or to make them feel as though they are subject to such restrictions. It may also be necessary to have in place arrangements for protecting patients and others from people whose mere presence on a ward may pose a risk to their health or safety.

8.39 It should be borne in mind that the nature of engagement with patients and of therapeutic interventions and the structure and quality of life on the ward are important factors in encouraging patients to remain in the ward and in minimising a culture of containment.

8.40 All patients must have regular access to outside space. Locking doors, placing staff on reception to control entry to particular areas, and the use of electronic swipe cards, electronic key fobs and other technological innovations of this sort are all methods that providers should consider to manage entry to and exit from clinical areas to ensure the safety of their patients and of others.

8.41 If providers are to manage entry to and exit from the ward effectively, they will need to have a policy for doing so. A written policy that sets out precisely what the ward arrangements are and how patients can exit from the ward, if they are legally free to leave, should be drawn up and given to all patients in the ward. The policy should be explained to patients on admission and to their visitors. In addition to producing the policy in English, providers may need to consider drawing it up in other languages if these are in common use in the local area.

8.42 If managing entry and exit by means of locked external doors (or other physical barriers) is considered to be an appropriate way to maintain safety, the practice adopted must be reviewed regularly to ensure that there are clear benefits for patients and that it is not being used for the convenience of staff. It is never acceptable to lock patients and others in clinical areas simply because of inadequate staffing levels. In conjunction with clinical staff, managers should regularly review and evaluate the mix of patients (there may, for example, be some patients who ought to be in a more secure environment), staffing levels and the skills mix and training needs of staff.
Blanket locked door policy

8.43 A blanket locked door policy which affects all patients in a hospital or on a ward could amount, depending on its implementation, to a restriction or a deprivation of liberty.

8.44 It is unlikely that there will be a deprivation of liberty if an informal patient, who has capacity and has consented to being admitted, is informed of the locked door policy and consents to being informally admitted and remaining on the ward under these conditions. The patient should be told who they can speak to if they wish to leave and must be able to leave at any time they wish to, unless they are being detained using the holding powers under section 5 of the Act (chapter 18) or an application for detention (chapters 14 and 15).

8.45 A patient’s article 8 rights should be protected by ensuring a locked door policy only imposes proportionate restrictions on their contact with family and friends which can be justified as being in the interests of the health and safety of the patient or others. The policy should conform to the ‘empowerment and participation’ principles in the Code.

8.46 Hospitals should not lock patients in clinical areas simply because of inadequate staffing levels. Local policies for locking clinical areas should be clearly displayed and explained to each patient on admission.

8.47 The safety of informal patients, who would be at risk of harm if they wandered out of a clinical environment at will, should be ensured by adequate staffing levels, positive therapeutic engagement and good observation, not simply by locking the doors of the unit or ward.

8.48 Services should consider how to reduce the negative psychological and behavioural effects of having locked doors, whether or not patients are formally detained.

9 Wishes expressed in advance

Why read this chapter?

9.1 This chapter gives guidance on statements by patients who are subject to compulsory measures under the Act about their preferences for what they would, or would not, like to happen if particular situations arise in future. Advance statements do not legally compel professionals to meet the patients stated preferences.

However, advance decisions to refuse treatment are legally binding. Such decisions must be recorded and documented. Advance decisions are concerned only with refusal of medical treatment and are made in advance by a person with the mental capacity to do so. The chapter details the circumstances when clinicians may lawfully treat a patient compulsorily under the Act.

Definitions

9.2 This chapter distinguishes between advance decisions to refuse medical treatment and other statements of views, wishes and feelings that patients make in advance.

9.3 An advance decision means a decision to refuse specified medical treatment made in advance by a person who has the mental capacity to do so. They are a way in which people can refuse medical treatment at a time in the future when they may lack the capacity to consent to or refuse that treatment.

9.4 Advance decisions are concerned only with refusal of medical treatment. Other advance expressions of views, wishes and feelings may be about preferred medical treatment or about any other aspect of a patient’s care, and may be about what the patient wants to happen as much as what they would prefer not to happen.

Advance decisions under the Mental Capacity Act

9.5 The Mental Capacity Act 2005 (MCA) says that people who have the capacity to do so, and who are at least 18 years old, may make an advance decision to refuse specified treatment which will have effect at a time when they no longer have capacity to refuse or consent to treatment. If a valid and applicable advance decision exists, it has the same effect as if the patient has capacity and makes a contemporaneous decision to refuse treatment.

9.6 Sometimes, the fact that a patient has made an advance decision refusing treatment for mental disorder will be one of the reasons why a decision is taken to detain them under the Act. That may be the only way to ensure they get the treatment they need.
9.7 In certain circumstances, described in chapter 24, the Act allows patients to be given medical treatment for their mental disorder without their consent and therefore even though they have made a valid and applicable advance decision to refuse the treatment. This only applies to patients who are detained under the Act and to patients on community treatment orders (CTOs). Except in emergencies, it only applies to patients subject to CTOs (‘community patients’) if they have been recalled to hospital by their responsible clinician.

9.8 Even where clinicians may lawfully treat a patient compulsorily under the Act, they should, where practicable, try to comply with the patient’s wishes as expressed in an advance decision. They should, for example, consider whether it is possible to use a different form of treatment not refused by the advance decision. If it is not, they should explain why to the patient.

9.9 Except where the Act means that they need not, clinicians must follow all other advance decisions made by their patients which they are satisfied are valid and applicable, even if the patients concerned are detained under the Act or on CTOs. By definition, this includes all valid and applicable advance decisions made by detained and community patients to refuse treatment which is not for mental disorder.

9.10 Clinicians should always start from the assumption that a person had the mental capacity at the time in question to make the advance decision. If a clinician is not satisfied that the person had capacity at the time they made the advance decision, or if there are genuine doubts about its validity or applicability, they can treat the person without fear of liability, so long as they comply with the other requirements of the MCA, including the requirement to act in the patient’s best interests.

9.11 For more information on what constitutes an advance decision (including specific additional requirements for the way advance decisions to refuse life-sustaining treatment must be documented), the effect they have and when they are valid and applicable, please refer to the MCA Code of Practice.16

Advance statements of wishes and feelings

9.12 There may be times when, because of their mental disorder, patients who are subject to compulsory measures under the Act are unable or unwilling to express their views, or participate as fully as they otherwise would, in decisions about their care or treatment under the Act. In such cases, patients’ past wishes and feelings – so far as they are known – take on a greater significance.

9.13a Individuals with mental health conditions should be able to express their views and preferences about their care and treatment. Some patients will deliberately state

their wishes in advance about a variety of issues, including their medical treatment, how families and carers should be involved, the steps that should be taken in emergencies and what should be done if particular situations occur. Such wishes should be given the same consideration as wishes expressed at any other time. Clinicians must consider advance statements when determining what is in the patient’s best interests if the patient subsequently loses capacity.

9.13b Encouraging patients to set out their wishes in advance is often a helpful therapeutic tool, encouraging collaboration and trust between patients and professionals. It is a way in which effective use can be made of patients’ expertise in the management of crises in their own conditions.

9.14 Whenever expressing a preference for their future treatment and care, patients should be encouraged to identify as precisely as possible the circumstances they have in mind. If they are saying that there are certain things that they do not want to happen – eg being given a particular type of treatment, or being restrained in a particular way – they should be encouraged to give their views on what should be done instead.

9.15 Patients should be made aware that expressing their preference for a particular form of treatment or care in advance like this does not legally compel professionals to meet that preference. However, professionals should make all practicable efforts to comply with these preferences and explain to patients why their preferences have not been followed.

9.16 Where patients express views to any of the professionals involved in their care about how they should be treated or ways they would not wish to be treated in future, the professional should record those views in the patient’s notes. If the views are provided in a written form, they should be kept with the patient’s notes.

9.17 Whether the patient or the professional records the patient’s views, steps should be taken, unless the patient objects, to ensure that the information:

- is drawn to the attention of other professionals who ought to know about it, and
- it is included in care plans and other documentation which will help ensure that the patient’s views are remembered and considered in situations where they are relevant in future.

9.18 Advance decisions to refuse treatment must be recorded and documented in the same way.

9.19 An advocate or carer should be invited to support a patient who may lack capacity to understand the wish they are expressing. If the professional to whom the wish is being expressed forms the opinion that the patient lacks capacity to understand this, the professional should record their opinion and their reasons for it, alongside the record of the patient’s wish.
9.20 The fact that a patient has expressed their wishes about a particular matter in the past is not a substitute for seeking their views on it when the situation actually arises, even if they are no longer in a position to think about their views as clearly as they did when they expressed their wishes previously. Everyone has the right to change their mind. In particular, where patients have the mental capacity to express a clear wish in the present, that wish should always be assumed to have overtaken their previous wishes, even if it is significantly different.

9.21 Where patients lack the capacity to formulate and express their views on an issue on which they have given their views in advance, the professional should record whether they make a decision under the Act which is contrary to those previously expressed views. They must record their reasons for the decision, just as they would if they were going against wishes that a patient was expressing in the present.

10 Confidentiality and information sharing

Why read this chapter?

10.1 This chapter deals with issues about confidentiality and information sharing which arise in connection with the Act.

The law on confidentiality is the same for patients subject to the Act as it is for any other patients, except where the Act says otherwise. Under the Act, there are some situations where confidential information about a patient is legally authorised to be disclosed, even if the patient does not consent. Guidance is given on the sharing of information by professionals and agencies to manage serious risks which certain patients pose to others.

General points

10.2 Except where the Act itself says otherwise, the law on confidentiality is the same for patients subject to the Act as it is for any other patients. The box below gives a brief summary of the most fundamental points of the general law. These points are relevant to patients of all ages, although there are some additional considerations in relation to children and young people (see chapter 19).

Confidentiality – a brief summary

There will be specific considerations for healthcare professionals such as doctors and nurses to whom the common law duty of confidentiality applies. The duty arises when one person discloses information to another in circumstances where it is reasonable to expect that the information will be held in confidence. Certain situations, such as discussions with a health professional or social worker, are generally presumed to be confidential.

However, there are circumstances in which it is both justifiable and important to share otherwise confidential patient information with people outside the immediate team treating a patient.

Before considering such disclosure of confidential patient information, the individual’s consent should normally be sought.

If a person lacks the capacity to consent to the disclosure, it may nonetheless be acceptable and appropriate to disclose the information in the person’s best interests. Healthcare professionals should use their professional judgement to determine what is in the patient’s best interest. This should include consultation with colleagues and take into account the patient’s previously expressed wishes and views.
Otherwise, confidential patient information should be disclosed outside the team only:

- with the patient’s consent (where the patient has capacity to consent)
- if there is a specific legal obligation or authority to do so, or
- where there is an overriding public interest in disclosing the information.

The ‘public interest’ is not the same as what might be of interest to the public. Where confidential patient information is involved, public interest justifications for overriding confidentiality could include (but are not limited to) protecting other people from serious harm and preventing serious crime.

The common law does not normally permit disclosure of confidential patient information solely in the patient’s own interests, if they have capacity to consent to the disclosure but refuse to do so.

A person’s right to have their privacy respected is protected by article 8 of the European Convention on Human Rights (ECHR). The disclosure of confidential information may be a breach of that right unless it is a necessary and proportionate response to the situation.

10.3 Information sharing between professionals can contribute to and support the care and treatment of patients and help to protect people from harm. This includes information sharing as part of the care programme approach (CPA) (or its equivalent) or the Welsh Measure (see paragraphs 34.22 – 34.25).

10.4 A range of public agencies is involved in the provision of services to patients who are subject to compulsory measures under the Act, including housing and social services. Patients must be consulted about what information it may be helpful to share with these services and when. Professionals should be clear about how the sharing of such information could benefit the patient or help to prevent serious harm to others and whether there are any potential negative consequences. Advocates and advice services can support patients in helping them decide what information should be shared.

10.5 Sharing information with carers and other people with a valid interest in the care and wellbeing of the patient can contribute to and support their care and treatment. Where patients have capacity to agree and are willing to do so, carers and other people with a valid interest should be given information about the patient’s progress to help them form and offer views about the patient’s care and provide effective care and support to the patient, especially if the individual is a community patient, subject to guardianship, or on leave. A patient’s agreement to such disclosure must be freely given. In the case of patients detained under part 3 of the Act, people with a valid interest may include victims and the families of victims (see chapter 40).
Disclosure of confidential patient information for the purposes of the Act

10.6 The Act creates a number of situations where confidential information about patients is legally authorised to be disclosed, even if the patient does not consent. These include:

- reports to the Tribunal when a patient’s case is to be considered
- reports to the Care Quality Commission (CQC) in relation to patients who have been treated on the basis of a certificate issued by a second opinion appointed doctor (SOAD), and
- reports to the Secretary of State for Justice on restricted patients.

10.7 The Act also gives certain people and bodies – including the CQC, SOADs and (in certain circumstances) independent mental health advocates (IMHAs) – the right to access records relating to patients.

10.8 In addition, where the Act allows steps to be taken in relation to patients without their consent, it is implicit that confidential patient information may be disclosed only to the extent that it is necessary to take those steps. For example, confidential patient information may be shared to the extent that it is necessary for:

- medical treatment which may be given without a patient’s consent under the Act
- safely and securely transport a patient to hospital (or anywhere else) under the Act
- finding and returning a patient who has absconded from legal custody or who is absent without leave, or
- transferring responsibility for a patient who is subject to the Act from one set of people to another (eg where a detained patient is to be transferred from one hospital to another, or where responsibility for a patient is to be transferred between England and another jurisdiction).

10.9 Even though information may be disclosed in these cases, it is still necessary for people proposing to disclose the information to be confident that it is necessary in the circumstances, that the aim of disclosure cannot reasonably be achieved without it, and that any breach of the patient’s confidentiality is a proportionate response given the purpose for which the disclosure is being considered. Care must also always be taken to ensure that any information disclosed is accurate.
Limitations on sharing information with carers, relatives and friends

10.10 Simply asking for information from carers, relatives, friends or other people about a patient without that patient’s consent need not involve any breach of confidentiality, provided the person requesting the information does not reveal any personal confidential information about the patient which the carer, relative, friend or other person being asked would not legitimately know anyway.

10.11 Apart from information which must be given to nearest relatives, the Act does not create any exceptions to the general law about disclosing confidential patient information to carers, relatives or friends.

10.12 Carers cannot be told a patient’s particular diagnosis or be given any other confidential personal information about the patient unless the patient consents or there is another basis on which to disclose it in accordance with the law. Carers, including young carers, should always be offered information which may help them understand the nature of mental disorder generally, the ways it is treated and the operation of the Act.

10.13 Carers, relatives, friends and other people have a right to expect that any personal information about themselves, or any information about the patient which they pass on to professionals in confidence, will be treated as confidential. Unless there is an overriding reason that makes it necessary and there is legal authority to do so, information they provide about patients should not be repeated to patients in a way that might reveal its source, unless the carer, relative, friend or other person was made aware that that could happen and had not objected to it.

Sharing information to manage risk

10.14 Although information may be disclosed only in line with the law, there is no reason in practice why patient confidentiality would make it impossible for professionals and agencies to share information needed to manage any serious risks which certain patients pose to other people.

10.15 Where the issue is the management of the risk of serious harm, the judgement required is normally a balance between the public interest in disclosure, including the need to prevent harm to others, and both the rights of the individual concerned and the public interest in maintaining trust in a confidential service.

10.16 Whether there is an overriding public interest in disclosing confidential patient information may vary according to the type of information. Even in cases where there is no overriding public interest in disclosing detailed clinical information about a patient’s state of health there may, nonetheless, be an overriding public interest in sharing more limited information about the patient’s current, and past, status under the Act, if that will help ensure properly informed risk management by the relevant authorities, families and carers.
Recording disclosure without consent

10.17 Any decision to disclose confidential information about patients – for any reason – should be fully documented. The relevant facts should be recorded, along with the reasons for the decision and the identity of all those involved in the decision-making. Reasons should be given by reference to the grounds on which the disclosure is to be justified.

Information for victims of crimes

10.18 As set out in chapter 40, the victims of certain mentally disordered offenders detained in hospital have rights to make representations and receive information about that patient’s discharge under the Domestic Violence, Crime and Victims Act 2004 (DVCV).17

10.19 In other circumstances, professionals should encourage (but may not require) mentally disordered offender patients to agree to share information that will enable victims and victims’ families to be informed about their progress. Among other benefits, disclosure of such information can sometimes serve to reduce the danger of harmful confrontations after a discharge of which victims were unaware.

10.20 Professionals should be ready to discuss with patients the benefits of enabling some information to be given by professionals to victims, within the spirit of the Code of Practice for Victims of Crime issued under the DVCV.18

11 Visiting patients in hospital

Why read this chapter?

11.1 This chapter covers visiting patients in hospital and those circumstances where it may be necessary to consider the exclusion of visitors. It includes particular considerations for child visitors and how far an individual should be placed from their family and/or local community.

All patients have a right to maintain contact with family and friends and to be visited, subject to carefully limited exceptions. The Act gives certain people the right to visit patients in private and arrangements must be in place to enable this to happen. Hospital managers have the right, under certain circumstances to restrict or refuse visitors, or require them to leave.

All hospitals should have written policies and procedures concerning the arrangements for children and young people who visit patients and for visits to patients who are children or young people.19

Arrangements for visits to patients

11.2 All patients have the right to maintain contact with, and be visited by, anyone they wish to see, subject to carefully limited exceptions. The value of visits in maintaining links with family and community networks is recognised as a key element in a patient’s care, treatment and recovery. Article 8 of the European Convention on Human Rights (ECHR) protects the right to a family life. In particular, every effort should be made to support parents to support their children. Patients should be able to see all their visitors in private, including in their own bedroom if the patient wishes.

11.3 Visits should be encouraged and made as comfortable and easy as possible for the visitor and the patient. Reasonable and flexible visiting times, access to refreshment and pleasant surroundings will all contribute to a sense of respect for the patient’s entitlement to be visited.

11.4 In addition to visits, every effort should be made to assist the patient, where appropriate, to maintain contact with relatives, friends and advocates in other ways. It is therefore good practice for patients to be placed in a hospital as close as reasonably practicable to their families, and patients should have readily accessible and appropriate daytime telephone and internet facilities (see chapter 8).

---

People with a right to visit patients

11.5 The Act gives certain people the right to visit patients in private if they wish. This includes second opinion appointed doctors (SOADs), independent doctors or approved clinicians appointed to examine the patient in relation to an application or reference to the Tribunal, people visiting on behalf of the Care Quality Commission (CQC), and independent mental health advocates (IMHAs). These people should be given access to all areas where the patient lives or has access themselves.

11.6 Hospital managers must ensure that such visits can take place in private, if that is what the person concerned wants.

11.7 If there are particular concerns for the security of the visitor, they should be discussed with the visitor with a view to agreeing suitable security arrangements.

11.8 Hospital managers should also ensure that patients can communicate with their legal representatives in private, and should facilitate visits by those representatives when they request them.

Exclusion or restriction of visitors

11.9 There are circumstances where hospital managers may restrict visitors, refuse them entry or require them to leave. Managers should have a policy on the circumstances in which visits to patients may be restricted, to which both clinical staff and patients may refer, which should be clearly displayed on the ward.

11.10 There are two principal grounds which could justify the restriction or exclusion of a visitor: clinical grounds and security grounds.

11.11 The decision to prohibit a visit by any person whom the patient has requested to visit or has agreed to see should be regarded as a serious interference with the rights of the patient and a blanket restriction may be considered a breach of their article 8 rights. There may be circumstances when a visitor has to be excluded, but these instances should be exceptional and any decision should be taken only after other means to deal with the problem have been considered and (where appropriate) tried. Any such decision should be fully documented and include the reasons for the exclusion, and it should be made available for independent scrutiny by the CQC or service commissioner, and explained to the patient. Hospital managers should review the effect on the patient of any decision to restrict visits. These policies should be risk-based and not impose blanket restrictions, eg no visitors for the first four weeks after admission.
Restriction or exclusion on clinical grounds

11.12 From time to time, the patient’s responsible clinician may decide, after assessment and discussion with the multi-disciplinary team, that some visits could be detrimental to the safety or wellbeing of the patient, the visitor, other patients or staff on the ward. In these circumstances, the responsible clinician may make special arrangements for the visit, impose reasonable conditions or if necessary exclude the visitor. In any of these cases, the reasons for the restriction should be recorded and explained to the patient and the visitor, both orally and in writing (subject to the normal considerations of patient confidentiality). Wherever possible, 24 hours’ notice should be given of this decision.

Restriction on security grounds

11.13 The behaviour of a particular visitor may be disruptive, or may have been disruptive in the past, to the degree that exclusion from the hospital is necessary as a last resort. Examples of such behaviour include:

• incitement to abscond
• smuggling of illicit drugs or alcohol into the hospital or unit
• transfer of potential weapons
• unacceptable aggression, and
• attempts by members of the media to gain unauthorised access.

11.14 A decision to exclude a visitor on the grounds of their behaviour should be fully documented and explained to the patient orally and in writing. Where possible and appropriate, the reason for the decision should be communicated to the person being excluded (subject to the normal considerations of patient confidentiality and any overriding security concerns).

Monitoring by hospital managers

11.15 Hospital managers should regularly monitor the exclusion from the hospital of visitors to detained patients.

11.16 Restricting visitors to informal patients who lack capacity to decide whether to remain in hospital could amount to or contribute to an unlawful deprivation of liberty or a breach of the individual’s human rights. It may indicate that a deprivation of liberty (DoL) authorisation or DoL order under the deprivation of liberty safeguards of the Mental Capacity Act (MCA) may need to be sought, or formal admission under the Act (see chapter 13).
**Children and young people**

11.17 All hospitals should have written policies and procedures regarding the arrangements for children and young people who visit patients in hospital and for visits to patients who are children or young people. Policies should be drawn up in consultation with local authorities and local safeguarding children boards.\(^2\)

11.18 Local policies should ensure that the best interests and safety of the children and young people concerned are always considered and that visits by children and young people are not allowed if they are not in their best interests. Within that overarching framework, hospitals should do all they can to facilitate the maintenance of children and young people’s contact with friends and family and offer privacy within which that can happen.

11.19 Information about visiting should be explained to children and young people in a way that they are able to understand. Environments that are friendly to children and young people should be provided.

11.20 Where a child or young person is being detained, it should not be assumed, because of their age, that they would welcome all visitors, and, like adults, their views should be sought.

---

\(^2\) The Secretary of State for Health has issued directions which set out more detailed restrictions on the visits by children to patients in the high security psychiatric hospitals. Refer to The High Security Psychiatric Services (Arrangements for Visits by Children) Directions 2013 and the guidance re-issued [https://www.gov.uk/government/publications/high-security-psychiatric-services-directions](https://www.gov.uk/government/publications/high-security-psychiatric-services-directions).
12 The Tribunal

Why read this chapter?

12.1 This chapter provides guidance on the role of the Tribunal and related duties on hospital managers and others.

The Tribunal is an independent judicial body which reviews cases of detained and conditionally discharged patients and patients subject to community treatment orders under the Act. Hospital managers and the local authority have a duty to ensure that patients understand their rights to apply for a Tribunal hearing. Managers have duties to refer patients to the Tribunal. Guidance is given about the reports to be prepared for the Tribunal, medical examinations, withdrawing an application, and representation.\(^{21}\)

Purpose of the Tribunal

12.2 The First Tier Tribunal (Mental Health) (‘the Tribunal’) is an independent judicial body. Its main purpose is to review the cases of detained and conditionally discharged patients and patients subject to community treatment orders (CTOs) under the Act (‘community patients’) and to direct the discharge of any patients where it thinks it appropriate. It also considers applications for discharge from guardianship.

12.3 The Tribunal provides a significant safeguard for patients who have had their liberty curtailed under the Act. Those giving evidence at hearings should do what they can to help enable tribunal hearings to be conducted in a professional manner, which includes having regard to the patient’s wishes and feelings and medical condition and ensuring that the patient feels as comfortable as possible with the proceedings.

12.4 It is for those who believe that a patient should continue to be detained or remain a community patient to prove their case, not for the patient to disprove it. They will therefore need to present the Tribunal with sufficient evidence to support continuing liability to detention or a CTO. Clinical and social reports form the backbone of this evidence. Care should be given to ensure that all information is as up-to-date as possible to avoid adjournment. In order to support the Tribunal in making its decision, all information should be clear and concise.

\(^{21}\) The First-tier Tribunal established under the Tribunals, Courts and Enforcement Act 2007. There is a right of appeal, on a point of law, from that Tribunal to the Upper Tribunal.
Informing the patient and nearest relative of rights to apply to the Tribunal

12.5 Hospital managers and the local authority are under a duty to take steps to ensure that patients understand their rights to apply for a Tribunal hearing. Hospital managers and the local authority should also advise patients of their entitlement to free legal advice and representation. They should do both whenever:

- patients are first detained in hospital, received into guardianship or discharged onto a CTO
- whenever their detention or guardianship is renewed or CTO is extended, and
- whenever their status under the Act changes – eg if they move from detention under section 2 to detention under section 3 or if their CTO is revoked.

12.6 Unless the patient requests otherwise and the patient should be asked, the information should normally also be given to their nearest relative (subject to the normal considerations about involving nearest relatives – see chapter 5).

12.7 Hospital managers and professionals should enable detained patients to be visited by their legal representatives at any reasonable time. This is particularly important where visits are necessary to discuss a Tribunal application. Where the patient consents, legal representatives and independent doctors should be given prompt access to the patient’s medical records. Delays in providing access can hold up Tribunal proceedings and should be avoided.

12.8 In connection with an application (or a reference) to a Tribunal, an independent doctor or approved clinician authorised by (or on behalf of) a patient has a right to visit and examine the patient in private (see paragraph 12.23). Those doctors and approved clinicians also have a right to inspect any records relating to the patient’s detention, treatment and (where relevant) after-care under section 117. Where nearest relatives have a right to apply to the Tribunal, they too may authorise independent doctors or approved clinicians in the same way. The patient’s consent is not required for authorised doctors or approved clinicians to see their records, and they should be given prompt access to the records they wish to see.

Hospital managers’ duty to refer cases to the Tribunal

12.9 The hospital managers have various duties to refer patients to the Tribunal (see paragraphs 37.36 – 37.40). They may also request the Secretary of State to refer a patient, and there are certain circumstances where they should always consider doing so (see paragraphs 37.41 – 37.43 and the section on Tribunals paragraph 19.106 – 19.109 in chapter 19 for guidance relating to children and young people).
Reports – general

12.10 Responsible authorities (ie the managers of the relevant hospital or the local authority responsible for a guardianship patient) should be familiar with the Tribunal’s rules and procedures. The rules place a statutory duty on the responsible authority to provide the Tribunal with a statement of relevant facts together with certain reports.

12.11 It is important that documents and information are provided in accordance with the Tribunal’s rules and procedures in good time for any Tribunal hearing. Missing, out-of-date or inadequate reports can lead to adjournments or unnecessarily long hearings. Where responsible clinicians, social workers or other professionals are required to provide reports, they should do this promptly and within the statutory timescale.

12.12 In the case of a restricted patient, if the opinion of the responsible clinician or other professional changes from what was recorded in the original Tribunal report(s), it is vital that this is communicated in writing as soon as possible, prior to the hearing, to the Tribunal office and the Mental Health Unit of the Ministry of Justice to allow them the opportunity to prepare a supplementary statement. Information about the Tribunal can be found at https://www.gov.uk/mental-health-tribunal

12.13 If a Tribunal panel feels that it needs more information on any report, it may request it, either in the form of a supplementary report or by questioning a witness at the hearing itself if the witness or their representative judge that it would not be detrimental to their health or wellbeing.

12.14 In some circumstances, the Tribunal will not sit immediately after receiving the report. In these cases, the report writers should consider whether anything in the patient’s circumstances have changed and should produce a concise update to the report. This is especially important if the patient’s status changes – eg if a patient becomes a community patient or moves from detention under section 2 to section 3.

12.15 In those cases, the application will need to be considered under the new circumstances of the case, and the report will need to provide a justification for continued detention or liability to recall under the new circumstances. The Tribunal may ask the author of the reports to talk through their report, so it is good practice for the authors to re-familiarise themselves with the content of any report before the hearing. If the author of the report is unable to attend, it is important that anyone attending in their place should wherever possible also have a good knowledge of the patient’s case.

---

22 Information about the Tribunal can be found at https://www.gov.uk/mental-health-tribunal
12.16 Hospital managers (or local authorities in guardianship cases) should ensure that the Tribunal is notified immediately of any events or changes that might have a bearing on Tribunal proceedings – eg where a patient is discharged or one of the parties is unavailable.

12.17 If the author of a report prepared for the Tribunal is aware of information they do not think the patient should see, they should follow the Tribunal’s procedure for the submission of such information. Ultimately, it is for the Tribunal to decide what should be disclosed to the patient.

12.18 Reports should be sent to the Tribunal office, preferably by secure e-mail, otherwise by post.

12.19 The responsible authority must ensure that up-to-date reports prepared specifically for the Tribunal are provided in accordance with the Tribunal’s rules and procedures. In practice, this will normally include a report completed by the patient’s responsible clinician.

12.20 A child or a young person may be admitted to an adult ward in exceptional circumstances only. A child or a young person may be admitted to an adult ward in exceptional circumstances only (see paragraph 19.100).

12.21 Where possible, reports should be written by the professionals with the best overall knowledge of the patient’s situation.

12.22 The reports should be submitted in good time to enable all parties, including the Secretary of State in restricted cases, to fulfil their responsibilities.

Medical examination

12.23 In certain categories of case, a medical member of the Tribunal may be asked to examine the patient, sometime before the hearing. Hospital managers must ensure that the medical member can see patients who are in hospital in private, where this is safe and practicable, and make provision for the member and the tribunal panel at the hearing to be able to examine the patient’s medical records, if necessary. It is important that the patient is told of any visit in advance, so that they can be available when the medical member visits.

Withdrawing the application

12.24 A request to withdraw an application may be made by the applicant in accordance with the Tribunal rules. The Tribunal is not bound to agree, especially if the withdrawal is merely tactical or is sought within 48 hours of the hearing. The applicant may not withdraw a reference made by hospital managers or the Secretary of State.
12.25 An application will be considered to be withdrawn if the patient is discharged. If this happens outside office hours, someone acting on behalf of the hospital managers (or the local authority, if it is a guardianship case) should contact the Tribunal office as soon as possible, to inform them. For detained patients, this could be done by a member of the ward staff.

**Representation**

12.26 Hospital managers (or local authorities, as the case may be) should inform patients of their right to present their own case to the Tribunal and their right to be represented by someone else (whether legally qualified or not) and of any free legal advice and representation available. Staff should be available to help patients make an application and prepare them for the tribunal. This is especially important for community patients who may not have daily contact with professionals.

12.27 If a patient has not appointed a representative and they do not wish to present their own case, or the patient lacks capacity and the Tribunal considers it is in the patient’s best interests to be represented, then the Tribunal can appoint a person before the hearing, or permit a person who has accompanied the patient to the hearing, to be a representative for the patient. A patient’s family member, carer or advocate could be their representative.

**The hearing**

**Attendance at hearings**

12.28 Normally patients will be present throughout hearings. Patients, their family and carers do not need to attend the Tribunal hearing, but professionals should encourage and support them to attend unless they judge that it would be detrimental to the patient’s health or wellbeing.

12.29 However a family member, carer or advocate will only be able to present the patient’s case if they are appointed, or given permission, by the Tribunal as a representative under the Tribunal’s procedural rules (see paragraph 12.27 above). If the patient is not well enough to attend the hearing or speak on their own behalf then an advocate or carer should be given the opportunity to attend and speak on their behalf.

12.30 It is important that the patient’s responsible clinician/s attend the Tribunal, supported by other staff involved in the patient’s care, where appropriate, as their evidence is crucial for making the case for a patient’s continued detention or CTO under the Act. Wherever possible the responsible clinician, and other relevant staff, should attend for the full hearing so that they are aware of all the evidence made available to the Tribunal and the Tribunal’s decision and reasons.
12.31 Responsible clinicians can attend the hearing solely as a witness or as the nominated representative of the responsible authority. As a representative of the responsible authority, the responsible clinician has the ability to call and cross-examine witnesses and to make submissions to the Tribunal. However, this may not always be desirable where it is envisaged that the responsible clinician will have to continue working closely with a patient.

12.32 Responsible authorities should therefore consider whether they want to send an additional person to represent their interests, allowing the responsible clinician to appear solely as a witness. Responsible clinicians should be clear in what capacity they are attending the Tribunal, as they may well be asked this by the panel.

12.33 It is important that other people who prepare reports submitted by the responsible authority attend the hearing to provide further up-to-date information about the patient, including (where relevant) their home circumstances and the aftercare available in the event of a decision to discharge the patient.

12.34 Increasingly, Tribunal hearings find it helpful to speak to a nurse, particularly a nurse who knows the patient. It is often helpful for a nurse who knows the patient to accompany them to the hearing.

12.35 Hospital managers should ensure that all professionals who attend Tribunal hearings are adequately prepared. They should seek to provide patients and their carers with sufficient information to understand the nature of the matters the Tribunal is considering in a format and language that patients and their carers understand. This could include pictorial or video formats outlining what the patient can expect.

**Accommodation for hearings**

12.36 The managers of a hospital in which a Tribunal hearing is to be held should provide suitable accommodation for that purpose. The hearing room should be private, quiet, clean and adequately sized and furnished. It should not contain confidential information about other patients. If the room is used for other purposes, care should be taken to ensure that any equipment (such as a video camera or a two-way mirror) would not have a disturbing effect on the patient.

12.37 The patient should have access to a separate room in which to hold any private discussions that are necessary – eg with their representative – as should the Tribunal members, so that they can discuss their decision.

12.38 Where a patient is being treated in the community, the hospital managers should consider whether a hospital venue is appropriate. They may wish to discuss alternatives with the Tribunal office.
Interpretation

12.39 It is important that patients and their representatives are able to understand and participate in the Tribunal hearing. This includes providing information in formats that they understand and if required providing interpretation services free of charge, including sign language. Hospital managers and local authorities should inform the Tribunal well in advance if they think any such services might be necessary.

Communication of the decision

12.40 The Tribunal will normally communicate its decision to all parties orally at the end of the hearing. Provided it is feasible to do so, and the patient wishes it, the Tribunal will speak to them personally. Otherwise, the decision will be given to the patient’s representative (if they have one). If the patient is unrepresented, and it is not feasible to discuss matters with them after the hearing, the hospital managers or local authority should ensure that they are told the decision as soon as possible. All parties to the hearing should receive a written copy of the reasons for the decision.

Complaints

12.41 Complaints from users about the Tribunal should be sent to the Tribunal offices. The Tribunal has procedures in places to deal with complaints promptly. This information is available by going to https://www.gov.uk/mental-health-tribunal.

Further information on the Tribunal

12.42 The Tribunal itself publishes further information and guidance about its procedures and operations.

Chapter 15 Emergency applications for detention
Chapter 16 Police powers and places of safety
Chapter 17 Transport of patients
Chapter 18 Holding powers
13 Mental capacity and deprivation of liberty

Why read this chapter?

13.1 A sound understanding and application of the principles and provisions of the Mental Capacity Act (MCA) and the Deprivation of Liberty Safeguards (DoLS), and of the common law relating to consent, is essential to enable decision-makers to fulfill their legal responsibilities and to safeguard their patients’ rights under the European Convention on Human Rights (ECHR).

Practitioners must be able to identify the legal framework that governs a patient’s assessment and treatment and authorise any appropriate deprivation of a patient’s liberty. The legal framework is not static and may change as the patient’s circumstances and needs change.

This chapter provides guidance for practitioners on the tools to determine whether the Mental Health Act 1983 or the MCA (including the DoLS) should be used, including when Article 5 rights (to liberty and security of person) are engaged.

13.2 This chapter:

• describes the MCA and its definition of ‘lack of capacity’
• describes the acts that can be performed under the MCA
• describes the matters to be considered when seeking a deprivation of liberty authorisation (DoL authorisation) under the Deprivation of Liberty Safeguards (DoLS) in the MCA; and explains the power of the Court of Protection under the MCA to grant a welfare order that authorises a deprivation of liberty (DoL order)
• provides guidance for determining whether a patient should be detained under the Act or under a DoL authorisation/DoL order
• through a case study, demonstrates decision-making in a complex situation concerning the interface between the Act and the DoLS.

13.3 This chapter should be read in close reference to other chapters in this Code, particularly:

• Children and young people (chapter 19)
• Applications for detention in hospital (chapter 14)
• Guardianship (chapter 30)
• Wishes expressed in advance (chapter 9)
13.4 And further detailed information can be found in:
- Mental Capacity Act 2005 Code of Practice
- Deprivation of Liberty Safeguards: code of practice to supplement the main Mental Capacity Act 2005 Code of Practice (DoLS Code of Practice)
- Department of Health Guidance on Consent

13.5 The DoL authorisation can only be made in respect of an individual aged 18 or over. A DoL order can be made by the Court of Protection in respect of individuals aged 16 or over and the remainder of the MCA applies to individuals aged 16 and over. Further guidance on the admission and treatment of children and young people is provided in chapter 19.

The Mental Capacity Act 2005 and the definition of ‘lack of capacity’

What is the Mental Capacity Act 2005 (MCA)?

13.6 The MCA provides the legal framework for acting and making decisions on behalf of individuals who lack capacity to make particular decisions for themselves, including decisions about care and treatment. It both empowers and protects individuals who lack capacity.

13.7 The MCA applies to thousands of people at any one time, and potentially to all adults at some point in their lives. It should be central to the approach professionals take to patients lacking capacity in all health (including psychiatric and general hospitals) and care settings.

13.8 The starting point should always be that the MCA should be applied wherever possible to patients detained under the Act who lack capacity. However in some situations the provision of treatment under the Act will limit the operation of aspects of the MCA. For example, if a patient’s treatment is being regulated by part 4 of the Act (chapters 24 and 25), then the MCA cannot in general be used to authorise medical treatment for mental disorder. Further, for such a patient, any advance decision by them under the MCA to refuse proposed medical treatment or any decision by their attorney under the MCA to refuse consent to proposed medical treatment cannot prevent medical treatment for mental disorder being given under sections 58 and 63 of the Act.

13.9 At the heart of the MCA are five statutory principles which apply to any act done for, or any decision made on behalf of, an individual who lacks capacity, including those who have mental health needs.

Five fundamental principles (section 1 of the MCA)

Principle one
A person must be assumed to have capacity unless it is established that they lack capacity.

Principle two
A person is not to be treated as unable to make a decision unless all practicable steps to help them to do so have been taken without success.

Principle three
A person is not to be treated as unable to make a decision merely because they make an unwise decision.

Principle four
An act done, or decision made, on behalf of a person who lacks capacity, must be done, or made, in their best interests.

Principle five
Before the act is done, or the decision is made, regard must be had to whether the purpose for which it is needed can be as effectively achieved in a way that is less restrictive of the person’s rights and freedom of action.

13.10 It is important for professionals to be aware that individuals with a mental disorder, including those liable to be detained under the Act, do not necessarily lack capacity. The presumption should always be that a patient subject to the Act has capacity, unless it is established otherwise in accordance with the MCA.

13.11 Healthcare providers have a legal duty to care for and treat patients who lack capacity in accordance with the MCA, when it applies. Failure to do so could result in enforcement action being taken by the Care Quality Commission (CQC).

How does the MCA define ‘lack of capacity’?

13.12 A person lacks capacity in relation to a matter if, at the material time, the person is unable to make a decision for themselves in relation to the matter because of an impairment of, or a disturbance in the functioning of, the mind or brain.
13.13 A person is ‘unable to make a decision’ for themselves if they are unable to:
- understand information which is relevant to the decision to be made
- retain that information in their mind
- use or weigh that information as part of the decision-making process, or
- communicate their decision (whether by talking, sign language or any other means).

13.14 As capacity relates to specific matters and because it can change over time, capacity should be reassessed as appropriate over time and for specific treatment decisions. The Act decision-makers should note that the MCA test of capacity should be used whenever assessing a patient’s capacity to consent for the purposes of the Act (including, for instance, under section 58 of the Act – see chapter 25).

Care planning

13.15 The five principles in section 1 of the MCA form a vital part of developing a patient’s care plan and should be integral to this process.

13.16 Professionals should seek to involve those who lack capacity in decisions about their care as much as they would involve those who have capacity. Care plans (see also chapter 34) should be developed in collaboration with the patient. Where professionals and patients disagree over elements of the care plan the emphasis should be on discussion and compromise. Restrictions (including restraint) and the deprivation of liberty should only be considered when absolutely necessary and when all appropriate efforts at building consensus and agreement have failed.

Acts that can be performed under the MCA

13.17 The MCA recognises that situations will occur when carers, and healthcare/social care staff will need to make decisions on behalf of patients who lack capacity to consent to care or treatment (whether for mental and/or physical conditions).

13.18 The Act does not regulate the treatment of physical conditions that are unrelated to mental disorders. The MCA applies to acts performed in the care or treatment of mental disorders and/or physical conditions.

13.19 The MCA permits certain acts of restraint, provided those acts are reasonably believed to be in the best interests of the patient. In this context restraint means using or threatening to use force to make a person do something they are resisting, or may resist, or restricting the person’s liberty of movement, whether or not the person resists.
13.20 In considering the use of restraint, decision-makers must carefully take into account the need to respect a patient’s liberty and autonomy. Section 6 of the MCA states that, in addition to needing to be in the best interests of the person who lacks capacity in the relevant respect, acts of restraint will only be permitted if:

13.20.1 the person taking action reasonably believes that restraint is necessary to prevent harm to the person who lacks capacity, and

13.20.2 the amount or type of restraint used and the amount of time it lasts is a proportionate response to the likelihood and seriousness of that harm.

13.21 However, sections 5 and 6 of the MCA cannot be relied on by themselves if the overall care package, including any proposed measures of restraint and/or proposed restrictions on movement, will give rise to a ‘deprivation of liberty’. A deprivation of liberty will engage article 5 rights and must be specifically authorised under the MCA by a DoL authorisation/DoL order, or otherwise made lawful by way of detention under the Act. Note however that if a potential deprivation of liberty is identified, the first step should always be to review the care plan to see if a less restrictive approach could be taken that would prevent that deprivation of liberty from arising.

Treatment for physical conditions of patients detained under the Act

13.22 The fact that an individual is being assessed or treated for a mental disorder does not mean that they lack capacity. The presumption should always be that a patient subject to the Act has capacity unless it is established otherwise in accordance with the MCA.

13.23 The Act regulates medical treatment of mental disorder for patients who are liable to be detained under the Act. This may include treatment of physical conditions but only to the extent that such treatment is part of, or ancillary to, treatment for mental disorder.

13.24 Where patients liable to be detained under the Act have a physical disorder unrelated to their mental disorder, then consent to treat this physical disorder should be sought. If the patient does not have the capacity to consent, treatment can be provided under the MCA provided it is in their best interests.

13.25 If a patient, liable to be detained under the Act has a physical disorder which has psychiatric symptoms or manifestations (eg a severe infection resulting in hallucinations or delusions) treatment for the physical disorder that is intended to alleviate or prevent the worsening of those symptoms or manifestations will fall within the Act.
If, however, a patient requires treatment for an injury resulting from mental disorder (e.g., they have as a result of a hallucination or delusion broken their arm) and the treatment for that physical condition does not alleviate or prevent a worsening of the mental disorder, then the treatment is unlikely to fall within the Act and will require consent, or if the person lacks capacity, treatment can be given in accordance with the MCA.

Authorising deprivations of liberty under the Mental Capacity Act 2005 (MCA) and the Deprivation of Liberty Safeguards (DoLS)

13.27 The DoLS are part of the MCA and are rooted in the fundamental principles in section 1 of the MCA. The DoLS only apply to individuals who lack capacity and if a deprivation of liberty is in their best interests.

13.28 The DoLS do not themselves authorise care or treatment, only the deprivation of liberty that results from the implementation of the proposed care plan. Any necessary care or treatment should be provided in accordance with the MCA.

13.29 When considering whether to apply for a DoL authorisation, decision-makers must first assess the capacity of the person to consent to the arrangements for their care or treatment, in accordance with the MCA.

13.30 Next, decision-makers must consider whether the circumstances of the proposed accommodation and treatment amounts (or is likely to amount) to a deprivation of liberty. Consideration must also be given at this stage to whether the patient’s care plan can be amended to avoid any potential deprivation of liberty.

13.31 The difference between a deprivation of liberty and restraint (which is permitted under sections 5 and 6 of the MCA, subject to certain conditions) is one of degree, intensity and duration, not necessarily nature or substance. The precise scope of the term ‘deprivation of liberty’ is not fixed. There is a deprivation of liberty in circumstances where a person is under continuous control and supervision and is not free to leave and lacks capacity to consent to the arrangements. Factors which are not relevant in determining whether there is a deprivation of liberty include the person’s compliance or lack of objection and the reason or purpose behind a particular placement. The relative normality of the placement (whatever the comparison made) is also not relevant.24 A deprivation of liberty can occur in domestic settings where the state is responsible for imposing such arrangements. In such cases, an order should be sought from the Court of Protection.

24 P v Cheshire West and Chester Council and another; P and Q v Surrey County Council. 2014. UKSC 19.
The definition of a deprivation of liberty develops over time in accordance with the case law of the European Court of Human Rights and UK courts on article 5 of the ECHR. In order for decision-makers to be able to assess whether the situation they are faced with constitutes (or is likely to constitute) a deprivation of liberty, they should keep abreast of the latest case law developments (ideally, through their organisation’s appointed MCA/DoLS lead).

Figure 3 details the criteria that must be satisfied in order to authorise a deprivation of liberty under the DoLS.

Figure 3: Criteria to authorise a deprivation of liberty under the DoLS

**Authorising a deprivation of liberty under the DoLS**

In general, an authorisation under the DoLS is given by a ‘supervisory body’ (a local authority or, in certain circumstances, the Welsh Ministers), following a request from the managing authority of the hospital or care home at which the individual is placed (or is likely to soon be placed – best practice would be for an authorisation to be in place at the moment a deprivation of liberty occurs). An authorisation will only be given if the person concerned is assessed to meet all six of the qualifying requirements, on which detailed guidance is given in the DoL Code of Practice. The six qualifying requirements are summarised below:

(a) **Age** – is the person concerned aged 18 or over? (Note that the remainder of the MCA applies to persons aged 16 and over, and that the Court of Protection may make DoL orders for persons aged 16 and over)

(b) **Mental health** – does the person have a mental disorder as defined by the Act? (disregarding the exclusions relating to learning disability in section 1 of the Act)

(c) **Mental capacity** – does the person lack capacity to decide whether or not they should be accommodated in the care home or hospital at issue to be given the care or treatment at issue?

(d) **Best interests**
   
   (i) is it in the best interest of the person for them to be deprived of their liberty
   
   (ii) is it necessary for them to be deprived of their liberty in order to prevent harm to themselves
   
   (iii) is the deprivation of liberty a proportionate response to the likelihood of the person suffering harm and the seriousness of that harm?

(e) **Eligibility** – this qualifying requirement is met unless the person is ineligible to be deprived of their liberty by the MCA (Schedule 1A to the MCA sets out who is ineligible for this purpose)

(f) **No refusals** – this qualifying requirement is met unless the person has made a valid advance decision to refuse treatment or there is a valid and conflicting decision by a donee or deputy.
Note: there is a different procedure in Schedule A1 of the MCA for an urgent authorisation. However, an urgent authorisation can never be given without a request for a standard authorisation being made simultaneously, and therefore, there must be a reasonable expectation that the six qualifying requirements for a standard authorisation are likely to be met (see paragraph 6.1 of the DoLS Code of Practice for further information).

**The Court of Protection**

13.34 The Court of Protection is a specialist court set up by the MCA to deal with complex cases involving individuals lacking capacity. It operates on a 24-hour basis.

13.35 The Court of Protection may make a welfare order to authorise a deprivation of liberty under the MCA (DoL order). DoL orders may also authorise treatment.

13.36 An application to the Court of Protection for a DoL order should be considered in complex cases. In addition, in certain cases a DoL order is the only way to authorise a deprivation of liberty under the MCA:

- if the deprivation of liberty is to occur in a place other than a hospital or care home then no DoL authorisation can be given. In an appropriate case, the Court of Protection can issue a DoL order to authorise a deprivation of liberty in a person’s own home or in the community (eg under supported living arrangements)
- where the person is aged 16 or 17 (DoL authorisations can only be given in relation to persons aged 18 or over).

**Detention under the Act or deprivation of liberty under a DoL authorisation or DoL order?**

13.37 If a person is suffering from mental disorder and needs to be assessed and/or treated in a hospital setting for that disorder (or physical conditions related to that disorder), consideration will need to be given to whether their proposed care and/or treatment will amount, or be likely to amount, to a deprivation of liberty and, if so, to whether a DoL authorisation/DoL order should be sought, or whether they should instead be detained under the Act.

13.38 If the care or treatment can safely and appropriately be provided in a less restrictive manner that will not give rise to (or be likely to give rise to) a deprivation of liberty, then the person concerned should not be detained under the Act and similarly no DoL authorisation/DoL order should be sought.
Detention under the Act can only occur in a hospital, as defined in section 145(2) of the Act, or a registered establishment, as defined in section 34(2) of the Act. Therefore if a person is to be accommodated and treated elsewhere then no question arises of detaining that person under the Act.

In addition, detention under the Act is only available if the person concerned is being assessed and/or treated for mental disorder, or assessed and/or treated for any physical conditions related to that mental disorder. The Act cannot be used to detain a person for the purposes of treating physical conditions which are unrelated to any mental disorder from which they are suffering. An example would be a patient detained under the Act who then requires treatment for appendicitis. If the patient has capacity to consent to treatment for appendicitis, this would need to be secured. If the patient lacks capacity to consent to treatment for appendicitis, then treatment could be provided under the MCA, provided it is in the patient’s best interests.

Patient’s attitude to the proposed accommodation in a hospital for treatment and to that treatment

If a person has capacity then they cannot be deprived of their liberty under the MCA.

A person who lacks capacity and who is to be deprived of their liberty (whether or not they consent) should never be informally admitted to hospital. They must be provided with the safeguards that apply when a person is deprived of their liberty under a DoL authorisation/DoL order, or detained under the Act.

If a person who lacks capacity would meet the criteria for being detained under the Act, then they will in general be ineligible for a DoL authorisation/DoL order if they object to being accommodated in a hospital setting to receive medical treatment for mental disorder and/or object to being given some or all of that treatment.
13.45 In other words, a person will be ineligible for a DoL authorisation/DoL order if:

- they are already detained under the Act or an equivalent provision (‘the hospital treatment regime’)\(^{25}\)
- they are already subject to the hospital treatment regime, but are not currently detained in a hospital, and the proposed accommodation in a hospital or care home for the purpose of treatment is either (i) inconsistent with the hospital treatment regime, or (ii) is medical treatment for mental disorder in a hospital
- they are subject to a community treatment order (CTO) or an equivalent provision (‘community treatment regime’)\(^{26}\) and the proposed accommodation in a hospital or care home for the purpose of treatment is either (i) inconsistent with the CTO, or (ii) the proposed treatment is medical treatment for mental disorder in a hospital
- they are subject to a guardianship application or guardianship order under the Act or equivalent provision (‘guardianship regime’)\(^{27}\), and either (i) the proposed accommodation in a hospital or care home for the purpose of treatment is inconsistent with the guardianship conditions, or (ii) the person objects to being kept in a hospital to receive medical treatment for mental disorder or being given that treatment.

13.46 For a person who lacks capacity and who suffers from mental disorder for which they require assessment and/or medical treatment in a hospital setting, but who does not object to being accommodated in a hospital setting or receiving that treatment, both detention under the Act and a DoL authorisation/DoL order will in principle be available. In this situation, decision-makers must determine which regime is the more appropriate.

13.47 The use of a DoL authorisation/DoL order in the psychiatric hospital setting is likely to be relatively infrequent because the Act criteria for detention are likely to be met, although whether the MCA can be used to safely and effectively assess or treat the patient should still be considered. Decision-makers in psychiatric hospitals must be aware of the circumstances in which a DoL authorisation/DoL order should be considered and/or might be used.

13.48 The choice of legal regime should never be based on a general preference for one regime or the other, or because one regime is more familiar to the decision-maker than the other. Such considerations are not legally relevant and lead to arbitrary decision-making. In addition:

- decision-makers should not proceed on the basis that one regime is generally less restrictive than the other. Both regimes are based on the need to impose as few restrictions on the liberty and autonomy of patients as possible. However, in the particular circumstances of an individual case, it may be apparent that one

---

\(^{25}\) See the definition of ‘hospital treatment regime’ in paragraph 8 of Schedule 1A to the MCA.

\(^{26}\) ‘Community treatment regime’ is defined in paragraph 9 of Schedule 1A as a CTO under section 17A of the Act and an obligation under another enactment which has the same effect as a CTO.

\(^{27}\) A guardianship regime is defined in paragraph 10 of Schedule 1A as an application under section 7 of the Act, an order under section 37 of the Act and an obligation under another enactment which has the same effect as a guardianship application or order.
regime is likely to prove less restrictive. If so, this should be balanced against any potential benefits associated with the other regime

• both regimes provide appropriate procedural safeguards to ensure the rights of the person concerned are protected during their detention. Decision-makers should not therefore proceed on the basis that one regime generally provides greater safeguards than the other. However, the nature of the safeguards provided under the two regimes are different and decision-makers will wish to exercise their professional judgement in determining which safeguards are more likely to best protect the interests of the patient in the particular circumstances of each individual case.

13.49 Paragraph 14.6 sets out various types of cases where it may be necessary to detain a patient under the Act rather than rely on a DoL authorisation/DoL order. However, aside from cases such as these, it is likely to be difficult to demonstrate that the criteria for detaining the patient under the Act are met if the MCA can be used safely and effectively to assess or treat a patient.

Electro-convulsive therapy (ECT)

13.50 ECT cannot be given to an individual who has the capacity to consent to that treatment but refuses to do so. Under the Act, ECT can only be given to individuals who lack capacity if approved by a second opinion appointed doctor (SOAD). See paragraphs 25.18 – 25.24 for further information on ECT.

13.51 Currently, there is no requirement for an independent medical opinion about the appropriateness of ECT being given to a person who lacks capacity to consent to that treatment. Such treatment could in principle be given on the basis of section 5 of the MCA.

Other considerations to be taken into account

13.52 The MCA applies to persons aged 16 years and over (and the Court of Protection has power to grant a DoL order in respect of a person who is aged 16 or over). A DoL authorisation may only be given in respect of a person who is aged 18 years or over. Chapter 19 of this Code describes procedures for dealing with children and young people. The Court of Protection and Ofsted have issued guidance on deprivations of liberty in children’s homes and residential special schools.28

Flowchart

13.53 A flow chart (Figure 5) describes the key decision-making steps when determining whether the Act and the MCA including the DoLS will be available to be used. The flow chart does not replace careful consideration by decision-makers of all relevant circumstances in individual cases. Decision-makers should use their professional judgment within the framework of the legislation.

Figure 5: Key decision-making steps when determining whether the MHA and MCA including DoLS will be available to be used

The first question in the flowchart is to ask whether the individual in question is suffering from a mental disorder for which they require assessment or treatment in a hospital. If the answer is ‘no’, then detention under the Act is not an available option.

If the answer is ‘yes’ then the decision-maker should consider a second question. The second question is: Does the individual in question lack the mental capacity to consent to being accommodated in the hospital for the purpose of being given the proposed care or treatment? If the answer is ‘no’ then the MCA and the DoLS are not an available option.

However, if the answer is ‘yes’ (in other words the individual in question is suffering from a mental disorder for which they require assessment and treatment in hospital AND they lack the capacity to consent to being accommodated in the hospital) then the next question to be asked is: Could the care plan result, or be likely to result, in a deprivation of liberty?

If the answer is ‘no’, then the individual could be admitted to the hospital on an informal basis (ie not detained under the Act) or treated under the provisions of the MCA (without the need to use the DoLS).

If the answer is ‘yes’ (there is, or is likely to be a deprivation of liberty) then the next question is whether the care and/or treatment plan could be amended to reduce any restraints or restrictions in place – thereby preventing a deprivation of liberty from arising. If the answer is ‘yes’, the care/treatment plan should be amended so that there is no deprivation of liberty.

If the care plan cannot be amended – so that there is (or is likely to be) an unavoidable deprivation of liberty then the individual in question must either be detained under the Act or receive an authorisation in respect of the DoLS. The individual cannot be admitted on an informal basis.

In determining whether the MHA or the DoLS is the most appropriate way of authorising the deprivation of liberty the decision-maker should consider the question: does the individual object to being kept in the hospital or to being given the treatment or any part of the treatment, or has the individual made a valid and applicable advance decision to refuse any part of the treatment? If the answer to this question is ‘yes’ then use of the Act is indicated – use of the DoLS would be inappropriate.

However, if the answer is ‘no’ (in other words, the individual is not objecting) then both detention under the Act and authorisation under DoLS are available. The individual cannot be placed under both regimes but must be placed under one. Guidance for decision-makers regarding this decision is to be found elsewhere in this chapter but it is important to remember that the choice of which regime to use should be made in the best interests of the individual – not because of the personal preference of the decision-maker.
Complex cases

No guidance can provide definitive answers in complex cases. Every individual case is unique with a complex mix of factors that need to be considered. A patient’s eligibility for detention under the Act or for a deprivation of liberty under a DoL authorisation/DoL order should always be considered.

In most cases, only one of the regimes will be available. However, in some cases, both will be available and must be considered. Decision-makers should exercise their professional judgement, taking legal advice where necessary, within the framework of the relevant legislation and guidance.

A hypothetical case is considered below. This case is illustrative only and is not intended to provide a template for decision-making. The case does not form part of the Code.

Case

a. P is a 72 year old woman suffering from dementia. Following a sudden deterioration in the community she has been admitted to hospital. The clinical team has assessed that P lacks the capacity to consent to treatment for her mental disorder. The clinical team has also concluded that it is in P’s best interests to receive that treatment in hospital.

b. P objects to the proposed stay in hospital to receive treatment and says she will leave the hospital if the clinical team tries to provide the treatment. In such an event, P would be prevented from leaving and the clinical team judge that a deprivation of liberty would arise. The clinical team determine that the criteria for detention under section 3 of the Act are satisfied and detain P. Treatment for mental disorder is provided.

c. When the course of treatment is finished, the clinical team decide that P no longer needs to be kept in a hospital for on-going treatment.

d. However, the clinical team considers (in consultation with P’s family and other relevant individuals and with respect to P’s previously stated views and beliefs) that it would not be in P’s best interests to discharge her back into the community immediately because she lives alone and the clinical team does not believe she would be able to look after herself. The clinical team assess that P lacks capacity to decide whether to live in a care home (and lacks capacity to decide whether to remain in hospital).

e. The hospital contacts the local authority to arrange a place at a residential care home. The care home states that a place will not be available for two weeks. The hospital believes it is in P’s best interests to remain in hospital until the care home
is ready to receive her (again, consulting with family and relevant individuals and taking P’s likely views and beliefs into consideration).

f. P’s assigned mental health professional asks the clinical team where P will stay until she can be moved to the care home. The clinical team say P will remain on the ward with patients who, unlike P, are still detained under the Act. If P attempts to leave the ward, the clinical team say that she will be prevented from doing so – and so a deprivation of liberty could potentially occur. The clinical team assesses that P does not and is not likely to object to remaining on the ward.

g. The DoL Best Interests Assessor (BIA) concludes that P meets the qualifying requirements for a DoL authorisation. The hospital applies to the Local Authority and receives a DoL authorisation covering P’s remaining stay in hospital.

h. When P is moved to the care home, the care home reassesses P’s situation and decides that P does not have capacity to decide whether to remain in the care home. The care home believes that it is in P’s best interests to remain at the care home (she would not be allowed to go home if she requested to do so, as the care home still believes she would be unable to look after herself adequately). Therefore the care home (assessing that the situation represents a deprivation of liberty) requests a further DoL authorisation from the local authority.

**Explanation of important points in (a) to (h) above:**

a. P lacks capacity and so the DoLS are in principle available.

b. The proposed care plan involves a potential deprivation of liberty. Treatment is for a mental disorder. The DoLS and the Act are both potentially available at this point. However, P objects to the proposed stay in hospital so she is ineligible to be deprived of liberty by a DoL authorisation/DoL Order. As such she can only be detained under the Act.

c. Care and treatment for the mental disorder has now finished. As such, the Act is no longer available.

d. The clinical team reaches a best interests decision and correctly reassesses capacity for a significant new care decision.

e. It becomes clear that it will be in P’s best interests to remain in hospital, pending the availability of an appropriate care home place.
f. A potential deprivation of liberty is identified – a legal regime must therefore be found to authorise that deprivation. The Act cannot be used as P does not meet the criteria for detention. The DoLS need to be used.

g. A DoL authorisation is received. (The clinical team might have felt it necessary to apply for an urgent authorisation together with the standard authorisation if the team determined that P would be deprived of her liberty after the Act detention had finished but before a standard authorisation could be granted.)

h. P moves to a care home. The care home rightly re-assesses P’s capacity and whether a deprivation of liberty could potentially occur. The care home applies for a DoL authorisation. P cannot be detained under the Act at this stage because the Act does not apply to care homes. Care and treatment can be provided under the MCA.
14 Applications for detention in hospital

Why read this chapter?

14.1 This chapter gives guidance on making applications for detention in hospital under Part 2 of the Act.

An application for detention may only be made where the grounds in either section 2 or section 3 of the Act are met. An application for detention may be made by an AMHP or the patient’s nearest relative, and they should understand the criteria for detention and their responsibilities under the Act.

Grounds for making an application for detention

14.2 An application for detention may only be made where the grounds in either section 2 or section 3 of the Act are met (see box below).

Criteria for applications

A person can be detained for assessment under section 2 only if both the following criteria apply:

• the person is suffering from a mental disorder of a nature or degree which warrants their detention in hospital for assessment (or for assessment followed by treatment) for at least a limited period, and
• the person ought to be so detained in the interests of their own health or safety or with a view to the protection of others.

A person can be detained for treatment under section 3 only if all the following criteria apply:

• the person is suffering from a mental disorder of a nature or degree which makes it appropriate for them to receive medical treatment in hospital
• it is necessary for the health or safety of the person or for the protection of other persons that they should receive such treatment and it cannot be provided unless the patient is detained under this section, and
• appropriate medical treatment is available.
14.3 The criteria require consideration of both the nature and degree of a patient’s mental disorder. Nature refers to the particular mental disorder from which the patient is suffering, its chronicity, its prognosis, and the patient’s previous response to receiving treatment for the disorder. Degree refers to the current manifestation of the patient’s disorder.

14.4 Before it is decided that admission to hospital is necessary, consideration must be given to whether there are alternative means of providing the care and treatment which the patient requires. This includes consideration of whether there might be other effective forms of care or treatment which the patient would be willing to accept and of whether guardianship would be appropriate instead.

14.5 In all cases, consideration must be given to:
- the patient’s wishes and view of their own needs
- the patient’s age and physical health
- any past wishes or feelings expressed by the patient
- the patient’s cultural background
- the patient’s social and family circumstances
- the impact that any future deterioration or lack of improvement in the patient’s condition would have on their children, other relatives or carers, especially those living with the patient, including an assessment of their ability and willingness to cope, and
- the effect on the patient, and those close to the patient, of a decision to admit or not to admit under the Act.

Factors to consider – the health or safety of the patient

14.6 Factors to be considered in deciding whether patients should be detained for their own health or safety include:
- the evidence suggesting that patients are at risk of:
  - suicide
  - self-harm
  - self-neglect or being unable to look after their own health or safety
  - jeopardising their own health or safety accidentally, recklessly or unintentionally, or
  - that their mental disorder is otherwise putting their health or safety at risk
- any evidence suggesting that the patient’s mental health will deteriorate if they do not receive treatment, including the views of the patient or carers, relatives or close friends (especially those living with the patient) about the likely course of the disorder.
• the patient’s own skills and experience in managing their condition
• the patient’s capacity to consent to admission and treatment (and the availability of the Deprivation of Liberty Safeguards (DoLS))
• whether the patient objects to treatment for mental disorder – or is likely to
• the reliability of such evidence, including what is known of the history of the patient’s mental disorder and the possibility of their condition improving
• the potential benefits of treatment, which should be weighed against any adverse effects that being detained might have on the patient’s wellbeing, and
• whether other methods of managing the risk are available.

Factors to consider – protection of others

14.7 In considering whether detention is necessary for the protection of other people, the factors to consider are the nature of the risk to other people arising from the patient’s mental disorder, the likelihood that harm will result and the severity of any potential harm, taking into account:
• that it is not always possible to differentiate risk of harm to the patient from the risk of harm to others
• the reliability of the available evidence, including any relevant details of the patient’s clinical history and past behaviour, such as contact with other agencies and (where relevant) criminal convictions and cautions
• the willingness and ability of those who live with the patient and those who provide care and support to the patient to cope with and manage the risk
• whether other methods of managing the risk are available, and
• harm to other people includes psychological as well as physical harm.

Alternatives to detention under the Act

14.8 In deciding whether it is necessary to detain patients, doctors and approved mental health professionals (AMHPs) must always consider the alternative ways of providing the treatment or care they need. Decision-makers should always consider whether there are less restrictive alternatives to detention under the Act, which may include:
• informal admission to hospital of a patient based on that person’s consent (see chapter 19 for guidance on consent to informal admission for children and young people)
• for treatment under the Mental Capacity Act (MCA) in a hospital or care home if the person lacks capacity to consent to admission and treatment. If the person will (or will be likely to be) deprived of their liberty to receive that treatment, a deprivation of liberty authorisation (DoL authorisation) or deprivation of liberty order by the Court of Protection (DoL order) must be in place to authorise that deprivation of liberty (see chapter 13)
• management in the community – eg by a crisis and support team, in a crisis house or with a host family (see chapter 29 on community patients), or
• guardianship (see chapter 30 and 31).

14.9 In considering whether it is necessary for the person to be detained under the Act, decision-makers must consider whether the person has capacity to consent to admission and treatment. This should be assessed in accordance with the MCA, which makes clear that a person must be assumed to have capacity unless it is established that they do not.

14.10 Professionals must consider available alternatives, having regard to all the relevant circumstances, to identify the least restrictive way of best achieving the proposed assessment or treatment. This will include considering what is the person’s best interests (if the person lacks capacity, this will be determined in accordance with the MCA).

Patients with capacity to consent to admission

14.11 When a patient needs to be in hospital, informal admission is usually appropriate when a patient who has the capacity to do so consents to admission. (See chapter 19 for guidance on when parents might consent to admission on behalf of children and young people.)

14.12 However, this should not be regarded as an absolute rule, especially if the reason for considering admission is that the patient presents a clear danger to themselves or others because of their mental disorder.

14.13 Compulsory admission should, in particular, be considered where a patient’s current mental state, together with reliable evidence of past experience, indicates a strong likelihood that they will have a change of mind about informal admission, either before or after they are admitted, with a resulting risk to their health or safety or to the safety of other people.

14.14 The threat of detention must not be used to induce a patient to consent to admission to hospital or to treatment (and is likely to invalidate any apparent consent).
14.15 If consideration is being given to the informal admission of a patient who is subject to Secretary of State restrictions, the Mental Health Casework Section of the Ministry of Justice should be contacted. Further advice is provided in chapter 22 and on the Ministry of Justice website.29

Patients who lack capacity to consent to admission or treatment

14.16 Where the criteria for detention under the Act are met, the situations where an application for detention should be made under the Act instead of relying on the DoLS include where:

- the patient has made a valid and applicable advance decision to refuse treatment which includes a necessary element of the treatment for which they are to be admitted to hospital (see chapter 9)
- the use of the DoLS would conflict with a decision of the person’s attorney, deputy, guardian or the Court of Protection, or
- the patient is objecting to being admitted to (or remaining in) hospital for mental health treatment.30

14.17 In that last case whether a patient is objecting has to be considered in the round, taking into account all the circumstances, so far as they are reasonably ascertainable. The decision to be made is whether the patient objects to treatment – the reasonableness of that objection is not the issue. In many cases the patient will be perfectly able to state their objection. In other cases doctors and AMHPs will need to consider the patient’s behaviour, wishes, feelings, views, beliefs and values, both present and past, so far as they can be ascertained. If there is reason to think that a patient would object, if able to do so, then the patient should be taken to be objecting.

14.18 Even if providing appropriate care or treatment will not unavoidably involve a deprivation of liberty, in some cases it may be necessary to detain a patient under the Act rather than rely on the MCA. For example, where the patient:

- has, by means of a valid and applicable advance decision, refused a necessary element of the treatment required, or
- lacks capacity to make decisions on some elements of the care and treatment they need, but has capacity to decide about a vital element – eg admission to hospital – and has either already refused it or is likely to do so.

14.19 Whether or not the DoLS could be used, other reasons why it may be necessary to detain a patient under the Act and not rely on the MCA alone include the following:

---

29 At the time of publication the telephone number is 020 7035 4848, option 5 should be selected.
30 The patient would be ineligible to be deprived of their liberty under the MCA: see paragraphs 1, 2 (Case E), 5 and 12 of Schedule 1A to the MCA. This means they are ineligible to be deprived of their liberty under an authorisation under Schedule A1 (see section 4A(5) read with paragraphs 12(1)(e) and 17 of Schedule A1) or a Court of Protection order (see section 16A).
• the patient’s lack of capacity to consent is fluctuating or temporary and the patient is not expected to consent to admission or treatment when they regain capacity. This may be particularly relevant to patients having acute psychotic, manic or depressive episodes

• a degree of restraint may need to be used which is justified by the risk to other people but which is not permissible under the MCA\textsuperscript{31} because, exceptionally, it cannot be said to be proportionate to the risk to the patient personally, and

• there is some other specific identifiable risk that the person might not receive the treatment they need if the MCA is relied on and either the person or others might potentially suffer harm as a result.

14.20 Otherwise, if the MCA can be used safely and effectively to assess or treat a patient, it is likely to be difficult to demonstrate that the criteria for detaining the patient under the Act are met.

14.21 For further information on the DoLS, see chapter 13, the MCA Code of Practice and its supplementary DoLS Code.\textsuperscript{32}

14.22 For the different considerations which apply to children and young people under the age of 18, see chapter 19.

**Section 2 or section 3**

14.23 An application for detention can be made under either section 2 or section 3 of the Act.

14.24 Section 2 should be used if:

• the full extent of the nature and degree of a patient’s condition is unclear

• there is a need to carry out an initial in-patient assessment in order to formulate a treatment plan, or to reach a judgement about whether the patient will accept treatment on a voluntary basis following admission, or

• there is a need to carry out a new in-patient assessment in order to re-formulate a treatment plan, or to reach a judgement about whether the patient will accept treatment on a voluntary basis.

14.25 Section 3 should be used if:

• the patient is already detained under section 2 (detention under section 2 cannot be renewed by a new section 2 application), or

• the nature and current degree of the patient’s mental disorder, the essential elements of the treatment plan to be followed and the likelihood of the patient accepting treatment as an informal patient is already established.

The assessment process

14.26 An application for detention may be made by an AMHP or the patient’s nearest relative. An AMHP is usually a more appropriate applicant than a patient’s nearest relative, given their professional training and knowledge of the legislation and local resources. This also removes the risk that an application by the nearest relative might have an adverse effect on their relationship with the patient.

14.27 An application must be supported by two medical recommendations given in accordance with the Act.

14.28 Doctors who are approached directly by a nearest relative about the possibility of an application being made should advise the nearest relative of their right to require a local authority to arrange for an AMHP to consider the patient’s case. Doctors should never advise a nearest relative to make an application in order to avoid involving an AMHP in an assessment.

Objective of the assessment

14.29 The objective of the assessment is to determine whether the criteria for detention are met and, if so, whether an application for detention should be made.

14.30 Because a proper assessment cannot be done without considering alternative means of providing care and treatment, AMHPs and doctors should, as far as possible in the circumstances, identify and liaise with services which may potentially be able to provide alternatives to admission to hospital. That could include crisis and home treatment teams.

Responsibilities of local authorities

14.31 Local authorities are responsible for ensuring that sufficient AMHPs are available to carry out their roles under the Act, including assessing patients to decide whether an application for detention should be made. To fulfil their statutory duty, local authorities must have arrangements in place in their area to provide a 24-hour service that can respond to patients’ needs.

14.32 Section 13 of the Act places a specific duty on local authorities to arrange for an AMHP to consider the case of any patient who is within their area if they have reason to believe that an application for detention in hospital may need to be made in respect of the patient. Local authorities must make such arrangements if asked to do so by (or on behalf of) the nearest relative.
14.33  If a patient is already detained under section 2 as the result of an application made by an AMHP, the local authority on whose behalf that AMHP was acting is responsible for arranging for an AMHP to consider the patient’s case again if the local authority has reason to believe that an application under section 3 may be necessary. This applies even if the patient has been detained outside that local authority’s area. These duties do not prevent any other local authority from arranging for an AMHP to consider a patient’s case if that is more appropriate.

Setting up the assessment

14.34  Local arrangements should, as far as possible, ensure that assessments are carried out by the most appropriate AMHP and doctors in the particular circumstances.

14.35  Where a patient is known to belong to a group for which particular expertise is desirable (eg they are aged under 18 or have a learning disability), at least one of the professionals involved in their assessment should have expertise in working with people from that group, wherever possible.

14.36  If this is not possible, at least one of the professionals involved in the person’s assessment should consult with one or more professionals who do have relevant expertise at the earliest opportunity and involve them as closely as the circumstances of the case allow.

14.37  Unless different arrangements have been agreed locally between the relevant authorities, AMHPs who assess patients for possible detention under the Act have overall responsibility for co-ordinating the process of assessment. In doing so, they should be sensitive to the patient’s age, sex, gender identity, social, cultural or ethnic background, religion or belief, and/or sexual orientation (see chapter 3 for more information). They should also consider how any disability the patient has may affect the way the assessment needs to be carried out.

14.38  Given the importance of good communication, it is essential that those professionals who assess patients are able to communicate with the patient effectively and reliably to prevent potential misunderstandings. AMHPs should establish, as far as possible, whether patients have particular communication needs or difficulties and take steps to meet these, by arranging, for example a signer or a professional interpreter. AMHPs should also be in a position, where appropriate, to supply appropriate equipment to make communication easier with patients who have impaired hearing, but who do not have their own hearing aid.

14.39  See paragraphs 14.102 - 14.106 for specific guidance in relation to the assessment of people who are deaf. For further guidance on specific issues that may arise when assessing people who have a learning disability or an autistic spectrum disorder, or who have a personality disorder, see chapter 20 and chapter 21 respectively.
14.40 Doctors and AMHPs undertaking assessments need to apply professional judgement and reach decisions independently of each other, but in a framework of co-operation and mutual support.

14.41 Unless there is good reason for undertaking separate assessments, patients should, where possible, be seen jointly by the AMHP and at least one of the two doctors involved in the assessment.

14.42 While it may not always be feasible for the patient to be examined by both doctors at the same time, they should both discuss the patient’s case with the person considering making an application for the patient’s detention.

14.43 Everyone involved in an assessment should be alert to the need to provide support for colleagues, especially where there is a risk of the patient causing physical harm. People carrying out assessments should be aware of circumstances in which the police should be asked to provide assistance, in accordance with arrangements agreed locally with the police, and how to use that assistance to maximise the safety of everyone involved in the assessment.

14.44 Locally agreed arrangements on the involvement of the police should include a joint risk assessment tool to help determine the level of risk and what (if any) police assistance may be required and how quickly it is needed. In cases where no warrant for the police to enter premises under section 135 is being applied for (see chapter 16), the risk assessment should indicate the reasons and why police assistance is nonetheless necessary.

The role of approved mental health professionals

14.45 AMHPs may make an application for detention only if they:
- have interviewed the patient in a suitable manner
- are satisfied that the statutory criteria for detention are met, and
- are satisfied that, in all the circumstances of the case, detention in hospital is the most appropriate way of providing the care and medical treatment the patient needs.

14.46 Once an AMHP has decided that an application should be made, they must then decide whether it is necessary or proper for them (rather than the nearest relative) to make the application. If, having considered any views expressed by the patient’s relatives and all the other relevant circumstances, they decide that it is, the AMHP must make the application.
14.47 At the start of an assessment, AMHPs should identify themselves to the person being assessed, members of the family, carers or friends and the other professionals present. AMHPs should ensure that the purpose of the visit, their role and that of the other professionals is explained. They should carry documents with them at all times which identify them as AMHPs and which specify both the local authority which approved them and the local authority on whose behalf they are acting.

14.48 Although AMHPs act on behalf of a local authority, they cannot be told by the local authority or anyone else whether or not to make an application. They must exercise their own judgement, based on social and medical evidence, when deciding whether to apply for a patient to be detained under the Act. The role of AMHPs is to provide an independent decision about whether or not there are alternatives to detention under the Act, bringing a social perspective to bear on their decision, and taking account of the least restrictive option and autonomy principles.

14.49 If a patient wants someone else (eg a familiar person or an advocate) to be present during the assessment and any subsequent action that may be taken, then ordinarily AMHPs should assist in securing that person’s attendance, unless the urgency of the case makes it inappropriate to do so. Patients may feel safer or more confident with a friend or other person they know well in attendance. Equally, an advocate can help to reassure patients. Some patients may already be receiving help from an advocate and, if this is the case, the advocate should also be present.

14.50 Patients should usually be given the opportunity of speaking to the AMHP alone. However, if AMHPs have reason to fear physical harm, they should insist that another professional is present.

14.51 It is not desirable for patients to be interviewed through a closed door or window, and this should be considered only where other people are at serious risk. Where direct access to the patient is not possible, but there is no immediate risk of physical danger to the patient or to anyone else, AMHPs should consider applying for a warrant under section 135 of the Act allowing the police to enter the premises (see chapter 16).

14.52 Where patients are subject to the short-term effects of alcohol or drugs (whether prescribed or self-administered) which make interviewing them difficult, the AMHP should either wait until the effects have abated before interviewing the patient or arrange to return later. If it is not realistic to wait, because of the patient’s disturbed behaviour and the urgency of the case, the assessment will have to be based on whatever information the AMHP can obtain from reliable sources. This should be made clear in the AMHP’s record of the assessment.
The AMHP and the nearest relative

14.53 AMHPs are required by the Act to attempt to identify the patient’s nearest relative as defined in section 26 of the Act (for information on the nearest relative see chapter 5).

14.54 When AMHPs make an application for admission under section 2, they must take such steps as are practicable to inform the nearest relative that the application is to be (or has been) made and of the nearest relative’s power to discharge the patient.

14.55 Before making an application for admission under section 3, AMHPs must consult the nearest relative, unless it is not reasonably practicable or would involve unreasonable delay.

14.56 Circumstances in which the nearest relative need not be informed or consulted include those where:

- it is not practicable for the AMHP to obtain sufficient information to establish the identity or location of the nearest relative or where to do so would require an excessive amount of investigation involving unreasonable delay, and
- consultation is not possible because of the nearest relative’s own health or mental incapacity.

14.57 There may also be cases where, although physically possible, it would not be reasonably practicable to inform or consult the nearest relative because there would be a detrimental impact on the patient which would result in infringement of the patient’s right to respect for their privacy and family life under article 8 of the European Convention on Human Rights and which could not be justified by the benefit of the involvement of the nearest relative. Detrimental impact may include cases where patients are likely to suffer emotional distress, deterioration in their mental health, physical harm, or financial or other exploitation as a result of the consultation.

14.58 Consulting and notifying the nearest relative is a significant safeguard for patients. Therefore decisions not to do so on these grounds should not be taken lightly. AMHPs should consider all the circumstances of the case, including:

- the benefit to the patient of the involvement of their nearest relative
- the patient’s wishes including taking into account whether they have the capacity to decide whether they would want their nearest relative involved and any statement of their wishes they have made in advance
- any detrimental effect that involving the nearest relative would have on the patient’s health and wellbeing, and
- whether there is any good reason to think that the patient’s objection may be intended to prevent information relevant to the assessment being discovered.

33 See in particular R. (on the application of E) v Bristol City Council. 2005. EWHC 74 (Admin).
14.59 AMHPs may also consider the degree to which the nearest relative has been willing to be involved on previous occasions, but unwillingness to act previously should not automatically be taken to presume current unwillingness.

14.60 If they do not consult or inform the nearest relative, AMHPs should record their reasons. Consultation must not be avoided purely because it is thought that the nearest relative might object to the application.

14.61 When consulting nearest relatives AMHPs should, where possible:
- ascertain the nearest relative’s views about both the patient’s needs and the nearest relative’s own needs in relation to the patient
- inform the nearest relative of the reasons for considering an application for detention and what the effects of such an application would be, and
- inform the nearest relative of their role and rights under the Act.

14.62 If the nearest relative objects to an application being made for admission for treatment under section 3, the application cannot be made. If it is thought necessary to proceed with the application to ensure the patient’s safety and the nearest relative cannot be persuaded to agree, the AMHP will need to consider applying to the county court for the nearest relative’s displacement under section 29 of the Act (see paragraphs 5.11 – 5.24).

Consultation with other people

14.63 Although there are specific requirements to consult the nearest relative, it is important to recognise the value of involving other people in the decision-making process, particularly the patient’s carers, family members and advocates, who are often able to provide a particular perspective on the patient’s circumstances. In so far as the urgency of the case allows, AMHPs should consider consulting with other relevant relatives, carers or friends and should take their views into account.

14.64 Where patients are under 18, AMHPs should in particular consider consulting with the patient’s parents (or other people who have parental responsibility for the patient – see chapter 19), assuming they are not the patient’s nearest relative anyway.

14.65 In deciding whether it is appropriate to consult carers and other family members, AMHPs should consider:
- the patient’s wishes
- the nature of the relationship between the patient and the person in question, including how long the relationship has existed, and
- whether the patient has referred to any hostility between them and the person in question, or there is other evidence of hostility, abuse or exploitation.
14.66 AMHPs should also consult wherever possible with other people who have been involved with the patient’s care, including their care co-ordinator if they are supported on the care programme approach (see chapter 34). This could include people working for statutory, voluntary or independent services and other service providers who do not specialise in mental health services but have contact with the patient. For example, the patient may be known to services for older people or substance misuse services.

14.67 Some patients may have an attorney or deputy appointed under the MCA who has authority to make decisions about their personal welfare. Where such a person is known to exist, AMHPs should take reasonable steps to contact them and seek their opinion. Where attorneys or deputies have the power to consent or refuse treatment for mental disorder on the patient’s behalf, they should also be given the opportunity to talk directly to the doctors assessing the patient, where practicable.

**Medical examination by doctors as part of the assessment**

14.68a A medical examination must involve:

- direct personal examination of the patient and their mental state
- consideration of all available relevant clinical information, including that in the possession of others, professional or non-professional.

14.68b If direct physical access to the patient is not immediately possible and it is not desirable to postpone the examination in order to negotiate access, consideration should be given to requesting that an AMHP apply for a warrant under section 135 of the Act (see paragraph 14.51 and chapter 16).

14.69 Where practicable, at least one of the medical recommendations must be provided by a doctor with previous acquaintance with the patient. Preferably, this should be a doctor who has personally treated the patient. But it is sufficient for the doctor to have had some previous knowledge of the patient’s case.

14.70 It is preferable that a doctor who does not have previous acquaintance with the patient be approved under section 12 of the Act. The Act requires that at least one of the doctors must be so approved.

14.71 If the doctors reach the opinion that the patient needs to be admitted to hospital, it is their responsibility to take the necessary steps to secure a suitable hospital bed. It is not the responsibility of the applicant, unless it has been agreed locally between the local authority and the relevant NHS bodies that this will be done by any AMHP involved in the assessment. Clinical commissioning groups (CCGs) are responsible for commissioning mental health services to meet the needs of their areas. This includes arrangements for the reception of patients in cases of special urgency or the provision of appropriate accommodation for patients under the age
of 18. NHS England is responsible for the commissioning of secure mental health services and other specialist services. NHS commissioners should ensure that procedures are in place through which beds can be identified whenever required.

14.72 Doctors must give reasons for the opinions stated in their recommendations. When giving a clinical description of the patient’s mental disorder as part of these reasons, doctors should include a description of the patient’s symptoms and behaviour, not merely a diagnostic classification.

14.73 When making recommendations for detention under section 3, doctors are required to state that appropriate medical treatment is available for the patient (see chapter 23). Preferably, they should know in advance of making the recommendation the name of the hospital to which the patient is to be admitted. If that is not possible, their recommendation may state that appropriate medical treatment will be available if the patient is admitted to one or more specific hospitals (or units within a hospital).

Communicating the outcome of the assessment

14.74 Having decided whether or not to make an application for admission, AMHPs should inform the patient, giving their reasons. Subject to the normal considerations of patient confidentiality, AMHPs should also give their decision and the reasons for it to:

- the patient’s nearest relative
- the doctors involved in the assessment
- the patient’s care co-ordinator (if they have one), and
- the patient’s GP, if they were not one of the doctors involved in the assessment.

14.75 An AMHP should, when informing the nearest relative that they not do intend to make an application, advise the nearest relative of their right to do so instead. If the nearest relative wishes to pursue this, the AMHP should suggest that they consult with the doctors to see if they would be prepared to provide recommendations.

14.76 Where the AMHP has considered a patient’s case at the request of the nearest relative, the reasons for not applying for the patient’s admission must be given to the nearest relative in writing. Such a letter should contain, as far as possible, sufficient details to enable the nearest relative to understand the decision while at the same time preserving the patient’s right to confidentiality.
Action when it is decided not to apply for admission

14.77 There is no obligation on an AMHP or nearest relative to make an application for admission just because the statutory criteria are met.

14.78 Where AMHPs decide not to apply for a patient’s detention they should record the reasons for their decision. The decision should be supported, where necessary, by an alternative framework of care or treatment (or both). AMHPs must decide how to pursue any actions which their assessment indicates are necessary to meet the needs of the patient. That might include, for example, referring the patient to social, health or other services.

14.79 The steps to be taken to put in place any new arrangements for the patient’s care and treatment, and any plans for reviewing them, should be recorded in writing and copies made available to all those who need them (subject to the normal considerations of patient confidentiality).

14.80 It is particularly important that the patient’s care co-ordinator (where they require support under the CPA – see chapter 34) is fully involved in decisions about meeting the patient’s needs.

14.81 Arrangements should be made to ensure that information about assessments and their outcome is passed to professional colleagues where appropriate, eg where an application for admission is not immediately necessary but might be in the future. This information will need to be available at short notice at any time of day or night.

14.82 More generally, making out-of-hours services aware of situations that are ongoing – such as when there is concern for an individual but no assessment has begun or when a person has absconded before an assessment could start or be completed – assists out-of-hours services in responding accordingly.

Action when it is decided to make an application

14.83 Most compulsory admissions require prompt action. Applicants have up to 14 days (depending on when the patient was last examined by a doctor as part of the assessment) in which to decide whether to make the application, starting with the day they personally last saw the patient. There may be cases where AMHPs conclude that they should delay taking a final decision, in order to see whether the patient’s condition changes, or whether successful alternatives to detention can be put in place in the interim.

14.84 Before making an application, AMHPs should ensure that appropriate arrangements are in place for the immediate care of any dependent children the patient may have and any adults who rely on the patient for care. Their needs should already have been considered as part of the assessment. Where relevant,
AMHPs should also ensure that practical arrangements are made for the care of any pets and for the local authority to carry out its other duties under the Care Act 2014 to secure the patient’s home and protect their property.

14.85 Applications for detention must be addressed to the managers of the hospital where the patient is to be detained. An application must state a specific hospital. An application cannot, for example, be made to a multi-site provider without specifying which of the provider’s sites the patient is to be admitted to. Providers should identify a bed manager who will be responsible for finding a suitable bed as soon as possible and telling the applicant the name of the provider in which it is situated.

14.86 Where units under the management of different bodies exist on the same site (or even in the same building), they will be separate hospitals for the purposes of the Act, because one hospital cannot be under the control of two sets of managers. Where there is potential for confusion, the respective hospital managers should ensure that there are distinct names for the units. In collaboration with local authorities, they should take steps to ensure that information is available to AMHPs who are likely to be making relevant applications to enable them effectively to distinguish the different hospitals on the site and to describe them correctly in applications.

14.87 Once an application has been completed, the patient should be transported to hospital as soon as possible, if they are not already in the hospital. But patients should not be moved until it is known that the hospital is willing to accept them.

14.88 A properly completed application supported by the necessary medical recommendations provides the applicant with the authority to transport the patient to hospital even if the patient does not wish to go. That authority lasts for 14 days from the date when the patient was last examined by one of the doctors with a view to making a recommendation to support the application. See chapter 17 for further guidance on transport.

14.89 The AMHP should provide an outline report for the hospital at the time the patient is first admitted or detained, giving reasons for the application and any practical matters about the patient’s circumstances which the hospital should know. Where possible, the report should include the name and telephone number of the AMHP or a care co-ordinator who can give further information. Local authorities should use a standard form on which AMHPs can make this outline report.

14.90 Where it is not realistic for the AMHP to accompany the patient to the hospital it is acceptable for them to provide the information outlined above by telephone, fax or other electronic means compatible with transferring confidential information. If providing the information by telephone, the AMHP should ensure that a written report is sent to the admitting hospital as soon as possible.
14.91 An outline report does not take the place of the full report which AMHPs are expected to complete for their employer (or the local authority on whose behalf they are acting – if different).

14.92 If the patient is a restricted patient, the AMHP should ensure that the Mental Health Casework Section of the Ministry of Justice is notified of the detention as soon as possible. This information should be left during office hours, although a duty officer is available at all times for urgent queries.\(^3\)

14.93 An application cannot be used to admit a patient to any hospital other than the one stated in the application (although once admitted a patient may be transferred to another hospital – see paragraphs 37.13 – 37.24).

14.94 In exceptional circumstances, if patients are transported to a hospital which has agreed to accept them, but there is no longer a bed available, the managers and staff of that hospital should assist in finding a suitable alternative for the patient. This may involve making a new application to a different hospital. If the application is under section 3, new medical recommendations will be required, unless the original recommendations already state that appropriate medical treatment is available in the proposed new hospital. The hospital to which the original application was made should assist in securing new medical recommendations if they are needed. A situation of this sort should be considered a serious failure and should be recorded and investigated accordingly.

Resolving disagreements

14.95 Sometimes there will be differences of opinion between professionals involved in the assessment. There is nothing wrong with disagreements: handled properly these offer an opportunity to safeguard the interests of the patient by widening the discussion on the best way of meeting their needs. Doctors and AMHPs should be ready to consult other professionals, especially care co-ordinators and others involved with the patient’s current care), and to consult carers and family, while retaining for themselves the final responsibility for their decision. Where disagreements do occur, professionals should ensure that they discuss these with each other.

14.96 Where there is an unresolved dispute about an application for detention, it is essential that the professionals do not abandon the patient. Instead, they should explore and agree an alternative plan – if necessary on a temporary basis. Such a plan should include a risk assessment and identification of the arrangements for managing the risks. The alternative plan should be recorded in writing, as should the arrangements for reviewing it. Copies should be made available to all those who need it (subject to the normal considerations of patient confidentiality).

\(^3\) At the time of publication the telephone number is 020 7035 4848, option 5 should be selected.
Responsibilities of approving bodies for doctors approved under section 12

14.97 The Secretary of State for Health’s functions of approving medical practitioners under section 12(2) of the Act are exercised by the approving bodies listed on the Gov.uk website. Medical practitioners who are approved clinicians under the Act are automatically treated as being approved under section 12 as well.

14.98 Approving bodies should:

• take active steps to encourage doctors, including GPs and those working in prison health services and police services, to apply for approval
• ensure that the up-to-date list of approved doctors and details of 24-hour on-call arrangements are available to all those who may need them, including GPs, providers of hospital and community mental health services and social services.

Co-operation between local agencies

14.99 NHS commissioners, NHS-funded providers and local authorities should co-operate in ensuring that there are opportunities for regular communication between professionals involved in mental health assessments, in order to promote understanding and to provide a forum for clarification of their respective roles and responsibilities. NHS commissioners, NHS-funded providers and local authorities should also keep in mind the interface with the criminal justice agencies, including the probation service and the police.

14.100 Opportunities should also be sought to involve and learn directly from people with experience of being assessed (patients and former patients), their carers, family and advocates.

Patients who are deaf

14.101 AMHPs and doctors assessing a deaf person should, wherever possible, have had deaf awareness training, including basic training in issues relating to mental health and deafness. Where required, they should also seek assistance from specialists with appropriate expertise in mental health and deafness. This may be available from one of the specialist hospital units for deafness and mental health. Contact with such units may, in particular, help to prevent deaf people being wrongly assessed as having a learning disability or another mental disorder.

14.102 Unless different arrangements have been agreed locally, the AMHP involved in the assessment should be responsible for booking and using registered qualified interpreters with expertise in mental health interpreting, bearing in mind that the interpretation of thought-disordered language requires particular expertise. Relay
interpreters (interpreters who relay British Sign Language (BSL) to hands-on BSL or visual frame signing or close signing) may be necessary, such as when the deaf person has a visual impairment, does not use BSL to sign or has minimal language skills or a learning disability.

14.103 Reliance on unqualified interpreters or health professionals with only limited signing skills should be avoided. Family members may (subject to the normal considerations about patient confidentiality) occasionally be able to assist a professional interpreter in understanding a patient’s idiosyncratic use of language. Family members should not be relied upon in place of a professional interpreter, even if the patient is willing for them to be involved.

14.104 Pre-lingual deafness may cause delayed language acquisition, which may in turn influence social behaviour. People carrying out assessments under the Act should have an awareness and knowledge of how mental health problems present in pre-lingually deaf people.

14.105 Cultural issues need to be taken into account, for instance in people who are pre-lingually deaf, as they have a visual perspective of the world and may consider themselves to be part of a cultural and linguistic minority. This means that they may behave in ways which are misperceived as evidence of mental disorder. For example, animated signing may be misunderstood as aggression, while touching a hearing person to talk to them may be misunderstood as an assault. A deaf person’s spoken or written English may be poor, giving rise to a false assumption of thought disorder.

15 Emergency applications for detention

Why read this chapter?

15.1 The Act permits an application for detention for assessment to be made under section 4 on the basis of a single medical recommendation, but only in very limited circumstances. This chapter provides guidance on the making of such emergency applications.

Applications for detention for assessment in an emergency

15.2 The Act permits an application for detention for assessment to be made under section 4 on the basis of a single medical recommendation, but only in very limited circumstances. An application for detention under section 4 may be made only when:

• the criteria for detention for assessment under section 2 are met
• the patient’s detention is required as a matter of urgent necessity, and
• obtaining a second medical recommendation would cause undesirable delay.

15.3 An application under section 4 may be made only if the applicant has seen the patient personally within the previous 24 hours. Otherwise, the duties of approved mental health professionals (AMHPs) in respect of applications are the same as for applications under section 2. The guidance given in chapter 14 about the way in which assessments should be carried out applies equally to applications under section 4 (except, of course, that there will only be one doctor involved).

Urgent necessity

15.4 Section 4 should be used only in a genuine emergency, where the patient’s need for urgent assessment outweighs the desirability of waiting for a second doctor.

15.5 Section 4 should never be used for administrative convenience. So, for example, patients should not be admitted under section 4 merely because it is more convenient for the second doctor to examine the patient in, rather than outside, hospital.

15.6 An emergency may arise where the patient’s mental state or behaviour presents problems which those involved cannot reasonably be expected to manage while waiting for a second doctor. To be satisfied that an emergency has arisen, the person making the application and the doctor making the supporting recommendation should have evidence of:

• an immediate and significant risk of mental or physical harm to the patient or to others
• danger of serious harm to property, or
• a need for the use of restrictive interventions on a patient (see chapter 26).
Availability of second medical recommendation

15.7 It is the responsibility of clinical commissioning groups (and the NHS Commissioning Board) to ensure that doctors are available in a timely manner to examine patients under the Act when requested to do so by AMHPs and in other cases where such an examination is necessary.

15.8 If AMHPs find themselves having to consider making emergency applications because of difficulties in securing a second doctor, they should report that to the local authority on whose behalf they are acting (or in accordance with locally agreed arrangements, if they are different). The local authority should review this issue promptly with the relevant NHS commissioner.

15.9 Hospital managers and local authorities should monitor the use of section 4 to ensure that it is not misused and to allow action to be taken to rectify any problems with the availability of doctors.

Admission under section 4

15.10 The authority to transport a patient to hospital and to start their detention there on the basis of an emergency application lasts only for 24 hours from the last time at which the doctor examined the patient for the purposes of the application, or from the time the application is made, whichever is the earlier. A patient may then be detained only for a maximum of 72 hours unless a second medical recommendation is provided to the hospital managers in accordance with the Act.

15.11 Patients admitted under section 4 should be examined by an appropriate second doctor as soon as possible, to decide whether they should continue to be detained. If the doctor making the recommendation for the section 4 application was not a doctor approved under section 12, the Act requires the doctor making the second recommendation to be so approved.

15.12 Patients detained on the basis of emergency applications who have the capacity to consent to treatment may not be treated without their consent under part 4 unless or until the second medical recommendation is received. Until then they are in exactly the same position as patients who are not detained under the Act in respect of consent to treatment. Patients detained under section 4 who lack capacity to consent to treatment may be treated under the Mental Capacity Act 2005 if it is deemed to be in their best interests (provided this treatment comes within the scope of section 5 of that Act and does not amount to a deprivation of liberty).

15.13 An application for detention for treatment under section 3 of the Act may be made while a patient is detained under section 4 – but two fresh medical recommendations would be required.
16 Police powers and places of safety

Why read this chapter?

16.1 Police officers have a power of entry to private premises under the Act, and a power to temporarily remove people from such premises and from public places persons to a place of safety, provided that specified criteria are met. This chapter gives guidance on obtaining a warrant, the need for agreed local policies, the definition of a place of safety, transfer of patients between places of safety, and assessment.

Approved mental health professionals (AMHPs), doctors and police officers should, in particular, be aware of the guidance given in this chapter.

Section 135: warrant to search for and remove patients

Section 135 (1) warrant

16.2 The purpose of a section 135(1) warrant is to provide police officers a power of entry to private premises through a magistrate granting them a warrant, for the purposes of removing the person to a place of safety for a mental health assessment or for other arrangements to be made for treatment or care. The warrant must be applied for by an AMHP and can be granted when the person is believed to be suffering from mental disorder and is being ill-treated, or is unable to care for themselves.

16.3 The warrant gives any police officer the right to enter the premises, by force if necessary. The police officer may remain even if asked to leave, and may also search the premises for the person believed to be suffering from a mental disorder. When acting on the warrant, the officer must be accompanied by an AMHP and a doctor. It may be helpful if the doctor who accompanies the police officer is approved for the purposes of section 12(2) of the Act. A person should be told the reasons for the removal before they are removed. The police officer may then remove the person to a place of safety, where they can be detained for up to 72 hours from the time of their arrival.

16.4 Where it is reasonably practicable, the intended place of safety should be identified, and the necessary arrangements made, before a warrant is applied for under section 135(1). Proper planning should ensure that it is not necessary to use a police station, as a place of safety for people removed under section 135(1), other than in the exceptional circumstances described in paragraph 16.36.

16.5 Before the execution of the warrant, the AMHP should contribute to any assessment of the risk presented by the person that is carried out by the police in order to plan to mitigate the risks identified and to help to keep that person safe during the process of their assessment or removal.
16.6 It is not necessary for permission to have been refused to enter in order for a section 135(1) warrant to be granted. The section 135 warrant enables the police officer to remove the person to a place of safety and can be granted with this purpose in mind.

16.7 A section 135 warrant is only granted in order to remove the person to a place of safety: it does not permit a mental health assessment to be carried out in the person’s home.

16.8 A police officer or any other qualified person may convene a mental health assessment in a person’s home on a voluntary basis without requiring section 135 powers.

16.9 Local authorities should ensure that guidance to AMHPs on how and when to apply for a warrant is also available to the relevant partner agencies (including the relevant local authority and police force).

16.10 Local authorities and hospital managers should ensure that there are procedures in place for obtaining warrants, both during and outside court hours. These procedures should describe the necessary processes, the evidence which individuals may be reasonably expected to produce, and the documents that should be prepared to help the process run smoothly and quickly.

16.11 Magistrates have to be satisfied that it is appropriate to issue a warrant. They are likely to ask applicants why they are applying for a warrant, whether reasonable attempts to enter without a warrant have been made and, if not, why not. Applicants should provide documented reasons for seeking a warrant if they have not already tried to gain access.

16.12 Magistrates should ensure that section 135 warrants can be granted in a timely way, taking into account that situations can be very urgent and that it should be possible to grant a warrant outside of normal business hours.

16.13 Following entry under section 135(1), the AMHP and doctor between them should, if feasible, carry out a preliminary assessment of the person to determine whether they need to be taken to a place of safety to be assessed further for an application under the Act or for other arrangements for care or treatment. It may be possible to carry out any such further assessment in the premises.

16.14 A person’s detention under section 135(1) ceases once an application for further detention has been made under the Act, other arrangements have been made for their treatment or care, or it has been decided that no further action is to be taken in respect of the person.
Section 135 (2) warrant

16.15 Section 135(2) provides for the issue of a warrant by a magistrate authorising entry by the police to remove a patient who is liable to be taken or returned to hospital or any other place or into custody under the Act. It enables a police officer to enter the premises and remove the patient so they can be taken or returned to where they ought to be. Such a warrant may be used, eg to help return a patient who has absconded, or who needs to be transported to hospital, if access to the premises where they are staying has been refused or is likely to be refused. (See chapter 28 for detailed guidance on patients who are absent from hospital without leave.)

16.16 When a warrant issued under section 135(2) is being used, it is good practice for the police officer to be accompanied by a person with authority from the managers of the relevant hospital (or local authority (LA), if applicable) to detain the patient and to take or return them to where they ought to be. For patients on a community treatment order (CTO) it is good practice for this person to be a member of the multi-disciplinary team responsible for the patient’s care. A person should be given oral reasons why they are being detained, taken or retaken, before this happens. See chapters 29 and 31 further information on CTOs.

Taking the person to the place of safety

16.17 Where a section 135 warrant is used, the AMHP, hospital managers or the local authority (as appropriate) should ensure that an ambulance or other transport is available to take the person to the place of safety or to the place where they ought to be, in accordance with a locally agreed policy on the transport of patients under the Act (see chapter 17). It may be helpful for the AMHP to escort the person or meet them on arrival at the place of safety, in order to ensure continuity of care and to provide information for the hand-over. The police should not normally be needed to transport the person or to escort them.

Section 136: mentally disordered people found in public places

16.18 Section 136 is an emergency power which allows for the removal to a place of safety of any person found in a place to which the public have access who appears to a police officer to be suffering from mental disorder and to be in immediate need of care or control.

16.19 ‘A place to which the public have access’ includes places to which members of the public have open access, access if a payment is made or access at certain times of the day. It does not include private premises, such as the person’s own place of residence or private homes belonging to others in which case a section
135 warrant is needed. It is not appropriate to encourage a person outside in order to use section 136 powers. Section 135 should be used if the person is in private premises.

16.20 A police officer may use section 136 if they encounter the person in a public place, including if they are responding to a call, are approached, or otherwise come into contact with them.

16.21 The purpose of section 136 is to remove a person to a place of safety so they can receive a mental health assessment, and any necessary arrangements made for their ongoing care. The police should not be called to a hospital to use their section 136 powers. If the person is already an in-patient in hospital, a nurse, doctor or approved clinician should instead use their holding powers under section 5 if it is considered necessary to detain the person (chapter 18).

16.22 Removal from a public place to a place of safety may take place if the police officer believes it necessary in the interests of that person, or for the protection of others.

16.23 Section 136 is not intended to be used as a way to gain access to mental health services and the person should be encouraged to take a route via primary care services, or to contact local mental health community services. A police officer may escort a person who is voluntarily seeking urgent mental healthcare to an appropriate service.

16.24 When considering the use of police powers to detain people under the Act, less restrictive alternatives to detention should be considered. Health and/or social care professionals may be able to identify alternative options. For example, in a person’s home the police, or any qualified person, may convene a mental health assessment with the person’s consent without using section 135 or section 136 powers, by requesting that a section 12-approved doctor attend in order to assess the person and make any arrangements for their ongoing care.

16.25 When deciding that detention may be necessary, the police may also benefit from seeking advice before using section 136 powers in cases where they are unsure that the circumstances are sufficiently serious for using these powers. Local protocols should set out how this advice can be provided and who the police should contact, including out of normal business hours.

16.26 The use of physical restraint or force may be required when removing a person to, or in, a place of safety for the protection of the person or others (such as the public, staff or patients). The physical restraint must be necessary and unavoidable to prevent harm to the person or others, no more restrictive than necessary, and be proportionate to the risk of harm if restraint was not used. The type of restraint which is least restrictive should be used. There should be a clear local protocol about the circumstances when, very exceptionally, police may be asked to use physical restraint in a health-based place of safety. For definitions of restraint and guidance on the use of restraint in hospital see chapter 26.
16.27 The purpose of removing a person to a place of safety in these circumstances is only to enable the person to be examined by a doctor and interviewed by an AMHP, so that the necessary arrangements can be made for the person’s care and treatment. It is not a substitute for an application for detention under the Act, even if it is thought that the person will need to be detained in hospital only for a short time. It should not be used as a substitute for, or affect the use of other police powers.

16.28 The maximum period a person may be detained under section 136 is 72 hours. In practice, detentions should not need to be this long. The imposition of consecutive periods of detention under section 136 is unlawful. The maximum 72-hour period begins at the time of arrival at the first place of safety (including if the person needs to be transferred to other places of safety).

16.29 Police should expedite the person’s assessment by a doctor and interview by an AMHP as soon as possible after the person is brought to the place of safety. As soon as practicable after the assessment and interview, the person should be discharged, informally admitted, further detained under the Act, or other arrangements made for the person’s treatment or care in the community. Health practitioners should take over responsibility for the person from the police as early as possible, to ensure that the person is cared for appropriately.

16.30 Police should generally use section 135 or 136, rather than their common law power of arrest for breach of the peace, when the person appears to be suffering from mental disorder which makes it necessary for them to be taken to a place of safety.

**Local policies on use of police powers and places of safety**

16.31a Local authorities, NHS commissioners, hospitals, police forces and ambulance services should have local partnership arrangements in place to deal with people experiencing mental health crises. The objective of local partnership arrangements is to ensure that people experiencing mental health crises receive the right medical care from the most appropriate health agencies as soon as possible. The police will often, due to the nature of their role, be the first point of contact for individuals in crisis, but it is crucial that people experiencing mental health crises access appropriate health services at the earliest opportunity.

16.31b It is also important to ensure that a jointly agreed local policy is in place governing all aspects of the use of section 135 and section 136. Good practice depends on a number of factors. For example:

- local authorities, hospitals, NHS commissioners, police forces and ambulance services should ensure that they have a clear and jointly agreed policy for use of the powers under sections 135 and 136, as well as the operation of agreed places of safety within their localities.
• all professionals involved in implementation of the powers should understand them and their purpose, the roles and responsibilities of other agencies involved, and follow the local policy
• professionals involved in implementation of the powers should receive the necessary training to be able to carry out fully the role ascribed to their agency
• the parties to the local policy should meet regularly to discuss its effectiveness in the light of experience and review the policy where necessary, and
• partner agencies should decide when information about specific cases can be shared between them for the purposes of safeguarding the person and the protection of others, if there is thought to be a risk of harm.

16.32 The policy should define responsibilities for:
• commissioning and providing sufficient safe and secure health-based places of safety, including for people under the age of 18
• identifying and agreeing the most appropriate places of safety in local areas, including contingency arrangements for those cases where the preferred place of safety is not available. This should ensure local agency boundaries should not be an overriding constraint, and there are arrangements to ensure children and young people can access a place of safety in their local area
• escalating and reviewing decisions, particularly in the event of disagreement
• providing prompt assessment (including how soon the doctor and AMHP should attend) and, where appropriate, admission to hospital for further assessment or treatment
• securing the attendance of police officers at health-based places of safety, where appropriate, for the patient’s health or safety or the protection of others
• the safe, timely and appropriate transport of the person to and between places of safety (bearing in mind that hospital or ambulance transport will usually be preferable to police transport, which should only be used exceptionally, such as in cases of extreme urgency or where there is an immediate risk of violence)
• deciding whether it is appropriate to transfer the person from the place of safety to which they have been taken to another place of safety (see paragraphs 16.51 – 16.56)
• ensuring that people who are intoxicated can be safely managed in any place of safety or an emergency department, and receive an assessment of both their physical and mental health needs. Intoxication should not be used as a basis for excluding people from particular places of safety, except in the circumstances outlined in the policy, such as where the patient’s current behaviour clearly indicates that there may be too high a risk to the safety of the individual or the staff
• ensuring that people who are behaving, or have behaved, violently can be safely managed in a place of safety taking into account the needs of the person and the safety of staff and others
• arranging access to a hospital emergency department for assessment for people who need it, and having an agreed list of circumstances when this will be necessary, such as where a person is self-harming, has a high body temperature or physical injury
• record keeping (see paragraphs 16.57 and 16.60) and monitoring (see paragraphs 16.61 – 16.63) and audit of practice against policy
• the release, transport and follow-up of people assessed under section 135 or 136 who are not then admitted to hospital or immediately accommodated elsewhere
• preparing multi-agency care plans for people who are repeatedly detained under section 136.

16.33 Responsibilities should be allocated to those who are best placed to discharge them, bearing in mind the different purposes for which health and social services and the police service exist. Local policies should ensure that police officers know who to contact prior to the removal of a person to a place of safety under section 136, in order to help secure their acceptance into a health-based place of safety.

16.34 Such policies should cover arrangements for police officers to attend when a person is removed to a health-based place of safety. Healthcare staff, including ambulance staff, should take responsibility for the person as soon as possible, including preventing the person from absconding before the assessment can be carried out. The police officer should not be expected to remain until the assessment is completed; the officer should be able to leave when the situation is agreed to be safe for the patient and healthcare staff.

16.35 Such policies may be best maintained by the establishment of a liaison committee, which might also take responsibility for examining the processes in place for other multi-agency tasks, such as transport of persons under the Act and policies in respect of patients who go absent without leave.

Places of safety

16.36 The locally agreed policy should contain a list of identified places of safety. The process for identifying the most appropriate place of safety to which a particular person is to be removed should be clearly outlined in the local policy. This should be a hospital or other health-based place of safety where mental health services are provided wherever possible subject to any urgent physical healthcare needs they may have). A police station should not be used as a place of safety except in exceptional circumstances, eg it may be necessary to do so because the person’s behaviour would pose an unmanageably high risk to other patients, staff or other users if the person were to be detained in a healthcare setting.
16.37 A police station should not be used as the automatic second choice if there is no local health-based place of safety immediately available. Other options which might be appropriate to the individual’s needs should be considered, eg a residential care home or the home of a relative or friend of the person who is willing to accept them temporarily. There is nothing that precludes other areas of a psychiatric hospital (such as a ward) being used as a temporary place of safety, provided that it is a suitable place and it is appropriate to use that place in the individual case.

16.38 In the exceptional circumstances in which a police station is used, the locally agreed policy should set out the time within which the appropriate health and social care professionals will attend the police station to assess the person or to assist in arranging to transfer them to a more suitable place of safety.

16.39 Although the Act provides a limit of 72 hours for detention under section 136, when a police station is used as a place of safety in the absence of a health-based place of safety being available, an assessment should be made as quickly as possible and made a priority by the doctor and AMHP (see 16.46 and 16.48 below). Alternatively, a transfer should be made as soon as a more appropriate place of safety becomes available. Wherever practicable, detention in a police station under section 136 should not need to exceed a maximum period of 24 hours.

16.40 People taken to a health-based place of safety should be transported there by an ambulance or other health transport arranged by the police, who should also escort them in order to facilitate hand-over to healthcare staff. If, in exceptional circumstances, a police officer needs to take a person to an emergency department after detaining that person under section 136, eg because emergency medical assessment or treatment is required, the emergency department should provide a safe and suitable place for immediate care for that person.

16.41 In identifying the most appropriate place of safety for an individual, consideration should be given to the impact that the proposed place of safety (and the journey to it) may have on the person and on their examination and interview. It should always be borne in mind that the use of a police station can give the impression that the person detained is suspected of having committed a crime. This may cause distress and anxiety to the person concerned and may affect their co-operation with, and therefore the effectiveness of, the assessment process.

16.42 Where an individual is removed to a place of safety by the police, the following apply:

- where the place of safety is a hospital, the police should make immediate contact with the hospital and local authority (or the people arranging AMHP services on its behalf) before the person’s arrival at the place of safety. This will allow arrangements to be made for the person to be interviewed and examined as soon as possible. Where a warrant has been issued under section 135, these arrangements should, wherever possible, have been made in advance by the AMHP, the hospital or any other organisation responsible for the person
• where a hospital is used as a place of safety, it is a local decision whether the person is admitted to a bed on arrival or whether that happens only after they have been interviewed and examined

• where a police station is to be used as the place of safety, the police should make contact quickly with the local authority (or its AMHP service) and with an appropriate doctor. This will enable the examination and interview to be conducted as quickly as possible, thus ensuring that the person spends no longer than necessary in police custody before being allowed to leave or taken to hospital. Early assessment will also allow consideration to be given to the possibility of a transfer to an alternative place of safety as soon as this is considered to be safe and appropriate in all of the circumstances

• intoxication (whether through drugs or alcohol) should not be used as a basis for exclusion from places of safety, except in circumstances set out in the local policy, where there may be too high a risk to the safety of the individual or staff. Health-based places of safety should not be conducting tests to determine intoxication as a reason for exclusion, and

• a child or young person should not be taken to a place of safety in a police station unless there is absolutely no alternative. If this occurs, consideration should also be given to using a different part of a police station or other place under the supervision of a police officer rather than a police custody suite.

### Assessment at a place of safety

16.43 The same care should be taken in examining and interviewing people in places of safety as in any other assessment. No assumptions should be made about them simply because the police have been involved, nor should they be assumed to be in any less need of support and assistance during the assessment. Guidance in chapters 14 and 15 on assessment applies in these circumstances as in any others.

16.44 Doctors examining patients should, wherever possible, be approved under section 12 of the Act. Where the examination has to be conducted by a doctor who is not approved under section 12, the doctor concerned should record the reasons for that.

16.45 Assessment by the doctor and AMHP should begin as soon as possible after the arrival of the individual at the place of safety; in cases where there are no clinical grounds to delay assessment, it is good practice for the doctor and AMHP to attend within three hours. Where possible, the assessment should be undertaken jointly by the doctor and the AMHP.

16.46 If possible, either a consultant psychiatrist in learning disabilities or an AMHP with knowledge and experience of working with people with learning disabilities should be available to make the assessment where it appears that the detained person has a learning disability.
16.47 Where the person detained is under the age of 18, or is known to have moved recently to adult mental health services, they should be taken to an appropriate place of safety (see paragraph 19.103), where either a child and adolescent mental health services (CAMHS) consultant or an AMHP with knowledge and experience of caring for this age group should undertake the assessment. If arranging for a CAMHS specialist to assess the person would result in a substantial delay, then those assessing the person should at least discuss the case with an appropriately qualified person. Where there is no local place of safety for under 18s, then the local health-based place of safety should be used.

16.48 The authority to detain a person under section 135(1) or 136 ends as soon as the assessment has been completed and suitable arrangements have been made. This may include detention under part 2 of the Act, informal admission, an offer of community treatment or other arrangements necessary for a safe discharge including necessary social arrangements. If a doctor assesses the person and concludes that the person is not suffering from a mental disorder then the person must be discharged.

16.49 It is important to remember that the definition of mental disorder is wide and includes personality disorder (see chapter 2). If the assessment by a doctor reveals that the person is not suffering from a mental disorder, but there are physical symptoms which require treatment, then the person should be discharged and appropriate steps taken to manage the physical condition.

16.50 If the doctor sees the person first and concludes that they have a mental disorder and that compulsory admission to hospital is not necessary, but that they may still need treatment or care (whether in or out of hospital), the person should still be seen by an AMHP. The AMHP should consult the doctor about any arrangements that might need to be made for the person’s treatment or care.

Transfer between places of safety

16.51 A person removed to a place of safety under section 135(1) or section 136 may be moved to a different place of safety within the maximum 72-hour period for which they may be detained. Transfers should take place only when it is in the person’s best interests. The maximum period of detention begins from the time of the person’s arrival at the first place of safety to which they are taken and cannot be extended if the person is transferred to another place of safety.

16.52 The person may be taken to the second or subsequent place of safety by transport arranged by a police officer, the AMHP or a person authorised by either a police officer or the AMHP.

16.53 A person may be transferred before their assessment has begun, while it is in progress or after it is completed and they are waiting for any necessary arrangements for their care or treatment to be put in place. If it is unavoidable, or
Although it may be helpful for local policies to outline circumstances in which a person is usually to be transferred between places of safety, the decision in each case should reflect the individual circumstances, including the person’s needs and the level of risk. For example, where the purpose of the transfer would be to move a person from a police station to a more appropriate health-based place of safety, the benefit of that move needs to be weighed against any delay it might cause in the person’s assessment and any distress that the journey might cause them. Any delays resulting from transferring the person cannot result in an overall period of detention which exceeds 72 hours.

Someone with the authority to effect a transfer should proceed by agreement wherever possible. Unless it is an emergency, a person should not be transferred without the agreement of an AMHP, a doctor or another healthcare professional who is competent to assess whether the transfer would put the person’s health or safety (or that of other people) at risk. It is for those professionals to decide whether they first need to see the person personally.

A person should never be moved from one place of safety to another unless it has been confirmed that the new place of safety is willing and able to accept them.

Record keeping

A record of the person’s time of arrival must be made immediately when they reach the place of safety. As soon as detention in a place of safety under section 135(1) or 136 ends, the individual must be told that they are free to leave by those who are detaining them. The organisation responsible for the place of safety should ensure that proper records are kept of the end of the person’s detention under these sections.

Given that the maximum period of detention at a place of safety is not affected by any subsequent transfer to a different place of safety (see paragraph 16.39 above), it is very important to ensure that the time of detention at the first place of safety is recorded clearly. This information should be shared between the transferring and receiving place of safety in the event of a transfer.

When admitted to a place of safety in a hospital, a record of the admission outcome of the assessment must be made by the hospital. Where persons who do not work for the hospital undertake the assessment, local procedures should be in place to ensure good record keeping.

If a person is excluded from a place of safety in a hospital and taken to a police station as a place of safety a record should be made of the decision, of who made the decision, and the reason it was made.
Monitoring use of the Act to remove people

16.61 The locally agreed policy should include arrangements for the use of section 136 (in particular) to be monitored effectively so that:

- a check can be made of the circumstances and outcomes of its, including in relation to people from black and minority ethnic communities, children and young people, and with people with protected characteristics as defined under the Equality Act 2010 (see chapter 3), and

- the parties to the policy can consider any changes to the mental health services or police operations or any other matters that might result in a reduction of its use.

16.62 The local policy should address who is responsible for collecting, analysing and disseminating the information required for monitoring purposes. Although information systems (and definitions) may differ between organisations, efforts should be made to ensure that the most important data for monitoring purposes is collected in a way that allows it to be analysed so that it is of use to all the parties to the policy.

16.63 It should also set the expected time limits within which the assessment at a place of safety should commence, and the relevant NHS bodies and local authorities should review local practice against these targets.

Rights of persons detained in places of safety

16.64 The Police and Criminal Evidence Act (PACE) Code of Practice C applies to persons detained under sections 135 and 136 (with the exception of section 15 of Code C). A person so detained therefore has the benefit of many of the safeguards applicable to a person who is in police detention after having been arrested. A person should expect to receive a copy of the Notice of Rights and Entitlements, which states that an individual can tell the police if they want access to a solicitor, if they want someone to be told that they are at the police station, and if they want medical help. It also states that an individual can tell the police that they want to look at the PACE Codes of Practice.

16.65 A person detained under section 136 may be searched by the constable at any time to ascertain what they have on them which could be used to harm themselves or others, damage property, or assist them to escape. The constable can hold on to anything found in the search, including clothes and personal effects, which the constable believes the person may use to cause such harm or damage or escape.

16.66 Where a hospital is used as a place of safety, the managers must ensure that the provisions of section 132 (giving of information) are complied with. In addition, access to legal advice should be facilitated whenever it is requested.
16.67 In all cases, the person detained should be told that the maximum period of detention is 72 hours.

16.68 Police and healthcare services should have regard to the Equality Act 2010 when using section 135 and 136 (see chapter 3).

Places of safety and consent to treatment

16.69 Detaining a patient in a place of safety under sections 135 or 136 does not confer any power under the Act to treat them without their consent. In other words, they are in exactly the same position in respect of consent to treatment as patients who are not detained under the Act.

Making necessary arrangements following assessment

16.70 Once the assessment has been concluded, it is the responsibility of the doctors and AMHPs involved to make any necessary further arrangements for the person’s treatment or care.

16.71 Where compulsory admission is indicated, the AMHP should arrange for a second doctor to examine the patient in accordance with the Act (unless it has been agreed locally that someone else should make such arrangements).

16.72 It is unlikely that an emergency application would be justified in these circumstances. If there was an urgent need to secure the transfer of the patient to hospital, the power of transfer between places of safety could be used.

16.73 A person who is detained under section 135 or 136 in hospital pending completion of their assessment cannot have their detention extended by use of section 5(2) or section 5(4).

16.74 It should also be borne in mind that a person who is removed to a place of safety may already be on a community treatment order (CTO) (chapter 29), conditional discharge (chapter 22) or leave of absence (chapter 27), or on leave without absence (chapter 28) and that they may need to be recalled or returned to hospital. If it becomes apparent that this is the case, the professionals assessing the patient should make an effort to contact the patient’s responsible clinician as soon as possible.

16.75 Where the person is known to be on a CTO and compulsory admission is indicated, the recall power should be used (see chapter 29). An application for detention cannot be made in respect of a person who is known to be on a CTO.

This material does not form part of the Code. It is provided for assistance only.
17 Transport of patients

Why read this chapter?

17.1 Patients may need to be transported between different locations. This chapter provides information about how patients should be conveyed in a manner that is most likely to preserve their dignity and privacy consistent with managing any risk to their health and safety or to other people, and the factors that should be taken into account.

Authorities, including NHS commissioners responsible for hospitals and ambulance and transport services, NHS-funded providers and the police, should agree joint local policies to ensure that patients can be conveyed without delay. When transport between hospitals is required, hospital managers should make appropriate arrangements. Guidance is provided on transporting patients to hospital on the basis of an application for detention, transporting patients who abscond and transporting patients who are subject to a community treatment order who are recalled to hospital.

General considerations

17.2 Patients should always be transported in the manner which is most likely to preserve their dignity and privacy consistent with managing any risk to their health and safety or to other people.

17.3 This applies in all cases where patients are compulsorily transported under the Act, including:

- taking patients to hospital to be detained for assessment or treatment
- transferring patients between hospitals
- returning patients to hospital if they are absent without leave
- taking community patients or patients who have been conditionally discharged to hospital on recall
- taking and returning patients who are subject to guardianship to the place their guardian requires them to live
- taking patients to, and between, places of safety, and
- taking patients to and from court.

17.4 When deciding on the most appropriate method for transporting a patient, factors to be taken into account include:

- the availability of different transport options
- the distance to be travelled
• the wishes and views of the patient, including any relevant statement of those views or wishes made in advance
• the patient’s age
• any physical disability the patient has
• any risks to the health and safety of the patient – including their need for support, supervision and clinical care or monitoring during the journey. This is particularly important where sedation has been, or may be used
• the nature of the patient’s mental disorder and their current state of mind
• the likelihood of the patient behaving in a violent or dangerous manner
• the health and safety of the people transporting the patient and anyone else accompanying them
• the likelihood that the patient may attempt to abscond and the risk of harm to the patient or other people were that to happen
• the impact that any particular method of transporting the patient will have on the patient’s relationship with the community to which they will return
• the effect on the patient of who accompanies them (eg whether the presence of the approved mental health professional (AMHP) or one of the doctors involved in the decision to detain them may have a detrimental effect)
• the availability of transport to return those who accompany the patient, and
• whether an alternative to transporting the patient is available and appropriate, eg video conferencing for a court appearance.

Transporting to hospital on the basis of an application for detention

17.5 Patients who have been sedated before being transported should always be accompanied by a health professional who is knowledgeable in the care of such patients, is able to identify and respond to any physical distress which may occur and has access to the necessary emergency equipment to do so.

17.6 A properly completed application for detention under the Act, together with the required medical recommendations, gives the applicant (the AMHP or nearest relative) the authority to transport the patient to the hospital named in the application.

17.7 Where AMHPS are the applicant they have a professional responsibility to ensure that all the necessary arrangements are made for the patient to be transported to hospital. All relevant agencies should co-operate fully with the AMHP to ensure a safe transport to hospital.

17.8 Relevant bodies should ensure locally agreed arrangements are in place (see paragraphs 17.20 – 17.27).
17.9 If the nearest relative is the applicant, any AMHP and other professionals involved in the assessment of the patient should give advice and assistance. But they should not assist in a patient’s detention unless they believe it is justified and lawful.

17.10 AMHPs should make decisions on which method of transport to use in consultation with the other professionals involved, the patient and (as appropriate) their carer, family or other supporters. The decision should be made following a risk assessment carried out on the basis of the best available information.

17.11 If the patient is likely to be unwilling to be moved, the applicant should provide the people who are to transport the patient (including any ambulance staff or police officers involved) with authority to transport the patient. It is that authorisation which confers on them the legal power to transport patients against their will, using reasonable force if necessary, and to prevent them absconding en route.

17.12 If the patient’s behaviour is likely to be violent or dangerous, the police should be asked to assist in accordance with locally agreed arrangements. Where practicable, given the risk involved, an ambulance service (or similar) vehicle should be used even where the police are assisting.

17.13 The locally agreed arrangements should set out what assistance the police will provide to AMHPs and health services in transporting patients safely, and what support ambulance or other health services will be expected to provide where patients are, exceptionally, transported in police vehicles.

17.14 Where it is necessary to use a police vehicle because of the risk involved, it may be necessary for the highest qualified member of an ambulance crew to ride in the same vehicle with the patient, with the appropriate equipment to deal with immediate problems. In such cases, the ambulance should follow directly behind to provide any further support that is required.

17.15 AMHPs should not agree to a patient being transported by private vehicle unless satisfied that it would not put the patient or other people at risk of harm and that it is the most appropriate way of transporting the person. In these circumstances there should be a medical escort for the patient other than the driver.

17.16 People authorised by the applicant to transport patients act in their own right and not as the agent of the applicant. They may act on their own initiative to restrain patients and prevent them absconding, if necessary. However, when they are the applicant, AMHPs retain a professional responsibility to ensure that the patient is transported in a lawful and humane manner and should give guidance to those asked to assist.

17.17 Patients may be accompanied by another person, provided that the AMHP and the person in charge of the vehicle are satisfied that this will not increase the risk of harm to the patient or others.
Before patients are moved, the applicant should ensure that the receiving hospital is expecting the patient and has been told the likely time of arrival. If possible, the name of the person who will be formally receiving the patient and their admission documents should be obtained in advance.

Where the applicant is not travelling in the same vehicle as the patient, the application form and medical recommendations should be given to the person authorised to transport the patient, with instructions for them to be presented to the member of hospital staff receiving the patient.

Locally agreed arrangements

It is for clinical commissioning groups (CCGs) to commission ambulance and patient transport services to meet the needs of people living in their areas. This includes services for transporting patients to and from hospital (and other places) under the Act.

CCGs should ensure, through their contracts, that appropriate transport will be made available in a timely manner where it is needed to transport patients under the Act. It is for service providers, whoever they are, to provide those services in accordance with their contracts.

If the patient is a privately-funded patient, it is for the managers of that hospital to make arrangements for any necessary transport.

The respective responsibilities of different agencies and service providers for transporting patients in different circumstances should be clearly established locally and communicated to the professionals who need to know.

In particular, it is essential to have clear agreements in place so that people who need assistance in transporting patients under the Act can obtain it without delay. Authorities, including NHS commissioners responsible for hospitals and ambulance and transport services, NHS-funded providers and the police, should agree joint local policies and procedures. These should include, in particular:

• a clear statement of the respective roles and obligations of each agency and service provider (and their staff)
• the form of any authorisation to be given by AMHPs (and others) when authorising people to transport patients on their behalf
• the assistance that managers and staff of hospitals will provide to AMHPs to make necessary arrangements for the transport of patients who are to be admitted to their hospital
• guidance and training (including refresher training) on legal powers in relation to transporting patients
• a clear statement of how risk assessment and management should be conducted and how the outcomes will influence decisions in relation to the transport of patients
• agreement on the appropriate use of different methods of restraint in transporting patients and how decisions on their use will be made in any given case
• any special arrangements where patients need to be transported outside the local area, and
• processes for reviewing and monitoring the involvement of the different agencies, including standards against which delivery will be monitored.

17.25 Policies should ensure that AMHPs (in particular) are not left to negotiate arrangements with providers of transport services on an ad hoc basis, in the absence of clear expectations about the responsibilities of all those involved.

17.26 Policies should also be consistent with those agreed in relation to the use of the police powers in sections 135 and 136 of the Act (see chapter 16).

17.27 For information on the transport of patients subject to part 3 of the Act see paragraphs 22.28 – 22.32.

Transporting patients between hospitals and returning patients who abscond

17.28 Where a patient requires transport between hospitals, it is for the managers of the hospitals concerned to make sure that appropriate arrangements are put in place. The managers of the hospital from which the patient is being transferred remain responsible for the patient until the patient is admitted to the new hospital.

17.29 Where a patient who is absent without leave from a hospital is taken into custody by someone working for another organisation, the managers of the hospital from which the patient is absent are responsible for making sure that any necessary transport arrangements at put in place for the patient’s return.

17.30 However, the organisation which temporarily has custody of the patient is responsible for them in the interim and should therefore assist in ensuring that the patient is returned in a timely and safe manner.

17.31 When making arrangements for the return of patients temporarily held in police custody, hospital managers should bear in mind that police transport to return them to hospital will not normally be appropriate. Decisions about the kind of transport to be used should be taken in the same way as for patients being detained in hospital for the first time.
Transporting patients subject to a CTO who are recalled to hospital

17.32 A notice of recall, properly completed by the responsible clinician and served on the patient in accordance with regulations, provides the authority to transport a patient subject to a CTO to hospital compulsorily, if necessary (see paragraphs 29.50 – 29.51 and 29.55).

17.33 Unless locally it has been agreed otherwise, the responsible clinician has responsibility for co-ordinating the recall process. The factors outlined above at paragraph 17.4, and the urgency of the situation, will need to be considered in deciding the best way to transport the patient to hospital. The guidance above in paragraphs 17.5 – 17.19 about taking patients to hospital when they are first to be detained applies here as well, except that an AMHP will not necessarily be involved.

17.34 A patient subject to a CTO who has been recalled can be transported by any officer on the staff of the hospital to which the patient is recalled, any police officer, any AMHP or any other person authorised in writing by the responsible clinician or the managers of that hospital. Who the most appropriate person to transport the patient is will depend on the individual circumstances.

Transporting patients subject to part 3 of the Act

17.35 Information on transporting patients subject to part 3 of the Act, including children and young people, is available at paragraphs 22.28 – 22.32.
18 Holding powers

Why read this chapter?

18.1 This chapter provides guidance about the use of ‘holding powers’ and how they should be exercised.

Doctors and approved clinicians have ‘holding powers’ under section 5(2) of the Act and certain nurses have the same powers under section 5(4) of the Act. This chapter provides guidance on the nature of this power, monitoring it’s use, the nomination of deputies if necessary, the role of hospital managers, and how patients should be assessed before invoking ‘holding powers’. It also provides guidance on the transfer of those subject to this power, to other hospitals.

Holding powers of doctors and approved clinicians under section 5(2)

Nature of the power

18.2 The power can be used where the doctor or approved clinician in charge of the treatment of a hospital in-patient (or their nominated deputy) concludes that an application for detention under the Act should be made. It authorises the detention of the patient in the hospital for a maximum of 72 hours so that the patient can be assessed with a view to such an application being made.

18.3 The identity of the person in charge of a patient’s medical treatment at any time will depend on the particular circumstances. But a professional who is treating the patient under the direction of another professional should not be considered to be in charge.

18.4 There may be more than one person who could reasonably be said to be in charge of a patient’s treatment, eg where a patient is already receiving treatment for both a physical and a mental disorder. In a case of that kind, the psychiatrist or approved clinician in charge of the patient’s treatment for the mental disorder is the preferred person to use the power in section 5, if necessary.

18.5 The period of detention starts at the moment the doctor’s or approved clinician’s report is furnished to the hospital managers (eg when it is handed to an officer who is authorised by the managers to receive it, or when it is put in the hospital’s internal mail system).
In this context, a hospital in-patient means any person who is receiving in-patient treatment in a hospital, except a patient who is already liable to be detained under section 2, 3 or 4 of the Act, or who is a supervised community treatment patient. It includes patients who are in hospital by virtue of a deprivation of liberty authorisation under the Mental Capacity Act 2005 (MCA) (see chapter 13). It does not matter whether or not the patient was originally admitted for treatment primarily for a mental disorder. The patient could be receiving in-patient treatment in a general hospital for a physical condition.

The power cannot be used for an out-patient attending a hospital’s accident and emergency department, or any other out-patient. Patients should not be admitted informally with the sole intention of then using the holding power.

Section 5(2) should only be used if, at the time, it is not practicable or safe to take the steps necessary to make an application for detention without detaining the patient in the interim. Section 5(2) should not be used as an alternative to making an application, even if it is thought that the patient will only need to be detained for 72 hours or less.

Doctors and approved clinicians should use the holding power only after having personally examined the patient.

Sometimes a report under section 5(2) may be made in relation to a patient who is not at the time under the care of a psychiatrist or an approved clinician. In such cases, the doctor invoking the power should make immediate contact with a psychiatrist or an approved clinician to obtain confirmation of their opinion that the patient needs to be detained so that an application can be made. If possible, the doctor should seek such advice before using the power.

Nomination of deputies

Section 5(3) allows the doctor or approved clinician in charge of an in-patient’s treatment to nominate a deputy to exercise section 5(2) powers in their absence. The deputy will then act on their own responsibility.

Only a doctor or approved clinician on the staff of the same hospital may be a nominated deputy (although the deputy does not have to be a member of the same profession as the person nominating them). Only one deputy may be authorised at any time for any patient, and it is unlawful for a nominated deputy to nominate another.
18.13 Doctors should not be nominated as a deputy unless they are competent to perform the role. If nominated deputies are not approved clinicians (or doctors approved under section 12 of the Act), they should wherever possible seek advice from the person for whom they are deputising, or from someone else who is an approved clinician or section 12 approved doctor, before using section 5(2). Hospital managers should see that arrangements are in place to allow nominated deputies to do this.

18.14 Nominated deputies should report the use of section 5(2) to the person for whom they are deputising as soon as practicable.

18.15 It is permissible for deputies to be nominated by title, rather than by name – eg the junior doctor on call for particular wards – provided that there is only one nominated deputy for any patient at any time and it can be determined with certainty who that nominated deputy is.

18.16 Hospital managers should ensure that ward staff know who the nominated deputy for a particular patient is at any given time.

18.17 Doctors and approved clinicians may leave instructions with ward staff to contact them (or their nominated deputy) if a particular patient wants or tries to leave. But they may not leave instructions for their nominated deputy to use section 5, nor may they complete a section 5 report in advance to be used in their absence. The deputy must exercise their own professional judgment.

Assessment for admission while a patient is detained under section 5(2)

18.18 Arrangements for an assessment to consider an application under section 2 or section 3 of the Act should be put in place as soon as the report is furnished to the hospital managers.

Ending section 5(2)

18.19 Although the holding power lasts for a maximum of 72 hours, it should not be used to continue to detain patients after:

- the doctor or approved clinician decides that, in fact, no assessment for a possible application needs to be carried out, or
- a decision is taken not to make an application for the patient’s detention.
18.20 Patients should be informed immediately that they are no longer detained under the holding power and are free to leave the hospital, unless, of course, the patient is to be detained under some other authority, such as an authorisation under the deprivation of liberty safeguards in the MCA (see chapter 13).

### Holding powers of nurses under section 5(4)

#### Nature of the power

18.21 Nurses of the ‘prescribed class’ may invoke section 5(4) of the Act in respect of a hospital in-patient who is already receiving treatment for mental disorder.\(^{35}\)

18.22a This power may be used only where the nurse considers that:

- the patient is suffering from mental disorder to such a degree that it is necessary for the patient to be immediately prevented from leaving the hospital either for the patient’s health or safety or the protection of other people, and
- it is not practicable to secure the attendance of a doctor or approved clinician who can submit a report under section 5(2).

18.22b It can be used only when the patient is still on the hospital premises.

18.23 The use of the holding power permits the patient’s detention for up to six hours or until a doctor or approved clinician with the power to use section 5(2) arrives at the place the person is being detained, whichever is the earlier. It cannot be renewed.

18.24 The patient may be detained from the moment the nurse makes the necessary record. The record must then be sent to the hospital managers.

18.25 The decision to invoke the power is the personal decision of the nurse, who cannot be instructed to exercise the power by anyone else.

18.26 Hospital managers should ensure that suitably qualified, experienced and competent nurses are available to all wards where there is a possibility of section 5(4) being invoked, particularly acute psychiatric admission wards and wards where there are patients who are acutely unwell or who require intensive nursing care. Where nurses may have to apply the power to patients from outside their specialist field, it is good practice for hospital managers to arrange suitable training in the use of the power in such situations.

---

\(^{35}\) The prescribed classes at the time of publication are nurses registered in sub-parts 1 or 2 of the register maintained by the Nursing and Midwifery Council whose entry in the register indicates that their field of practice is either mental health nursing or learning disabilities nursing. See the Mental Health (Nurses) (England) Order 2008/1207.
Assessment before invoking section 5(4)

18.27 Before using the power, nurses should assess:
- the likely arrival time of the doctor or approved clinician, as against the likely intention of the patient to leave. It may be possible to persuade the patient to wait until a doctor or approved clinician arrives to discuss it further, and
- the consequences of a patient leaving the hospital before the doctor or approved clinician arrives – in other words, the harm that might occur to the patient or others.

18.28 In doing so, the nurse should consider:
- the patient’s expressed intentions
- the likelihood of the patient harming themselves or others
- the likelihood of the patient behaving violently
- any evidence of disordered thinking
- the patient’s current behaviour and, in particular, any changes in their usual behaviour
- the patient’s recent communications with family and friends
- whether the date is one of special significance for the patient (eg the anniversary of a bereavement)
- any recent disturbances on the ward
- any relevant involvement of other patients
- any history of unpredictability or impulsiveness
- any formal risk assessments which have been undertaken (specifically looking at previous behaviour), and
- any other relevant information from other members of the multi-disciplinary team.

18.29 Nurses should be particularly alert to cases where patients suddenly decide to leave or become determined to do so urgently.

18.30 Nurses should make as full an assessment as possible in the circumstances before using the power, but sometimes it may be necessary to invoke the power on the basis of only a brief assessment.

Action once section 5(4) is used

18.31 The reasons for invoking the power should be entered in the patient’s notes. Details of any patients who remain subject to the power at the time of a shift change should be given to staff coming on duty.
18.32 The use of section 5(4) is an emergency measure, and the doctor or approved clinician with the power to use section 5(2) in respect of the patient should treat it as such and arrive as soon as possible. The doctor or approved clinician should not wait six hours before attending simply because this is the maximum time allowed.

18.33 If the doctor or approved clinician arrives before the end of the six hour maximum period, the holding power lapses on their arrival. But if the doctor or approved clinician then uses their own holding power, the maximum period of 72 hours runs from when the nurse first made the record detaining the patient under section 5(4).

18.34 If no doctor or approved clinician able to make a report under section 5(2) has attended within six hours, the patient is no longer detained and may leave if not prepared to stay voluntarily. This should be considered as a serious failing, and should be reported and investigated locally as such.

General points about using section 5

Recording the end of detention

18.35 The time which a patient ceases to be detained under section 5(2) or 5(4) should be recorded, preferably using a standardised system established by the hospital managers for the purpose. The reason why the patient is no longer detained under the power should be recorded, and what then happened to the patient (eg the patient remained in hospital voluntarily, was discharged, or was detained under a different power).

18.36 Detention under section 5(2) or 5(4) cannot be renewed, but that does not prevent it being used again on a future occasion if necessary.

Monitoring use

18.37 Hospital managers should monitor the use of section 5, including:

- how quickly patients are assessed for detention and discharged from the holding power
- the attendance times of doctors and approved clinicians following the use of section 5(4), and
- the proportion of cases in which applications for detention are, in fact, made following use of section 5.
Information

18.38 Hospital managers must ensure that patients detained under section 5 are given information about their position and their rights as required by section 132 of the Act.

Medical treatment of patients

18.39 Detaining patients under section 5 does not confer any power under the Act to treat them without their consent. The rules in part 4 of the Act do not apply to these patients. In other words, they are in exactly the same position as patients who are not detained under the Act in respect of consent to treatment.

Transfer to other hospitals

18.40 It is not possible for patients detained under section 5 to be transferred to another hospital under section 19 (because they are not detained by virtue of an application made under part 2 of the Act).

18.41 If a patient with capacity to consent is subject to section 5(2) of the Act but needs to go to another hospital urgently for treatment, security or other exceptional reasons, they can only be taken there if they consent. They may also be taken there if they lack capacity but do not object, providing the transfer is in their best interests.

18.42 If, following transfer, the patient tries to leave the receiving hospital, a new situation will have arisen. In this circumstance, the receiving hospital may need to use section 5(2) to provide authority to detain the patient in that hospital.

18.43 In all cases, if the conditions are met, an emergency application for detention under section 4 of the Act could be made to the sending hospital (see chapter 15). The patient could then be transferred to the receiving hospital under section 19. Alternatively, an emergency application under section 4 could be submitted to the managers of the receiving hospital.

Additional considerations for specific patients

Chapter 19 Children and young people under the age of 18

Chapter 20 People with learning disabilities or autistic spectrum disorders

Chapter 21 People with personality disorders

Chapter 22 Patients concerned with criminal proceedings
19 Children and young people under the age of 18

Why read this chapter?

19.1 Particular issues arise in relation to children (under 16 years of age) and young people (16 or 17 years old). In addition to the Act, other relevant legislation includes the Children’s Act 1989 and 2004, the Mental Capacity Act 2005 and the Human Rights Act 1998 (HRA). Professionals, practitioners and others responsible for the care of children and young people should be familiar with this legislation.

This chapter provides guidance on the role of those with parental responsibility for a child or young person; confidentiality and sharing information; how children and young people should be safeguarded where admission to hospital is not appropriate and on decisions on admission and treatment.

19.2 This chapter sets out some of the key factors that need to be borne in mind and their interconnections, including:

• some of the main concepts that need to be considered when providing care and treatment to children and young people, such as ‘parental responsibility’ and the ‘zone of parental control’
• assessing the competence of children and the capacity of young people to make decisions about their admission and/or treatment
• when informal admission might be appropriate and when the Mental Health Act 1983 (the Act) should be used
• specific provisions relating to the treatment of children and young people under the Act
• the duty to provide age appropriate services
• applications and references to the Tribunal, and
• general duties of local authorities in relation to children and young people in hospital.

General considerations

19.3 In addition to the Act, those responsible for the care of children and young people in hospital should be familiar with other relevant legislation, including the Children Acts 1989 and 2004, the Mental Capacity Act 2005 (the MCA) and the HRA. They should also be aware of the United Nations Convention on the Rights of the Child, and keep up-to-date with relevant case law and guidance.
19.4 When making decisions in relation to the care and treatment of children and young people, practitioners should always keep the following points in mind:

- the best interests of the child or young person must always be a significant consideration
- everyone who works with children has a responsibility for keeping them safe and to take prompt action if welfare needs or safeguarding concerns are identified
- all practitioners and agencies are expected to contribute to whatever actions are needed to safeguard and promote a child or young person's welfare
- the developmental process from childhood to adulthood, particularly during adolescence, involves significant changes in a wide range of areas, such as physical, emotional and cognitive development - these factors need to be taken into account, in addition to the child and young person's personal circumstances, when assessing whether a child or young person has a mental disorder
- children and young people should always be kept as fully informed as possible, just as an adult would be, and should receive clear and detailed information concerning their care and treatment, explained in a way they can understand and in a format that is appropriate to their age
- the child or young person's views, wishes and feelings should always be sought, their views taken seriously and professionals should work with them collaboratively in deciding on how to support that child or young person's needs
- any intervention in the life of a child or young person that is considered necessary by reason of their mental disorder should be the option that is least restrictive and least likely to expose them to the risk of any stigmatisation consistent with effective care and treatment, and it should also result in the least possible separation from family, carers, friends and community or interruption of their education, as is consistent with their wellbeing
- where hospital admission is necessary, the child or young person should be placed as near to their home as reasonably practicable, recognising that placement further away from home increases the separation between the child or young person and their family, carers, friends, community and school
- all children and young people should receive the same access to educational provision as their peers
- children and young people have as much right to expect their dignity to be respected as anyone else, and
- children and young people have as much right to privacy and confidentiality as anyone else.
People with parental responsibility

19.5 Given the central role of those with parental responsibility in relation to decisions about the admission and treatment of their child (see paragraphs 19.37-19.41 below), it is essential that those proposing the admission and/or treatment identify who has parental responsibility.

19.6 Those with parental responsibility will usually, but not always, be the parents of the child or young person. Other people may also acquire parental responsibility. Where the parents are not married, it will be necessary to ascertain whether the father has gained parental responsibility (this might be by a court order, parental responsibility agreement, or (since 1st December 2003) as a result of the father registering his child’s birth jointly with the child’s mother).36 The question whether the father has acquired parental responsibility will also be relevant when ascertaining who is the nearest relative under the Act37 (see paragraph 5.3 above in chapter 5 on The nearest relative).

19.7 It is essential that those taking decisions under the Act are clear about who has parental responsibility. When seeking to determine who has parental responsibility for the child or young person, practitioners should always check with the holders of the child or young person’s medical and/or social service files whether these files include any relevant court orders, and request copies of any such orders. These orders may include care orders, child arrangements orders (which replace residence orders and contact orders)38, special guardianship orders, evidence of appointment as the child or young person’s guardian, parental responsibility agreements or orders under section 4 of the Children Act 1989 and any order under wardship. In addition, practitioners should always check with those caring for the child or young person whether any child arrangements orders, parental responsibility agreements or orders, or special guardianship orders have been obtained.

19.8 In cases where the parents of a child or young person (both of whom have parental responsibility), are separated and the child or young person is living with one parent in accordance with a child arrangements order (formerly known as a residence order), practitioners should be aware that the parents continue to share parental responsibility and both should be involved in making decisions about their child.

19.9 Where a special guardianship order is in place, the special guardian will share parental responsibility with the child or young person’s parents. However, save for certain purposes specified in the Children Act 1989, the special guardian is entitled to exercise parental responsibility to the exclusion of any other person with parental responsibility for the child (apart from another special guardian) (see section 14C of the Children Act 1989).

36 See Department of Health. Reference guide to consent for examination or treatment. 2nd edition. 2009, for a list of persons who may have parental responsibility.
37 Section 26(2)(b) of the Mental Health Act 1983.
Children looked after by the local authority

19.10 Where children or young people are looked after by the local authority (see section 22 of the Children Act 1989), it will be important to ascertain whether they are subject to a care order (or interim care order) or are being voluntarily accommodated by the local authority.

19.11 If a child or young person is voluntarily accommodated by the local authority, parents or other people with parental responsibility have the same rights and responsibilities in relation to treatment as they would otherwise. Accordingly, admission and/or treatment decisions should be discussed with the parent or other person with parental responsibility who continues to have parental responsibility for the child.

19.12 If the child or young person is subject to a care order, the parents (and any others with parental responsibility) share parental responsibility with the local authority. It will therefore be a matter for negotiation and agreement between the local authority and those with parental responsibility as to who should be consulted about admission and/or treatment decisions. However, where satisfied that it is necessary to do so in order to safeguard or promote the child or young person’s welfare, the local authority can limit the extent to which parents (or others) may exercise their parental responsibility (see section 33(3)(b) of the Children Act 1989).

Confidentiality and sharing information

19.13 As with adults, children and young people have a right to confidentiality (see chapter 10). Where children are competent, and young people have the capacity, to make decisions about the use and disclosure of information they have provided in confidence, their views should be respected. (Paragraph 19.23 – 19.36 below provides guidance on assessing a child’s competence and a young person’s capacity to decide.) However, as with adults, in certain circumstances confidential information may be disclosed without the child or young person’s consent; for example if there is reasonable cause to believe that the child or young person is suffering, or is at risk of suffering, significant harm. Practitioners should be familiar with the Department of Health’s Information Sharing: Guidance for practitioners and managers 2008, which includes guidance on assessing a child or young person’s ability to make decisions about sharing information.

19.14 The same principles apply if a child who is competent, or a young person who has capacity, to make a decision regarding the information does not wish their parent (or others with parental responsibility) to be involved in decision-making about their care and treatment. Their decision should be respected unless the disclosure can be justified; for example, because there is cause to suspect that the child or young person is suffering or is likely to suffer, serious harm. Practitioners should seek to encourage the child or young person to involve their parents (unless it
is considered that to do so would not be the best interests of the child or young person. They should also be proactive in discussing with the child or young person the consequences of their parent(s) not being involved.

19.15 Where a child or young person does not wish their parent(s) to be involved, every effort should be made to understand the child or young person’s reasons for this, with a view to ascertaining whether any concerns that the child or young person has can be addressed. For example, the child or young person may be receiving counselling that they do not want their parents to know about, but would be happy for their parents to be informed about more general aspects of their care and treatment. See also paragraph 10.5 on sharing information with carers, relatives and friends, which will also apply to people with parental responsibility.

Safeguarding children and young people where admission to hospital is not appropriate

19.16 There is no minimum age limit for detention in hospital under the Act. It may be used to detain children or young people who need to be admitted to hospital for assessment and/or treatment of their mental disorder, when they cannot be admitted and/or treated on an informal basis (see paragraphs 19.48 - 19.70 below), and where the criteria for detention under the Act are met.

19.17 Where mental health professionals conclude that admission to hospital is not the appropriate course of action, consideration must be given to what alternative means of care and support are necessary to meet the needs of the child or young person. The appropriate action will usually be to refer the child or young person’s case to the relevant local authority’s children’s services, in accordance with local protocols for interagency working to safeguard and promote the welfare of children and young people.

19.18 In cases where admission to hospital under the Act is not appropriate, but the child or young person has significant needs which mean that the level and type of intervention is likely to amount to a deprivation of liberty, their placement in secure accommodation under section 25 of the Children Act 1989 may be required.39 This will be a matter for the local authority children’s services to consider in the light of the provisions of section 25 of the Children Act 1989, and relevant Children Act 1989 guidance.40

---

39 Note that section 25 of the Children Act 1989 refers to ‘restricting liberty’; the court held in Re K (A Child (Secure Accommodation Order: Right to Liberty). Fam 377 that a secure accommodation order is a deprivation of liberty within the meaning of article 5 of the European Convention on Human Rights.

Decisions on admission and treatment of under 18s

19.19 The decision to admit a child or young person to hospital is inextricably linked to the decision to treat them once they have been admitted. Nonetheless, they are different decisions and need to be considered separately. In addition, the law about admission and treatment of young people aged 16 and 17 differs from that applicable to children under 16. Specific issues relating to the admission and treatment of young people are considered at paragraphs 19.52 - 19.64 and those relating to the admission and treatment of under 16s at paragraphs 19.65 - 19.70. However, the following four concepts will be relevant to admission and treatment decisions of both children and young people:

• consent
• assessing capacity (young people) or competence (children) to make decisions
• the role of those with parental responsibility and ‘zone of parental control’, and
• deprivation of liberty (DoL).

Children and young people and consent

19.20 The valid consent of a child or young person will be sufficient authority for their admission to hospital and/or treatment for mental disorder; additional consent by a person with parental responsibility will not be required. In such cases, however, it is good practice to involve the child or young person’s parents and/or others involved in their care in the decision-making process, if the child or young person consents to information about their care and treatment being shared.

19.21 Consent should be sought for each aspect of the child or young person’s admission, care and treatment as it arises. ‘Blanket’ consent forms (ie forms that purport to give consent to any proposed treatment) are not acceptable and should not be used.

19.22 Just as adults must have the capacity to consent to a particular intervention, a young person must have the capacity, or a child must have competence to make that decision (see paragraph 19.23 below). They must also have sufficient information to make that decision and not be subject to any undue influence when doing so (see chapter 4). However, unlike adults, the refusal by a competent child or young person with capacity under the age of 18 may in certain circumstances, be overridden by a court. In the case of Re W (a minor) (medical treatment: court’s jurisdiction), the court decided that it has jurisdiction to override the refusal of a child/young person of treatment in circumstances that will, in all probability, lead to the death of the child or young person or to severe permanent injury; or where there is a serious and imminent risk that the child or young person will suffer grave
and irreversible mental or physical harm. However, the court also emphasised that
the child or young person’s refusal is a very important consideration when deciding
whether treatment should be given, despite the child or young person’s refusal,
noting that its importance increases with their age and maturity. Guidance on the
action that can be taken in cases requiring emergency life-saving treatment is set
out below at paragraph 19.71.

Assessing a young person’s capacity and a child’s competence to make decisions

19.23 Before relying on the consent of a child or young person it will be necessary to
ascertain whether they can give valid consent. The test for assessing whether a
child under 16 can give valid consent differs from that of a young person aged
16 or 17. The capacity of a young person aged 16 or 17 to consent is assessed
in accordance with the MCA, while the test for children under 16 is determined
by considering whether they are ‘Gillick competent’. These different tests are
explained in more detail below.

19.24 Practitioners might find it helpful to approach matters by considering the following
three questions in both children and young person cases, which should be read in
conjunction with the paragraphs below:

• has the child/young person been given the relevant information in an appropriate
  manner (such as age appropriate language)? (See paragraphs 24.35 – 24.36 on
  the importance of giving sufficient information)

• have all practicable steps been taken to help the child/young person make the
decision? The kind of support that might help the decision-making will vary,
depending on the child or young person’s circumstances. Examples include:
  • steps to help the child or young person feel at ease
  • ensuring that those with parental responsibility are available to support their
    child (if that is what the child or young person would like)
  • giving the child or young person time to absorb information at their own pace,
    and
  • considering whether the child or young person has any specific communication
    needs (and if so, adapting accordingly).

• can the child/young person decide whether to consent, or not to consent, to the
  proposed intervention? (See below for the differing tests for assessing a child’s
  competence (Gillick competence) at paragraphs 19.33 – 19.36 and a young
  person’s capacity at paragraphs 19.25 – 19.32).

---

42 See Gillick v West Norfolk and Wisbech Area Health Authority. 1986. A.C. 112.
Decision-making and young people

19.25 The MCA applies to young people aged 16 or 17, so they must be assumed to have capacity to make the decision about a proposed admission to hospital and/or treatment unless it is established that they lack capacity, as is the case with adults (paragraphs 13.10 – 13.14).

19.26 Section 2 of the MCA states that a person lacks capacity in relation to a matter if at the relevant time they are unable to make a decision for themselves in relation to the matter ‘because of an impairment of, or a disturbance in the functioning of, the mind or brain’. It does not matter whether the impairment is permanent or temporary (see section 2(2)). Section 3 of the MCA then states that a person is unable to make a decision if they are unable to:

- understand the information relevant to the decision
- retain that information
- use or weigh that information as part of the process of making that decision, or
- communicate their decision (whether by talking, using sign language or any other means).

19.27 The MCA also states that a person must not be regarded as unable to understand the information relevant to the decision if they are able to understand an explanation of it given in a way that is appropriate to their circumstances. This means that it is essential that steps are taken to enable a person to understand information, such as using simple language and visual aids (see section 3(2) MCA).

19.28 Where there are concerns that the young person is unable to make the particular decision, the young person’s capacity should be assessed by a professional with expertise in working with children and young people.

19.29 If the young person is unable to decide about the proposed action at the relevant time (for example, admission and/or treatment) ‘because of an impairment of, or disturbance in the functioning of, the mind or brain’, they will lack capacity as defined in section 2 of the MCA. The reason for the young person’s inability to decide about the proposed admission or treatment may be because of their mental disorder. Alternatively, the young person’s inability to decide might arise from a temporary ‘impairment of, or disturbance in, the functioning of, their mind or brain’ that does not amount to a mental disorder (for example, an impairment or disturbance caused by the distress related to the proposed admission or treatment). In either case, the young person will lack capacity within the meaning of the MCA and the MCA will apply in the same way as it does for adults. It may therefore be possible for the particular decision to be made in accordance with the MCA for, and in the best interests of, the young person.
19.30 When assessing a young person’s capacity to make the decision in question, practitioners should be aware that in some cases a young person may be unable to make a decision for reasons other than an impairment of, or a disturbance in the functioning of, their mind or brain (even if that is only temporary). In such cases, the person will not lack capacity within the meaning of the MCA. For example, a young person who is informed that they need to be admitted into hospital may, in the particular circumstances of the case, be unable to make a decision. This might be because they find themselves in an unfamiliar and novel situation, having never before been asked to absorb that type and quantity of information, or they are worrying about the implications of deciding one way or the other.

19.31 In such cases (which are likely to be rare) every effort should be made to ensure that the young person is supported in making the decision (for example, by involving those with parental responsibility and/or advocates). Steps should also be taken to explain fully and clearly why admission is thought necessary, what the alternatives to the admission are and why they are considered not to be the best option. Save where the case requires urgent action, the young person should be given the time that they need to think things over and ask for clarification.

19.32 It is important that practitioners are aware of the distinction between those cases that fall within the MCA and those that do not. If it is not clear whether the young person’s inability to decide is because of an ‘impairment of, or a disturbance in the functioning of, the mind or brain’ or whether due to some other reason, a specialist opinion should be sought from a professional with expertise in working with children and young people. The relevance of this distinction to admission and treatment is explained below at paragraphs 19.53 and 19.63.

**Decision-making and children under 16**

19.33 Children under 16 should be assessed to establish whether they have competence to make a particular decision at the time it needs to be made. This is because in the case of Gillick,43 the court held that children who have sufficient understanding and intelligence to enable them to understand fully what is involved in a proposed intervention will also have the competence to consent to that intervention. In such cases, the child is sometimes described as being ‘Gillick competent’. A child may be Gillick competent to consent to admission to hospital, medical treatment, research, or any other activity that requires their consent.

19.34 The concept of Gillick competence is said to reflect the child’s increasing development to maturity. The understanding required to make decisions about different interventions will vary considerably. A child may have the competence to consent to some interventions but not others. The child’s competence to consent should be assessed carefully in relation to each decision that needs to be made.

---

43 Gillick v West Norfolk and Wisbech Area Health Authority. 1986. A.C. 112.
19.35 When considering whether a child has the competence to decide about the proposed intervention, practitioners may find it helpful to consider the following questions.

- Does the child understand the information that is relevant to the decision that needs to be made?
- Can the child hold the information in their mind long enough so that they can use it to make the decision?
- Is the child able to weigh up that information and use it to arrive at a decision?
- Is the child able to communicate their decision (by talking, using sign language or any other means)?

19.36 A child may lack the competence to make the decision in question either because they have not as yet developed the necessary intelligence and understanding to make that particular decision; or for another reason, such as because their mental disorder adversely affects their ability to make the decision. In either case, the child will be considered to lack Gillick competence.

The role of those with parental responsibility and the zone of parental control

19.37 As explained at paragraph 19.5, it will be important to identify those who have parental responsibility for the child or young person who may be able to provide parental consent to the proposed admission and/or treatment. This is because, subject to the child or young person's right to confidentiality (discussed above at 19.13 - 19.15), they should be consulted about the proposed decision concerning their child. In relation to 16 and 17 year olds, if decisions are to be made in accordance with the MCA (on the basis that the young person lacks capacity within the meaning of the MCA) those with parental responsibility should be consulted about the best interests of the young person (see section 4 of the MCA and chapter 13).

19.38 Parental consent should not be relied upon when the child is competent or the young person has capacity to make the particular decision. The effect of section 131(4) of the Act in relation to the informal admission to hospital of a 16 or 17 year old, who has capacity, is that parental consent cannot be relied upon to override that young person's decision about their admission. In relation to decisions about such a young person's treatment, it is inadvisable to rely on the consent of a person with parental responsibility to treat a young person who has capacity to make the decision and has refused the treatment. Similarly, in relation to children, it is not advisable to rely on the consent of a parent with parental responsibility to admit or treat a child who is competent to make the decision and does not consent to it. Although in the past the courts have found that a person with parental responsibility can overrule their child's refusal, such decisions were made before the introduction of the HRA and since then court decisions concerning children and young people
have given greater weight to their views.\footnote{See for example R (on the application of Axon) v Secretary of State for Health and the Family Planning Association. 2006. EWHC 37 (Admin), in which the court expressed doubt as to why a parent should retain a right to parental authority relating to a medical decision where the young person concerned understood the advice provided by the medical professional and its implications.} The proposed action may need to be lawfully authorised by other means (see paragraphs 19.65 - 19.64).

**19.39** In some circumstances, it will be possible for children lacking competence and young people lacking capacity to be admitted to hospital and/or treated on the basis of parental consent (see paragraphs 19.52-19.70). However, before relying on parental consent, practitioners must be satisfied that it is appropriate to do so. This is important because court decisions relating to parental consent have emphasised that there are limits to both the types of decisions that can be made by those with parental responsibility on behalf of their child, and the circumstances in which these decisions can be made.\footnote{See for example, RK v BCC [2011] EWCA Civ 1305, Nielsen v Denmark. 1989. 11 EHRR (paragraph 72) Gillick v West Norfolk and Wisbech Area Health Authority. 1986. A.C. 112 and Hewer v Bryant. 1970. 1 QB 357.} For example, when making decisions on behalf of their child, parents must act in their child’s best interests and those with parental responsibility cannot authorise the deprivation of liberty (discussed below) of their child. This guidance uses the term ‘the zone of parental control’ to highlight the need to establish whether the particular decision can be authorised by parental consent or not. Those cases in which parental consent provides sufficient authority for the proposed intervention to go ahead are described as falling within the zone of parental control.

**19.40** Whether the particular intervention can be undertaken on the basis of parental consent will need to be assessed in the light of the particular circumstances of the case. In determining whether it is appropriate to rely on parental consent, practitioners will need to consider a range of factors. These are set out below, under the two key questions that must be addressed (the term ‘parent’ is used to cover all people with parental responsibility).

• First, is this a decision that a parent should reasonably be expected to make? If the decision goes beyond the kind of decisions parents routinely make in relation to the medical care of their child, clear reasons as to why it is acceptable to rely on parental consent to authorise this particular decision will be required. When considering this question, any relevant human rights decisions made by the courts should be taken into account. Significant factors in determining this question are likely to be:

  • the type and invasiveness of the proposed intervention – the more extreme the intervention, the greater the justification that will be required. Relying on parental consent to authorise an intrusive form of treatment might be justified because it is necessary to prevent a serious deterioration of the child or young person’s health, but this would need to be balanced against other factors such as whether the child or young person is resisting the treatment; whether the specific form of treatment is particularly invasive and/or controversial (eg careful consideration should be given to the appropriateness of relying on parental consent to authorise electro-convulsive therapy (ECT).\footnote{Section 58A of the Act includes specific safeguards for all children and young people for whom ECT is proposed, whether or not they are detained under the Act - see paragraph 19.80 - below.}
• whether the proposed action amounts to a deprivation of liberty; parental consent cannot be relied upon to authorise a deprivation of liberty the age, maturity and understanding of the child or young person: the role of parents in decision-making should diminish as their child develops greater independence, with accordingly greater weight given to the views of the child or young person

• the extent to which the decision accords with the wishes of the child or young person, and whether the child or young person is resisting the decision. Although parental consent should only be considered where the child is assessed as lacking competence or the young person is assessed as lacking the capacity to make the decision, it will still be important to seek their views, and take them into account

• whether the child or young person had expressed any views about the proposed intervention when they had the competence or capacity to make such decisions; for example, if they had expressed a willingness to receive one form of treatment but not another, it might not be appropriate to rely on parental consent to give the treatment that they had previously refused.

• Secondly, if the answer to the first question is ‘yes’, are there any factors that might undermine the validity of parental consent? Irrespective of the nature of the decision being proposed, there may be reasons why relying on the consent of a person with parental responsibility may be inappropriate; for example:

• where the parent is not able to make the relevant decision; for example, this may arise, if the parent lacks capacity as defined in the MCA, because of their own mental health problems or learning disabilities. In cases of doubt, the parent’s capacity will need to be assessed in accordance with the MCA

• where the parent is not able to focus on what course of action is in the best interests of their child; for example, where the parents have gone through a particularly acrimonious divorce, they may find it difficult to separate the decision whether to consent to their child’s admission to hospital from their own hostilities

• where the poor mental health of the child or young person has led to significant distress and/or conflict between the parents, so that they feel unable to decide on what is best for their child and/or cannot agree on what action should be taken, and

• where one parent agrees with the proposed decision but the other is opposed to it. Although parental consent is usually needed from only one person with parental responsibility,47 it may not be appropriate to rely on parental consent if another person with parental responsibility disagrees strongly with the decision to admit and/or treat their child, and is likely to take action to prevent the intervention, such as removing the child from hospital or challenging the decision in court.

---

47 See section 2(7) of the Children Act 1989.
19.41 If the decision is not one that a parent would reasonably be expected to make, or there are concerns about the validity of the consent of the person with parental responsibility, it will not be appropriate to rely on parental consent. In such cases, the proposed intervention must be lawfully authorised by other means. In cases where the proposed intervention relates to the assessment and/or treatment of the child or young person’s mental disorder, they could be admitted and treated under the Act if the criteria are met. This is discussed below. If the Act is not applicable, legal advice should be sought on the need to seek authorisation from a court before further action is taken. If there is doubt as to whether or not parental consent can be relied upon to authorise the particular intervention, professionals should take legal advice so that account may be taken of the most recent case law.

Deprivation of liberty

19.42 Determining whether the admission to hospital and assessment and/or the treatment proposed amounts to a deprivation of liberty is as important for admission and treatment decisions concerning children and young people as it is for adults. Article 5 (the right to liberty) of the European Convention on Human Rights (ECHR) applies to individuals of all ages.

19.43 Where the proposed admission and/or treatment of a child or young person amounts to a deprivation of liberty within the meaning of article 5, they cannot be admitted or treated informally on the basis of parental consent. This is because there is no lawful authority for doing so. The courts have made clear that while those with parental responsibility may impose, or may authorise others to impose, restrictions on the liberty of their child, they cannot authorise restrictions that amount to the deprivation of liberty of their child.\(^48\) Nor does the MCA permit young people, who lack capacity to make such decisions, to be admitted or treated if the admission and/or treatment amount to a deprivation of liberty.

19.44 In establishing whether there is a deprivation of liberty it is necessary to consider the circumstances of each case, looking at a range of factors, such as the type and duration of the restrictions imposed on the person and the impact of such restrictions on that person. Chapter 13, paragraphs 13.31 – 13.32 provides guidance on assessing whether the particular circumstances give rise to a deprivation of liberty.

19.45 An additional and significant factor when considering whether the proposed intervention in relation to a child or young person is a restriction of liberty or amounts to a deprivation of liberty is the role of parental control and supervision. Practitioners will need to determine whether the care regime for, and restrictions placed on, the child or young person accord with the degree of parenting control and supervision that would be expected for a child or young person of that age.

---

\(^48\) RK V BCC. 2011. EWCA Civ 1305, paragraphs 14 and 15,
For example, whereas it is usual for a child of under 12 years not to be allowed out unaccompanied without their parent’s permission, this would not usually be an acceptable restriction on a 17 year old. However, account would also need to be taken of the particular experience of the child or young person. For example, a younger child who has who has been caring for their parent, including shopping for the household and/or accompanying their parent to medical appointments, might not be used to being prevented from going out unaccompanied.

19.46 Decisions as to whether the child or young person’s admission and/or treatment amounts to a deprivation of liberty must be considered on a case by case basis. Where children and young people are admitted informally, the question of whether the care regime amounts to a deprivation of liberty must be kept under regular review. This is because although initially informal admission might be appropriate because the child or young person’s care plan involves only restrictions of liberty, a change in circumstances may mean that the restrictions placed upon the child or young person amount to a deprivation of liberty for which lawful authority will be needed.

19.47 Please refer to chapter 26, which provides guidance on the use of restrictive interventions.

Informal admission and treatment

19.48 The law about admission to hospital and treatment for mental disorder of young people aged 16 and 17 differs from that of children under 16. However, in both cases, whether they are competent (in the case of children) or have capacity (in the case of young people) to decide about their admission and/or treatment is of central importance. (See paragraphs 19.23 – 19.35 above for assessing the competence of children and the capacity of young people to make decisions).

19.49 In relation to admission, as with adults, children and young people may be admitted to hospital for treatment for mental disorder informally, on the basis of their consent (see section 131 of the Act (informal admission of patients). Where they lack capacity as defined in the MCA (16 or 17 year olds) or competence (‘Gillick’ competence in respect of under 16s) they can be admitted informally in the circumstances outlined below.

19.50 In all cases concerning admission and/or treatment, practitioners must determine whether the proposed intervention can be undertaken on an informal basis. Informal admission and treatment can be authorised by either the child or young person’s consent, parental consent (where the child lacks competence or the young person lacks capacity) or in relation to young people who lack capacity, in accordance with the MCA. The following paragraphs (19.52 – 19.70) provide guidance on how to determine whether such routes to informal admission and/or treatment are applicable. These will have to be considered in the light of the particular circumstances of each case. Where the proposed admission and/or
treatment cannot be authorised on an informal basis, the criteria for detention under the Act must be met for the child or young person to be admitted under the Act or (where the Act is not applicable), the admission can be authorised by the high court. The only exception to this is where a life-threatening emergency has arisen (see paragraph 19.71).

19.51 In cases where a child or young person cannot be admitted and/or treated informally, and the criteria for detention under the Act are not met, legal advice should be obtained on whether to seek the assistance of the High Court. The court’s authorisation may be sought by way of an order or declaration, under its inherent jurisdiction, or for a section 8 order under the Children Act 1989. Whether the Court is prepared to assist will depend on the facts of the particular case. It should also be noted that the Court of Protection can make a deprivation of liberty order in respect of young people aged 16 and 17.

16 and 17 year olds

Informal admission of 16 and 17 year olds with capacity to consent

19.52 The effect of section 131 of the Act is that where a young person aged 16 or 17 has capacity (as defined in the MCA) to consent to being admitted to hospital for treatment for mental disorder, they may either consent, or refuse to consent, to the proposed informal admission. If a young person has the capacity to consent to informal admission and gives such consent, they can be admitted, irrespective of the views of a person with parental responsibility (who cannot prevent the admission). If the young person with capacity does not consent to the admission, then a person with parental responsibility cannot consent on their behalf.

19.53 In some cases, the young person may be unable to decide whether or not to agree to their admission to hospital, but not because they lack capacity within the meaning of the MCA. For example, this might be because, despite every effort in helping the young person to make this decision, the young person finds the decision too difficult to make (see paragraphs 19.30 – 19.32 above). In such cases, it will not be possible for a person with parental responsibility to consent on their behalf. This is because section 131 of the Act only allows informal admission on the basis of parental consent if the young person lacks capacity within the meaning of the MCA.

19.54 Where the young person does not consent to their admission to hospital, but the admission is thought to be necessary, consideration should be given to whether the criteria for admission under the Act are met. If the Act is not applicable, legal advice should be sought on the need to seek authorisation from the court before further action is taken.
19.55 If the young person is admitted informally, the considerations set out in paragraphs 19.58 - 19.64 will apply to their treatment.

**Informal admission of 16 and 17 year olds who lack capacity to consent**

19.56 Where a young person aged 16 or 17 lacks capacity it may be possible for them to be admitted informally, in accordance with the MCA unless the admission and treatment amounts to a deprivation of liberty. In some circumstances it may be possible for a person with parental responsibility to consent on behalf of the young person who is not capable of making decisions about their admission to hospital, provided that the admission and treatment does not amount to a deprivation of liberty. The factors to consider whether it is possible to rely on parental consent are set out in paragraphs 19.37 – 19.41 above.

19.57 If the proposed admission and/or treatment will, or is likely to, amount to a deprivation of liberty, the young person cannot be admitted informally. In cases where neither the MCA, nor parental consent can authorise informal admission, but the admission is thought to be necessary, consideration should be given to as whether the criteria for admission under the Act are met. If the Act is not applicable, legal advice should be sought on the need to seek authorisation from the court before further action is taken.

**Informal treatment of 16 and 17 year olds with capacity to consent**

19.58 By virtue of section 8 of the Family Law Reform Act 1969, young people aged 16 or 17 can consent to their own medical treatment and to any ancillary procedures involved in that treatment, such as an anaesthetic. Accordingly, treatment can be given if the young person, who has capacity, gives valid consent. (See paragraphs 19.20 – 19.22 above on consent and assessing a young person’s capacity to make decisions and consent.)

19.59 Where a young person has the capacity to consent to proposed medical treatment but refuses to consent, it would be inadvisable to rely on the consent of a person with parental responsibility in order to treat the young person (see above, paragraph 19.38). In such cases, consideration should be given to whether admission under the Act for the purposes of treatment is necessary, and if so, whether the criteria are met. If the Act is not applicable, legal advice should be sought on the need to seek authorisation from the court before further action is taken.
Informal treatment of 16 and 17 year olds who lack capacity to consent

19.60 Different considerations apply to a decision to treat a young person aged 16 or 17 informally where the young person lacks capacity or is otherwise not able to decide whether or not to consent to the proposed treatment.

19.61 Where the young person lacks capacity, the MCA will apply in the same way as it does to those aged 18 and over, and treatment may be given in accordance with the MCA, unless it amounts to a deprivation of liberty.

19.62 A person with parental responsibility may also be able to consent on behalf of the young person who lacks capacity to make decisions about their treatment, provided that the treatment does not amount to a deprivation of liberty. The factors to consider whether it is possible to rely on parental consent are set out in paragraphs 19.40 – 19.41 above.

19.63 A person with parental responsibility may be able to consent to the treatment on behalf of a young person who although is unable to decide about the proposed treatment, does not lack capacity within the meaning of the MCA (the circumstances when this might occur is explained at paragraph 19.30 above). In such cases every effort must be made to help the young person in making the decision for themselves (see paragraph 19.31 above).

19.64 If it is not possible to provide treatment relying on the MCA or parental consent, consideration should be given to whether admission under the Act for the purposes of treatment is necessary, and if so, whether the criteria are met. If the Act is not applicable, legal advice should be sought on the need to seek authorisation from the court before further action is taken.

Under 16s

Informal admission and treatment of under 16s who are Gillick competent

19.65 Where a child who is Gillick competent to decide about their admission to hospital for assessment and/or treatment of their mental disorder consents to this, they may be admitted to hospital as an informal patient. A child who is Gillick competent to do so and has consented to being admitted informally, may also be given treatment if they are competent to consent to the proposed treatment, and do consent. Consent will be required for each aspect of the child's care and treatment as it arises. This will involve an assessment of the child's competence to make the particular treatment decision and, where the child is competent to do so, confirmation that they have given their consent.
Where a child who is Gillick competent refuses to be admitted for treatment, for the reasons outlined in paragraph 19.38 above, it may be inadvisable to rely on the consent of a person with parental responsibility. In such cases, consideration should be given to whether admission under the Act is necessary, and if so, whether the criteria are met. If the Act is not applicable, legal advice should be sought on the need to seek authorisation from the court before further action is taken.

Informal admission and treatment of under 16s who are not Gillick competent

Where a child is not Gillick competent then it may be possible for a person with parental responsibility to consent, on their behalf, to their informal admission to hospital for treatment for mental disorder. The factors to consider whether it is appropriate to rely on parental consent are set out in paragraphs 19.40 - 19.41 above.

If parental consent can be relied upon and consent is given by a person with parental responsibility, then the child may be admitted and treated as an informal patient.

The fact that a person with parental responsibility has consented to the informal admission of their child does not mean that consent has been given to all components of the child’s treatment programme. Consent will be required for each aspect of the child’s care and treatment as it arises. This will involve consideration as to whether the child is competent to make decisions about their treatment, and if not whether such treatment can be authorised by parental consent.

If it is not considered appropriate to rely on parental consent for the proposed admission and/or treatment, for example because the admission and/or treatment amounts to a deprivation of liberty, or the consent of a person with parental responsibility is not given, the child cannot be admitted and treated informally. In such cases, consideration should be given to whether admission under the Act is necessary, and if so, whether the criteria are met. If the Act is not applicable, legal advice should be sought on the need to seek authorisation from the court before further action is taken.

Emergency treatment

A life-threatening emergency may arise when treatment needs to be given but it is not possible to rely on the consent of the child, young person or person with parental responsibility and there is no time to seek authorisation from the court or (where applicable) to detain and treat under the Act. If the failure to treat the child or young person would be likely to lead to their death or to severe permanent injury, treatment may be given without their consent, even if this means overriding their
refusal when they have the competence (children) or the capacity (young people and those with parental responsibility), to make this treatment decision. This is because in such cases, the courts have stated that doubt should be resolved in favour of the preservation of life, and it will be acceptable to undertake treatment to preserve life or prevent irreversible serious deterioration of the child or young person's condition.

19.72 The treatment given must be no more than necessary and in the best interests of the child or young person. Once the child or young person's condition is stabilised, legal authority for on-going treatment must be established; this might be on an informal basis (see paragraphs 19.48 - 19.70 above) or in accordance with either a court order or, if the child or young person is detained, under part 4 of the Act (see paragraphs 19.78 -19.88).

Assessing whether to make an application for admission under the Act

19.73 At least one of the people involved in assessing whether a child or young person should be admitted to hospital, and if so, whether they should be detained under the Act (ie one of the two medical practitioners or the approved mental health professional (AMHP)), should be a Child and Adolescent Mental Health Services (CAMHS) professional. Where this is not possible, and admission to hospital is considered necessary, the AMHP should have access to an AMHP with experience of working in CAMHS, and the medical practitioners should consult a CAMHS clinician as soon as possible and involve them as closely as the circumstances of the case allow. In cases where the child or young person has complex or multiple needs, other clinicians may need to be involved, for example, a learning disability CAMHS consultant where the child or young person has a learning disability. See chapter 14 for fuller information on the assessment process.

19.74 As part of their role in setting up an assessment (see paragraphs 14.45 – 14.52) AMHPs should consider whether to inform the relevant local authority children’s services that an assessment is being arranged and request that any relevant information about the child or young person is provided prior to the assessment. The AMHP should consider with children’s services whether a representative from children’s services should attend the assessment. The AMHP should employ their best efforts to identify those who have parental responsibility, and who would be the nearest relative (see chapter 5).

Information to under 18s detained under the Act

19.75 Chapter 4 provides guidance on the provision of information to people detained under the Act and chapter 6 provides guidance on the role of independent mental health advocates. Both these chapters apply to children and young people.
19.76 Hospital managers should ensure that staff providing children and young people with information about their rights in accordance with section 132 of the Act have sufficient knowledge and experience to be able to provide information to children and young people and determine whether the information has been understood. Written age appropriate information should also be made available.

19.77 Independent mental health advocates (IMHAs) have an important role in ensuring that children and young people understand, and are able to exercise, their rights under the Act, such as applying to a Tribunal (see below at paragraph 19.106), and to the hospital managers for discharge from detention (see chapter 38). It is therefore essential that the IMHAs working in CAMHS (or providing assistance to under 18s who are admitted to adult psychiatric wards – see paragraph 19.100 below) have experience of working with children and young people and an understanding of children’s services and relevant law and policy, as well as an in-depth knowledge of the Act.

Treatments for under 18s regulated by the Act

19.78 As with adults, treatment for mental disorder for under 18s is regulated by part 4 and part 4A of the Act. The following paragraphs highlight issues of specific relevance to children and young people under 18. These points should be read in conjunction with the guidance in chapters 24 and 25. Although in some cases the Act provides that treatment can be given to a child or young person without their consent, their consent should still be sought, wherever practicable (see paragraph 24.39. This will necessitate an assessment of the child’s competence or young person’s capacity to decide about the treatment proposed (see paragraphs 19.23 - 19.36 above).

Treatments requiring the patient’s consent (section 57)

19.79a Treatment covered by section 57 of the Act (primarily neurosurgery for mental disorder) cannot be given to a child or young person who does not personally consent to it, whether they are detained or not. These treatments cannot, therefore, be given to any young person or child who does not have the competence or capacity to consent, even if a person with parental responsibility consents. If such treatment is proposed in respect of a child or young person who has the competence or capacity to consent (such cases are likely to be rare), the requirements set out under section 57 of the Act must be met before the treatment can be given and these are explained in chapter 25 (paragraphs 25.6 – 25.9). The child or young person is eligible for help from an IMHA.
Electro-convulsive therapy (ECT) (section 58A)

19.79b The Act provides specific safeguards in relation to treatment with Electro-convulsive therapy ECT for patients who are under 18.

19.80 As with adults, children and young people who are detained under the Act cannot be given ECT without their consent, if they are capable of consenting to the treatment, unless it is emergency treatment. (Treatment, including ECT, can be given in emergencies under section 62 of the Act (‘emergency treatment’), see chapter 25 paragraph 25.32 – 25.34c. If they are not capable of consenting, or if it is emergency treatment, they may be given ECT without their consent in accordance with the rules described in chapter 25.

19.81 Children and young people on a community treatment order (CTO) who are competent (children) or who have capacity (young people) to make such treatment decisions cannot be given ECT without their consent, even in emergencies, unless they have been recalled to hospital (in which case the treatment provisions under part 4, referred to above, will apply). Part 4A sets out the circumstances in which children who are not competent, and young people who lack capacity, to consent can be given treatment, including ECT when on a CTO. Part 4A is explained in chapter 25.

19.82 Whether or not they are detained under the Act, save where emergency treatment is given under section 62 of the Act, no child or young person under the age of 18 can be given ECT without the approval of a second opinion appointed doctor (SOAD). This means:

- for children and young people who are ‘capable of understanding the nature, purpose and likely effects’ of ECT and consent to it, the SOAD must certify, in writing, that the child or young person is capable of consenting, they have consented to ECT, and it is appropriate for ECT to be given

- for children and young people who are not capable of consenting to ECT, the SOAD must certify that the child or young person is not capable of understanding the nature, purpose and likely effects of ECT, but it is appropriate for ECT to be given. In addition, in relation to a young person who lacks capacity to consent to ECT, the SOAD must certify that giving the treatment would not conflict with a decision made by a deputy appointed by the Court of Protection, or the Court of Protection.

19.83 The legal authority to give ECT to children and young people who are neither detained under the Act, nor subject to a CTO and who lack the capacity (young people) or the competence (children) to consent to ECT will need to be clarified. (The approval of a SOAD is not in itself sufficient authorisation for ECT to be given.) This means that in the case of young people who lack capacity, the MCA could provide the necessary authority to give ECT, so long as this would not involve a deprivation of liberty.
19.84 Although the Act does not prevent a person with parental responsibility from consenting to ECT on behalf of a child who lacks competence, or young person who lacks capacity, to consent and who is neither detained under the Act nor a patient subject to a CTO, careful consideration should be given as to whether to rely on parental consent. This is because, although there is no case law at present directly on this point, given the nature and invasiveness of ECT, it may lie outside the types of decision that parents can make on behalf of their child. The factors to consider whether it is possible to rely on parental consent are set out in paragraphs 19.40 - 19.41 above.

19.85 In cases where ECT cannot be given on the basis of either the child or young person’s consent, or parental consent, or the MCA, consideration should be given to whether the child or young person should be admitted under the Act for ECT, if the criteria are met (or recalled to hospital, in case of a community patient).

19.86 In cases where the Act is not applicable, court authorisation should be sought. Although the application to the court should be made before a SOAD is asked to approve the treatment, it would be good practice to seek the views of a SOAD before making the application as the court is likely to wish to consider a SOAD’s opinion before determining whether to authorise ECT. In practice, the issues the court is likely to address will mirror those that the SOAD is required to consider.

19.87 All children and young people, whether or not they are detained under the Act, are eligible for help from IMHAs if ECT is proposed.

Other treatments under the Act in respect of patients who are liable to be detained and CTO patients who have been recalled

19.88 Part 4 of the Act sets out when patients (of all ages) who are liable to be detained, or have been recalled to hospital from a CTO, can be given other types of treatment for mental disorder. These provisions are set out in chapters 24 and 25.

Age-appropriate services

19.89 Section 131A of the Act says that children and young people admitted to hospital for the treatment of mental disorder should be accommodated in an environment that is suitable for their age (subject to their needs). This duty applies to the admission of all under 18s, whether or not they are detained under the Act and includes children and young people who are subject to community treatment order (CTO), who are recalled to hospital, or who agree to informal admission.
19.90 This means that children and young people should have:
- appropriate physical facilities
- staff with the right training, skills and knowledge to understand and address their specific needs as children and young people
- a hospital routine that will allow their personal, social and educational development to continue as normally as possible, and
- equal access to educational opportunities as their peers, in so far as that is consistent with their ability to make use of them, considering their mental state.

19.91 The duty requires hospital managers to ensure that the environment in the hospital is suitable. When determining the suitability of the environment, they must consult a person whom they consider to have knowledge or experience in working with children and young people receiving in-patient mental healthcare and who are able to make this assessment (this will usually be a CAMHS professional). The duty applies to all in-patient mental health services, including highly specialised services such as eating disorder units, and learning disability services.

19.92 The Care Quality Commission (CQC) must be notified without delay if an under 18 year old is placed on an adult psychiatric ward for longer than a continuous period of 48 hours. Section 140 of the Act requires clinical commissioning groups to notify local authorities in their area of the hospitals that are designed to be specifically suitable for patients under the age of 18.

19.93 Section 131A does not prohibit all admissions of individuals aged under 18 to adult wards. However, such admissions are permissible only in exceptional circumstances, where this is considered to be the most suitable place for an under 18 year old. Generally, these exceptional circumstances fall into two distinct categories, referred to in this guidance as ‘emergency situations’ and ‘atypical cases’ (explained below).

19.94 In all cases, to be lawful, the admission of a person aged under 18 to an adult ward must be suitable for that particular individual at the time that the admission is being considered.

19.95 In the case of children aged under 16, it is Government policy that they should not be admitted to an adult ward. If this should happen, such an admission should be treated as a serious untoward incident and fully investigated and reported accordingly.

19.96 In all cases where an under 18 year old is admitted to an adult ward, the reasons for the admission should be recorded, including an explanation as to why this is considered to be in the best interests of the child or young person, and why other options were not available and/or suitable. Details of what actions (that are, necessary to rectify the situation) will be taken by whom, and when, should also be recorded.

---

In a small number of cases the child or young person’s need to be accommodated in a safe environment could, in the short term, take precedence over the suitability of that environment for their age (referred to as an ‘emergency situation’). Such situations will arise where the child or young person needs to be admitted urgently to hospital and accordingly waiting for a bed to become available on a CAMHS unit is not considered to be an acceptable option. An ‘emergency situation’ should be a rare and unusual case. It is not unusual for children or young people to require unplanned admissions and accordingly local policies should be in place to ensure that such admissions are to age appropriate environments.

It is important to recognise that there is a clear difference between what is a suitable environment for a child or young person in an emergency situation, and what is a suitable environment for a child or young person on a longer-term basis. In an emergency, such as when the patient is in crisis, the first imperative is to ensure that the child or young person is in a safe environment. Once the initial emergency situation is over, hospital managers must ensure that action is taken to transfer the child or young person to more appropriate accommodation unless they have determined that the adult ward is the most appropriate environment for the child or young person. In determining whether the environment is suitable beyond the initial crisis, in addition to the appropriateness of the mental healthcare that can be provided on the adult ward, the hospital managers would need to consider issues such as whether the child or young person can mix with individuals of their own age, can receive visitors of all ages, and has access to education.

An ‘atypical case’ describes a situation where those arranging a young person’s admission conclude that the best option for that young person is to be admitted to an adult ward even if a CAMHS bed were available. While likely to be rare, such cases may arise from time to time. For example, when the young person is very close to their 18th birthday and placing them on a CAMHS ward for a matter of weeks or days before transferring them to an adult ward would be counter-therapeutic for that young person. In some cases the young person may express a preference to be on an adult ward, such as when they are under the care of the early intervention psychosis (EIP) team which has beds on an adult ward. The young person may prefer to have continuity of care from the EIP team rather than be admitted to a unit with different clinicians. Or if a young mother requires admission for post-natal depression, admission to an adult mother and baby unit would allow the young mother to remain with her child, whereas admission to a CAMHS unit would not.

Where, whether owing to an emergency or because the admission is an ‘atypical’ case, it is considered appropriate for the child or young person to be admitted to an adult ward, it will still be necessary to ensure that appropriate steps have been taken to safeguard the young person. Discrete accommodation in an adult ward, with facilities, security and staffing appropriate to the needs of that young person, might provide the most satisfactory solution; for example, young female patients should be placed in single sex accommodation. Wherever possible all those involved in the care and treatment of children and young people should be CAMHS specialists.
Anyone who looks after them must always have enhanced disclosure clearance from the disclosure and barring service (DBS), including a barred list check, and that clearance must be kept up-to-date (see also paragraph 12.20).

19.101 Where the placement of a child or young person on a CAMHS unit might have a detrimental effect on the other children and young people, the hospital managers need to ensure that the interests of other patients are protected. However, the needs of other children and young people should not override the need to provide accommodation in an environment that is suitable for the patient’s age (subject to their needs) for an individual patient aged under 18. This means that the detrimental impact on other young patients is not an acceptable reason for transferring a child or young person to an adult ward.

19.102 Children and young people aged under 18 should also have access to age-appropriate leisure activities and facilities for visits from parents, guardians, siblings, or carers.

19.103 Section 131a of the Act applies to under 18s who are detained in hospital, as a place of safety under sections 135 or 136 of the Act, but not to other places of safety. As explained above, under 18s may be admitted to adult hospital facilities in ‘emergency situations’. A child or young person may be detained in a place of safety that is not specifically designated for under 18s if this is assessed to be a suitable environment for the child or young person at that time, given the particular circumstances. If, subsequently, the child or young person is assessed as requiring admission to hospital, the admission must be to an age-appropriate (and otherwise suitable) environment and this should be arranged as soon as possible. Section 131a should never be relied upon as a reason for detaining a child or young person under the age of 18 in a police cell rather than a hospital (see paragraph 104 below ‘Under 18s detention in a place of safety’). The safety of the child or young person should always be central to the decision-making process.

Under 18s detention in a place of safety

19.104 As chapter 16 (Police powers and places of safety – under sections 135 or 136 of the Act) states, the process for identifying the most appropriate place of safety to which a particular person is to be removed should be clearly outlined in the local place of safety policy. This applies to children and young people as much as adults. Unless there are specific arrangements in place with CAMHS, the healthcare setting identified by local policies as the place of safety should be used, and the fact that this is attached to an adult ward should not preclude its use for this purpose. In addition, the policies should make clear that a person under 18 should not be removed to a police station as a place of safety unless there are exceptional circumstances, and clear reasons (which should be recorded according to the local policy and shared with relevant local authority children’s services), why this is the most appropriate place in which to safeguard that child or young person (see paragraphs 16.42 – 16.50).
The responsible clinician and others caring for and treating under 18s

19.105 Wherever possible, those responsible for the care and treatment of children and young people should be CAMHS specialists. Chapter 36 (allocating or changing a responsible clinician) provides guidance in relation to identifying responsible clinicians. In the exceptional cases where a young person is admitted to an adult psychiatric ward, the hospital managers must ensure that the clinical staff have regular access to, and make use of, a CAMHS specialist for advice and consultation.

The Tribunal

19.106 Children and young people who are detained under the Act have the same rights as other patients to apply to the Tribunal (see chapter 12). It is important that children and young people are informed of their right to apply to the Tribunal and are assisted in obtaining legal representation at an early stage. As noted above (paragraph 19.77), IMHAs have an important role to in ensuring that children and young people understand, and are able to exercise, their rights under the Act. The IMHA’s help in relation to applications to Tribunal will be particularly important, such as helping the child or young person contact a lawyer and understanding the role of the Tribunal, and what to expect at the Tribunal hearing.

19.107 A CAMHS panel of the Tribunal has been established so that, wherever possible, at least one member of the panel considering a child or young person’s case will have experience of working with under 18s.

19.108 Professionals preparing social circumstances reports for the Tribunal must ensure that such reports include any information required in the Tribunal’s Practice Directions.50

19.109 In addition, hospital managers should ensure that systems are in place to identify cases requiring referral to a Tribunal in accordance with section 68 of the Act. They have a duty to refer patients to the Tribunal under section 68(6) of the Act after a one-year period without a Tribunal hearing in relation to under 18s. In addition, hospital managers should consider asking that the Secretary of State refers a child or young person’s case to a Tribunal under section 67 of the Act in cases where that child or young person is unable to have their case considered speedily by the Tribunal (see chapter 37 paragraph 37.41 – 37.43)

50 At the time of publication this was detailed in Annex E (Patients under the age of 18) of the Practice Direction, dated 28th October 2013, First Tier Tribunal, Health Education and Social Care Chamber Statements and Reports in Mental Health Cases.
After-care

19.110 Prior to their discharge from hospital all children and young people should have an assessment of their needs, on which a care plan for their after-care is based. Guidance on the duty to provide after-care under section 117 of the Act, is set out in chapter 33. Such guidance is applicable to individuals of all ages, but in relation to children and young people additional factors will need to be considered. This may include ensuring that the after-care integrates with any existing provision made for looked after children and those with special educational needs or disabilities, as well as safeguarding vulnerable children. Whether or not section 117 of the Act applies, a child or young person who has been admitted to hospital for assessment and/or treatment of their mental disorder may be ‘a child in need’ for the purpose of section 17 of the Children Act 1989. See also paragraph 19.117 below in relation to children and young people with special educational needs.

19.111 For information about after-care payments, please see chapter 33 for relevant details covering children and young people.

Community treatment order (CTO) and guardianship

19.112 There is no lower age limit for a CTO. The number of children and young people whose clinical and family circumstances make them suitable to move from being detained to being a community patient is likely to be small, but it should be used where appropriate (see chapters 29 and 31).

19.113 Parents (or other people with parental responsibility) cannot consent (or refuse consent) to treatment for mental disorder on a child or young person’s behalf while the child or young person is on a CTO. If community patients under the age of 18 are living with one or both parents, the responsible clinician should consult with the parent(s) about the particular treatment (subject to the normal considerations of patient confidentiality), bearing in mind that if a parent objects to any aspect of the community and treatment plan, it would make it very difficult for the child or young person to live with the parents whilst on a CTO. This dialogue should continue throughout the period of the CTO. If a parent is unhappy with the particular treatment or conditions attached to the CTO, and the child is not competent, or young person lacks capacity, to consent, a review by the child or young person’s team should take place to consider whether the treatment and care plan, and CTO in general, are still appropriate for them.

19.114 The powers of guardianship under the Act apply to individuals aged 16 and over and therefore may be applicable to young people aged 16 and 17 (see chapter 30).
Education

19.115 Local authorities must make arrangements to provide suitable education for all children of compulsory school age. Suitable education means education suitable to their age, ability and aptitude and to any special educational needs (SEN) they may have. This education must be full-time, unless the local authority determines that, for reasons relating to the physical or mental health of the child, a reduced level of education would be in the child’s best interests. Children and young people admitted to hospital under the Act should have access to education that is on a par with that of mainstream provision, including appropriate support for those with SEN. Practitioners and local authorities should work together to minimise any disruption to education, and in order to ensure that local authorities can meet their duty to provide suitable education, when a child or young person is admitted under the Act, they should be notified as soon as possible, ideally in advance of the placement. The duty on local authorities to ensure suitable education also applies when a child or young person is receiving treatment in an area where they are not normally resident.

19.116 Young people over the school leaving age should also be encouraged to continue learning. Under Raising the Participation Age legislation (forming part of the Education and Skills Act 2008), local authorities have duties to promote effective participation in education or training for 16 and 17 year olds including those admitted to hospital.

19.117 When a child or young person with a statement SEN, a learning difficulty assessment (LDA) or an education, health and care plan (EHC plan) is admitted to hospital under the Act the local authority who maintains the plan should be informed, so that they can ensure that educational support continues to be provided. If necessary, the plan may be reviewed and amended to ensure targets and provisions remain appropriate. The local authority must also be involved in creating the discharge plan, so that the statement, LDA or EHC plan is revised as necessary to continue to reflect the child or young people educational, health and social care needs.

Transition from CAMHS

19.118 Young people’s transition from CAMHS, whether they are being discharged from mental health services or moving on to adult mental health services, requires careful planning, which should start at least six months before the young person is due to leave CAMHS. The planning process should ensure the full involvement of the child or young person and (subject to issues of confidentiality – see paragraphs 19.13 - 19.15) those who will be involved in their care, including those with parental responsibility. Key factors are that the young person should be listened to and helped to improve their self-sufficiency; they should be provided with appropriate and accessible information so they can exercise choice effectively and participate in decisions about which adult and other services they receive.
19.119 Where a young person has an EHC plan that includes agreed provision to support mental health then health commissioners must put arrangements in place to secure that provision. Commissioners should be aware that where appropriate, local authorities may maintain EHC plans up to the age of 25.

**Duties of local authorities in relation to children and young people in hospital**

19.120 Local authorities should ensure that they arrange for visits to be made to:

- children and young people looked after by them who are in hospital, whether or not they are under a care order, and
- children and young people accommodated or intended to be accommodated for three months or more by NHS bodies, or independent hospitals.\(^{51}\) Such visits must be undertaken in accordance with the relevant regulations.\(^{52}\)

19.121 In addition, local authorities should consider whether it would be appropriate to provide financial support to enable families to visit children and young people placed in hospital, taking into account their duties to promote contact between children and young people and their families. Such duties arise when children and young people are being looked after by local authorities as well as when they are accommodated in hospital for three months or more. The provision of financial support to cover the travel costs of visiting might be essential for some families on low incomes, especially if their child has been placed out of area (see paragraphs 8A and 16 of schedule 2 of the Children Act 1989).

19.122 Section 116 of the Act also places duties on local authorities in respect of children and young people in their care by virtue of a care order and who are admitted to a hospital, independent hospital or care home in England and Wales. In such cases, local authorities are required to arrange for the child or young person to be visited and to take such other steps in relation to the child or young person while they are in a hospital, independent hospital or care home as would be expected to be taken by their parent(s).

19.123 Local authorities are under a duty in the Children Act 1989 to:

- promote contact between children and young people who are children in need, or looked after children, and their families, if they live away from home, and to help them get back together (paragraphs 10 and 15 of Schedule 2 to the Children Act 1989), and
- arrange for people (independent visitors) to visit, advise and befriend children and young people looked after by the authority wherever they are, if they have not been regularly visited by their parents (paragraph 17 of Schedule 2 to the Children Act 1989).

---

\(^{51}\) See sections 85 and 86 of the Children Act 1989.

\(^{52}\) See Visits to Children in Long-Term Residential Care Regulations 2011. (Statutory Instrument 2011/1010);
19.124 Local authorities should be alerted if the whereabouts of the person with parental responsibility is not known or if that person has not visited the child or young person for a significant period of time. When alerted to this situation the local authority should consider whether visits should be arranged.

19.125 Hospital managers should set up systems to ensure that directors of children’s services are notified of cases in which their duty to visit and consider the welfare of children and young people in hospital arises (see chapter 37 for further details on the functions of hospital managers).

This material does not form part of the Code. It is provided for assistance only.

**Notes to flowcharts**

The following flowcharts are for assistance only and do not form part of the Code. They summarise the issues that practitioners will need to consider when determining the legal authority to admit and/or treat a child (under 16s) or young person (16 or 17 year olds). They should be read in conjunction with this chapter. The additional notes should be read with the corresponding boxes in the flow chart. The numbers in brackets refer to paragraphs of the Code.
Figure 6: Informal admission and treatment of under 16s

The first question in the flowchart is to ask whether the child is competent to decide about the proposed admission/treatment.

If the answer to this question is ‘Yes’, then the next question is whether the child does consent to the admission and/or treatment. If the child does consent, the child can be admitted and treated informally on basis of their consent. However, if the child does not consent admission under the Act will need to be considered. If the criteria for admission under the Act are not met, the child cannot be admitted or treated without court authorisation (although it should be noted that action can be taken in life-threatening emergencies).

If the child is not competent to decide about the proposed admission/treatment, the next question is whether the admission or treatment amounts to a deprivation of liberty. If the answer to this question is ‘Yes’, admission under the Act will need to be considered. If the criteria for admission under the Act are not met, the child cannot be admitted or treated without court authorisation (although it should be noted that action can be taken in life-threatening emergencies).

If the child’s admission or treatment does not amount to a deprivation of liberty, the next question is whether the decision is within the zone of parental control. If the answer to this question is ‘No’, admission under the Act will need to be considered. If the criteria for admission under the Act are not met, it will be necessary to apply to the court for authorisation (although it should be noted that action can be taken in life-threatening emergencies).

If the decision to admit and/or treat the child does fall within the zone of parental control, the next question is whether the person with parental responsibility consents to the admission and/or treatment. If the parent does consent, the child can be admitted and treated informally on basis of parental consent. If the parent does not consent, admission under the Act will need to be considered. If the criteria for admission under the Act are not met, it will be necessary to apply to the court for authorisation (although it should be noted that action can be taken in life-threatening emergencies).
Additional notes to Figure 6

1. Is the child competent to decide about the proposal/treatment? It will be important to identify the decision to be made: decisions about admission need to be treated separately from decisions about treatment. Consider whether the child is competent (‘Gillick’ competent) to consent to the admission and/or treatment (see paragraph 19.33 – 19.36).

2. Does the child consent to the admission and/or treatment? The consent of a ‘Gillick competent’ child will be sufficient authority to admit and/or treat the child (paragraphs 19.65 – 19.66). Note: there may be reasons for not relying on the young person’s consent to admission (paragraphs 14.11 – 14.13). If a Gillick competent child does not consent to the proposed admission and/or treatment it would be inadvisable to override their refusal by relying on parental consent (paragraph 19.38).

3. Does the admission/treatment amount to a deprivation of liberty? Parental consent cannot authorise a deprivation of liberty, so a child cannot be admitted or treated informally if the intervention amounts to a deprivation of liberty.

4. Is the decision within the zone of parental control? (This is explained in paragraphs 19.37 – 19.41).

5. Does the person with parental responsibility consent? A child who is not competent to make decisions about their admission and/or treatment may be admitted and/or treated if the person with parental responsibility consents to the particular intervention. If the person with parental responsibility is unwilling to consent to the admission and/or treatment, consider whether admission under the Act are met.
Figure 7: Informal admission of 16 and 17 year olds

The first question in the flowchart is to ask whether the young person has capacity to consent to the proposed admission. If the answer to this question is ‘Yes’, then the next question is whether the young person consents to being admitted for assessment and/or treatment. If the young person does consent to the admission the young person can be admitted informally on basis of the young person’s consent. If the young person does not consent, admission under the Act will need to be considered. If the criteria for admission under the Act are not met, the young person cannot be admitted without court authorisation (although it should be noted that action can be taken in life-threatening emergencies).

If the young person does not have the capacity to consent to the proposed admission, the next question is whether the proposed admission involves a deprivation of liberty. If it does not involve a deprivation of liberty the young person can be admitted informally, in accordance with the MCA if the admission is in the young person’s best interests. If the admission does amount to a deprivation of liberty admission under the Act will need to be considered. If the criteria for admission under the Act are not met, the young person cannot be admitted without court authorisation (although it should be noted that action can be taken in life-threatening emergencies).
Additional notes to Figure 7

1. Does the young person have capacity to consent to admission? (see paragraphs 19.25 - 19.32)

2. Does the young person consent to being admitted? The consent of a young person with capacity to consent is sufficient authority to admit them (paragraph 19.52). Note: there may be reasons for not relying on the young person’s consent to admission to hospital (paragraphs 14.11- 14.13). Parental consent cannot override a young person’s refusal to being admitted (section 131 the Act, see paragraph 19.38).

3. Does the admission involve a deprivation of liberty? A young person cannot be admitted informally if the admission amounts to a deprivation of liberty: neither the MCA nor parental consent can authorise a young person’s deprivation of liberty (paragraphs 19.42 - 19.46). If the young person lacks capacity, the admission is in the young person’s best interests and does not amount to a deprivation of liberty then the young person can be admitted informally in accordance with the MCA (paragraphs 19.56 - 19.57).
The first question in the flowchart is to ask whether the young person has the ability to make decisions about the proposed treatment. If the answer to this question is ‘Yes’, the next question is whether the young person consents to the proposed treatment. If the young person does consent, the young person can be treated informally on basis of their consent. If the young person does not consent, admission under the Act will need to be considered. If the criteria for admission under the Act are not met, the young person cannot be treated without court authorisation (although it should be noted that action can be taken in life-threatening emergencies).

If the young person does not have the ability to make decisions about the proposed treatment the next question is whether the proposed treatment involves a deprivation of liberty. If it does, admission under the Act will need to be considered. If the criteria for admission under the Act are not met, the young person cannot be treated without court authorisation (although it should be noted that action can be taken in life-threatening emergencies).

If the proposed treatment does not involve a deprivation of liberty the next question is whether the young person lacks capacity within the MCA. If the answer to this question is ‘Yes’ the young person can be treated informally, in accordance with the MCA if treatment is in young person’s best interests.

If the young person does not lack capacity within the MCA, the next question is whether the decision to treat is within the zone of parental control. If it is not, admission under the Act will need to be considered. If the criteria for admission under the Act are not met, the young person cannot be treated without court authorisation (although it should be noted that action can be taken in life-threatening emergencies).

If the decision to treat is within the zone of parental control, the next question is whether the person with parental responsibility consents to the proposed treatment. If the person with parental responsibility does not consent, admission under the Act will need to be considered. If the criteria for admission under the Act are not met, the young person cannot be treated without court authorisation (although it should be noted that action can be taken in life-threatening emergencies).

If the person with parental responsibility does consent to the proposed treatment, the young person can be treated informally on the basis of parental consent.
Additional notes to Figure 8

1. Is the young person unable to make decisions about the proposed treatment? If so, is this because they lack capacity under the MCA? Or are they unable to decide about the proposed treatment but not because they lack capacity within the meaning of the MCA? (See paragraphs 19.25 - 19.32.)

2. Does the young person consent to the proposed treatment? The consent of a young person who has capacity to make the decision is sufficient authority to treat the young person - (paragraphs 19.58 - 19.59). It would be inadvisable to rely on parental consent to authorise the young person's treatment when the young person has capacity and is refusing the treatment (paragraph 19.38).

3. Does the treatment involve a deprivation of liberty? A young person cannot be treated informally if the admission amounts to a deprivation of liberty: the MCA cannot authorise a young person's deprivation of liberty, nor can parental consent authorise a deprivation of liberty (paragraphs 19.42 - 19.47).

4. Does the young person lack capacity within the MCA? If the young person lacks capacity, and the treatment is in the young person's best interests and does not amount to a deprivation of liberty, then the young person can be treated informally in accordance with the MCA (paragraphs 19.60 - 19.64).

5. Is the decision within the zone of parental control? This concept is explained in paragraphs 19.40 - 19.41.

6. Does the person with parental responsibility consent? In cases where the young person is unable to decide about their treatment but not because they lack capacity within the meaning of the MCA (see paragraph 19.30) it may be possible for the treatment to be given on the basis of parental consent, if the treatment is within the zone of parental control (see paragraphs 19.63 and 19.40 - 19.41).
Examples

The following examples should be read in conjunction with the above text and the preceding flowcharts.

Example A

A 13 year old child is assessed as not being Gillick competent. The primary purpose of the intervention is to provide medical treatment for mental disorder. The child has been in hospital before and is happy to return there. However, neither of the parents (both of whom have parental responsibility) consents. Given that it is not possible to rely on the child’s consent (the child is not Gillick competent) or parental consent (the parents do not consent and no other person has parental responsibility) the child cannot be admitted informally in accordance with section 131(1) of the Act. If the child meets the relevant criteria, the child could be admitted to hospital for assessment (section 2) or for treatment (section 3) under the Act. If the criteria for detention under the Act are not met, legal advice should be sought on the need to seek authorisation from the court before further action is taken.

Example B

A 14 year old girl is assessed as not being Gillick competent. The primary purpose of the intervention is to provide medical treatment for mental disorder, but she is severely anorexic and the proposed treatment is that she is fed by naso-gastric tube. The naso-gastric tube may need to be in place for several weeks in order to restore the child to a safe BMI (body mass index). The care team conclude that as this is a particularly invasive form of treatment and the girl is likely to resist the insertion of the tube, it would not be appropriate to rely on parental consent to authorise this intervention. Accordingly, even though a person with parental responsibility consents, the child is not admitted and treated informally under section 131(1) of the Act. If the child meets the relevant criteria, she could be admitted to hospital for assessment (section 2) or for treatment (section 3) under the Act. If the criteria for detention under the Act are not met, legal advice should be sought on the need to seek authorisation from the court before further action is taken.

Example C

A 15 year old child is assessed as being Gillick competent. The primary purpose of the intervention is to provide medical treatment for mental disorder. The child does not consent to treatment in hospital. The child’s parents are keen for the child to be admitted to hospital and give their consent. However, it is not considered safe to rely on the parent’s consent where a Gillick competent child is refusing. Accordingly, the child cannot be admitted informally under section 131(1) of the Act as the child is competent to consent but does not do so. If the child meets the relevant criteria, the child could be admitted to hospital for assessment (section 2) or for treatment (section 3) under the Act. If the criteria for detention under the Act are not met, legal advice should be sought on the need to seek authorisation from the court before further action is taken.
Example D

A 16 year old young person is assessed as needing a period of in-patient treatment. As the MCA applies, he is presumed to have capacity to make decisions. There is no evidence to show that he lacks capacity. The primary purpose of the intervention is to provide medical treatment for mental disorder. The young person consents to admission and treatment in hospital. The young person can be admitted to hospital and treated as an informal patient in accordance with section 131 of the Act without being detained.

Example E

A 17 year old young person is assessed as needing a period of in-patient treatment. She is assessed as not having the capacity to decide about either her admission to hospital or her treatment in hospital. The admission and treatment are in her best interests and do not amount to a deprivation of liberty. Accordingly, she can be admitted to hospital and treated for her mental disorder relying on the MCA. However, her capacity to make decisions for herself should be kept under regular review. Similarly, her care plan should be reviewed on a regular basis to ensure that she is not deprived of her liberty as this would not be authorised by the MCA.
20 People with learning disabilities or autistic spectrum disorders

Why read this chapter?

20.1 This chapter deals with issues of particular relevance to people with learning disabilities, autistic spectrum disorders or both, including patients who are children or young people.

People with learning disabilities are entitled to the same rights and protections as other patients under the Act. Professionals and practitioners working with people with learning disabilities should also be familiar with Mental Capacity Act (MCA) and the Equality Act 2010.

The chapter identifies the key issues from the MCA and the Equality Act that should be considered and provides guidance about the detention of people with learning disabilities. The definition of learning disabilities provided in the Act is stated and guidance is given on that and autistic spectrum conditions.

Learning disabilities

20.2 For the purposes of the Act, a ‘learning disability’ is defined as ‘a state of arrested or incomplete development of the mind which includes significant impairment of intelligence and social functioning’.

20.3 Although defined as a mental disorder in this way, learning disability shares few features with the serious mental illnesses that are the most common reason for using the Act. Relatively few people with learning disability are detained under the Act, and where they are this must be for treatment.

A learning disability has also been described as a:

- significantly reduced ability to understand new or complex information, to learn new skills, and
- reduced ability to cope independently which starts before adulthood with lasting effects on development.53

---

20.4 The identification of an individual with a learning disability is a matter for clinical judgement, guided by current professional practice. It is important to assess the person holistically, as well as to consider their behaviour in light of the person’s current and past circumstances. Where a learning disability is identified, then three further issues have to be considered:

- whether the MCA has to be applied in addition to the Act and, if so, how,
- whether reasonable adjustments would assist the person with learning disabilities, and
- what the inclusion and promotional person’s human rights would add to the wellbeing of the person.\textsuperscript{54}

**Mental Capacity Act**

20.5 In addition to the information in chapters 3 and 13, for individuals with a learning disability the following should be taken into consideration:

- where a person with learning disabilities detained under the Act has a physical illness which is unrelated to their mental disorder for which they need treatment (e.g. cancer treatment), the MCA will apply to assessing whether they have the capacity to give consent to that treatment
- where a person with learning disabilities who is pregnant while detained under the Act, needs physical treatment to which she does not have the capacity to consent, the MCA will apply to that treatment
- where a person’s challenging behaviour may be caused by a physical condition unrelated to their mental disorder, such as a toothache or a stomach ache, and they do not have the capacity to consent to treatment of that condition, the MCA needs to be applied in giving that treatment
- where a decision needs to be made about where a person with learning disabilities should be discharged to, and they do not have capacity to make that decision, then the MCA needs to be applied to reach a decision in the person’s best interests
- where a decision is being made for a person with learning disabilities in their best interests, an independent mental capacity advocate (IMCA) must be involved, particularly if the person has no family or friends to be consulted.

**Equality Act 2010**

20.6 In addition to the information in chapter 3, for individuals with a learning disability the following should be taken into consideration in relation to the Equality Act:

- where some people with learning disabilities find it difficult to manage ‘queuing’ at meal times, a hospital or assessment or treatment centre should make different arrangements for meal times
- in a hospital or assessment and treatment setting where social activities are provided on a ‘first come first served’ basis, positive action should be used to enable people with reduced ability or confidence due to their learning disability, to access these activities
- in an institutional setting where aggressive behaviour can occur, institutions must take extra steps to protect those who are vulnerable
- if restrictive interventions may be used, the person should have a behaviour support plan that sets out what type of restrictive interventions may be used (chapter 26). People with learning disabilities need behaviour support plans to be carefully targeted to their understanding, their needs and their history and to be assisted to understand when restrictive interventions may be used and for what purpose
- staff should be aware if a person with a learning disability is being harassed or victimised by other people using the service, and carefully considered ‘adjustments’ to the care regime may be needed to prevent this.

20.7 These examples illustrate the principle that health services can take proportionate positive action to achieve equality of access and of outcome. The Equality Act allows persons with disabilities to be treated more favourably than others if necessary to comply with the public sector equality duty, and includes a duty to make ‘reasonable adjustments’ to help to eliminate barriers to access and participation for disabled persons (chapter 3).

**Detention – on the basis of abnormally aggressive or seriously irresponsible behaviour**

20.8 An application for detention for treatment, or for reception into guardianship, on the basis of a learning disability without another concomitant mental disorder may be made only where it is associated with one or both of the following further features:

- abnormally aggressive behaviour, or
- seriously irresponsible conduct.
20.9 This means, for the purposes of admission or treatment under the Act, a person may not be considered to be suffering from a mental disorder simply as a result of having a learning disability: the disability must be associated with abnormally aggressive or seriously irresponsible conduct.

20.10 Neither term is defined in the Act, and it is not possible to define exactly what kind of behaviour would fall into either category. It will, inevitably, depend not only on the nature of the behaviour and the circumstances in which it is exhibited, but also on the extent to which it gives rise to a serious risk to the health or safety of the person or others, or both.

20.11 This means that people with a learning disability cannot be detained under the Act simply because they have a learning disability or autism, or they are displaying behaviour which is challenging due to an unmet physical health need, unmet social or emotional needs, or unmet support needs. They must meet the criteria in the Act for detention. Detaining a patient with a learning disability if they do not meet the criteria is unlawful.

20.12 A patient with a learning disability cannot be informally admitted if they do not have capacity to consent to that admission and treatment. If the patient lacks that capacity and will (or will be likely to be) deprived of their liberty to receive the treatment, a deprivation of liberty authorisation (DoL authorisation) or deprivation of liberty order by the Court of Protection (DoL order) must be in place to authorise the deprivation of liberty (see chapters 13 and 14). CQC must be immediately notified if there is a risk that such a patient may be unlawfully deprived of their liberty.

20.13 In assessing whether a patient’s learning disability is associated with behaviour which could not only be categorised as aggressive but as abnormally so, relevant factors may include:
• how persistent and severe it has been
• whether, and to what degree, it has in fact resulted in harm to other people, and
• how likely it is to recur.

20.14 Bizarre or unusual behaviour is not the same as abnormally aggressive behaviour.

20.15 Recent reviews of serious cases, have shown that people’s life experiences and life stories are important in helping to understand some aggressive behaviour. People with learning disabilities experience disproportionate harassment, ‘hate crime’, ‘mate crime’ and are disproportionately the victims of violence. These are all factors that may make aggressive behaviour sometimes a learned protective behaviour rather than a sign of mental disorder.
20.16 Similarly, in assessing whether a person’s learning disability is associated with behaviour which is not only irresponsible but seriously so, relevant factors may include:

- whether behaviour suggests a disregard for its serious or dangerous consequences
- how seriously harmful the consequences of the behaviour were or might have been
- how likely it is to recur.

20.17 If a person with a learning disability is detained under the Act, a comprehensive assessment of their needs must be undertaken to ensure that any reasonable adjustments are made. This must include:

- communication support
- positive behavioural support (PBS) (see chapter 26)
- adapted treatment programmes including psychological therapies
- adapted therapeutic environment
- risk assessment of personal safety (due to increased vulnerability), and
- prioritised access to and involvement of carers and/or advocates, unless the individual had indicated that they do not want this.

20.18 When assessing whether a person with a learning disability should be detained for treatment under the Act, it is important to establish whether any abnormally aggressive or seriously irresponsible behaviour identified stems from difficulties in communication or an underlying condition. Challenging behaviour may have an underlying physical cause, such as extreme pain from an undiagnosed condition or inflection. Unmet physical needs should not be confused with mental illness. If, for example, the behaviour is the only way of drawing attention to an underlying physical health problem, it would be wrong to interpret the behaviour as an indication of their mental disorder, and treatment under the Act would not be an appropriate response.

20.19 For children or young people aged under the age of 18 (and for many people up till the age of 25), consideration must be given to the fact that they are at an age where they are learning to manage their emotions. Children and young people with and without learning disabilities often experience and express their emotions more strongly than other people, and they need support to understand what might be happening to them (see chapter 19).
Practice considerations

20.20 Unless very urgent action is required, it would not be good practice to diagnose a person as having a learning disability associated with abnormally aggressive behaviour or seriously irresponsible conduct (or both) without an assessment by a consultant psychiatrist in learning disabilities and a formal specialist psychological assessment. This should be part of a holistic appraisal by medical, nursing, social work, speech and language and occupational therapy and psychology clinicians with experience in learning disabilities, in consultation with a relative, advocate or supporter of the patient. An approved mental health professional (AMHP) who assesses a patient with a learning disability under the Act should have training and experience in working with people with learning disabilities. Information from the person-centred care plan and health action plan may also inform the assessment process.

20.21 For children and young people under the age of 18, a children and adolescent mental health services (CAMHS) consultant with experience of learning disability should be involved wherever possible.

20.22 All those involved in examining, assessing, treating or taking other decisions in relation to people with learning disability should bear particular risks in mind in relation to people with learning disabilities including:

- incorrect assumptions that they do not have capacity to make decisions for themselves and a tendency to be over-protective. The MCA makes clear that a person must be assumed to have capacity unless it is established that they do not

- incorrect assumptions that a tendency to acquiesce is the same as informed consent

- over-reliance on family members, both for support and for decision-making. The often considerable expertise of family members should be acknowledged, and appropriately used in partnership with the clinical team. But this should not mean that clinicians rely on family members to take decisions inappropriately and on their own on behalf of the person

- ignoring the role that family and friends can play in providing relevant information about the person’s past, or about effective communication methods

- a lack of appreciation of the potential abilities of people with learning disabilities, including their potential to make decisions for themselves

- the risk the person may be denied access to decision-making processes, meetings about them or information

- the person’s limited life experiences to draw on when making choices, and

- attributing the person’s symptoms and behaviours to their learning disability rather than underlying undiagnosed and/or unmet physical or mental health needs or to something traumatic that happened to them in their past.
Those working under the Act with people with learning disabilities should bear in mind the following general points.

- Practitioners require a good understanding of the MCA. In particular, the requirement to assist people to make decisions for themselves where possible; the need to respect a decision by a person who has capacity which may be seen as unwise; and to offer care that is the least restrictive of people’s rights. This should be audited as part of the quality monitoring within hospitals and other settings.

- People with learning disabilities may use non-verbal communication rather than spoken language. This non-verbal communication may include behaviour, gestures, posture and body language, ways of moving, signing, noises and pointing. It is important to recognise people’s communication in all its forms and to avoid assuming that people’s behaviour is a symptom of a mental disorder, when it may be their way to communicate feelings or physical pain or discomfort.

- People with learning disabilities may find new environments, such as a medical setting, frightening. All ‘reasonable adjustments’ (as required by the Equality Act 2010 – see paragraphs 3.8 – 3.9) need to be made to adapt and respond to each individual’s needs. This may mean offering a quiet space, for example, or having a key worker with specialist training or a communication book.

- The most appropriate method of communication for each person with learning disabilities should be identified as soon as possible, and the help of a speech and language therapist should be sought wherever appropriate. It is helpful to identify a specific person who will undertake this task.

- Some people with learning disabilities may prefer to have written material in simple language with images or symbols to assist, or in pictures without written words, and this could be reinforced orally. It can be helpful to repeat information and leave a record of the information that has been shared so that the person can consult it later and ask others to clarify anything that is difficult to understand.

- It is important to set aside sufficient time for preparation of suitable information and for preparation before meetings. Meetings should be held in an environment which is not intimidating in order to allow the person every chance to understand the information given.

It is good practice for hospitals providing treatment and care for people with learning disabilities to have policies and practices which specifically address:

- staff training and supervision in how to effectively communicate with people with learning disabilities, particularly in understanding their wishes and feelings

- specialist staff who create communication books for individual in-patients and who teach how to develop personalised care for people who have learning disabilities

- training in positive behavioural support (see chapter 26)

- reasonable adjustments and capable environments, and

- regular audits of incidents involving restrictive practices to see whether less restrictive methods could be used.
20.25 Providers should ensure that their care and treatment of people with learning disabilities is compliant with the law. People with learning disabilities, their families, carers and advocates need to have access to legal advice on when to access the Court of Protection, and when to access the Tribunal (see paragraphs 12.5 – 12.8 and the MCA Code of Practice). Providers should proactively promote people’s rights and their access to human rights.

20.26 Promoting human rights such as the article 8 right to private life, may mean reviewing policies on: access to the person’s sleeping area; mobile phones, visits from family and friends; and how to maintain family life (eg through contact with family members, such as sharing meals and celebrations, and performing roles such as being parents or grandchildren). The person’s article 5 right to liberty should also be protected by developing and applying the least restrictive care and treatment regimes.

20.27 Providers cannot assume that people with learning disabilities understand how to access information and advice about their rights, for example in relation to consent to admission and treatment, applications for discharge and accommodation decisions on discharge. Providers must take such steps as are practicable to ensure people with learning disabilities can access information and advice, including access to additional support such as independent mental health advocates (IMHAs) or independent mental capacity advocates (IMCAs) (see chapter 6).

20.28 Where information relates to the right of the individual to have their case reviewed by the Tribunal, adjustments may need to be made to ensure people with learning disabilities understand the Tribunal’s role. An individual (and family or friends supporting them) may well need support to make an informed decision about whether and when and how to make an application, which may be provided by IMHAs, IMCAs or other advocates.

20.29 Where professionals taking decisions under the Act have limited expertise in promoting the rights of people with learning disabilities, it is good practice to seek advice from a specialist or specialist service (perhaps within the local authority or voluntary organisation), which can suggest alternatives to compulsory treatment and give advice on mental capacity issues and on communication.

20.30 It is desirable that, during examination or assessment, people with learning disabilities have someone with them whom they know well and who knows their particular communication needs (subject to the normal considerations of patient confidentiality).

20.31 The potential of co-morbidity with mental illness and personality disorder should also be kept in mind so professionals with appropriate expertise can be involved in the person’s assessment, treatment and care. The possibility of physical health problems underlying the presentation of abnormally aggressive or seriously irresponsible behaviour should always be kept in mind.
Autistic spectrum conditions

20.32 The Act’s definition of mental disorder includes the full range of autistic spectrum conditions, including those existing alongside a learning disability or any other kind of mental conditions. While it is possible for someone on the autistic spectrum to meet the criteria in the Act for detention and treatment without having any other form of mental conditions, even if it is not associated with abnormally aggressive or seriously irresponsible behaviour, this is likely to happen only very rarely. Compulsory treatment in a hospital setting is rarely likely to be helpful for a person with autism, who may be very distressed by even minor changes in routine and is likely to find detention in hospital anxiety provoking. Sensitive, person-centred support in a familiar setting will usually be more helpful. Wherever possible, less restrictive alternative ways of providing the treatment or supporting a person should be found. The specialist expertise and skills of staff should be regularly audited, particularly the ability to recognise social needs as well as health ones, specialist communication skills, and identify a range of care options.

20.33 Autistic spectrum conditions are disorders occurring from early stages in development where a person shows marked difficulties with social communication, social interaction and social imagination. They may be preoccupied with a particular subject of interest. This spectrum includes high functioning people who need person-centred care as well as those with little or no verbal communication. The key to appropriate care is having staff with the relevant expertise and experience, who can consider a range of care options, with an emphasis on those which are least restrictive to the person.

20.34 Autism spectrum conditions are developmental in nature and are not mental illnesses. People with an autistic spectrum conditions may have additional or related problems, which frequently include anxiety. These may be related to social factors associated with frustration or communication problems or rigid or literal patterns of thought and behaviour. As with people with learning disabilities, it should be borne in mind that people with autistic spectrum conditions may also have co-morbid mental disorders, including mood disorders and, occasionally, personality disorders.

20.35 A person with an autistic spectrum conditions may have additional sensory and motor difficulties, which make them behave in an unusual manner which might be interpreted as a mental illness but are, in fact, a coping mechanism. These include sensitivity to light, sound, touch and balance and may result in a range of regulatory behaviours, including rocking, self-injury and avoidance (such as running away).

20.36 A person with an autistic spectrum conditions is likely to behave in ways that seem odd to other people. Mere eccentricity, in anyone, does not justify the use of the Act.
20.37 There can also be a repetitive or compulsive element to much of the behaviour of people with autistic spectrum conditions. The person may appear to be choosing to act in a particular way, but their behaviour may be distressing even to themselves. It may be driven or made worse by anxiety and could lead to harm to self or others. Repetitive behaviour does not in itself constitute a mental disorder.

20.38 The examination or assessment of someone with an autistic spectrum condition requires special consideration of how to communicate effectively with the person being assessed. Whenever possible the people carrying out assessments should have experience and training in working with people with these conditions. If this is not possible they should seek assistance from specialists with appropriate expertise, but this should not be allowed to delay action that is immediately necessary. Assessment should ideally be part of a complete appraisal – a multi-disciplinary process involving medical, nursing, social work, occupational therapy, speech and language therapy and psychology professionals (as necessary) with relevant specialist experience.

20.39 Where appropriate, someone who knows the person with an autistic spectrum condition should be present at an initial examination and assessment, provided that this does not breach the person’s confidentiality. Knowledge of the person’s early developmental history and usual pattern of behaviour will help prevent someone with an autistic spectrum condition from being wrongly made subject to compulsory measures under the Act or treated inappropriately with psychopharmacological agents.

20.40 A person with an autistic spectrum condition may show a marked difference between their intellectual and their emotional development. Their behaviour may occasionally seem aggressive or seriously irresponsible. They may be able to discuss an act intellectually and express a desire to do or not do it, but may not have the instinctive social empathy to keep to their intentions. This must be understood and responded to by professionals, who should recognise that the specialist structured approaches to communication may be required. When a person is unable to prevent themselves from causing severe harm to themselves or others, compulsory measures under the Act may be needed.

20.41 If people with autistic spectrum conditions do need to be detained under the Act, it is important that they are treated in a setting appropriate to their social and communication needs as well as being able to treat their mental condition.

21 People with personality disorders

Why read this chapter?

21.1 The Act applies equally to all people with mental disorders, including those with either primary or secondary diagnosis of personality disorder. This chapter is particularly helpful for professionals and practitioners working with people with personality disorders. Guidance is given on assessment and appropriate medical treatment.

Personality disorders – general points

21.2 Generally, people who have personality disorders present a complex range of mental health and other problems:

- many people may have a diagnosis of more than one personality disorder, and they may also have other mental health problems such as depression, anxiety or post-traumatic stress syndrome
- suicidality, self-harm, substance misuse problems and eating disorders are also common in people with personality disorders
- some individuals experience very severe, periodic emotional distress in response to stressful circumstances and crisis, particularly people with borderline personality disorder
- some individuals can at times display a form of psychosis that is qualitatively different from that displayed by people with a diagnosis of mental illness
- people with personality disorders usually have long-standing and recurrent relationship difficulties
- people with personality orders are more likely than other population groups to experience housing problems and long-term unemployment
- a very small subgroup of people with personality disorder may be anti-social and dangerous
- anti-social personality disorder is strongly associated with offending, and it is estimated that personality disorders have a high prevalence within offender populations.
Personality disorders and mental health legislation

21.3 People with personality disorders who are subject to compulsory measures under the Act may include individuals who:

- have a primary diagnosis of personality disorder and present a serious risk to themselves or others (or both)
- have complex mental disorders, including personality disorder, presenting serious risk to themselves or to others (or both)
- have primary diagnoses of personality disorder or complex disorders including personality disorder and are transferred from prison for treatment in secure psychiatric or personality disorder inpatient services
- are transferred from prison or other secure settings for treatment within designated dangerous and severe personality disorder (DSPD) units in hospitals, and
- are personality disordered offenders who have completed inpatient treatment in DSPD units, or other secure settings, but who may need further treatment in the community.

Practice considerations

Assessment

21.4 People with personality disorders may present and behave in very different ways from those with other mental disorders. It is important that such behaviours and presentations are properly understood if the Act is to be used appropriately.

21.5 Especially in times of crisis, decisions about the use of the Act for people with personality disorders will often have to be made by professionals who are not specialists in the field. It is therefore important that approved mental health professionals (AMHPs) and doctors carrying out initial assessments have a sufficient understanding of personality disorder as well as other forms of mental disorder.

21.6 Individuals who have historically been labelled by various local agencies as having a personality disorder may never, in fact, have had a thorough clinical assessment and formulation. A number of validated assessment tools enable a more precise identification to be made. Professionals will need to ensure that any treatment and aftercare plans are shaped by appropriate clinical assessments conducted by suitably trained practitioners.

21.7 In emergency or very high-risk situations, where such an assessment has not already been carried out and an application for detention under the Act is being considered, then responding to the immediate risk to the health or safety of the patient or to other people is the first priority. However, achieving an appropriate clinical assessment and formulation should be an immediate aim of detention.
Appropriate medical treatment

21.8 What constitutes appropriate medical treatment for a particular patient with personality disorder will depend very much on their individual circumstances. First and foremost that calls for a clinical judgment by the clinicians responsible for their assessment or treatment.

21.9 A proposed care plan will not, of course, meet the Act’s definition of appropriate medical treatment unless it is for the purpose of alleviating or preventing a worsening of the patient’s mental disorder, its symptoms or manifestations (see chapter 23).

21.10 Generally, treatment approaches for personality disorder need to be relatively intense and long term, structured and coherent. Sustainable long-term change is more likely to be achieved with the voluntary engagement of the patient.

21.11 People with personality disorders may take time to engage and develop motivation for such longer-term treatment. But even patients who are not engaged in that kind of treatment may need other forms of treatment, including nurse and specialist care, to manage the continuing risks posed by their disorders, and this may constitute appropriate medical treatment.

21.12 In the majority of cases the primary model of intervention for personality disorder is rooted in a psycho-social model.

21.13 Patients who have been detained may often need to continue treatment in a community setting on discharge. Where there are continuing risks that cannot otherwise safely be managed, a community treatment order (CTO), guardianship or (for restricted patients) conditional discharge may provide a framework within which such can continue their treatment in the community.

21.14 In deciding whether treatment under the Act can safely be delivered in the community, account should be taken of:

- where the specific model of treatment intervention can be most effectively and safely delivered
- if management of personal and social relationships is a factor in the intervention, how the appropriate day-to-day support and monitoring for the patient’s social as well as psychological needs can be provided
- to what degree the psycho-social model of intervention requires the active participation of the patient for an effective and safe outcome
- the degree to which the patient has the ability to take part in a psycho-social intervention that protects their own and others’ safety
- the degree to which 24-hour access to support will be required, and
- the need for the intervention plan to be supervised by a professional who is appropriately qualified in the model of intervention and in risk assessment and management in the community.
21.15 In the case of personality disordered offenders who may already have received long-term treatment programmes within secure or prison settings, treatment in the community may well still be required while they resettle in the community.

22 Patients concerned with criminal proceedings

Why read this chapter?

22.1 This chapter provides guidance on the use of the Act to arrange treatment for mentally disordered people who come into contact with the criminal justice system, including a section specifically relating to children and young people who have reached the criminal age of responsibility (10 years) and who are also subject to criminal proceedings and to those people who are subject to Secretary of State for Justice restrictions (restricted patients).

People who are subject to criminal proceedings have the same rights to psychiatric assessment and treatment as anyone else. Professionals and practitioners working with such patients must be mindful of the need to ensure that the restrictions imposed on the patient are proportionate and kept to a minimum needed to meet the purpose and aim of the restriction.

22.2 In taking decisions with regard to these patients, practitioners must be mindful of the need to ensure that restrictions imposed on the patient are proportionate and kept to the minimum needed to meet the purpose and aim of the restriction.

Assessment for potential admission to hospital

22.3 People who are subject to criminal proceedings have the same rights to psychiatric assessment and treatment as everyone else. Any person who is in police or prison custody or before the courts charged with a criminal offence and who is in need of medical treatment for mental disorder should be considered for admission to hospital.

22.4 Wherever possible, people who appear to police custody officers or the court to be mentally disordered should have their treatment needs considered at the earliest possible opportunity, by the liaison and diversion service where there is one. Such people may be at greatest risk of self-harm while in custody. Prompt access to specialist treatment may prevent significant deterioration in their condition and is likely to assist in a speedier justice process, helping to avoid longer-term harm or detention in an unsuitable environment.

22.5 If criminal proceedings are discontinued it may be appropriate for the relevant local authority to arrange for an approved mental health professional (AMHP) to consider making an application for admission to hospital under part 2 of the Act.
22.6 A prison healthcare centre is not a hospital within the meaning of the Act. The rules in part 4 of the Act about medical treatment of detained patients do not apply and treatment cannot be given there under the Act without the patient’s consent (see chapter 4).

Liaison and diversion (L&D) services

22.7 Liaison and diversion (L&D) services aim to identify and assess individuals of all ages who have mental health problems, learning disabilities and other needs when they come into contact with the youth and adult justice systems and help support the most appropriate criminal justice system outcome. L&D is not itself a treatment service, but it is an identification, assessment and referral service. It uses assessments to make appropriate referrals for treatment and support, and ensures youth and adult justice practitioners are notified of specific health requirements and vulnerabilities of an individual which can be taken into account when decisions about charging and sentencing are made. The service will aim to identify these individuals as early as possible after they come into contact with the police and criminal justice system. It should provide coverage at police custody suites, courts and link up to other parts of the justice process, such as prison and probation. For many people, contact with criminal justice agencies will be the first time they will have been assessed and diagnosed.

Agency responsibilities

22.8 The relevant NHS commissioners should:

- provide the courts, in response to a request under section 39 of the Act, with comprehensive information on the range of facilities available for the admission of patients subject to the criminal justice process. For children and young people this should include information regarding child and adolescent mental health services (CAMHS) beds which are or could be made available for patients
- appoint a named person to respond to requests for information, and
- ensure that prompt medical assessment of defendants is provided to assist in the speedy completion of the trial process and the most suitable disposal for the offender.

22.9 Section 39A requires a local authority to inform the court, if requested, whether it, or any person approved by it, is willing to receive an offender into guardianship and how the guardian’s powers would be exercised. Local authorities should appoint a named person to respond to requests from the courts about mental health services available in the community including under guardianship.
Assessment by a doctor

22.10 A doctor who is asked to provide evidence in relation to a possible admission under part 3 of the Act should bear in mind that the request is not for a general report on the defendant’s condition but for advice on whether or not the patient should be diverted from prison by way of a hospital order, or a hospital direction (or a community order with a mental health treatment requirement under criminal justice legislation).

22.11 Doctors should:

• identify themselves to the person being assessed, explain who has requested the report and make clear the limits of confidentiality in relation to the report. They should explain that any information disclosed, and the medical opinion, could be relevant not only to medical disposal by the court but also to the imposition of a punitive sentence, or to its length, and

• request relevant pre-sentence reports, the inmate medical record and previous psychiatric reports, as well as relevant documentation regarding the alleged offence. If any of this information is not available, the doctor’s report should say so clearly.

22.12 The doctor, or one of them if two doctors are preparing reports, should have access to a bed or take responsibility for referring the case to another clinician who does if they propose to recommend admission to hospital within the period of 28 days beginning with the date of the making of the order under section 37 or section 45A (see paragraphs 22.47 and 22.61 – 22.64).

22.13 The doctor should, where possible, identify and access other independent sources of information about the person’s previous history (including convictions). This should include information from GP records, previous psychiatric treatment and patterns of behaviour.

Hospital orders/remands to hospital

22.14a Assessments for remands to hospital or for hospital orders still require assessment by a section 12 approved registered medical practitioner. HMCTS commission these reports in accordance with the Costs in Criminal Cases (General) Regulations 1986.55

55 http://www.legislation.gov.uk/uksi/2012/1804/made
Mental health treatment requirement (MHTR)

22.14b The legislative changes introduced by Legal Aid, Sentencing and Punishment of Offenders Act 2012 (LASPO) introduces a simplified procedure for the assessment of an individual for a MHTR, this may now be undertaken by a mental health practitioner, rather than a section 12 approved registered medical practitioner. MHTRs are still required to be administered under the direction of a registered medical practitioner or a chartered psychologist. Here the L&D service may undertake the assessment and liaise with the probation office preparing the pre-sentence report, but a registered medical practitioner would still be required to provide direction for the administration of any order made by the court.

22.15 In cases where the doctor cannot state with confidence at the time of sentencing whether a hospital order or MHTR will be appropriate, they should consider recommending an interim hospital order under section 38 of the Act. This order provides for the person to be admitted to hospital for up to 12 weeks (which may be extended for further periods of up to 28 days to a maximum total period of 12 months) so that the court can reach a conclusion on the most appropriate and effective disposal.

Independent medical assessment

22.16 A patient who is remanded to hospital for a report (section 35) or for treatment (section 36) is entitled to obtain, at their own expense, or where applicable through legal aid, an independent report on their mental condition from a doctor or other clinician of their choosing, for the purpose of applying to court for the termination of the remand. The hospital managers should help in the exercise of this right by enabling the patient to contact a suitably qualified and experienced solicitor or other legal adviser.

22.17 Where the court refers the patient for assessment or treatment under sections 35 or 36, the initial report that has been requested by the court would be remunerated from central funds and not by the legal aid agency. If, however, the patient wishes to obtain a report to challenge the report produced for the court, providing that the merits criteria are satisfied, this could be remunerated under the patient’s criminal legal aid. Additionally, the patient would need to satisfy the financial eligibility criteria specified by either the magistrates’ court or Crown Court. The patient’s representative could also consider making an application to the legal aid agency for prior authority to commission a report to challenge the report produced by the clinical staff.
Reports to the court

22.18 Clinical opinion is particularly important in helping courts to determine the sentence to be passed. In particular, it will help to inform the decision whether to divert the offender from punishment by way of a hospital order, or whether a prison sentence is the most suitable disposal. Clinicians providing their assessment should have had experience (forensic) in working with mentally disordered offenders.

22.19a A medical report for the court should set out:

- the material on which the report is based
- how that material relates to the opinion given
- where relevant, how the opinion may relate to any other trial issue
- factors relating to the presence of mental disorder that may affect the risk that the patient poses to themselves or to others, including the risk of re-offending, and
- if admission to hospital is recommended, what, if any, special treatment or security is recommended and whether the doctor represents an organisation which is able to provide what is required.

22.19b Reports should also include an assessment of the patient’s fitness to plead. The report should not speculate about guilt or innocence.

22.19c The Good Practice Guidance: Commissioning, administering and production of psychiatric reports for sentencing, issued by HMCTS and the Ministry of Justice in 2010 drafted in conjunction with the judiciary and the Royal College of Psychiatrists provides further detailed guidance.56

Recommendations on disposal

22.20 Section 157 of the Criminal Justice Act 2003 requires the court to obtain a medical report before passing a custodial sentence other than one fixed by law. Before passing such a sentence, the court must consider any information before it which relates to the offender’s mental condition and the likely effect of such a sentence on that condition and on any treatment which may be available for it.

---

22.21a It may, therefore, be appropriate to include recommendations on the disposal of the case. In making recommendations for disposal the doctor should consider the longer-term, as well as immediate, consequences. Factors to be taken into account include:

• whether the court may wish to make a hospital order subject to special restrictions

• whether, for restricted patients, the order should designate admission to a named unit within the hospital

• whether, in the event of the court concluding that a prison sentence is appropriate, the offender should initially be admitted to hospital by way of a hospital direction under section 45A and a limitation direction which will subject the patient to special restrictions, and

• whether a community order with a mental health treatment requirement may be appropriate.

22.21b Consideration of longer-term implications is especially important where the court considers the offender to be dangerous under the Criminal Justice Act 2003 and where an extended determinate sentence (EDS) or a life sentence is appropriate. The medical reports especially with respect to the offender’s level of responsibility for the offence, will form an important element in the court’s consideration of whether a hospital order under section 37 or a hybrid order (hospital direction and prison sentence) under section 45A is appropriate. Further guidance on the use of section 45A is provided below.

Detention in a named unit

22.22 Where an offender is made subject to special restrictions (‘restricted patients’), the court, or the Secretary of State for Justice in some circumstances may specify that the person be detained in a named unit within a hospital. This is to ensure an appropriate level of security.

22.23 A named hospital unit can be any part of a hospital which is treated as a separate unit. The hospital managers of the hospital will define the boundaries of the hospital however it will be for the court (or the Secretary of State for Justice, as the case may be) to confirm the unit or hospital covered by the detention authority in each case where it makes use of the power. When transferring a prisoner to hospital with a restriction direction attached, the Secretary of State may direct that the patient be detained in a specific hospital unit. This will normally be to a named ward to prevent patients being moved to lower levels of security within a hospital without the Secretary of State’s agreement. Admission to a named unit will mean that the consent of the Secretary of State will be required for any leave of absence or transfer from the named unit, even if the transfer is to the same level of security, or transfer is to another part of the same hospital or to another hospital. If however,
the transfer involves no change to either the named unit/hospital prior agreement from the Secretary of State is not required. The mental health casework section (MHCS) should be informed of the move (see paragraph 14.14).

22.24 As noted above, the need to consider the longer-term implications of a recommended disposal is particularly important where an extended determinate sentence is indicated under the Criminal Justice Act 2003. Either a hospital order under section 37 or attachment of a hospital direction to the prison sentence under section 45A is available to the court. Discretion lies with the court. Further guidance on the use of section 45A is provided below.

22.25 A hospital order, with or without restrictions, diverts the offender from a custodial sentence to a hospital for treatment. There is no limit to the time a restricted hospital order is in force so that the period of detention will be determined by the need for treatment in hospital.

22.26a A hospital direction, by contrast, accompanies a prison sentence and means that from the start of the sentence the offender will be managed in hospital in the same way as a prisoner who has been transferred to hospital subject to special restrictions under sections 47 and 49 of the Act. The responsible clinician can propose transfer to prison to the Secretary of State for Justice at any time before the prisoner’s release date if, in their opinion, no longer requires treatment in hospital and/or no effective treatment can be given.

Availability of places

22.26b If the medical evidence is that the person needs treatment in hospital, but the doctor cannot identify a suitable facility where the person could be admitted immediately, they should seek advice from the CCG that is responsible for providing the person with primary medical services or the CCG in whose area the person is usually resident.

Transporting people subject to part 3 of the Act

22.27 Patients who are detained under part 3 of the Act transported between secure units, courts or prison are the responsibility of the unit/prison sending the patient unless other arrangements negotiated. In certain circumstances (eg an emergency situation) a clinical commissioning group commissioned ambulance with appropriate escort may be required to transport the patient. Further information on the transport of patients generally is included at chapter 17.

22.28 A child or young person subject to part 3 should be transferred under local escort and bed watch policies. They should be transported in ‘usual transport’ (eg a car) unless in an emergency or otherwise agreed when an ambulance should be used.
22.29 It may be necessary for patients subject to part 3 of the Act to be subject to mechanical restraint for the purposes of ensuring a safe transfer (see paragraphs 26.73 – 26.85).

Transport to and from court

22.30 For patients remanded to hospital under sections 35 or 36 of the Act, or subject to a hospital order or an interim hospital order, the court has the power to direct who is to be responsible for transporting the defendant from the court to the receiving hospital. In practice, when remand orders are first made, patients are usually returned to the holding prison briefly using the escort provision commissioned for court to prison journeys, and arrangements are then made to admit them and make arrangements for transporting them to hospital within the statutory period.

22.31 When a patient has been admitted on remand or is subject to an interim hospital order, it is the responsibility of the hospital to return the patient to court as required. The court should give adequate notice of hearings. The hospital should liaise with the court in plenty of time to confirm the arrangements for escorting the patient to and from the court. The hospital will be responsible for providing a suitable escort for the patient when travelling from the hospital to the court and should plan for the provision of necessary staff to do this. The assistance of the police may be requested, if necessary. If possible, and having regard to the needs of the patient, medical or nursing staff should remain with the patient on court premises, even though legal accountability while the patient is detained for hearings, remains with the court. For restricted patients attendance at court will require the consent of the Secretary of State. For those patients who have been transferred under section 48 of the Act, permission to attend court will be provided in writing on initial admission. For other patients who are required to attend court, prior approval must be sought.

22.32 For further guidance on transport of patients under the Act, see chapter 17.

Treatment without consent – patients remanded for report

22.33 The rules in part 4 of the Act about medical treatment of detained patients do not apply to patients remanded to hospital under section 35 for a report on their mental condition. As a result, treatment can be administered only with their consent, or, in the case of a person aged 16 or over who lacks capacity to consent, in accordance with the Mental Capacity Act 2005 (see chapter 13). For children under the age of 16, who are not competent to consent to the proposed treatment, it may be possible for a person with parental responsibility for the child to consent on their behalf. (Further guidance on the informal treatment of children and young people, including the factors to consider in determining whether parental consent can be relied upon, are set out in chapter 19.)
Where a patient remanded under section 35 is thought to be in need of medical treatment for mental disorder which cannot otherwise be given, the patient should be referred back to court by the clinician in charge of their care as soon as possible, with an appropriate recommendation and with an assessment of whether they are in a fit state to attend court.

If there is a delay in securing a court date, consideration should be given to whether the patient meets the criteria for detention under part 2 of the Act to enable compulsory treatment to be given. This will be concurrent with, and not a replacement for, the remand made by the court.

Transfer of prisoners to hospital

The need for inpatient treatment for a prisoner should be identified and acted upon quickly, and prison healthcare staff should make contact immediately with NHS England. Responsible NHS commissioners should aim to ensure that transfers of prisoners with mental disorders are carried out within a timeframe equivalent to levels of care experienced by patients who are admitted to mental health care services from the community. Any unacceptable delays in transfer after identification of need should be actively monitored and investigated by NHS England.

Prisoners with a diagnosis of mental disorder who have given informed consent to treatment should be considered for transfer to hospital for treatment if the prison environment is considered to be contributing to their disorder. An assessment of need and regular review should consider whether the prison healthcare centre is capable of providing for the prisoner's care if they are considered to be too unwell or vulnerable to return to residential wings. For information on patients with a personality disorder see chapter 21.

Children and young people in custody

It is recognised that the treatment of children and young people under the Act should be provided by specialist professionals; be appropriate for their age and clinical need and be planned and implemented effectively with minimum delay and disruption. See chapter 19 for further information.

The terminology surrounding children and young people may also be very different. For example ‘custody’ and ‘youth detention accommodation’ have the same meaning as prison and the detention accommodation will comprise:

- secure training centres (STC)
- secure children’s homes (SHC)
- young offender institutions (YOI)
- local authority accommodation
• accommodation provided under subsection (5) of section 82 of the Children Act 1989
• other accommodation as specified by the Secretary of State.

Medical assessment

22.38 Medical assessments in the case of a defendant under the age of 18, should be undertaken by a professional with current clinical expertise, including specialist knowledge of child and adolescent mental health services (CAMHS). If this is not possible, professionals with the appropriate expertise and experience should be consulted.

22.39 A mental health assessment should be undertaken within three days of admission to a custodial setting. The Manual for the Comprehensive Health Assessment Tool (CHAT): Young People in the Secure Estate June (version 3) provides guidance on undertaking the assessment.57

22.40 Children and young people may also be assessed using the Gillick competence test which determines whether the person has the capacity to make their own decisions (see chapter 19). Guidance on assessing the competence (of children under the age of 16) and the capacity (of young people aged 16 or 17) to make decisions about their admission to hospital and/or treatment is provided in chapter 19).

Transfer from custody under the Act for children and young people

22.41 Relevant NHS commissioners must provide the courts with comprehensive information regarding CAMHS beds which are, or could be made, available for patients.

22.42 Details should be provided of multi-agency after-care arrangements for children on restricted orders that might be on Children Act 1989 arrangements (full care orders). The Ministry of Justice expects support and aftercare to be provided by appropriate authorities in the event of return from a secure hospital to detention. The section 117 meeting provides an opportunity to ensure co-ordination.

22.43 Young people can become ‘looked after children’ if they become accommodated under section 20 of the Children Act 1989 or are the subject of a care order under section 31 of the 1989 Act or alternatively, for a period of their remand to youth detention accommodation or local authority accommodation under chapter 3, part 3 of the LASPO.

22.44 Courts are unable to use section 45A in respect of children and young people (those under the age of 21) as they are not subject to a term of imprisonment.

**Restricted patients**

22.45 The Secretary of State for Justice has certain obligations with regard to the management of patients who are subject to restrictions (restricted patients) under the Act. The mental health casework section of the Ministry of Justice, on behalf of the Secretary of State, carries out these functions. Reference to ‘restricted patients’ is included in the above paragraphs where relevant however the paragraphs below provide brief summaries of the key stages of a restricted patient’s progress which are subject to Secretary of State for Justice decisions. The information should be read in conjunction with the guidance available on the Ministry of Justice website: [http://www.justice.gov.uk/offenders/types-of-offender/mentally-disordered-offenders](http://www.justice.gov.uk/offenders/types-of-offender/mentally-disordered-offenders)

22.46 Restricted patients are those who are subject to a hospital order with restrictions (sections 37 and 41 of the Act); a hospital and limitation direction (section 45A and section 45b); a transfer direction with a restriction order (section 47 (sentenced prisoners), or a transfer direction under section 48 (remand or civil prisoners and immigration detainees). In respect of transferred prisoners, the restrictions are applied via the order under section 49. A person charged with an offence before the Crown Court but found not guilty by reason of insanity, or found unfit to plead, may also receive a hospital and restriction order under sections 37 and 41. The restriction order carries no time limit so the patient will remain detained in hospital for as long as they require treatment. However, where the patient is also subject to a prison sentence and the patient is a restricted patient by virtue of section 45A (a limitation direction) or section 49, the restriction will fall away on the date that the patient would be released from prison.

22.47 All decisions about restricted patients, including about leave, transfer, remission or discharge are taken by the Secretary of State for Justice. The Tribunal has a statutory duty to review the detention of a restricted patient and order discharge if it is not satisfied that the criteria for detention under the Act are met. The Tribunal does not have the power to discharge transferred prisoners, but can decide whether the patient would be ready for discharge if they were not a prisoner, and can make a recommendation that they should be returned to prison or, if appropriate, that a referral should be made to the parole board (see chapter 12).
Community leave

22.48 Section 41(3)(c)(i) requires a responsible clinician to obtain consent from the Secretary of State for Justice before granting section 17 leave to a restricted patient.

22.49 The Secretary of State will often consent to programmes of leave which give responsible clinicians discretion as to leave arrangements. The expectation however is that the leave will be designed and conducted in such a way as to preserve public safety and, where appropriate, respect the feelings and fears of victims and others who may have been affected by the offences.

22.50 Leave request forms are provided on the Ministry of Justice website which outlines the information required however the attachment of leave plans may also be useful. In the event that consent for leave is given, responsible clinicians should be aware that the Ministry of Justice may request additional reports on the restricted patient as considered necessary.

22.51 Should there be any concerns or doubts about the leave being taken, it should be suspended and MHCS informed.

Hospital transfers

22.52 Section 19 and regulations made under it, enable a restricted patient who is detained in hospital to be transferred to another hospital and to be detained in that hospital on the same basis by virtue of section 41(3)(c) of the Act with the consent of the Secretary of State.

22.53 The Secretary of State’s role is to ensure that transfers between hospitals preserve public safety, and, where appropriate, respect the feelings and fears of victims and others who may have been affected by the offences. The Secretary of State will not agree to a transfer unless he is satisfied that the move will not put the public or victims at risk. The Secretary of State may also stipulate a specific hospital or unit when agreeing to the transfer of a patient and any movement outside this ‘named’ hospital or ward will require the permission of the Secretary of State.

22.54 It is useful for the MHCS forms accessed via the website be used when requesting that a restricted patient be transferred between hospitals. However, in urgent situations, it may be sufficient for the transferring and receiving clinicians to provide confirmation of their assessments and the availability of appropriate treatment in writing to MHCS. Contact with the casework manager should be made in the first instance.
Patients transferred from prison under sections 47/49 and 48/49

22.55 Section 47 of the Act empowers the Secretary of State for Justice by warrant to direct the removal to and detention in hospital for treatment of a person who is serving a sentence of imprisonment. The ‘transfer direction’ may be made with or without restrictions under section 49 and if transferred to hospital by virtue of a transfer direction only, the patient is treated as if they were a civil patient and the Secretary of State for Justice will have no further role.

22.56 When prisoners have been transferred under section 47 and remain detained in hospital after their release date, they cease to be restricted patients but remain detained as if on a hospital order without restrictions. The responsible clinician’s options under the Act are modified accordingly, and the patient may, for example, be discharged onto a community treatment order (CTO), guardianship or discharged.

22.57 Section 48 empowers the Secretary of State for Justice by warrant to direct the removal to and detention in hospital for treatment of certain offenders such as those on remand, civil prisoners and immigration detainees. Restrictions may also be added under section 49. Subsequent attendance at court will require Secretary of State consent and will usually be given at the time of admission.

22.58 Should a transfer request be made for a prisoner under sections 47 and 49 who is near the end of his/her sentence, the Secretary of State for Justice will apply heightened scrutiny to such a request to ensure that the criteria for transfer under the Act is satisfied and taking into account the potential lengthening of detention.

22.59 In exceptional circumstances, the Secretary of State for Justice may ‘direct’ a restricted patient’s admission into hospital, outside the NHS commissioning arrangements. This is usually where it is critical that the patient receive treatment and identifying a suitable bed is difficult.

Patients directed to hospital by a Crown Court under section 45A

22.60 Section 45A (hospital direction) permits a court to impose a prison sentence upon an offender and at the same time order immediate admission to hospital for medical treatment. A limitation direction accompanies a hospital direction and applies in the same way as a restriction order under section 41.

22.61 The intention of the hospital direction is to increase the flexibility of options when dealing with mentally disordered offenders and in particular enables courts to deal with some of the most difficult cases in a way that takes proper account of the offender’s need for treatment, the demands of justice and the right of other people to be protected from harm.
A hospital direction enables the court to impose a custodial sentence (determinate or indeterminate) whilst as the same time securing medical treatment without delay.

The granting of a hospital and limitation direction is a decision for the court and there can be no presumption that one will be made even if the evidence suggests that it is appropriate. A hospital and limitation direction may be imposed where it is considered that the offender, although suffering from a mental disorder, can be considered to be responsible, to a degree, for the offence. Generally, courts have adopted the test that there has to be a ‘significant degree’ of culpability for a hospital direction to be appropriate, although this test is not always applied.

Notional section 37 patients

For transferred determinate sentence prisoners, restrictions added by the Secretary of State for Justice will cease on expiry of the custodial part of the sentence (ie the date the offender would have been released had he or she remained in prison). If the patient continues to require further treatment, they can remain detained within the hospital as if subject to an unrestricted section 37 hospital order. Patients detained under a hospital and limitation direction (under sections 45A and 45B of the Act) will fall into this category if they have reached the end of their sentence but still require treatment. These patients are all commonly referred to as ‘notional section 37’ patients.

All unrestricted patients, including ‘notional section 37 patients’ have been entirely diverted from the criminal justice system to the health system for treatment. They are not deemed to pose a serious risk to the public. Decisions on granting community leave, movement through the hospital system and discharge will be taken by the responsible clinician and hospital managers. The Tribunal also has a statutory duty to discharge if not satisfied that the criteria for detention are met.

When a transferred prisoner becomes unrestricted, there is still a period when, if released, they will be subject to licence conditions and management by the National Probation Service. Hospitals should remain in contact with the offender manager and victim liaison officer therefore until the end of sentence.

The Secretary of State for Justice may authorise the discharge of a restricted patient. The discharge will either be with conditions, a ‘conditional discharge’ or ‘absolutely’ in which case the restrictions will cease and there will be no further involvement of the Secretary of State. In addition the Tribunal has a statutory duty to discharge patients if not satisfied that the criteria for detention are met (see chapter 12).
22.65 Conditionally discharged restricted patients will in most cases be subject to community supervision and be monitored by a clinical supervisor and a social supervisor, both of whom are required to submit reports, generally quarterly, to the Ministry of Justice detailing the patient’s progress, current presentation and any concerns.

22.66 The Ministry of Justice does not stipulate the professionals who can undertake the role of social supervisor however the expectation is that they will receive adequate training and be resourced to be able to produce prompt, accurate reports and raise any concerns with regard to the patient’s behaviour in the community. Social supervisors will be allocated by the local authorities.

Recall to hospital

22.67 If after being granted a conditional discharge by either the Secretary of State for Justice or the First Tier Tribunal (Mental Health), the Secretary of State may recall a patient under section 42(3) if something has happened since the conditional discharge of sufficient significance to justify doing so.

22.68 A patient will be recalled where it is necessary to protect the public from the actual or potential risk posed by that patient and that the risk is linked to the patient’s mental disorder. It is not possible to specify all the circumstances when recall may be appropriate and public safety will always be the most important factor. Key points include:

- the decision on whether to recall will largely depend on the degree of danger posed by the patient, the gravity of the potential or actual risk and how imminent the risk is
- recall does not necessarily require any evidence of deterioration in the patient’s mental state however as indicated above, but evidence is required that a ‘change’ has occurred since the discharge decision. This is so that the Secretary of State for Justice can be satisfied that recall is a proportionate and lawful action. Other than in an emergency, medical evidence will be required that the patient is currently mentally disordered
- recall will not be used to deal with anti-social or offending behaviour that is unconnected with the patient’s mental disorder
- recall decisions always give precedence to public safety considerations. This may mean that the Secretary of State will decide to recall on public safety grounds even if the supervisors (see paragraph on discharge above) are of the view that recall would be counter-therapeutic for the patient
- recall will be considered to protect others from harm because of a combination of the patient’s mental disorder and behaviour, including potential behaviour where there is evidence that indicates the imminent likelihood of risk behaviours
• in an emergency the Secretary of State may recall for assessment in the absence of fresh evidence as regards mental disorder

• the support for recall from the patient’s social supervisor is important but not determinative and the Secretary of State can, satisfied that recall is necessary, make the decision to recall in the absence of any recommendation

• where however recall is recommended by at least one supervisor, then the expectation is that the patient should be recalled unless there are compelling reasons not to recall

• admission under sections 2 or 3 – If a restricted patient requires compulsory detention in hospital under the Act then recall will almost invariably be appropriate. The only circumstances where recall may not be indicated would be where discharge was imminent (within days rather than weeks), or where the admission is solely due to self-harm/suicide issues and the admission is likely to last less than a month.

22.69 Should recall be indicated, the clinical team should initially discuss their concerns with MHCS and identify a suitable bed at an appropriate security level for the patient to be admitted to. Once the arrangements are confirmed, MHCS will issue a Secretary of State warrant for the recall of a patient to a named hospital/unit.

22.70 The social supervisor requesting the recall will be advised by MHCS that the patient should be briefly informed of the Secretary of State’s reasons for the recall at the time the recall is effected unless the patient is violent. The Secretary of State then expects full reasons to be communicated to the patient within 72 hours of readmission.

Secretary of State ‘direction’

22.71 In exceptional circumstances, the Secretary of State for Justice may ‘direct’ a restricted patient’s admission into hospital, outside the NHS commissioning arrangements. This is usually where it is critical that the patient receive treatment and identifying a suitable bed is difficult.

Contacting the MHCT

22.72 Verbal authorisation can be given for recalls/transfers with warrants and written authorisations provided during office hours. The MHCT also provides an on-call service between the hours of 17:00 to 09:00 and on weekends and bank holidays. The on-call number is: 020 7035 4848, option 5.
Multi-agency public protection arrangements (MAPPA)

22.73 Under section 325(3) of the Criminal Justice Act 2003, health services have a duty to co-operate with the MAPPA responsible authorities in assessing and managing the risk of MAPPA eligible mentally disordered offenders. Further guidance can be obtained at: https://www.gov.uk/government/publications/multi-agency-public-protection-arrangements-mappa--2

Care, support and treatment in hospital

Chapter 23 The appropriate medical treatment test

Chapter 24 Medical treatment under the Act

Chapter 25 Treatments subject to special rules and procedures

Chapter 26 Safe and therapeutic responses to disturbed behaviour
23 The appropriate medical treatment test

Why read this chapter?

23.1 This chapter provides guidance on the application of the appropriate medical treatment test and the criteria for detention or a community treatment order (CTO) under the Act.

Purpose of medical treatment for mental disorder

23.2 For the purposes of the Act, medical treatment includes nursing, psychological intervention and specialist mental health habilitation, rehabilitation and care. Habilitation means equipping someone with skills and abilities they have never had, whereas rehabilitation means helping them recover skills and abilities they have lost.

23.3 In the Act, medical treatment for mental disorder means medical treatment which is for the purpose of alleviating, or preventing a worsening of, a mental disorder or one or more of its symptoms or manifestations.

23.4 Purpose is not the same as likelihood. Medical treatment must be for the purpose of alleviating or preventing a worsening of mental disorder even if it cannot be shown, in advance, that a particular effect is likely to be achieved.

23.5 Symptoms and manifestations include the way a disorder is experienced by the individual concerned and the way in which the disorder manifests itself in the person's thoughts, emotions, communication, behaviour and actions. It should be remembered that not every thought or emotion or every aspect of the behaviour, of a patient suffering from mental disorder will be a manifestation of that disorder.

23.6 Even if particular mental disorders are likely to persist or get worse despite treatment, there may well be a range of interventions which would represent appropriate medical treatment. It should never be assumed that any disorders, or any patients, are inherently or inevitably untreatable. Nor should it be assumed that likely difficulties in achieving long-term and sustainable change in a person's underlying disorder make medical treatment to help manage their condition and the behaviours arising from it either inappropriate or unnecessary.
Appropriate medical treatment test

23.7 The purpose of the appropriate medical treatment test is to ensure that no-one is detained (or remains detained) for treatment, or is on a CTO, unless medical treatment for their mental disorder is available.

23.8 This medical treatment must be appropriate, taking into account the nature and degree of the person’s mental disorder and all their particular circumstances, including cultural, ethnic and religious or belief considerations. By definition, it must be treatment which is for the purpose of alleviating or preventing a worsening of the patient’s mental disorder or its symptoms or manifestations.

23.9 The appropriate medical treatment test requires a judgement about whether an appropriate package of treatment for mental disorder is available for the individual in question. Where the appropriate medical treatment test forms part of the criteria for detention, the medical treatment in question is treatment for mental disorder in the hospital in which the patient is to be detained. Where it is part of the criteria for a CTO it refers to the treatment for mental disorder that the person will be offered while on a CTO.

Applying the appropriate medical treatment test

23.10 The test requires a judgement about whether, when looked at in the round, appropriate medical treatment is available to the patient, given:

• the nature and degree of the patient’s mental disorder, and
• all the other circumstances of the patient’s case.

In other words, both the clinical appropriateness of the treatment and its appropriateness more generally must be considered.

23.11 The other circumstances of a patient’s case might, for example, include factors such as:

• the patient’s physical health – how this might impact on the effectiveness of the available medical treatment for the patient’s mental disorder and the impact that the treatment might have in return
• the patient’s age
• any physical disabilities or sensory impairments the patient has
• the patient’s culture and ethnicity
• the patient’s gender, gender identity, sexual identity and sexual orientation
• the patient’s religion or beliefs
• the location of the available treatment
• the implications of the treatment for the patient’s family and social relationships, including their role as a parent (where applicable)
• its implications for the patient’s education or work, and
• the consequences for the patient, and other people, if the patient does not receive the treatment available (for mentally disordered offenders about to be sentenced for an offence, the consequence will sometimes be a prison sentence).

23.12 Medical treatment must always be an appropriate response to the patient’s condition and situation and indeed wherever possible should be the most appropriate treatment available. It may be that a single medical treatment does not address every aspect of a patient’s mental disorder.

23.13 Medical treatment must actually be available to the patient. It is not sufficient that appropriate treatment could theoretically be provided.

23.14 What is appropriate will vary greatly between patients. It will depend, in part, on what might reasonably be expected to be achieved given the nature and degree of the patient’s disorder.

23.15 Medical treatment which aims merely to prevent a disorder worsening is unlikely, in general, to be appropriate in cases where normal treatment approaches would aim (and be expected) to alleviate the patient’s condition significantly. However, for some patients with persistent and severe mental disorders, management of the undesirable effects of their disorder may be the most that can realistically be hoped for.

23.16 Appropriate medical treatment does not have to involve medication or psychological therapy – although it very often will. There may be patients whose particular circumstances mean that treatment may be appropriate even though it consists only of nursing and specialist day-to-day care under the clinical supervision of an approved clinician in a safe and secure therapeutic environment with a structured regime.

23.17 Simply detaining someone, even in a hospital, does not constitute medical treatment.

23.18 A patient’s attitude towards the proposed treatment may be relevant in determining whether the appropriate medical treatment test is met. An indication of unwillingness to co-operate with treatment generally, or with a specific aspect of treatment, does not make such treatment inappropriate.
23.19 In particular, psychological therapies and other forms of medical treatments which, to be effective, require the patient’s co-operation are not automatically inappropriate simply because a patient does not currently wish to engage with them. Such treatments can potentially remain appropriate and available as long as it continues to be clinically suitable to offer them and they would be provided if the patient agreed to engage.

23.20 In determining whether the appropriate medical treatment test is met, those making the judgement must satisfy themselves that appropriate medical treatment is available for the time being, given the patient’s condition and circumstances as they are currently understood. Determinations are time specific and may need to be reconsidered as the patient’s condition changes or clinicians obtain a greater understanding of the patient’s case.
24 Medical treatment under the Act

Why read this chapter?

24.1 This chapter gives guidance on medical treatment for mental disorder under the Act, especially treatment given without patients’ consent.

Treatment must be appropriate to the patient’s mental health condition and take account of the person’s wishes or feelings and advance decisions. The chapter provides guidance about appropriate treatment; treatments to which special rules and procedures apply; the treatment of detained patients and patients under community treatment orders; and on issues of capacity and consent. It also gives guidance on treatment plans, explaining their importance, and provides a summary of the treatment of incapacitated patients and the interface between the Act and the Mental Capacity Act (MCA).

Definitions

24.2 In the Act, ‘medical treatment’ includes nursing, psychological intervention and specialist mental health habilitation, rehabilitation and care.

24.3 The Act defines medical treatment for mental disorder as medical treatment which is for the purpose of alleviating or preventing a worsening of a mental disorder or one or more of its symptoms or manifestations.

24.4 This includes treatment of physical health problems only to the extent that such treatment is part of, or ancillary to, treatment for mental disorder (eg treating wounds self-inflicted as a result of mental disorder). Otherwise, the Act does not regulate medical treatment for physical health problems.

Appropriate treatment

24.5 All treatment provided should be appropriate to the patient’s mental health condition and take account of any advance decisions made by the person and any wishes or feelings they have expressed in advance of treatment. The practicalities of how the treatment is to be delivered, and how outcomes will be monitored should be considered.

24.6 Where reasonably practicable, treatment must be based on a strong evidence-base. Professionals should ensure that any treatment is compliant with the current guidelines and standards about what is appropriate treatment. Examples include NCIE/SCIE guidelines, NICE quality standards and Department of Health Care Programme Approach (CPA) guidance.
Treatments to which special rules and procedures apply

24.7 Sections 57, 58 and 58A of the Act set out types of medical treatment for mental disorder to which special rules and procedures apply, including, in many cases, the need for a certificate from a second opinion appointed doctor (SOAD) approving the treatment.

24.8 Guidance on sections 57, 58 and 58A is given in chapter 25, but in summary the treatments involved are as in the table below.

Summary of treatments covered by sections 57, 58 and 58A

<table>
<thead>
<tr>
<th>Section</th>
<th>Forms of treatment covered</th>

Note: it is possible that other forms of treatment may be added to any of these sections by regulations.

Treatment of detained patients and supervised community treatment patients recalled to hospital (part 4 of the Act)

24.9 Part 4 of the Act deals mainly with the treatment of people who have been detained in hospital, including patients on a community treatment order (CTO) and conditionally discharged patients who have been recalled to hospital. They are referred to in this chapter as ‘detained patients’.

24.10 Some patients detained in hospital are not covered by these rules, as set out in the table below. When this chapter talks about detained patients, these patients are not included. There are no special rules about treatment for these patients – they are in the same position as patients who are not subject to the Act at all, and they have exactly the same rights to consent to and refuse treatment.
Meaning of detained patients in this chapter

<table>
<thead>
<tr>
<th>In this chapter ‘detained patients’ means:</th>
<th>Exceptions</th>
</tr>
</thead>
</table>
| Patients who are liable to be detained in hospital under any section of the Act (including those who are not actually detained, such as patients who are on leave of absence or absent without leave). | • Patients detained on the basis of an emergency application under section 4 unless or until the second medical recommendation is received  
• Patients held in hospital under the holding powers in section 5  
• Patients remanded to hospital for a report on their mental condition under section 35  
• Patients detained in hospital as a place of safety under section 135 or 136  
• Patients temporarily detained in hospital as a place of safety under section 37 or 45A, pending admission to the hospital named in their hospital order or hospital direction  
• Restricted patients who have been conditionally discharged (unless or until they are recalled to hospital) |
| Patients on CTOs who have been recalled to hospital                                               |                                                                                                                                                                                                          |
| Restricted patients who have been conditionally discharged and recalled to hospital               |                                                                                                                                                                                                          |

24.11 Unless sections 57, 58 or 58A apply, section 63 of the Act means that detained patients may be given medical treatment for any kind for mental disorder, if they:

- consent to it, or
- have not consented to it, but the treatment is given by or under the direction of the approved clinician in charge of the treatment in question.

24.12 If sections 57, 58 or 58A apply, detained patients may be given the treatment only if the rules in those sections are followed (see paragraphs 25.26 – 25.27).

Treatment of CTO patients not recalled to hospital (part 4A patients)

24.13 Part 4A of the Act sets out different rules for treatment for patients on CTOs who have not been recalled to hospital by their responsible clinician. This includes patients on CTOs who are in hospital without having been recalled (eg if they have been admitted to hospital voluntarily).
24.14 For convenience, this chapter refers to patients on CTOs who have not been recalled to hospital (ie admitted to hospital voluntarily) as ‘part 4A patients’.

24.15 The rules for part 4A patients differ depending on whether or not they have the capacity to consent to the treatment in question. Except where otherwise stated, references in the paragraphs below to a person who lacks capacity includes patients aged under 16 who lack the competence to consent (see paragraph 24.17).

24.16 Part 4A patients, who have the capacity to consent to a treatment, may not be given that treatment unless they consent. There are no exceptions to this rule, even in emergencies. The effect is that treatment can be given without their consent only if they are recalled to hospital.

24.17 For part 4A patients, aged 18 and over, who lack the capacity to consent to a treatment, it may be given if someone who has lasting power of attorney (a donee) or a Court of Protection appointed deputy consents on their behalf. Similarly it may be given in the case of those aged 16 and over if a deputy consents to the treatment on their behalf. Similarly it may be given in the case of those aged 16 and over if a deputy consents to the treatment on their behalf.

24.18 Part 4A patients who lack capacity to consent to treatment may also be given it, without anyone’s consent by or under the direction of the approved clinician in charge of the treatment, unless:
- in the case of a patient aged 18 or over, the treatment would be contrary to a valid and applicable advance decision made by the patient (see chapter 9)
- in the case of a patient aged 18 or over, the treatment would be against the decision of someone with the authority under the Mental Capacity Act 2005 (MCA) to refuse it on the patient’s behalf (an attorney, a deputy or the Court of Protection)
- in the case of a patient aged 16 or over, the treatment would be against the decision of a deputy who has authority to refuse it on the patient’s behalf, or
- force needs to be used in order to administer the treatment and the patient objects to the treatment.

24.19 In this last case, force means the actual use of physical force on the patient. Where force needs to be used, it is up to the person proposing to give the treatment to decide whether a patient objects to the treatment. The question is simply whether the patient objects – the reasonableness (or unreasonableness) of the objection is irrelevant. In any situation where force is used, if it amounts to a restrictive intervention then the provisions within chapter 26 apply and particular note should be taken of paragraphs 26.33 – 26.41.
24.20 In deciding whether patients object to treatment, all the relevant evidence should be taken into account, so far as it reasonably can be. In many cases, patients will be perfectly able to state their objection, either verbally or by their dissenting behaviour. In other cases, especially where patients are unable to communicate (or only able to communicate to a limited extent), clinicians will need to consider the patient’s behaviour, wishes, feelings, views, beliefs and values, both present and past, so far as they can be ascertained.

24.21 If there is reason to think that a patient would object, if able to do so, then the patient should be taken to be objecting. Occasionally, it may be that the patient’s behaviour initially suggests an objection to being treated, but is in fact not directed at the treatment at all. In that case the patient would not be taken to be objecting.

24.22 Whether or not part 4A patients consent to treatment, there are certain treatments they can only be given if they have been approved by a SOAD on a ‘part 4A certificate’. The Act refers to this as the ‘certificate requirement’, which is above and beyond the requirements described in paragraphs 24.16 – 24.22 (the Act calls these the ‘authority’ to give treatment). Broadly speaking, the certificate requirement applies to any treatment for which a certificate would be necessary under section 58 or 58A of the Act were the patient detained instead (see chapter 25).

Emergency treatment under section 64G for CTO patients not recalled to hospital (part 4A patients)

24.23 In an emergency, treatment can also be given to part 4A patients who lack capacity (and who have not been recalled to hospital) by anyone, whether or not they are acting under the direction of an approved clinician.

24.24 It is an emergency only if the treatment is immediately necessary to:
- save the patient’s life
- prevent a serious deterioration of the patient’s condition and the treatment does not have unfavourable physical or psychological consequences which cannot be reversed
- alleviate serious suffering by the patient and the treatment does not have unfavourable physical or psychological consequences which cannot be reversed and does not entail significant physical hazard, or
- prevent patients behaving violently or being a danger to themselves or others and the treatment represents the minimum interference necessary for that purpose, does not have unfavourable physical or psychological consequences which cannot be reversed and does not entail significant physical hazard.

If the treatment is ECT (or medication administered as part of ECT), only the first two categories above apply.
24.25 Where treatment is immediately necessary in these terms, it can be given even though it conflicts with an advance decision or the decision of someone who has the authority under the MCA to refuse it on the patient’s behalf.

24.26 In addition, force may be used (whether or not the patient objects), provided that:
- the treatment is necessary to prevent harm to the patient, and
- the force used is proportionate to the likelihood of the patient suffering harm and to the seriousness of that harm.

24.27 These are the only circumstances in which force may be used to treat patients on CTOs who object, without recalling them to hospital. This exception is for situations where the patient’s interests would be better served by being given urgently needed treatment by force outside hospital rather than being recalled to hospital. This might, for example, be where the situation is so urgent that recall is not realistic, or where taking patients to hospital would exacerbate their condition, damage their recovery or cause them unnecessary anxiety or suffering. Situations like this should be exceptional.

Treatment of other patients

24.28 The Act does not regulate treatment for any other patients, except that:
- the special rules and procedures in section 57 apply to all patients, and
- the special rules and procedures in section 58A apply to all patients under the age of 18. See chapters 25 and 19.

Capacity and consent

24.29 The Act frequently requires healthcare professionals to determine:
- whether a patient has the capacity to consent to or refuse a particular form of medical treatment, and
- if so, whether the patient does in fact consent.

The rules for answering these questions are the same as for any other patients.
Capacity to consent: people aged 16 or over

24.30 For people aged 16 or over, capacity to consent is defined by the MCA. The principles of the MCA state (among other things) that:

- people must be assumed to have capacity unless it is established that they lack capacity
- people are not to be treated as unable to make a decision unless all practicable steps to help them do so have been taken without success
- people are not to be treated as unable to make a decision merely because they make an unwise decision.

24.31 When taking decisions about patients under the Act, it should be remembered that:

- mental disorder does not necessarily mean that a patient lacks capacity to give or refuse consent, or to take any other decision
- any assessment of an individual’s capacity has to be made in relation to the particular decision being made – a person may, for example, have the capacity to consent to one form of treatment but not to another
- capacity in an individual with a mental disorder can vary over time and should be assessed at the time the decision in question needs to be taken
- where a patient’s capacity fluctuates in this way, consideration should be given, if a decision is not urgently required, to delaying the decision until the patient has capacity again to make it for themselves
- not everyone is equally capable of understanding the same explanation – explanations should be appropriate to the level of the patient’s assessed ability
- all assessments of an individual’s capacity should be fully recorded in the patient’s notes.

Competence to consent to treatment – children under 16

24.32 The MCA does not apply to medical treatment for children under 16. Children who have sufficient understanding and intelligence to enable them fully to understand what is involved in a proposed treatment are considered to be competent (or ‘Gillick competent’) to consent to it. Further information on assessing a child’s competence to make treatment decisions is provided in chapter 19.
Consent

24.33 Consent is the voluntary and continuing permission of a patient to be given a particular treatment, based on a sufficient knowledge of the purpose, nature, likely effects and risks of that treatment, including the likelihood of its success and any alternatives to it. Permission given under any unfair or undue pressure is not consent.

24.34 By definition, a person who lacks capacity is unable to consent or refuse treatment, even if they co-operate with the treatment or actively seek it.

24.35 It is the duty of everyone seeking consent to use reasonable care and skill, not only in giving information prior to seeking consent, but also in meeting the continuing obligation to provide the patient with sufficient information about the proposed treatment and alternatives to it.

24.36 The information which must be given should be related to the particular patient, the particular treatment and relevant clinical knowledge and practice. In every case, sufficient information must be given to the patient to ensure that they understand in broad terms the nature, likely effects and all significant possible adverse outcomes of that treatment, including the likelihood of its success and any alternatives to it. A record should be kept of information provided to patients.

24.37 Patients should be invited to ask questions and professionals should answer fully, frankly and truthfully. There may sometimes be a compelling reason, in the patient’s interests, for not disclosing certain information. A professional who chooses not to disclose information must be prepared to justify the decision. A professional who chooses not to answer a patient’s question should make this clear to the patient so that the patient knows where they stand.

24.38 Patients should be told that their consent to treatment can be withdrawn at any time. Where patients withdraw their consent (or are considering withdrawing it), they should be given a clear explanation of the likely consequences of not receiving the treatment and (where relevant) the circumstances in which the treatment may be given without their consent under the Act. A record should be kept of the information provided to patients.

Treatment without consent – general points

24.39 Although the Act permits some medical treatment for mental disorder to be given without consent, the patient’s consent should still be sought before treatment is given, wherever practicable. The patient’s consent or refusal should be recorded in their notes, as should the treating clinician’s assessment of the patient’s capacity to consent.
24.40 If a patient initially consents, but then withdraws that consent (or loses the capacity to consent), the treatment should be reviewed. The clinician in charge of the treatment must consider whether to proceed in the absence of consent, to provide alternative treatment instead or to give no further treatment.

24.41 Clinicians authorising or administering treatment without consent under the Act are performing a function of a public nature and are therefore subject to provisions of the Human Rights Act 1998 (HRA). It is unlawful for them to act in a way which is incompatible with a patient’s rights set out in The European Convention of Human Rights (ECHR).

24.42 In particular, the following should be noted:

- compulsory administration of treatment which would otherwise require consent is invariably an infringement of article 8 of the ECHR (respect for family and private life). However, it may be justified where it is in accordance with law (in this case the procedures in the Act) and where it is proportionate to a legitimate aim (in this case, the reduction of the risk posed by a person’s mental disorder and the improvement of their health)

- compulsory treatment is capable of being inhuman treatment (or in extreme cases even torture) contrary to article 3 of the ECHR, if its effect on the person concerned reaches a sufficient level of severity. But the European Court of Human Rights has said that a measure which is convincingly shown to be of medical necessity from the point of view of established principles of medicine cannot in principle be regarded as inhuman and degrading.

24.43 Scrupulous adherence to the requirements of the legislation and good clinical practice should ensure that there is no such incompatibility. But if clinicians have concerns about a potential breach of a person’s human rights they should seek senior clinical and, if necessary, legal advice.

**Treatment plans**

24.44 Treatment plans are essential for patients being treated for mental disorder under the Act. A patient’s responsible clinician is responsible for ensuring that a treatment plan is in place for that patient.

24.45 A treatment plan should include a description of the immediate and long-term goals for the patient and should give a clear indication of the treatments proposed and the methods of treatment.

24.46 The treatment plan should form part of a coherent care plan under the care programme approach (CPA) (or its equivalent), and be recorded in the patient’s notes (see chapter 34).
24.47 Psychological therapies should be considered as a routine treatment option at all stages, including the initial formulation of a treatment plan and each subsequent review of that plan. Any programme of psychological intervention should form part of the agreed treatment plan and be recorded in the patient’s notes as such. At no time should it be used as an isolated and spontaneous reaction to particular behaviour.

24.48 Wherever possible, the whole treatment plan should be discussed with the patient. Patients should be encouraged and assisted to make use of advocacy support available to them, if they want it. This includes, but need not be restricted to, independent mental health advocacy services under the Act. Where patients cannot (or do not wish to) participate in discussion about their treatment plan, any views they have expressed previously should be taken into consideration (see chapter 9).

24.49 Subject to the normal considerations of patient confidentiality, the treatment plan should also be discussed with their carers, with a view to enabling them to contribute to it and express agreement or disagreement.

24.50 Discussion with carers is particularly important where carers will themselves be providing care to the patient while the plan is in force. Plans should not be based on any assumptions about the willingness or ability of carers to support patients, unless those assumptions have been discussed and agreed with the carers. Carers and families still have an important role to play in maintaining the patient’s contact with the home and community life and providing emotional support when the patient is detained in hospital.

24.51 For children and young people, subject to the normal considerations of patient confidentiality, the plan should similarly be discussed with the people who have parental responsibility for them. For further information on confidentiality and sharing information concerning children and young people, paragraphs 19.13 – 19.15.

24.52 Treatment plans should be regularly reviewed and the results of reviews recorded in the patient’s notes.

Treatment of incapacitated patients – interface between parts 4 and 4A of the Mental Health Act and the Mental Capacity Act 2005 (section 28)

24.53 In so far as it deals with decisions about medical treatment for people aged 16 or above who lack capacity to consent to such treatment, the MCA applies to patients subject to the Act in the same way as to anyone else, with exceptions set out in the following table. These exceptions apply only to medical treatment for mental disorder.
Medical treatment of patients subject to the Mental Health Act – exceptions to the normal rules on treatment and consent in the MCA

<table>
<thead>
<tr>
<th>Situation</th>
<th>Exceptions to the normal rules in the MCA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Section 57 treatment (neurosurgery for mental disorder etc)</td>
<td>The MCA may not be used to give anyone treatment to which section 57 applies (see chapter 25 for guidance on section 57).</td>
</tr>
<tr>
<td>Section 58 treatment (medication after an initial three month period, except ECT-related medication)</td>
<td>The MCA may not be used to give anyone treatment to which section 58 applies (see chapter 25 for guidance on section 58).</td>
</tr>
<tr>
<td>Section 58A treatment (ECT and related medication)</td>
<td>The MCA may not be used to give detained patients (as defined in paragraphs 24.9 – 24.12) ECT and any other treatment to which section 58A applies.</td>
</tr>
<tr>
<td>Treatment regulated by part 4 of the Act for detained patients</td>
<td>The MCA may not be used to give detained patients (as defined in this chapter) any other medical treatment for mental disorder. Treatment regulated by part 4 of the Act at the time of the proposed treatment must be given in accordance with part 4 of the Act instead (see paragraphs 24.9 – 24.12).</td>
</tr>
<tr>
<td>Treatment for patients on CTOs who have not been recalled to hospital (part 4A patients)</td>
<td>The MCA may not generally be used to give these CTO patients any medical treatment for mental disorder, but attorneys, deputies and the Court of Protection may consent to such treatment on behalf of these CTO patients.</td>
</tr>
<tr>
<td>Advance decisions to refuse treatment (as defined in the MCA)</td>
<td>Where the Act allows treatment to be given against the wishes of a patient who has capacity to consent, it also allows treatment to be given despite the existence of a valid and applicable advance decision made under the MCA (see chapter 9). But note that, except in emergencies:</td>

<tr>
<td></td>
<td>• treatment to which section 58A applies cannot be given contrary to a valid and applicable advance decision</td>
</tr>
<tr>
<td></td>
<td>• treatment cannot be given to CTO patients who have not been recalled to hospital (part 4A patients) contrary to a valid and applicable advance decision.</td>
</tr>
<tr>
<td>Patients who have attorneys or court-appointed deputies under the MCA with authority to take decisions on their behalf about their medical treatment</td>
<td>Attorneys and deputies (acting within the scope of their authority under the MCA) may not:</td>
</tr>
<tr>
<td></td>
<td>• consent to treatment to which section 57 or 58 applies on behalf of any patient</td>
</tr>
<tr>
<td></td>
<td>• consent to treatment to which section 58A applies – but note that (except in emergencies) they may refuse it on a patient's behalf</td>
</tr>
<tr>
<td></td>
<td>• consent to or refuse any other treatment on behalf of detained patients (as defined in paragraphs 24.9 – 24.10).</td>
</tr>
<tr>
<td></td>
<td>But note that attorneys and deputies may:</td>
</tr>
<tr>
<td></td>
<td>• consent to treatment on behalf of CTO patients who have not been recalled to hospital (part 4A patients), even if treatment is to be given forcibly</td>
</tr>
<tr>
<td></td>
<td>• except in emergencies, also refuse treatment on behalf of those patients.</td>
</tr>
</tbody>
</table>
24.54 See chapter 13 for guidance on the interface between detention under the Act and the deprivation of liberty safeguards under the MCA. See chapter 30 for the interface between the powers of guardians under the Act and the MCA.

Court of protection and other courts

24.55 Although the Act refers only to decisions of the Court of Protection, other courts may, in certain circumstances, have the power to order that the treatment must not be given. Should such an order be made, legal advice should be sought on the legal authority for continuing or starting any such treatment.

Summary of when medical treatment for mental disorder may be given under the Mental Health Act

<table>
<thead>
<tr>
<th>Type of patient (and relevant part of the Act)</th>
<th>When treatment can be given</th>
<th>Notes (for further detail see chapter 24)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Detained patients (part 4) – see definition in paragraphs 24.9 – 24.12</td>
<td>If sections 57, 58 or 58A apply, treatment may be given only in accordance with those sections. Otherwise, treatment may be given: • with the patient’s consent • without the patient’s consent under section 63, if the treatment is by or under the direction of the approved clinician in charge.</td>
<td>Neurosurgery for mental disorder and other treatments to which section 57 applies cannot be given without the patient’s consent and must always be approved by a SOAD. ECT and other treatments to which section 58A applies cannot be given to a patient who has capacity to consent but refuses to do so. They can only be given to patients who lack capacity (or who are under 18) if approved by a SOAD. Medication to which section 58 apply can be given without the patient’s consent, but only with the approval of a SOAD. Sections 57, 58 and 58A do not apply in emergencies, where treatment is defined in section 62 as immediately necessary.</td>

25 Treatments subject to special rules and procedures

Why read this chapter?

25.1 This chapter gives guidance on the special rules and procedures in the Act for certain types of medical treatment for mental disorder.

This chapter provides guidance on the ‘clinician in charge of treatment’ and the treatments under section 57, or 58, or 58A of the Act. Guidance is given on second opinion approved doctor (SOAD) certificates and a summary of the circumstances in which certificates cease to authorise treatment, even though they have not been withdrawn is provided.

Definitions

25.2 In this chapter:

- ‘detained patients’ means the same as in chapter 24 (see paragraphs 24.9 – 24.12)
- ‘SOAD’ means a second opinion approved doctor appointed by the care quality commission (CQC) to approve certain forms of treatment
- ‘SOAD certificate’ means a certificate issued by a SOAD approving treatment for a particular patient
- ‘part 4A patient’ means a patient on a community treatment order (CTO) who has not been recalled to hospital
- ‘part 4A certificate’ means a SOAD certificate issued under part 4A of the Act in respect of the treatment of a patient on a community treatment order (CTO).

Clinician in charge of treatment

25.3 This chapter frequently refers to the ‘clinician in charge of treatment’. This means the clinician in charge of the particular treatment in question for a patient, who need not be the same as the responsible clinician who is in charge of a patient’s case overall.

25.4 In many cases, for detained and patients on a CTO the clinician in charge of treatment must be an approved clinician, as set out in the following table.
Summary of when the person in charge of treatment under the Act must be an approved clinician

<table>
<thead>
<tr>
<th>Type of patient</th>
<th>When the clinician in charge of the treatment must be an approved clinician</th>
</tr>
</thead>
<tbody>
<tr>
<td>Detained patients</td>
<td>When the treatment is being:</td>
</tr>
<tr>
<td></td>
<td>• given without the patient’s consent</td>
</tr>
<tr>
<td></td>
<td>• given with the patient’s consent, on the basis of a certificate issued under section 58 or, in relation to a patient over 18 a certificate issued under section 58A, by an approved clinician (rather than a SOAD) – see paragraphs 25.13 and 15.20 below</td>
</tr>
<tr>
<td></td>
<td>• continued with the consent of a community patient who has been recalled to hospital (including one whose community treatment order has then been revoked) to avoid serious suffering to the patient, pending compliance with section 58 – see paragraph 25.28.</td>
</tr>
<tr>
<td>Part 4A patients</td>
<td>When the treatment is being given to a patient who lacks capacity to consent to it and without the consent of an attorney, deputy or the Court of Protection (unless it is immediately necessary and being given under section 64G – see paragraphs 25.21 – 25.22).</td>
</tr>
</tbody>
</table>

**25.5** Hospital managers should keep a record of approved clinicians who are available to treat patients for whom they are responsible and should ensure that approved clinicians are in charge of treatment where the Act requires it.

**Treatments requiring consent and a second opinion under section 57**

**25.6** Section 57 applies to neurosurgery for mental disorder and to surgical implantation of hormones to reduce male sex drive. It applies to all patients, whether or not they are otherwise subject to the Act.

**25.7** Where section 57 applies, these treatments can be given only if all three of the following requirements are met:

• the patient consents to the treatment

• a SOAD (and two other people appointed by the CQC) certify that the patient has the capacity to consent to the treatment and has done so

• the SOAD also certifies that it is appropriate for the treatment to be given to the patient.

---

58 In fact, here and in section 58 and 58A, the Act refers to the patient being “capable of understanding the nature, purpose and likely effects” of the treatment. For all practical purposes this can be understood to mean the same as the test of whether the patient has the capacity to consent (or, if under 16, the competence to do so).
25.8 A decision to administer treatments to which section 57 applies requires particularly careful consideration, given their significance and sensitivity. Hospitals proposing to offer such treatments are strongly encouraged to agree with the CQC the procedures which will be followed to implement the requirements of section 57.

25.9 Before asking the CQC to put in hand the process of issuing a certificate, referring professionals should personally satisfy themselves that the patient is capable of giving valid consent and is willing to consent. The restrictions and procedures imposed by section 57 should be explained to the patient, and it should be made clear to the patient that their willingness to receive treatment does not necessarily mean that the treatment will be given.

Treatments requiring consent or a second opinion under section 58

25.10 Section 58 applies to the administration of medication for mental disorder. But it only applies once three months (‘the three-month period’) have passed from the day on which any form of medication for mental disorder was first administered to the patient during the current period in which the patient is liable to be detained under the Act.

25.11 For these purposes, the three-month period continues even if the section under which the patient is detained changes or if the patient has withdrawn consent for the treatment. It also includes any time the patient has spent on a CTO. The three-month period is broken if a part 2 patient is discharged without becoming a CTO patient or if the patient is placed under guardianship, or upon the conditional discharge of a restricted patient.

25.12 Section 58 does not apply to medication administered as part of electro-convulsive therapy (ECT). That is covered by section 58A instead (see paragraphs 25.18 – 25.24).

25.13 Section 58 applies only to detained patients. They cannot be given medication to which section 58 applies unless:

- the approved clinician in charge of the treatment, or a SOAD, certifies that the patient has the capacity to consent and has done so, or
- a SOAD certifies that the treatment is appropriate and either that:
  - the patient does not have the capacity to consent, or
  - the patient has the capacity to consent but has refused to do so.

25.14 Hospital managers should ensure that systems are in place to remind both the clinician in charge of the medication and the patient at least four weeks before the expiry of the three-month period.
25.15 Warning systems must be capable of dealing with the possibility that a patient may become a CTO patient, and may also have their community treatment order revoked, during the three-month period. A patient’s move between detention and CTO does not change the date on which the three-month period expires.

25.16 Where approved clinicians certify the treatment of a patient who consents, they should not rely on the certificate as the only record of their reasons for believing that the patient has consented to the treatment. A record of their discussion with the patient, and of the steps taken to confirm that the patient has the capacity to consent, should be made in the patient’s notes as normal.

25.17 Certificates under this section must clearly set out the specific forms of treatment to which they apply. All the relevant drugs should be listed, including medication to be given ‘as required’ (prn), either by name or by the classes described in the British National Formulary (BNF). If drugs are specified by class, the certificate should state clearly the number of drugs authorised in each class, and whether any drugs within the class are excluded. The maximum dosage and route of administration should be clearly indicated for each drug or category of drugs proposed. This can exceed the dosages listed in the BNF, but particular care is required in these cases.\(^59\)

Electro-convulsive therapy under section 58A

25.18 Section 58A applies to ECT and to medication administered as part of ECT. It applies to detained patients and to all patients aged under 18 (whether or not they are detained).

25.19 The key differences from section 58 are that:

- patients who have the capacity to consent may not be given treatment under section 58A unless they do in fact consent
- no patient aged under 18 can be given treatment under section 58A unless a SOAD has certified that the treatment is appropriate
- there is no initial three-month period during which a certificate is not needed (even for the medication administered as part of the ECT).

25.20 A patient who is consenting may not be given treatment under section 58A unless the clinician in charge, or a SOAD, has certified that the patient has the capacity to consent and has done so. If the patient is under 18, only a SOAD may give the certificate, and the SOAD must also certify that the treatment is appropriate.

25.21 A patient who lacks the capacity to consent may not be given treatment under section 58A unless a SOAD certifies that the patient lacks capacity to consent and that:

- the treatment is appropriate
- no valid and applicable advance decision has been made by the patient under the Mental Capacity Act 2005 (MCA) refusing the treatment in question
- no suitably authorised attorney or deputy objects to the treatment on the patient’s behalf
- the treatment would not conflict with a decision of the Court of Protection which prevents the treatment being given.

25.22 In all cases, SOADs should indicate on the certificate the maximum number of administrations of ECT which it approves.

25.23 For children and young people under 18, a SOAD certificate by itself is not sufficient to authorise the treatment, unless they are detainted. Clinicians must also have the patient’s own consent or some other legal authority, just as they would if section 58A did not exist (see chapter 19 paragraphs 19.80 – 19.87).

25.24 Whether or not section 58A applies, patients of all ages to be treated with ECT should be given written information before their treatment starts which helps them to understand and remember, both during and after the course of ECT, the advice given about its nature, purpose and likely effects.

**Part 4A certificates**

25.25 Part 4A patients may be given certain treatments for mental disorder only if a SOAD has certified that the treatment is appropriate, using a part 4A certificate. The requirement to have a certificate is in addition to the other rules governing treatment of CTO patients, described in chapter 29.

25.26a A part 4A certificate is needed for:

- treatments which would require a certificate under section 58 if the patient were detained – ie medication after an initial three-month period (‘section 58 type treatment’)
- ECT and any other types of treatment to which section 58A applies (‘section 58A type treatment’).

25.26b However, a certificate is not required for section 58 type treatment during the first month following a patient’s discharge from detention onto a CTO order (even if the three-month period in section 58 has already expired or expires during that first month). Nor is a certificate required if treatment is authorised under section 64G, or if it is immediately necessary and the patient, their donee or deputy or the Court of Protection has consented on the patient’s behalf (see chapter 7).
25.27 When giving part 4A certificates, SOADs do not have to certify whether a patient has, or lacks, capacity to consent to the treatments in question, nor whether a patient with capacity is consenting or refusing. They may make it a condition of their approval that particular treatments are given only in certain circumstances. For example, they might specify that a particular treatment is to be given only with the patient’s consent. Similarly, they might specify that a medication may be given up to a certain dosage if the patient lacks capacity to consent, but that a higher dosage may be given with the patient’s consent.

CTO patients recalled to hospital – exceptions to the need for certificates under section 58 or 58A

25.28 In general, CTO patients recalled to hospital are subject to sections 58 and 58A in the same way as other detained patients. But there are three exceptions, as follows:

- a certificate under section 58 is not needed for medication if less than one month has passed since the patient was discharged from hospital and became an CTO patient
- a certificate is not needed under either section 58 or 58A if the treatment in question is already explicitly authorised for administration on recall on the patient’s part 4A certificate
- treatment that was already being given on the basis of a part 4A certificate may be continued, even though it is not authorised for administration on recall, if the approved clinician in charge of the treatment considers that discontinuing it would cause the patient serious suffering. It may only be continued pending compliance with section 58 or 58A (as applicable) – in other words while steps are taken to obtain a new certificate.

25.29 As a result, SOADs giving part 4A certificates need to consider what (if any) treatments to approve should the patient be recalled to hospital. They must decide whether to impose any conditions on that approval. Unless they specify otherwise, the certificate will authorise the treatment even if the patient has capacity to refuse it (unless it is a section 58A type treatment).

25.30 The potential advantage of authorising treatments to be given on recall to hospital is that it will enable such treatments to be given quickly without the need to obtain a new certificate. SOADs should do so only where they believe they have sufficient information on which properly to make such a judgement.

25.31 The exceptions to the requirement to have a certificate under section 58 or 58A set out in paragraph 25.28 continue to apply if the patient’s community treatment order (CTO) is revoked, but only while steps are taken to comply with section 58 (where relevant). Responsible clinicians should ensure that steps are in hand to obtain a new SOAD certificate under section 58 or 58A, if one is needed, as soon as they revoke a CTO.
Urgent cases where certificates are not required (sections 62, 64B, 64C and 64E)

25.32 Sections 57, 58 and 58A do not apply in urgent cases where treatment is immediately necessary (section 62). Similarly, a part 4A certificate is not required in urgent cases where the treatment is immediately necessary (sections 64B, 64C and 64E).

25.33a This applies only if the treatment in question is immediately necessary to:
   • save the patient’s life
   • prevent a serious deterioration of the patient’s condition, and the treatment does not have unfavourable physical or psychological consequences which cannot be reversed
   • alleviate serious suffering by the patient, and the treatment does not have unfavourable physical or psychological consequences which cannot be reversed and does not entail significant physical hazard, or
   • prevent patients behaving violently or being a danger to themselves or others, and the treatment represents the minimum interference necessary for that purpose, does not have unfavourable physical or psychological consequences which cannot be reversed and does not entail significant physical hazard.

25.33b If the treatment is ECT (or medication administered as part of ECT) only the first two categories above apply.

25.34a These are strict tests. It is not enough for there to be an urgent need for treatment or that the clinicians involved believe the treatment is necessary or beneficial.

25.34b Urgent treatment under these sections can continue only for as long as it remains immediately necessary. If it is no longer immediately necessary, the normal requirements for certificates apply. Although certificates are not required where treatment is immediately necessary, the other requirements of parts 4 and 4A of the Act still apply. The treatment is not necessarily allowed just because no certificate is required.

25.34c Hospital managers should monitor the use of these exceptions to the certificate requirements to ensure that they are not used inappropriately or excessively. They are advised to provide a form (or other method) by which the clinician in charge of the treatment in question can record details of:
   • the proposed treatment
   • why it is immediately necessity to give the treatment
   • the length of time for which the treatment was given.
Requesting a SOAD visit

25.35 If a SOAD certificate is required, the clinician in charge of the treatment in question has the personal responsibility of ensuring that a request is made to the CQC for a SOAD to visit.

25.36 Clinicians should not normally request a visit from a SOAD in order to obtain a certificate which they could issue themselves confirming that a patient has consented to treatment. They should request a visit for that purpose only if they are genuinely unable to determine for themselves whether the patient has the capacity to consent or whether the patient is in fact consenting.

Arranging and preparing for SOAD visits

25.37 SOADs will visit detained patients in hospital. For CTO patients, hospital managers should ensure that arrangements are made for the SOAD to see the patient at a mutually agreed place, eg at an outpatient clinic or somewhere that the patient might visit regularly.

25.38 Attending hospital for examination by a SOAD is a condition of all CTOs. If CTO patients fail to attend when asked to do so, they may be recalled to hospital for the examination, if necessary, but this should only ever be a last resort (see paragraph 29.44).

25.39 The treatment proposal for the patient, together with notes of any relevant multidisciplinary discussion on which it was based, must be given to the SOAD before or at the time of the visit. If a part 4A certificate is being requested, the proposal should clearly indicate which (if any) treatments it is proposed should be authorised in the case of the patient’s recall to hospital.

25.40 During a visit, SOADs should:

- satisfy themselves that the patient’s detention or CTO papers are in order (where applicable)
- interview the patient in private if possible. Others may attend if the patient and the SOAD wish, or if it is thought that the SOAD would be at significant risk of physical harm from the patient (and the SOAD agrees).

25.41 Hospital managers are responsible for ensuring that people whom the SOAD wishes to meet (including the clinician in charge of the treatment) are available in person at the time the SOAD visits.

25.42 The managers are also responsible for ensuring that all relevant documentation, including the patient’s full clinical notes, are available for the SOAD’s inspection.
25.43 SOADs have a right to access records without the patient’s consent, if necessary, but only those records relating to the treatment of the patient in the hospital or other establishment in which they are examining the patient. If a CTO patient with capacity to do so refuses the SOAD access to records which the SOAD thinks are relevant, the examination should be arranged in a hospital where the relevant records would be available.

25.44 Where the proposed treatment includes medication, the SOAD’s attention should be drawn specifically to any recent review of the patient’s treatment, including the rationale for using medication, and what other forms of treatment have been tried or considered. Clinicians should consider seeking a review by a specialist mental health pharmacist before seeking a SOAD certificate, particularly if the patient’s medication regimen is complex or unusual.

25.45 Approved clinicians should ensure that SOADs are informed if the hospital knows that the patient has an attorney or deputy who is authorised under the MCA to make decisions on the patient’s behalf about medical treatment. Details of any relevant advance decisions, or advance statements of views, wishes or feelings, should already be recorded in the patient’s notes. If they are not, they should be drawn to the SOAD’s attention.

Statutory consultees

25.46 SOADs are required to consult two people (‘statutory consultees’) before issuing certificates approving treatment.\(^{60}\) Where section 57, 58 or 58A applies, one of the statutory consultees must be a nurse; the other may not be either a nurse or a doctor. Both must have been professionally concerned with the patient’s medical treatment, and neither may be the clinician in charge of the proposed treatment or the responsible clinician (if the patient has one). Where a SOAD is considering giving a part 4A certificate, at least one of the statutory consultees must not be a doctor (but need not be a nurse), and neither may be the clinician in charge of the proposed treatment or the responsible clinician (if the patient has one).

25.47 The Act does not specify who the statutory consultees should be, but they should be people whose knowledge of the patient and the patient’s treatment can help the SOAD decide whether the proposed treatment is appropriate. People who may be particularly well placed to act as statutory consultees include the patient’s care co-ordinator (if they have one) and, where medication is concerned, a mental health pharmacist who has been involved in any recent review of the patient’s medication.

25.48 The statutory consultees whom the SOAD proposes to consult should consider whether they are sufficiently concerned professionally with the patient’s care to fulfil

---

\(^{60}\) Sections 57(3)
the function. If not, or if a consultee feels that someone else is better placed to fulfil the function, they should make this known to the clinician in charge of the treatment and to the SOAD in good time.

25.49 Statutory consultees may expect a private discussion with the SOAD and to be listened to with consideration. Among the issues that the consultees should consider commenting on are:

- the proposed treatment and the patient’s ability to consent to it
- their understanding of the past and present views and wishes of the patient
- other treatment options and the way in which the decision on the treatment proposal was arrived at
- the patient’s progress and the views of the patient’s carers, and
- where relevant, the implications of imposing treatment on a patient who does not want it and the reasons why the patient is refusing treatment.

25.50 If the SOAD wishes to speak to the statutory consultees face-to-face, the hospital managers should ensure that the SOAD is able to do so.

25.51 Consultees should ensure that they make a record of their consultation with the SOAD, which is then placed in the patient’s notes.

25.52 SOADs should, where appropriate, consult a wider range of people who are concerned with the patient’s care than those required by the Act, including the patient’s GP, nearest relative, family and carers, and any independent mental health advocate or other advocate representing the patient.

The SOAD’s decision and reasons

25.53 The SOAD’s role is to provide an additional safeguard to protect the patient’s rights, primarily by deciding whether certain treatments are appropriate and issuing certificates accordingly. Although appointed by the commission, SOADs act as independent professionals and must reach their own judgement about whether the proposed treatment is appropriate.

25.54 When deciding whether it is appropriate for treatment to be given to a patient, SOADs are required to consider both the clinical appropriateness of the treatment to the patient’s mental disorder and its appropriateness in the light of all the other circumstances of the patient’s case.

25.55 SOADs should, in particular:

- seek to understand the patient’s views on the proposed treatment, and the reasons for them. This includes involving an advocate, family members or carers or making any reasonable adjustments, as appropriate
• give due weight to the patient’s views, including any objection to the proposed treatment and any preference for an alternative
• consider the appropriateness of alternative forms of treatment, not just that proposed
• balance the potential therapeutic efficacy of the proposed treatment against the side effects and any other potential disadvantages to the patient;
• take into account any previous experience of comparable treatment for a similar episode of disorder, and
• give due weight to the opinions, knowledge, experience and skills of those consulted.

25.56 SOADs must provide written reasons in support of their decisions to approve specific treatments for patients. SOADs do not have to give an exhaustive explanation, but should provide their reasons for what they consider to be the substantive points on which they made their clinical judgement. These reasons can be recorded on the certificate itself when it is given, or can be provided to the clinician in charge of the treatment separately as soon as possible afterwards.

25.57 A certificate may be acted on even though the SOAD’s reasons have yet to be received. But if there is no pressing need for treatment to begin immediately, it is preferable to wait until the reasons are received, especially if the patient is likely to be unhappy with the decision.

25.58 When giving reasons, SOADs will need to indicate whether, in their view, disclosure of the reasons to the patient would be likely to cause serious harm to the patient’s physical or mental health or to that of any other person.

25.59 It is the personal responsibility of the clinician in charge of the treatment to communicate the results of the SOAD visit to the patient. This need not wait until any separate statement of reasons has been received from the SOAD. But when a separate statement is received from the SOAD, the patient should be given the opportunity to see it as soon as possible, unless the clinician in charge of the treatment (or the SOAD) thinks that it would be likely to cause serious harm to the physical or mental health of the patient or any other person.

25.60 Documents provided by SOADs are a part of, and should be kept in, the patient’s notes. The clinician in charge of the treatment should record their actions in providing patients with (or withholding) the reasons supplied by a SOAD.

25.61 Every attempt should be made by the clinician in charge of the treatment and the SOAD to reach agreement. A generally sound plan need not be rejected as a whole because of a minor disagreement about one aspect of it.

25.62a If SOADs are unable to agree with the clinician in charge of the treatment, they should inform the clinician personally as soon as possible. It is good practice for SOADs to give reasons for their disagreement.
Neither the SOAD nor the approved clinician should allow a disagreement in any way to prejudice the interests of the patient. If agreement cannot be reached, the position should be recorded in the patient’s notes by the clinician in charge of the treatment in question, and the patient’s responsible clinician (if different) should be informed.

The opinion given by the SOAD is the SOAD’s personal responsibility. There can be no appeal to the CQC against the opinion.

**Status of certificates under part 4 and part 4A**

A certificate issued by an approved clinician or by a SOAD is not an instruction to administer treatment.

The fact that the SOAD has authorised a particular treatment does not mean that it will always be appropriate to administer it on any given occasion, or even at all. People administering the treatment (or directing its administration) must still satisfy themselves that it is an appropriate treatment in the circumstances.

They also need to take reasonable steps to assure themselves that the treatment is, in fact, authorised by the certificate, given what is said in the certificate about the patient’s capacity and willingness to consent (see paragraph 25.76).

Original signed certificates should be kept with the documents which authorise the patient’s detention or CTO, and copies should be kept in the patient’s notes. As a matter of good practice, a copy of the certificate relating to medication should also be kept with the patient’s medicine chart (if there is one) to minimise the risk of the patient being given treatment in contravention of the provisions of the Act.

**Review of treatment and withdrawal of approval (sections 61 and 64H)**

Although the Act does not require the validity of certificates to be reviewed after any particular period, it is good practice for the clinician in charge of the treatment to review them (in consultation with the responsible clinician, if different) at regular intervals.

The clinician in charge of any treatment given in accordance with a SOAD certificate must provide a written report on that treatment and the relevant patient’s condition at any time if requested to do so by the CQC under sections 61 or 64H of the Act. This is in addition to the reports they are automatically required to provide periodically under those sections.\(^61\) Copies of reports should be given to patients.

---

\(^61\) At the time of publication, the Care Quality Commission expects these reports to be submitted on form MHAC1 which it provides for the purpose.
25.70 Under sections 61 and 64H, the CQC may also, at any time, direct that a certificate is no longer to approve either some or all of the treatments specified in it from a particular date.

25.71 However, where the CQC revokes approval in that way, treatment (or a course of treatment) which is already in progress may continue, pending a new certificate, if the clinician in charge of it considers that discontinuing it would cause the patient serious suffering.62

25.72 This exception only applies pending compliance with the relevant requirement to have a certificate – in other words, while steps are taken to obtain a new certificate. It cannot be used to continue treatment under section 57 or section 58A against the wishes of a patient who has the capacity to refuse the treatment, because in those cases there is no prospect of obtaining a new certificate.

**Action where treatment is continued pending a new certificate**

25.73 Where treatment is continued to avoid serious suffering pending compliance with a certificate requirement, the clinician in charge of the treatment should immediately take steps to ask for a SOAD visit. This applies both to cases where certificates have been withdrawn by the CQC and to cases where the treatment of CTO patients is being continued pending a new certificate following their recall to hospital (see paragraphs 25.28 and 25.31). If the SOAD visits and decides not to give a certificate for treatment which requires one, the treatment must end immediately.

25.74 As with immediately necessary treatment, hospital managers should monitor the use of these exceptions. They should require clinicians to record details of why it was necessary to continue treatment without a certificate and how long it took to obtain a new certificate.

**Other circumstances when certificates cease to be effective**

25.75 There are a number of other circumstances in which a certificate will cease to authorise treatment (or a particular treatment). These are summarised in the following table. People administering treatment on the basis of a certificate should always take reasonable steps to satisfy themselves that the certificate remains applicable to the circumstances.

---

62 Section 62(2).
Circumstances in which the certificate ceases to authorise treatment, even though they have not been withdrawn

<table>
<thead>
<tr>
<th>Type of certificate</th>
<th>Circumstances in which the certificate ceases to authorise treatment</th>
</tr>
</thead>
<tbody>
<tr>
<td>Certificate issued by approved clinician under section 58 or 58A</td>
<td>The clinician concerned stops being the approved clinician in charge of the treatment.</td>
</tr>
</tbody>
</table>
| SOAD certificate under section 57 | The patient no longer consents to the treatment.  
The patient no longer has capacity to consent to the treatment. |
| SOAD certificate under section 58 or 58A | The patient stops (even if only temporarily) being either a detained patient (as defined in chapter 24) or a community patient who is not recalled to hospital – except in the case of section 58A certificates for patients aged under 18.  
The SOAD specified a time limit on the approval of a course of treatment, and the time limit has expired.  
The certificate was given on the basis that the patient consented, but the patient no longer consents or has lost the capacity to consent.  
The certificate was given on the basis that the patient lacked capacity to consent, but the patient now has that capacity.  
Section 58 only: The certificate was given on the basis that the patient had capacity to consent but was refusing, and the patient is now either consenting or has lost the capacity to consent.  
Section 58A only: The certificate was given on the understanding that the treatment would not conflict with an advance decision to refuse treatment, but the person giving the treatment has since become aware that there is such a conflict.  
Section 58A only: The certificate was given on the understanding that the treatment would not conflict with a decision of an attorney, deputy or the Court of Protection, but the person giving the treatment has since become aware that there is such a conflict, or an attorney, deputy or the Court of Protection makes a new decision that the treatment should not be given. |
| Part 4A certificate | The patient stops (even if only temporarily) being either a detained patient (as defined in chapter 24 or patient on a CTO. (But note that a part 4A certificate authorises section 58 type treatment for a patient whose CTO has been revoked only pending compliance with section 58 itself.)  
The SOAD specified a time limit on the approval of a course of treatment, and the time limit has expired. |
25.76 In all the circumstances listed in the table, treatment cannot be continued while a new certificate is obtained, unless no certificate is needed because the treatment is immediately necessary (see paragraphs 25.32 to 25.34) and, in respect of CTO patients not recalled to hospital, the treatment is given under section 64G.

25.77 It is not good practice to use a certificate that was issued to a patient when detained and who has since been discharged onto a CTO to authorise treatment if the patient is then recalled to hospital, even if the certificate remains technically valid. A new certificate should be obtained as necessary.

25.78 Hospital managers should make sure that arrangements are in place so that certificates which no longer authorise treatment (or particular treatments) are clearly marked as such, as are all copies of those certificates kept with the patient’s notes and medication chart.

26 Safe and therapeutic responses to disturbed behaviour

Why read this chapter?

26.1 A positive and therapeutic culture should be provided for all patients receiving treatment for a mental disorder and who may present with behavioural disturbance. This chapter provides guidance for providers, professionals and practitioners on how to manage disturbed behaviour. It requires providers to have restrictive intervention reduction programmes and policies on various matters. The chapter makes clear that restrictive interventions should only be undertaken in a manner which respects human rights. It requires and provides guidance on individual assessments and behaviour support plans. It provides a definition of restrictive intervention for the purposes of the chapter and gives guidance on particular types of restrictive interventions. Guidance is given on the particular needs of children and young people. Guidance is given on the importance of appropriate staff training.

26.2 Except where otherwise stated, this guidance applies to all patients receiving treatment for a mental disorder in a hospital and who are liable to present with behavioural disturbances, regardless of their age and whether or not they are detained under the Act.

Restrictive intervention reduction programmes

26.3 The primary focus of any provider which treats patients who are liable to present with behavioural disturbance should be the provision of a positive and therapeutic culture which focuses on preventing behavioural disturbances, early recognition, and de-escalation (see paragraphs 26.17 - 26.25).

26.4 All providers should prevent the misuse and misapplication of restrictive interventions. When their use cannot be avoided, providers should ensure that they are used in a safe manner. To ensure this, all mental health providers should have in place a regularly reviewed and updated restrictive intervention reduction programme.

26.5 Restrictive intervention reduction programmes are overarching, multi-component action plans which aim to reduce the use of restrictive interventions. They should ensure accountability for continual improvements in service quality through the delivery of positive and proactive care. They should also include improvement targets and identify who is responsible for progressing the different parts of the plan. A key indicator that a plan is being delivered well will be a reduction in the use of restrictive interventions, reductions of injuries as a result of restrictive interventions, improved patient satisfaction and reduced complaints.
Provider’s policies

26.6 Each provider should have one or more policies that guide the day-to-day operation of services, (‘provider’s policies’), which should include guidance on:

- individualised assessments of risks and need for support (see paragraphs 26.7 - 26.25)
- the use of behaviour support plans (as defined in paragraph 26.13)
- how restrictive interventions should be implemented, in particular, an assessment of their potential to cause harm to the physical, emotional and psychological wellbeing of patients and how providers will take account of a patient’s individual vulnerabilities to harm (such as unique needs associated with physical/emotional immaturity, older age, disability, poor physical health, past history of traumatic abuse etc)
- how restrictive interventions which are used by the provider (enhanced observation, physical restraint, mechanical restraint, rapid tranquillisation, seclusion and/or long term segregation), should be authorised, initiated, applied, reviewed and discontinued, as well as how the patient should be supported throughout the duration of the application of the restrictive intervention (see paragraphs 26.62 – 26.136)
- local recording and reporting mechanisms around the use of restrictive interventions
- post-incident analysis/debrief (see paragraphs 26.143 – 26.147), and
- workforce development, including training requirements relating to the application of restrictive interventions (see paragraphs 26.150 – 26.152).

Individualised assessments

26.7 Patients who are suffering from a mental disorder should, on admission to hospital, be assessed for immediate and potential risks of behavioural disturbance. Staff should be alert to risks that may not be immediately apparent, such as self-neglect. Assessments should take account of the patient’s history of such behaviours, their history of experiencing personal trauma, their presenting mental and physical state and their current social circumstances.

26.8 While previous history is an important factor in assessing current risk, staff should not assume that a previous history of behavioural disturbance means that a patient will necessarily behave in the same way in the future.

26.9 Particular care needs to be taken to ensure that negative and stigmatising judgements about certain diagnoses, behaviours or personal characteristics do not obscure a rigorous assessment of the degree of risk which may be presented, or the potential benefits of appropriate treatment to people presenting with behavioural disturbance.
26.10 Assessments of behavioural presentation are important in developing an understanding of a patient’s needs. These must take account of the patient’s social and physical environment and the broader context against which behavioural disturbance occurs. There may be times where a patient has good reasons for feeling angry and this may be expressed in the form of behavioural disturbance. Assessments should seek to understand behaviour in its broader context and not automatically presume it to be a manifestation of a mental disorder. Assessments must also seek and take into account the views of patients and their families, carers and advocates as to why a patient might be behaving in a particular way.

26.11 The results of the assessment should be used to guide the development and implementation of effective, personalised and enduring systems of support that seek to meet patient’s needs, promote recovery and enhance quality of life outcomes for the patient and others who care and support them.

26.12 When concluded, assessments should: describe behaviours of concern; identify factors which predict their occurrence; and describe the functions that behaviours serve or the outcomes they achieve for the patient. These assessments will inform the patient’s CPA care plan and/or Behaviour Support Plan (or equivalent) (see paragraphs 26.13 – 26.26). Factors which may contribute to behavioural disturbance and which should therefore be considered within assessments include:

- poorly treated symptoms of mental disorder
- unmet social, emotional or health needs
- excessive stimulation, noise and general disruption
- excessive heating, overcrowding and restricted access to external space
- boredom, lack of constructive things to do, insufficient environmental stimulation
- clumsy or controlling approaches to care by staff
- the excessive/unreasonable application of demands/rules
- lack of positive social interaction
- restricted/unpredictable access to preferred items and activities
- patients perceiving that others (whether staff, friends and/or families) are not concerned with their subjective anxieties and concerns
- exposure to situations that mirror past traumatic experiences
- a sense of personal disempowerment
- emotional distress, eg following bereavement
- frustrations associated with being in a restricted and controlling environment
- antagonism, aggression or provocation on the part of others
- inconsistent care
- difficulties with communication
- the influence of alcohol or drugs
- a state of confusion
- physical illness.
Behaviour support plans

26.13 Patients who are assessed as being at risk of being exposed to restrictive interventions should have either a behaviour support plan or incorporate its elements within an alternative form of care or treatment plan (see paragraphs 34.2 – 34.5). A behaviour support plan enables therapeutic responses to a patient. It is based on an understanding of a patient’s needs and includes circumstances that are likely to predict behavioural disturbance. Behaviour support plans are individualised care plans and should be made up of the following elements:

- primary preventative strategies which aim to enhance a patient’s quality of life and meet their unique needs, thereby reducing the likelihood of behavioural disturbances

- secondary preventative strategies which focus on recognition of early signs of impending behavioural disturbance and how to respond to them in order to encourage the patient to be calm (including on de-escalation see paragraphs 26.22 – 26.25)

- tertiary strategies which guide the responses of staff and other care givers when there is a behavioural disturbance, including clear instruction on the pre-planned use of any restrictive interventions. Instructions should ensure that the restrictions are used in such a way as to minimise distress and risk of harm to the patient.

26.15 Patients, their families and advocates must be as fully involved as possible in developing and reviewing behaviour support plans. The preparation of behaviour support plans provides an important opportunity to record the wishes and preferences of families and carers and what involvement they may wish to have in the management of behavioural disturbances. For example, family members may wish to be notified and involved in a review of the use of the restrictive intervention.

26.16 Behaviour support plans should take full account of disabilities, a patient’s level of cognitive functioning, the impact of age in terms of physiological and emotional maturity, the patient’s ethnicity, culture, religion or belief, gender, gender identity and sexual identity. They should be constructed in such a way as to maximise privacy and dignity.
Meeting needs

26.17a Behavioural disturbance can be minimised by promoting a supportive and therapeutic culture within the care environment. Unless a patient is subject to specific justifiable restrictions (eg for security reasons), primary preventative strategies should typically include many of the following, depending on actual assessed needs.

26.17b The care environment:

- providing predictable access to preferred items and activities
- avoiding excessive levels of environmental stimulation
- organising environments to provide, eg quiet rooms, recreation rooms, single-sex areas and access to open spaces and fresh air
- giving each patient a defined personal space and a safe place to keep their possessions
- ensuring an appropriate number and mix of staff to meet patients’ needs.

26.17c Engaging with service users and their families:

- in all aspects of care and treatment planning, involving the patient’s nearest relative, family, carers, advocates and others who know the patient and their preferences
- engaging patients, supporting them to make choices about their care and treatment and keeping them fully informed, in a way that they can understand what is happening and why
- avoiding demands associated with compliance with service-based routines and adherence to ‘blanket rules’ (see paragraphs 1.4, 8.5, 8.43, 11.11 and 26.139)
- involving patients in the identification of their own trigger factors and early warning signs of behavioural disturbance and in how staff should respond to them
- ensuring that significant meetings occur in a format, location and at a time of day that promotes engagement of patients, families, carers and advocates
- ensuring that patients are able to meet visitors in private convivial environments, as well as to maintain private communication by telephone, post and electronic media, respecting the wishes of patients and their visitors, subject to security considerations
- promptly informing patients, families, carers and advocates of any significant developments in relation to patients’ care and treatment, wherever practicable and subject to the patient’s wishes and confidentiality obligations.
26.17d Care and support:

- opportunity for patients to be involved in decisions about an activity and therapy programme that is relevant to their identified needs and includes evening and weekend activity
- delivering individualised patient-centred care which takes account of each patient’s unique circumstances, their background, priorities, aspirations and preferences
- supporting patients to develop or learn new skills and abilities by which to better meet their own needs
- developing a therapeutic relationship between each patient and a key worker or nurse
- providing training for staff in the management of behavioural disturbance, including alternatives to restrictive interventions, the attitude and values staff should have, and training in the implementation of models of care including positive behavioural support
- ensuring that patients’ complaints procedures are accessible and available and that concerns are dealt with quickly and fairly.

26.18 Patients who are identified as being at risk of presenting with behavioural disturbance should be given the opportunity to have their wishes and feelings recorded in an advance statement, if they have the capacity to do so. Guidance on advance statements of wishes and feelings can be found in chapter 9.

26.19 Whilst some psychological treatments (sometimes referred to as ‘behaviour modification’ or ‘behavioural programmes’) may impose restrictions on normal day-to-day activities (eg restricting access to favoured activities or incentives so that they are available only as incentives or behavioural reinforcers), such restrictions should not be automatically imposed across the service, or be used to punish or humiliate. This means that service providers should avoid blanket restrictions that apply to all patients; treatments should always be individualised, and subject to discussion and review by the whole clinical team. The patient’s consent should always be sought where the patient has capacity, even if a refusal may be overridden (eg because the patient may be given compulsory treatment under the Act).

26.20 Restrictions associated with such programmes must be reasonable and proportionate to the risks associated with the behaviour being addressed and consistent with the guiding principles of the Code (and the MCA, where it applies). Access to food and drink, fresh air, shelter, warmth, a comfortable environment, confidentiality or reasonable privacy should never be restricted or used as a ‘reward’ or ‘privilege’ contingent upon the presentation of ‘desired’ behaviours.
26.21 Provider policies should encourage patients to avoid staying in their bedrooms for prolonged periods during the daytime. This should be achieved by making therapeutic interventions and a range of engaging activities available; it should not be achieved by locking people out of their bedrooms.

26.22 De-escalation is a type of secondary preventative strategy. It involves the gradual resolution of a potentially violent or aggressive situation where a patient begins to show signs of agitation and arousal that may indicate an impending episode of behavioural disturbance.

26.23 De-escalation strategies seek to promote relaxation, eg through the use of verbal and physical expressions of empathy and alliance. Approaches typically involve establishing rapport and the need for mutual co-operation, demonstrating compassion, negotiating realistic options, asking open questions, demonstrating concern and attentiveness, using empathic and non-judgemental listening, distracting, redirecting the patient into alternate pleasurable activities and being sensitive to non-verbal communication.

26.24 Staff should liaise with patients and those who know them well, and take into account clinical assessments, in order to identify individualised de-escalation approaches which should be recorded as secondary preventative strategies in the patient’s behaviour support plan. In some instances is may be feasible for families to contribute to de-escalation approaches eg by speaking to their relative on the telephone (see paragraph 26.15).

26.25 Staff should ensure that they do not exacerbate behavioural disturbance eg through dismissing genuine concerns, failing to act as agreed in response to requests, unreasonable or repeated delays, except where such behaviour is unavoidable.

Enhanced observation

26.26 The location of all patients in a hospital ward or service setting should be known to staff responsible for their care. It is not necessary to routinely keep patients who are not considered to present a serious risk of harm to themselves or others within sight.

26.27 Research suggests that most attempted suicides are discovered and prevented by staff checking on patients, particularly in the more private areas of wards. For patients assessed as being at risk of suicide or serious self-harm, a significant preventive mechanism is for nursing staff to be ‘caringly vigilant and inquisitive’. For such patients, staff should have a thorough knowledge of the patient as a person, and be constantly and consistently attentive to their state of mind, whereabouts and safety. Unusual circumstances and noises should be noticed and investigated.
26.28 There may be times when enhanced levels of observation are required for the short-term management of behavioural disturbance or during periods of distress to prevent suicide or serious self-harm. Enhanced observation is a therapeutic intervention with the aim of reducing the factors which contribute to increased risk and promoting recovery. It should be undertaken in a manner which focuses on engaging the patient therapeutically and enabling them to address their difficulties constructively.

26.29 Enhanced observation may be provided on an intermittent basis with staff engaging with patients and observing their condition at irregular and unpredictable intervals of between 15 and 30 minutes. High use of intermittent observation on wards has been shown to be associated with low levels of self-harm and can be tolerated by patients.

26.30 Alternatively enhanced observation may be provided on a continuous basis with the patient remaining either within eyesight of staff, or for the most serious degrees of risk within arm’s length. Continuous observation should be carried out when intermittent observation is seen as insufficient to safely manage risks, if this does not compromise the attention given to other patients.

26.31 Provider policies should cover the use of enhanced observation and include:
  • which discipline(s) of staff are best placed to carry out enhanced observation and under what circumstances it might be appropriate to delegate this duty to another member of the team
  • how the selection of a staff member to undertake enhanced observation will take account the patient’s unique characteristics and circumstances (including factors such as ethnicity, sexual identity, age and gender)
  • how enhanced observation can be undertaken in a way which minimises the likelihood of patients perceiving the intervention to be coercive
  • how observation can be carried out in a way that respects the patient’s privacy as far as practicable and minimises any distress. In particular provider policies should outline steps to maximise dignity without compromising safety when patients are in a state of undress, such as when using the toilet, bathing, showering, dressing etc. See guidance on respecting privacy and dignity in chapter 8.

26.32 Staff must balance the potentially distressing effect on the patient of increased levels of observation, particularly if these levels of observation are proposed for many hours or days, against the identified risk of self-injury or behavioural disturbance. Levels of observation and risk should be regularly reviewed and a record made of agreed decisions in relation to increasing or decreasing the observation.

26.33 If a patient under long-term enhanced observation is also being prevented from having contact with anyone outside the area in which they are confined, then this will amount to either seclusion or long-term segregation which should comply with paragraphs 26.101 – 26.136.
Restrictive interventions

26.34 Where a person restricts a patient’s liberty of movement, or uses (or threatens to use) force then that must:
- be used for no longer than necessary to prevent harm to the person or to others
- be a proportionate response to that harm, and
- must be the least restrictive option.

26.35 Restrictive interventions are deliberate acts on the part of other person(s) that restrict a patient’s movement, liberty and/or freedom to act independently in order to:
- take immediate control of a dangerous situation where there is a real possibility of harm to the person or others if no action is undertaken, and
- end or reduce significantly the danger to the patient or others.

26.36 Where restrictive interventions are likely to be used, they should be planned in advance in a behaviour support plan (or equivalent) including primary and secondary preventative strategies (paragraph 26.13 – 26.15).

26.37 There will be times when patients present with behavioural disturbances which have been predicted in risk assessments. In such cases carefully planned tertiary strategies in the behaviour support plan (or equivalent) will inform the responses taken by staff.

26.38 On other occasions, behavioural disturbance may not have been predicted by risk assessments. In such cases emergency management of the situation and the use of restrictive interventions will be based on clinical judgements which take account of relevant best practice guidance (such as those published by the National Institute for Health and Care Excellence (NICE) and all available knowledge of the patient’s circumstances.

26.39 The most common reasons for needing to consider the use of restrictive interventions are:
- physical assault
- dangerous, threatening or destructive behaviour
- self-harm or risk of physical injury by accident
- extreme and prolonged over-activity that is likely to lead to physical exhaustion
- attempts to escape or abscond (where the patient is detained under the Act or deprived of their liberty under the MCA).
26.40 Restrictive interventions must be used in a way that minimises any risk to the patient’s health and safety and that causes the minimum interference to their autonomy, privacy and dignity, while being sufficient to protect the patient and other people. The patient’s freedom should be contained or limited for no longer than is necessary. Staff must not cause deliberate pain to a service user in an attempt to force compliance with their instructions except in the most exceptional circumstances to mitigate immediate risk to life.

26.41 The choice and nature of restrictive intervention will depend on various factors, but should be guided by:

- the patient’s wishes and feelings, if known (eg by an advance statement)
- what is necessary to meet the needs of the individual patient based on a current assessment and their history
- the patient’s age and any individual physical or emotional vulnerabilities that increase the risk of trauma arising from specific forms of restrictive intervention
- whether a particular form of restrictive intervention would be likely to cause the patient distress, humiliation or fear
- obligations to other patients affected by the behavioural disturbance;
- responsibilities to protect other patients, visitors and staff
- the availability of resources in the environment of care.

26.42 Where a patient has a history of abuse, restrictive interventions of any nature can trigger responses to previous traumatic experiences. Responses may be extreme and may include symptoms such as flashbacks, hallucinations, dissociation, aggression, self-injury and depression. Patients’ recorded wishes about restrictive interventions may be particularly useful for those with an identified history of trauma. Where possible, patients’ preferences in terms of the gender of staff carrying out such interventions should be sought and respected.

Respecting human rights

26.43 Any use of restrictive interventions on a patient must be undertaken in a manner which is compliant with the Human Rights Act 1998 (HRA) and the relevant rights in the European Convention on Human Rights (ECHR).

26.44 Services and their staff must help all patients to understand the legal authority for any proposed action and their rights (especially their right to leave a hospital if they are not detained there).
26.45 No restrictive intervention should be used unless it is medically necessary to do so in all the circumstances of the case and only if de-escalation techniques have first been tried and been unsuccessful. Action that is not medically necessary may well breach a patient’s rights under article 3, which prohibits inhuman or degrading treatment.

26.46 Article 8 of the ECHR protects the right to respect for private and family life. A restrictive intervention that does not meet the minimum level of severity for article 3 may nevertheless breach a patient’s article 8 rights if it has a sufficiently adverse effect on the patient’s private life, including their moral and physical integrity.

26.47 Restrictions that alone, or in combination, deprive a patient of their liberty without lawful authority will breach article 5 of the ECHR (the right to liberty). There is a deprivation of liberty in circumstances where a person is under continuous control and supervision and is not free to leave and lacks capacity to consent to the proposed interventions giving rise to the deprivation of liberty. However, the precise scope of the term ‘deprivation of liberty’ is not fixed and develops over time in accordance with the case law of the European Court of Human Rights and UK courts on article 5.

26.48 Unless a patient is detained under the Act or is subject to a deprivation of liberty authorisation or deprivation of liberty order under the MCA, providers and their staff must be careful to ensure that the use of restrictive interventions does not impose restrictions which amount to a deprivation of liberty.

26.49 Examples of restrictions that could indicate there is a deprivation of liberty include:
   • informal patients being prevented from leaving a hospital
   • Informal patients being told that they will be detained under the Act if they do not comply with requests of staff
   • informal patients being kept in circumstances amounting to seclusion without their consent.

26.50 Restrictive interventions may be permitted if they are in the best interests of a person aged 16 and over who lacks capacity if they meet the requirements in section 6 of the MCA and do not amount to a deprivation of liberty. Section 6 requires that the person taking the action must reasonably believe that the action is necessary to prevent harm to the person who lacks capacity (and it therefore does not cover seclusion) and that it is a proportionate response to the likelihood and seriousness of that harm.
26.51 In the case of children and young people under the age of 18, the use of restrictive interventions may require modification to take account of their developmental status. The legal context within which restrictive interventions are used with children and young people is different from that which surrounds adults; key aspects of this are explored in the following paragraphs. For further information on children and young people more generally please see chapter 19.

26.52 Service providers should ensure that staff involved in the care of children and young people who exhibit behavioural disturbance are able to employ a variety of skills and strategies that enable them to provide appropriate help and support. In most cases it is expected that restrictive interventions will only be used if they form part of the behaviour support plan and have therefore been developed with input from the child or young person and their family.

26.53 Sometimes it will be necessary to use a restrictive intervention which is not part of the child or young person’s behaviour support plan. Any such intervention must be used in a way that minimises risks to the child or young person’s health and safety and that causes the minimum interference to their liberty, privacy and dignity, while ensuring that the intervention protects the children or young person and/or others. Staff should always ensure that restrictive interventions are used only after having due regard to the patient’s age and having taken full account of their physical, emotional and psychological maturity.

26.54 When antipsychotic medication is used to sedate a child or young person, special consideration should be given to risks relating to their developing central nervous system, especially when the medication is given to children or adolescents who do not have a diagnosed psychosis.

26.55 The size and physical vulnerability of children and young people should be taken into account when considering physical restraint. Physical restraint must be used with caution when it involves children and young people because in most cases their musculoskeletal systems are immature which elevates the risk of injury.

26.56 Seclusion is a traumatic experience for any patient but can have particularly adverse implications for the emotional development of a child or young person and this should be taken into consideration in any decision to seclude. Careful assessment of the potential effects of seclusion by a trained child and adolescent clinician is required (especially for those children and adolescents with histories of trauma and abuse, where other strategies to de-escalate behaviours may be more appropriate than the use of seclusion).

26.57 In children and young people’s services where ‘time-out’ processes are used, provider policies must differentiate between time-out and seclusion. Time-out is a specific behaviour change strategy which should be delivered as part of a behavioural programme. Time-out might include: preventing a child or young
person from being involved in activities which reinforce a behaviour of concern until the behaviour stops; asking them to leave an activity and return when they feel ready to be involved and stop the behaviour; or accompanying the child or young person to another setting and preventing them from engaging in the activity they were participating in for a set period of time. If time-out processes have the features of seclusion, this should be treated as seclusion and comply with the requirements of the Code.

26.58 Great caution should be exercised in using restrictive interventions on children and young people who are not detained under the Act. As noted in paragraphs 26.72 and 26.103, if there are indications that the use of restrictive interventions (particularly physical restraint or seclusion) might become necessary, consideration should be given to whether formal detention under the Act is appropriate. A person with parental responsibility can consent to the use of restrictive interventions where a child lacks competence or a young person lacks the capacity to consent, but only if the decision falls within the ‘zone of parental control’ (see paragraphs 19.37 – 19.41).

26.59 Parental consent cannot be used to authorise the use of restrictive interventions that deprive the child or young person of their liberty. This is particularly likely to be the risk with the proposed use of physical restraint, mechanical restraint, rapid tranquilisation or seclusion.

26.60 For young people aged 16 or 17 who are not detained under the Act and who lack capacity to consent to the proposed interventions, the use of restrictive interventions in the young person’s best interests may be authorised under the MCA, provided that they meet the requirements in section 6 of the MCA and do not amount to a deprivation of liberty (see paragraph 26.47).

26.61 Staff having care of children and young people should be aware that under section 3(5) of the Children Act 1989 they may do ‘what is reasonable in all the circumstances of the case for the purpose of safeguarding or promoting the child’s welfare’. Whether an intervention is reasonable or not will depend among other things upon the urgency and gravity of what is required. Whilst this might allow action to be taken to say prevent a child from harming him/herself it would not allow restrictive interventions that are not proportionate and would not authorise actions that amounted to a deprivation of liberty.

Procedures for the safe use of restrictive interventions

26.62 Restrictive interventions must never be employed to deliberately inflict pain, punish or humiliate.

26.63 Any initial attempt to manage an acute behavioural disturbance should, as far as the situation allows, be non-restrictive. For example, assistance might be sought using a locally available electronic method of calling for help (such as an
emergency alarm system) or by verbally summoning assistance. A single member of staff should assume control of the incident. Where possible, agreement should be sought from the patient to stop the behaviour. The communication needs of patients should be taken into account including those arising from patients with sensory impairments, learning disability, autism or for whom English is not their first language. Where possible, an explanation should be given to the patient of the consequences of refusing the request from staff to desist.

26.64 The nature and manner of application of any restrictive intervention, the reason(s) for its use and the consequences or outcome, must be recorded in an open and transparent manner.

26.65 Staff should only use methods of restrictive interventions for which they have received training. Training records must record precisely what techniques a member of staff has received training in.

26.66 Verbal de-escalation should continue throughout a restrictive intervention and negotiations should focus on establishing rapport, demonstrating concern and helping the patient to relax and should focus on reducing the patient’s level of agitation.

26.67 Whenever restrictive interventions are being used, provider’s policies must make provision for the timely attendance of a doctor in response to staff requests concerning a psychiatric emergency whether in relation to medication, restraint or seclusion.

26.68 Where a behavioural disturbance occurs and a restrictive intervention has been used family members should be informed in accordance with any prior agreements (see paragraph 26.15).

Physical restraint

26.69 Physical restraint refers to any direct physical contact where the intervener’s intention is to prevent, restrict, or subdue movement of the body, or part of the body of another person.

26.70 Full account should be taken of patients’ age, physical and emotional maturity, health status, cognitive functioning and any disability or sensory impairment which may confer additional risks to the patient’s health, safety and wellbeing in the face exposure to physical restraint. Throughout any period of physical restraint:

- a member of staff must monitor the service user’s airway and physical condition throughout the restraint in order to minimise the potential of individual harm or injury. Observations that include vital clinical indicators such as pulse, respiration
and complexion (with special attention for pallor/discolouration) must be conducted and recorded, and staff should be trained so that they are competent to interpret these vital signs

- emergency resuscitation devices should be readily available in the area where restraint is taking place
- a member of staff should take the lead in caring for other patients and moving them away from the area of disturbance. Staff not involved in the use of physical restraint should leave the area quietly.

26.71 Where physical restraint has been used staff must record the decision and the reasons for it as well as details as of how the intervention was implemented and the patient’s response.

26.72 If a patient is not detained under the Act, but physical restraint of any form has been deemed necessary, consideration should be given to whether the criteria in sections 5 and 6 of the MCA apply (restraint to be used in respect of people aged 16 and over who lack capacity) and/or whether detention under the Act is appropriate (subject to the criteria being met).63

Mechanical restraint

26.73 Mechanical restraint refers to the use of a device to prevent, restrict or subdue movement of a person’s body, or part of the body, for the primary purpose of behavioural control.

26.74 Mechanical restraint must only be used exceptionally, where other forms of restriction cannot be safely employed. It should be used in line with the least restrictive option and autonomy principle and should not be a response to an acute situation. The indications for the use of mechanical restraint should be based on safe and therapeutic management of a disturbed patient and it should never be used in lieu of adequate staffing.

26.75 Mechanical restraint must not be used on an unplanned basis. Its use must be approved by the patient’s responsible clinician following multi-disciplinary consultation (which includes an IMHA – see chapter 6). Provision for the use of mechanical restraint must be recorded as a tertiary strategy in the behaviour support plan (or equivalent). This plan must detail the circumstances which might warrant mechanical restraint, the type of device to be applied, how continued attempts will be made to de-escalate the situation and any special measures that are required to reduce the likelihood of physical or emotional trauma resulting.

---

26.76 Where the agreed provisions for the use of mechanical restraint in the behaviour support plan allow a registered nurse, in an urgent situation, to authorise the actual use of mechanical restraint, the nurse should notify, without delay, the Responsible Clinician or duty doctor.

26.77 Staff applying mechanical restraint devices must have been trained in their application and use.

26.78 A patient who is mechanically restrained must, as a minimum, remain under continuous observation throughout. It may be necessary for the patient to remain at arm’s length.

26.79 The patient should be reviewed by a nurse every fifteen minutes for the duration of the period of mechanical restraint.

26.80 The patient should have a medical review by their responsible clinician or the duty doctor at a minimum of hourly intervals throughout the period of mechanical restraint. Reviews should ensure that the patient is as comfortable as possible and should include a full evaluation of their physical and mental health condition. The first review should occur as soon as possible after the doctor has been notified of the restraint.

26.81 Nursing staff must be able to summon a doctor in order to conduct a medical review ahead of the next scheduled review if they have concerns about the patient’s condition.

26.82 The patient’s clinical record must provide details of the rationale for the decision to mechanically restrain the patient, the medical and psychiatric assessment, the patient’s condition at the commencement of mechanical restraint, the response to mechanical restraint and the outcomes of the four hourly medical reviews.

26.83 Mechanical restraint which involves tying (whether by means of tape or by using a part of the patient’s garments) to some part of a building or its fixtures must never be used.

26.84 If, exceptionally, a belt (or similar device) device is applied to a patient’s body, to which their arms/wrists are secured and the resulting degree of immobility prevents their egress from an area (such as where they are unable to reach or operate door handles), this will amount to either seclusion or long term segregation. The patient must be afforded the safeguards provided within this chapter regarding associated observation and monitoring, review procedures and care plans to ensure that privacy and dignity are preserved. Such devices should never be used as an alternative (or in addition to) to seclusion because a suitable safe environment in which to undertake seclusion is not available.
26.85 There may be exceptional circumstances where mechanical restraint devices need to be routinely used on a long term basis, such as to limit chronic self-injurious behaviour of extremely high frequency and intensity (in which case the requirement for post incident review does not apply). This contingency is most notably encountered with small numbers of patients who have severe cognitive impairments, where devices such as arm splints or cushioned helmets may be required to safeguard a patient from the hazardous consequences of their behaviour. In such cases, tertiary strategies within behaviour support plans should aim to provide brief recurrent periods whereby restraints can be removed. The behaviour support plan may also allow for less frequent medical and nursing reviews provided that the whole clinical team, the patient’s family, carers and advocates are in agreement.

Patients subject to a Ministry of Justice Order

26.86 There may be occasions when the use of mechanical restraint (including handcuffs) is required for security purposes when transferring prisoners into a healthcare setting. Guidance for prison and health staff to develop local procedures for the safe management of prisoners at hospital was agreed in a concordat between the National Offender Management Service (NOMS) and the NHS Counter Fraud and Security Service, which forms part of the National Security Framework.64

26.87 Similarly, there may be occasions where mechanical restraint (including handcuffs) may be used for security purposes for the transfer of restricted patients in secure settings to other non-secure settings. The use of mechanical restraint in these circumstances should be informed by an assessment of the risks posed by the patient, as well as their presenting physical and mental condition and the need to maximise their dignity. Whilst medical treatment is being carried out, mechanical restraints must be removed if requested by medical staff.

26.88 On occasion, in high-risk cases, the Secretary of State for Justice will make permission for a restricted patient to leave the hospital conditional on the use of restraint. Staff should discuss any concerns about this with Mental Health Casework Section (see paragraph 14.15 for contact details).

---

Rapid tranquillisation

26.89 Rapid tranquillisation refers to the use of medication to calm/lightly sedate a patient, reduce the risk of harm to self and/or others and achieve optimal reduction in agitation and aggression, thereby allowing a thorough psychiatric examination to take place. Prescribers should aim to ensure that the degree of sedation arising from rapid tranquillisation does not unnecessarily compromise the patient’s capacity to understand and respond to what is said to them.

26.90 The use of rapid tranquillisation to manage acute behavioural disturbance is a very short-term strategy designed solely to reduce immediate risk and is distinct from treating any underlying mental illness.

26.91 Rapid tranquillisation should only be used where a patient is highly aroused, agitated, overactive and aggressive, or is making serious threats or gestures towards others, or is being destructive to their surroundings, when other therapeutic interventions have failed to contain the behaviour.

26.92 Rapid tranquillisation includes the use of both intra-muscular injections and oral medication. Oral medication should always be considered before any injections.

26.93 Rapid tranquillisation should be prescribed in accordance with evidence-based practice guidelines such as those published by NICE. It must be in line with legal requirements (in respect of detained patients, the consent to treatment and emergency treatment powers under the Act) (see chapter 24).

26.94 Persons prescribing rapid tranquillisation must make clear to staff caring for the patient any physical observations and monitoring required following administration.

26.95 Where a prescription indicates a choice of administration routes for rapid tranquillisation (eg oral or intramuscular injection), the person prescribing the medication should list factors which should be considered in determining which route to use, under any reasonably foreseeable circumstances.

26.96 Where rapid tranquillisation in the form of an intramuscular injection is required, the person prescribing the injection should state the preferred injection site, having taken full account of the need to avoid face down restraint.

26.97 Physical restraint may, on occasion, need to be used in order to administer rapid tranquillisation by intramuscular injection to an unwilling patient, where there is legal authority to treat the patient without consent. It should not be used unless there is such legal authority, whether under the Act (see provisions for treatment in chapter 24), the MCA or otherwise. In particular, rapid tranquillisation should not be used to treat an informal patient who has the capacity to refuse treatment and who has done so.

---

The use of restraint to administer treatment in non-emergency circumstances should be avoided wherever possible, but may sometimes be necessary, especially if not administering the treatment would increase the likelihood of an emergency situation occurring. The decision to use restraint should first be discussed with the clinical team and should be properly documented in the patient’s notes, along with the justification for it.

Following the administration of rapid tranquillisation, the patient’s condition and progress must be closely monitored. Subsequent records must indicate the reason for the use of rapid tranquillisation and provide a full account of both its efficacy and any adverse effects observed or reported by the patient.

Rapid tranquillisation should never be used to manage patients as a substitute for adequate staffing.

Seclusion

Seclusion refers to the supervised confinement and isolation of a patient, away from other patients, in an area from which the patient is prevented from leaving. Its sole aim is the containment of severely disturbed behaviour which is likely to cause harm to others. Seclusion should ordinarily only be undertaken in a room or suite of rooms that have been specifically designed and designated for the purposes of seclusion and which serves no other function on the ward. It does not include locking people in their rooms at night in accordance with the high security psychiatric services (arrangements for safety and security) directions 2013.

If a patient is confined in any way that meets the definition above, even if they have agreed to or requested such confinement, they have been secluded regardless of whether any local or alternative terms are used (such as ‘therapeutic isolation’) or the conditions of the immediate environment.

Seclusion must only be used in hospitals and in relation to patients detained under the Act. If an emergency situation arises involving an informal patient and, as a last resort, seclusion is necessary to prevent harm to others, then an assessment for an emergency application for detention under the Act should be undertaken immediately.

Seclusion must not be used as a punishment or a threat, or because of a shortage of staff. It should not form part of a treatment programme.

26.105 Seclusion must never be used solely as a means of managing self-harming behaviour. Where the patient poses a risk of self-harm as well as harm to others, seclusion should be used only when the professionals involved are satisfied that the need to protect other people outweighs any increased risk to the patient’s health or safety arising from their own self-harm and that any such risk can be properly managed.

26.106 The following factors should be taken into account in the design of rooms/areas where seclusion is to be carried out:

- the room must allow for communication with the patient when the patient is in the room and the door is locked, eg via an intercom
- rooms should include limited furnishings which must include a bed, pillow, mattress and blanket/covering
- there should be no apparent safety hazards
- rooms should have robust, reinforced exterior window(s) that provides natural light (where possible the window should be positioned to enable a view outside)
- rooms should have externally controlled lighting including a main light and subdued lighting for night time
- rooms should have robust door(s) which open outwards
- rooms should have externally controlled heating/air conditioning with an ability for those observing the patient to monitor the room temperature
- rooms should not have blind spots and alternate viewing panels should be available where required
- a clock should always be visible to the patient from within the room
- rooms should have access to sanitary facilities.

26.107 Provider policies must include detailed guidance on the use of seclusion and must be consistent with the guiding principles of the Code. The policy should:

- ensure the physical and emotional safety and wellbeing of the patient
- ensure that the patient receives the care and support rendered necessary by their seclusion both during and after it has taken place
- designate a suitable environment that takes account of the patient’s dignity and physical wellbeing
- set out the roles and responsibilities of staff
- set requirements for recording, monitoring and reviewing the use of seclusion and any follow-up action.
26.108 In order to ensure that seclusion measures have a minimal impact on a patient’s autonomy, seclusion should be applied flexibly and in the least restrictive manner possible, considering the patient’s circumstances. Where seclusion is used for prolonged periods, then subject to suitable risk assessments, such flexibilities may include allowing patients to receive visitors, facilitating brief periods of access to secure outside areas or allowing meals to be taken in general areas of the ward. The possibility of facilitating such flexibilities should be considered during any review of the ongoing need for seclusion. Particularly with prolonged seclusion, it can be difficult to judge when the need for seclusion has ended. These flexibilities can provide a means of evaluating the patient’s mood and degree of agitation under a lesser degree of restriction, without terminating the seclusion episode.

Procedure for seclusion

26.109 The following procedure should be incorporated into the provider’s policy on seclusion.

Authorising seclusion

<table>
<thead>
<tr>
<th>Seclusion may be authorised by either:</th>
<th>Additional considerations</th>
</tr>
</thead>
</table>
| A consultant psychiatrist            | • the psychiatrist must have first seen the patient and carried out a medical review (see paragraph 26.116)  
• if the consultant psychiatrist is neither the patient’s responsible clinician (RC) nor an approved clinician (AC), the RC or duty doctor (or equivalent) must be informed of seclusion as soon as practicable. |
| An approved clinician who is not a registered medical practitioner (RMP) | • provider policies must determine the appropriateness of ACs who are not RMPs who can fulfil this function  
• the patient’s RC or duty doctor (or equivalent) must be informed of seclusion as soon as practicable. |
| The professional in charge (eg a nurse) of a ward | • the patient’s RC or duty doctor (or equivalent) must be informed of seclusion as soon as practicable. |
Commencing seclusion

26.110 Staff may decide what a patient can take into the seclusion area. The patient should never be deprived of clothing when in seclusion (see paragraphs 26.137 – 26.142).

26.111 When the patient is placed in seclusion, the start time of the seclusion should be recorded in the seclusion record (see paragraph 26.125).

26.112 If seclusion was authorised by an AC who is not a RMP or the professional in charge of ward, the responsible clinician or duty doctor (or equivalent) must attend to undertake the first medical review (see paragraph 26.116) within one hour of the commencement of seclusion. If the patient is newly admitted, not well known to the staff, or there has been a significant change in patients physical, mental state and/or behavioural presentation, then this medical review must take place without delay. If seclusion is authorised by a consultant psychiatrist, the first medical review must take place immediately before seclusion.

26.113 Where it has been agreed in a behaviour support plan that family members will be notified of significant behavioural disturbances and the use of restrictive interventions, this should take place as planned (see paragraph 26.15).

Observation during seclusion

26.114 A suitably skilled professional should maintain continuous direct observation of the patient throughout the period of the patient’s seclusion.

• The professional must have the means to summon urgent assistance from other staff at any point.

• Consideration should be given to whether a male or female person should carry out ongoing observations; this may be informed by consideration of a patient’s trauma history.

• The aim of observation is to safeguard the patient, monitor their condition and behaviour and to identify the earliest time at which seclusion can be ended.

• A record of the patient’s behaviour must be made every fifteen minutes (see paragraph 26.125).

• The record made should include, where applicable: the patient’s appearance, what they are doing and saying, their mood, their level of awareness and any evidence of physical ill health especially with regard to their breathing or pallor/cyanosis.

• Where a patient appears to be asleep in seclusion, the person observing the patient must be alert to and assess the level of consciousness and respirations of the patient.
Seclusion reviews

26.115 A series of review processes must be instigated when a patient is secluded. These include multi-disciplinary team reviews, nursing reviews, medical reviews and independent multi-disciplinary team reviews. All reviews provide an opportunity to determine whether seclusion needs to continue or should be stopped, as well as to review the patient’s mental and physical state. Where agreed (see paragraph 26.15), family members should be advised of the outcomes of reviews.

26.116 Medical reviews

• The first medical review (paragraph 26.116) must:
  • if seclusion was authorised by either by an approved clinician who is not a RMP or the professional in charge of ward, be undertaken by the responsible clinician or duty doctor (or equivalent) within one hour of the commencement of seclusion; or
  • if seclusion was authorised by a consultant psychiatrist, be undertaken immediately before seclusion.

• Continuing medical reviews of a secluded patient by a senior doctor or approved clinician must take place every four hours following the first medical review including evenings, night time, weekends and bank holidays until the first independent MDT review. A provider’s policy may allow different review arrangements to be applied when patients in seclusion are asleep.

• Following the first independent MDT (see below) further medical reviews should continue twice in every 24-hour period. At least one of these should be carried out by the patient’s RC. Local arrangements for out-of-hours cover must provide for a consultant psychiatrist who is an approved clinician to cover out-of-hours RC functions.

• Medical reviews must be carried out in person.

• Medical reviews should include, where appropriate:
  • a review of physical and psychiatric health status
  • an assessment of adverse effects of medication
  • a review of the observations required
  • a reassessment of medication prescribed
  • an assessment of the risk posed by the patient to others
  • an assessment of any risk to the patient from deliberate or accidental self-harm
  • an assessment of the need for continuing seclusion, and whether it is possible for seclusion measures to be applied more flexibly or in a less restrictive manner.

• Medical reviews provide opportunity to evaluate and make amendments, as appropriate, to seclusion care plans (see paragraph 26.123).
26.117 Nursing reviews

- Nursing reviews of the secluded patient must take place at least every two hours following the commencement of seclusion.
- These must be undertaken by two individuals who are registered nurses, at least one of whom was not involved directly in the decision to seclude.
- In the event of concerns regarding the patient’s condition, this should be immediately brought to the attention of the patient’s RC or duty doctor.
- When patients in seclusion are asleep, provider policies may allow reviews to be undertaken on the basis of examination of the seclusion record (see paragraph 26.125) in order to avoid waking the patient.

26.118 Multi-disciplinary seclusion reviews

- The first multi-disciplinary seclusion review must be held within one hour of the commencement of seclusion. It may be appropriate for this to immediately follow the first medical review.
- Appropriate membership of the multi-disciplinary seclusion review meetings should be determined by provider policies. Membership would likely include the RC or another consultant psychiatrist (who must be an approved clinician), the senior nurse on the ward and staff from other disciplines who would normally be involved in service user reviews.
- At weekends and overnight, membership of the initial multi-disciplinary seclusion review may be limited to medical and nursing staff, in which case the on-call senior site manager (or equivalent) should also be involved.
- If it is agreed that seclusion needs to continue, a seclusion care plan (see paragraph 26.123) should be agreed and prepared which will identify how the all the patient’s presenting and ongoing needs whilst in seclusion can continue to be met.
- Further multi-disciplinary seclusion reviews should take place once in every 24-hour period of continuous seclusion.
- Where seclusion continues, these reviews should evaluate and make amendments, as appropriate, to the seclusion care plan (see paragraph 26.123).

26.119 Independent multi-disciplinary team review

- An independent multi-disciplinary team review must be promptly undertaken where a patient has either been secluded for eight hours consecutively OR for 12 hours intermittently during a 48-hour period.
- Appropriate membership of the meeting should be determined by provider policies, but as a minimum they should include a senior doctor or approved clinician, nurses and other professionals who were not involved in the incident which led to the seclusion and an IMHA. It is good practice for the independent multi-disciplinary team to consult those involved in the original decision.
• If it is agreed that seclusion needs to continue, the review should evaluate and make recommendations, as appropriate, for amendments to the seclusion care plan (see paragraph 26.123).

Ending seclusion

26.120 Seclusion must immediately end when a multi-disciplinary seclusion review, a medical review or the independent multi-disciplinary team review determines it is no longer warranted. Alternatively where the professional in charge of the ward feels that seclusion is no longer warranted, seclusion may end following consultation with the patient’s responsible clinician or duty doctor. This consultation may take place in person or by telephone.

26.121 Seclusion ends when a patient is allowed both free and unrestricted access to the normal ward environment or transfers/returns to conditions of long term segregation.

26.122 Opening a door for toilet/food breaks or medical review does not constitute the end of a period of seclusion.

Further guidance on seclusion

26.123 A seclusion care plan should set out how the individual’s care needs of the patient will be met whilst the patient is in seclusion and record the steps that should be taken in order to bring the need for seclusion to an end as quickly as possible. As a minimum the seclusion care plan should detail:

• a statement of clinical needs (including any physical or mental health problems), risks and treatment objectives
• a plan as to how needs are to be met, how de-escalation attempts will continue and how risks will be managed
• details of bedding and clothing to be provided
• details as to how the patient’s dietary needs are to be provided for
• details of any family or carer contact/communication which will maintained during the period of seclusion in accordance with paragraph 26.15.

26.124 Wherever possible, the patient should be supported to contribute to the seclusion care plan and steps should be taken to ensure that the patient is aware of what they need to do for the seclusion to come to an end. In view of the potentially traumatising effect of seclusion, care plans must provide details of the support that will be provided when the seclusion comes to an end.
The seclusion record format should be determined within organisational policies on seclusion. Different providers will use differing systems, they may be electronic or paper-based (or a combination of both); in any case they must be compliant with recognised professional record keeping standards. The seclusion record must provide the following details:

- who authorised the seclusion
- the date and time of commencement of seclusion
- the reason(s) for seclusion
- what the person took into the seclusion room
- if and when a family member or carer was informed of the use of seclusion (see paragraph 26.15)
- 15 minute recordings by the person undertaking continuous direct observation
- details of who undertook scheduled nursing reviews, their assessment, record of the patient’s condition and recommendations
- details of who undertook scheduled medical reviews, their assessment, record of the patient’s condition and recommendations
- details of who undertook the scheduled independent multi-disciplinary review, their assessment, record of the patient’s condition and recommendations
- details of who undertook the scheduled multi-disciplinary reviews, their assessment, record of the patient’s condition and recommendations
- the date and time seclusion ended
- who determined that the seclusion period should come to an end.

**Long-term segregation**

26.126 Long-term segregation refers to a situation where, in order to control an almost continuous risk of serious harm posed by the patient to others, a patient is not allowed to mix freely with other patients on the ward/unit on a long-term basis.

26.127 There are a small number of patients who exhibit behavioural disturbance that is more sustained and therefore not amenable to short-term seclusion. These patients may benefit from intensive mental healthcare delivered in a discrete clinical area that minimises their contact with the general ward population. The clinical judgement in these cases is that, if the patient were allowed to mix freely in the general ward environment, other patients or staff would almost continuously be open to potentially serious injury or harm.
In contrast to seclusion, long-term segregation is not an emergency response to an acute incident. Rather, it is a planned restriction introduced in response to a chronic presentation of violence and aggression and which is used to create the optimal situation in which to provide care and treatment and promote recovery. Patients should not be isolated from contact with staff (indeed it is highly likely they should be supported through enhanced observation) or deprived of access to therapeutic interventions. Treatment plans must aim to end long-term segregation.

It is permissible to manage this small number of patients by ensuring that their contact with the general ward population is limited. Patients in long-term segregation should be able to freely access a number of areas including, as a minimum, bathroom facilities, a bedroom and relaxing lounge area. They should also be able to access secure outdoor areas. The environment should be no more restrictive than is necessary to minimise assessed risks and should afford access to a range of stimulating activities.

The responsible commissioner for the patient and the local safeguarding team must be made aware of any patient being supported in long-term segregation.

If the patient requires further isolation in response to acute behavioural disturbance (for example, being locked in a room on their own) and the sole aim of this is to contain that severely disturbed behaviour, then this constitutes seclusion and the seclusion guidelines need to be followed.

Staff supporting patients who are long term segregated must make written records on their condition on at least an hourly basis.

The patient’s situation must be formally reviewed by an approved clinician at least once in any 24-hour period and at least weekly by the full multi-disciplinary team. The composition of this team should be decided by the provider’s policy on long-term segregation, but must include the patient’s responsible clinician and an IMHA. Provider policies must provide for periodic reviews by a senior clinician who is not involved with the case. The outcome of all reviews and the reasons for continued segregation must be recorded.

The patient’s treatment plan must clearly state the reasons why long-term segregation is required. In these cases, the way that the patient’s situation is reviewed needs to reflect the specific nature of their management plan. The purpose of a review is to determine whether the patient has settled sufficiently to return to the ward community and to check on their general health and welfare. The decision to return the patient to the general ward environment will be taken by their MDT, following a thorough risk assessment and observations from staff of the patient’s presentation during close monitoring of the patient in the company of others.

The patient’s care plan must outline how they are to be made aware of what is required of them so that the period of long term segregation can be brought to an end.
26.136 Where successive multi-disciplinary team reviews determine that segregation continues to be required it is expected that more information will be available to demonstrate its necessity and to explain why the patient cannot be supported in a less restrictive manner.

Deprivation of access to normal daytime clothing

26.137 Patients should never be deprived of appropriate clothing with the intention of restricting their freedom of movement, neither should they be deprived of other aids necessary for their daily living.

26.138 It may be appropriate, in a small number of instances for patients to be asked to wear special tear proof clothing. There must be an individualised risk assessment by the multi-disciplinary team before this decision is taken. This is principally likely to be the case where the risk of shredded clothing being used to self-harm or attempt suicide has been assessed and is considered to be very high.

26.139 Tear-proof clothing should never be a first line response to such risks and should never be used as a substitute for enhanced levels of support and observation. The requirement to wear tear proof clothing should never be a blanket rule within a service.

26.140 Any items of tear proof clothing should fit the patient so as to preserve their dignity, the tear proof clothing should not be demeaning or stigmatising, and should where possible meet any specific cultural or religious requirements.

26.141 Any requirement that a patient should wear tear proof clothing should be proportionate to the assessed risk and documentary evidence should show that it is used only as long as absolutely necessary. As soon as the risk is assessed to have diminished, consideration should be given by nursing staff and/or the multi-disciplinary team to a return to usual clothing. This will require ongoing dynamic risk assessment.

26.142 Behaviour support plans should detail primary preventative strategies that will aim to avoid the ongoing need for such restrictions. The patient should be advised what is required of them in order that they can wear their usual and preferred clothing.

Following acute behavioural disturbance

26.143 Following any significant episode of behavioural disturbance that has led to the use of a restrictive intervention, a post incident review/debrief must be undertaken in order to ensure that involved parties, including patients, receive appropriate support and that there is opportunity for organisational learning.
26.144 If the patient is willing, able and agrees to discuss the incident which led to the use of a restrictive intervention, their understanding and experience of the incident should be explored. The patient should be given a choice as to who they would like to discuss their experience with wherever possible. Attempts at staff justification for the decision to use a restrictive intervention may be counterproductive.

26.145 Patients’ accounts of the incident and their feelings, anxieties or concerns following the restrictive intervention must be recorded in their notes. Behaviour support plans (or equivalent) should be reviewed and updated as necessary. Patients should be reminded that they can record their future wishes and feelings about which restrictive interventions they would or would not like to be used in an advance statement (see chapter 9).

26.146 If patients wish to formally raise a concern they should be reminded of how to access the local complaints system and independent advocacy services. The hospital’s safeguarding lead should be informed of whenever a patient raises concerns about restrictive interventions.

26.147 There should be arrangements in place to provide support to patients (and others) who have suffered serious assaults in hospital including, where appropriate, the involvement of the police.

CTO patients and patients subject to guardianship

26.148 As is the case for hospital patients, a positive behavioural support (PBS) framework should be used in relation to those patients on a CTO, guardianship or leave, who present with behavioural disturbance. Behaviour support plans should be developed as part of the patient’s care plan. Positive and Proactive Care gives further guidance. Seclusion and long-term segregation should not be used for patients on a CTO, guardianship or leave.

26.149 Neither a CTO nor guardianship gives anyone the right to treat the patient without their consent, if they have capacity. Restrictive interventions that give rise to deprivations of liberty go beyond what can be authorised by the conditions of the patient’s community treatment order or conditions of guardianship. If there are indications that the use of any such restrictive interventions may become necessary, this should prompt consideration as to whether the community patient should be recalled to hospital or the guardianship patient should be detained under the Act, or whether a deprivation of liberty authorisation or deprivation of liberty order can be sought under the MCA.
Training

26.150 All hospitals should have a policy on workforce development and training of staff may be exposed to aggression or violence in their work or who may need to become involved in the application of restrictive interventions. The policy should specify who will receive what level of training (based on training needs analysis) and how often they will be trained. The policy should require training to be delivered during the induction period of new staff members or as soon as is practicably possible thereafter.

26.151 All staff who support people who are liable to present with behavioural disturbance should be competent in physical monitoring and emergency resuscitation techniques to ensure the safety of patients following administration of rapid tranquillisation and during periods of physical restraint or seclusion.

26.152 All clinical staff who undertake training in the recognition, prevention and management of violence and aggression and associated physical restraint should attend periodic refresher or update education and training programmes.

27 Leave of absence

Why read this chapter?

27.1 Patients detained in hospital have the right to leave hospital lawfully only if they have leave of absence from their responsible clinician under section 17 of the Act.

This chapter gives guidance on who has the power to grant leave of absence, leave for restricted patients, short- and long-term leave, escorted leave, leave to reside in other hospitals, and recall from leave.67

General points

27.2 In general, while patients are detained in a hospital they can leave lawfully – even for a very short period – only if they are given leave of absence by their responsible clinician under section 17 of the Act.68

27.3 Responsible clinicians cannot grant leave of absence from hospital to patients who have been remanded to hospital under sections 35 or 36 of the Act or who are subject to interim hospital orders under section 38.

27.4 Except for certain restricted patients (see paragraph 27.13), no formal procedure is required to allow patients to move within a hospital or its grounds. Such ‘ground leave’ within a hospital may be encouraged or, where necessary, restricted, as part of each patient’s care plan.

27.5 What constitutes a particular hospital for the purpose of leave is a matter of fact which can be determined only in the light of the particular case. Where one building, or set of buildings, includes accommodation under the management of different bodies (e.g. two different NHS trusts), the accommodation used by each body should be treated as forming separate hospitals. Facilities and grounds shared by both can be regarded as part of both hospitals.

67 For patients in high security hospitals, this chapter should be read in conjunction with The High Security Psychiatric Services (Arrangements for Safety and Security) Directions. 2013 and associated guidance

68 Patients will also lawfully be absent from hospital if they are being transferred or taken to another place under the Act, or under another piece of legislation. This would include, e.g. patients being transferred to another hospital under section 19 of the Act, or patients who are required to attend court
Power to grant leave

27.6 Only the patient’s responsible clinician can grant leave of absence to a patient detained under the Act. Responsible clinicians cannot delegate the decision to grant leave of absence to anyone else. In the absence of the usual responsible clinician (eg if they are on leave), permission can be granted only by the approved clinician who is for the time being acting as the patient’s responsible clinician.

27.7 Responsible clinicians may grant leave for specific occasions or for specific or indefinite periods of time. They may make leave subject to any conditions which they consider necessary in the interests of the patient or for the protection of other people.

27.8 Leave of absence can be an important part of a detained patient’s care plan, but can also be a time of risk. When considering and planning leave of absence, responsible clinicians should:

- consider the benefits and any risks to the patient’s health and safety of granting or refusing leave
- consider the benefits of granting leave for facilitating the patient’s recovery
- balance these benefits against any risks that the leave may pose for the protection of other people (either generally or particular people)
- consider any conditions which should be attached to the leave, eg requiring the patient not to visit particular places or persons
- be aware of any child protection and child welfare issues in granting leave
- take account of the patient’s wishes, and those of carers, friends and others who may be involved in any planned leave of absence
- consider what support the patient would require during their leave of absence and whether it can be provided
- ensure that any community services which will need to provide support for the patient during the leave are involved in the planning of the leave, and that they know the leave dates and times and any conditions placed on the patient during their leave
- ensure that the patient is aware of any contingency plans put in place for their support, including what they should do if they think they need to return to hospital early
- consult any relevant agencies, eg MAPPA or the sex offender management unit (SOMU)
- undertake a risk assessment and put in place any necessary safeguards, and
- (in the case of mentally disordered offender patients – see chapter 22) consider whether there are any issues relating to victims which impact on whether leave should be granted and the conditions to which it should be subject.
When considering whether to grant leave of absence for more than seven consecutive days, or extending leave so that the total period is more than seven consecutive days, responsible clinicians must first consider whether the patient should go onto a community treatment order (CTO) instead and, if required, consult any local agencies concerned with public protection. This does not apply to restricted patients, nor, in practice, to patients detained for assessment under section 2 of the Act, as they are not eligible to be placed on a CTO.

The requirement to consider a CTO does not mean that the responsible clinician cannot use longer-term leave if that is the more suitable option, but the responsible clinician will need to be able to show that both options have been duly considered. The decision, and the reasons for it, should be recorded in the patient’s notes.

One use of leave for more than seven days may be to assess a patient’s suitability for discharge from detention. Guidance on factors to be considered when deciding between leave of absence and a CTO is given in chapter 31.

Hospital managers cannot overrule a responsible clinician’s decision to grant leave. However, the fact that a responsible clinician grants leave subject to certain conditions, eg residence at a hostel, does not oblige the hospital managers, or anyone else, to arrange or fund the particular placement or services the clinician has in mind. Responsible clinicians should not grant leave on such a basis without first taking steps to establish that the necessary services or accommodation (or both) are available and will be funded.

**Restricted patients**

Any proposal to grant leave to a restricted patient has to be approved by the Secretary of State for Justice, who should be given as much notice as possible and full details of the proposed leave. For further information on restricted patients see chapter 22.

Where the courts or the Secretary of State have decided that restricted patients are to be detained in a particular unit of a hospital, those patients require leave of absence to go to any other part of that hospital as well as outside the hospital.

Restricted patients are not eligible to be placed on a CTO. The Secretary of State for Justice would normally consider any request for section 17 leave for a restricted patient to be in the community for more than a few consecutive nights as an application for conditional discharge.
Short-term leave

27.16 Subject to the agreement of the Secretary of State for Justice in the case of restricted patients, responsible clinicians may decide to authorise short-term local leave, which may be managed by other staff. For example, patients may be given leave for a shopping trip of two hours every week to a specific destination, with the decision on which particular two hours to be left to the discretion of the responsible nursing staff.

27.17 The parameters within which this discretion may be exercised must be clearly set out by the responsible clinician, eg the particular places to be visited, any restrictions on the time of day the leave can take place, and any circumstances in which the leave should not go ahead.

27.18 Responsible clinicians should regularly review any short-term leave they authorise on this basis and amend it as necessary.

Longer periods of leave

27.19 Longer-term leave should be planned properly and, where possible, well in advance. Patients should be fully involved in the decision and responsible clinicians should be satisfied that patients are likely to be able to manage outside the hospital. Subject to the normal considerations of patient confidentiality, carers and other relevant people should be consulted before leave is granted (especially where the patient is to reside with them). Relevant community services should also be consulted.

27.20 If patients do not consent to carers or other people who would normally be involved in their care being consulted about their leave, responsible clinicians should reconsider whether or not it is safe and appropriate to grant leave.

27.21 As with short-term leave, responsible clinicians should specify any circumstances in which the leave should not go ahead – eg if the patient’s health has considerably deteriorated since it was authorised.

Recording leave

27.22 Hospital managers should establish a standardised system by which responsible clinicians can record the leave they authorise and specify the conditions attached to it. Copies of the authorisation should be given to the patient and to any carers, professionals and other people in the community who need to know. A copy should also be kept in the patient’s notes. In case they fail to return from leave, an up-to-date description of the patient should be available in their notes.
The outcome of leave – whether or not it went well, particular problems encountered, concerns raised or benefits achieved – should also be recorded in patients’ notes to inform future decision-making. Patients should be encouraged to contribute by giving their own views on their leave; some hospitals provide leave records specifically for this purpose.

**Care and treatment while on leave**

27.24 Responsible clinicians’ responsibilities for their patients remain the same while the patients are on leave.

27.25 A patient who is granted leave under section 17 remains liable to be detained, and the rules in part 4 of the Act about their medical treatment continue to apply (see chapter 24). If it becomes necessary to administer treatment without the patient’s consent, consideration should be given to whether it would be more appropriate to recall the patient to hospital (see paragraphs 27.32 to 27.35), although recall is not a legal requirement.

27.26 The duty on local authorities and clinical commissioning groups (or, in certain circumstances, NHS England) to provide aftercare under section 117 of the Act for certain patients who have been discharged from detention also applies to those patients while they are on leave of absence (see chapter 33 on after-care).

**Escorted leave**

27.27 A responsible clinician may direct that their patient remains in custody while on leave of absence, either in the patient’s own interests or for the protection of other people. Patients may be kept in the custody of any officer on the staff of the hospital or any person authorised in writing by the hospital managers. Such an arrangement is often useful, eg to enable patients to participate in escorted trips or to have compassionate home leave.

27.28 While it may often be appropriate to authorise leave subject to the condition that a patient is accompanied by a friend or relative (eg on a pre-arranged day out from the hospital), responsible clinicians should specify that the patient is to be in the legal custody of a friend or relative only if it is appropriate for that person to be legally responsible for the patient, and if that person understands and accepts the consequent responsibility.

27.29 Escorted leave to Scotland, Northern Ireland, the Isle of Man or any of the Channel Islands can only be granted if the local legislation allows patients to be kept in custody while in that jurisdiction.
Leave to reside in other hospitals

27.30 Responsible clinicians may require patients, as a condition of leave, to reside at another hospital in England and Wales, and they may then be kept in the custody of staff of that hospital. Before authorising leave on this basis, responsible clinicians should consider whether it would be more appropriate to transfer the patient to the other hospital instead (see chapter 37).

27.31 Where a patient is granted leave of absence to another hospital, the responsible clinician at the first hospital should remain in overall charge of the patient’s case. If it is thought that a clinician at the other hospital should become the responsible clinician, the patient should instead be transferred to that hospital. An approved clinician in charge of any particular aspect of the patient’s treatment may be from either hospital (for further guidance on allocating responsible clinicians see chapter 36).

Recall from leave

27.32 A responsible clinician may revoke their patient’s leave at any time if they consider it necessary in the interests of the patient’s health or safety or for the protection of other people. Responsible clinicians must be satisfied that these criteria are met and should consider what effect being recalled may have on the patient. A refusal to take medication would not on its own be a reason for revocation, although it would almost always be a reason to consider revocation.

27.33 The responsible clinician must arrange for a notice in writing revoking the leave to be served on the patient or on the person who is for the time being in charge of the patient. Hospitals should always know the address of patients who are on leave of absence.

27.34 The reasons for recall should be fully explained to the patient and a record of the explanation included in the patient’s notes. A restricted patient’s leave may be revoked either by the responsible clinician or by the Secretary of State for Justice.

27.35 It is essential that carers (especially where the patient is residing with them while on leave) and professionals who support the patient while on leave should have easy access to the patient’s responsible clinician if they feel consideration should be given to return of the patient before their leave is due to end.
Renewal of authority to detain

27.36 It is possible to renew a patient’s detention while they are on leave if the criteria in section 20 of the Act are met (see chapter 32). Leave should not be used as an alternative to discharging the patient either completely or onto a CTO where that is appropriate. Chapter 31 gives further guidance on factors to consider when deciding between leave of absence and a CTO.

Patients who are in hospital but not detained

27.37 Patients who are not legally detained in hospital have the right to leave at any time. They cannot be required to ask permission to do so, but may be asked to inform staff when they wish to leave the ward.

This material does not form part of the Code. It is provided for assistance only.
28 Absence without leave

Why read this chapter?

28.1 This chapter provides guidance on action to be taken when patients are absent without leave (AWOL) or have otherwise absconded from legal custody under the Act, including on when patients are to be considered to be AWOL.

Hospital managers should have policies in place outlining actions necessary in this eventuality and guidance is provided about the matters that should be covered by such policies.

General points

28.2 Under section 18 of the Act, patients are considered to be AWOL in various circumstances, in particular when they:

• have left the hospital in which they are detained without leave being agreed (under section 17 of the Act) by their responsible clinician
• have failed to return to the hospital at the time required to do so under the conditions of leave under section 17
• are absent without permission from a place where they are required to reside as a condition of leave under section 17
• have failed to return to the hospital if their leave under section 17 has been revoked
• are patients on a community treatment order (CTO) (community patients) who have failed to attend hospital when recalled
• are CTO patients who have absconded from hospital after being recalled there;
• are conditionally discharged restricted patients whom the Secretary of State for Justice has recalled to hospital
• are guardianship patients who are absent without permission from the place where they are required to live by their guardian.
Detained patients

28.3 Detained patients who are AWOL may be taken into custody and returned by an approved mental health professional (AMHP), any member of the hospital staff, any police officer, or anyone authorised in writing by the hospital managers.

28.4 A patient who has been required to reside in another hospital as a condition of leave of absence can also be taken into custody by any member of that hospital’s staff or by any person authorised by that hospital’s managers.

28.5 Otherwise, responsibility for the safe return of patients rests with the detaining hospital. If the absconding patient is initially taken to another hospital, that hospital may, with the written authorisation of the managers of the detaining hospital, detain the patient while arrangements are made for their return. In these (and similar) cases people may take a faxed or scanned copy of a written authorisation as evidence that they have the necessary authority without waiting for the original.

Guardianship patients

28.6 Guardianship patients who are AWOL from the place they are required to live may be taken into custody by any member of the staff of a local authority, any person authorised in writing by the local authority or the private guardian (if there is one), or a police officer.

Patients on a CTO (community patients)

28.7 Community patients who are AWOL may be taken into custody and returned to the hospital to which they were recalled by an AMHP, a police officer, a member of staff of the hospital to which they have been recalled, or anyone authorised in writing by managers of that hospital or by the responsible clinician.

Other situations in which patients are in legal custody

28.8 In addition, there are various situations in which patients are considered to be in legal custody under the Act. These include, eg:

- the detention of patients in places of safety under section 135 or 136
- the transport of patients to hospital (or elsewhere) under the Act, including patients being returned to hospital when they have gone AWOL
- where patients’ leave of absence is conditional on their being kept in custody by an escort.

(See chapters 16, 17 and 27 respectively.)
28.9 If patients who are in legal custody abscond, they may also be taken into custody and returned to the place they ought to be, in accordance with the Act.

Local policies

28.10 Hospital managers should ensure that there is a clear written policy about the action to be taken when a detained patient, or a patient on a CTO, goes missing. All relevant staff should be familiar with this policy. Hospital managers should agree their policy with other agencies – such as the police and ambulance services – as necessary.

28.11 Policies in relation to detained and CTO patients should include guidance about:

- the immediate action to be taken by any member of staff who becomes aware that a patient has gone missing, including a requirement that they immediately inform the professional in charge of the patient’s ward (where applicable), who should in turn ensure that the patient’s responsible clinician is informed
- the circumstances in which a search of a hospital and its grounds should be made
- the circumstances in which other local agencies with an interest, including the local authority, should be notified
- the circumstances in which the police should be informed, who is responsible for informing the police and the information they should be given (this should be in line with local arrangements agreed with the police)
- how and when other people, including the patient’s nearest relative, should be informed (this should include guidance on informing people if there is good reason to think that they might be at risk as a result of the patient’s absence)
- when and how an application should be made for a warrant under section 135(2) of the Act to allow the police to enter premises in order to remove a patient who is missing
- how (and by whom) patients are to be returned to the place where they ought to be, and who is responsible for organising any necessary transport (see chapter 17).

28.12 Local authorities should have equivalent policies for the action to be taken when they (or a private guardian) become aware that a guardianship patient is AWOL from the place where they are required to live.

28.13 The police should be asked to assist in returning a patient to hospital only if necessary. If the patient’s location is known, the role of the police should, wherever possible, only be to assist a suitably qualified and experienced mental health professional in returning the patient to hospital.
The police should always be informed immediately if a patient is missing who is:
• considered to be particularly vulnerable
• considered to be dangerous
• subject to restrictions under part 3 of the Act (restricted patients) (see paragraphs 22.45b – 22.49).

There may also be other cases where, although the help of the police is not needed, a patient’s history makes it desirable to inform the police that they are AWOL in the area.

Whenever the police are asked for help in returning a patient, they must be informed of the time limit for taking them into custody.

Where the police have been informed about a missing patient, they should be told immediately if the patient is found or returns.

Although every case must be considered on its merits, patient confidentiality will not usually be a barrier to providing basic information about a patient’s absence to people – such as those the patient normally lives with or is likely to contact – who may be able to help with finding the patient.

Where a patient is missing for more than a few hours, their nearest relative should normally be informed (if they have not been already), subject to the normal considerations about involving nearest relatives (see paragraphs 4.29 – 4.34).

It is good practice when a patient returns after a substantial period of absence without leave always to re-examine the patient to establish whether they still meet the criteria for detention, a CTO or guardianship. Where patients (other than restricted patients) have been AWOL for more than 28 days, section 21B of the Act requires such an examination to take place within a week of the patient’s return and the provision of a report that the criteria for continued detention or being subject to a CTO or guardianship are still met. Otherwise, the patient’s detention, CTO or guardianship will end automatically.

Incidents in which patients go AWOL or abscond should be reviewed and analysed so that lessons for the future can be learned, including lessons about ways of identifying patients most at risk of going missing.

All instances of absence without leave should be recorded in the individual patient’s notes. Where a patient has gone AWOL previously, it may be useful for the patient’s care plan to include specific actions which experience suggests should be taken if that patient were to go missing again.
29 Community treatment orders

Why read this chapter?

29.1 The purpose of a community treatment order (CTO) is to allow suitable patients to be treated safely in the community rather than in hospital; this chapter gives guidance on CTOs. Hospital managers, approved mental health professionals and responsible clinicians should, in particular, note the guidance in this chapter.

This chapter provides guidance about the use of CTOs, patients for whom they are suitable, and providing and managing care planning and support in the community. Certain conditions may be attached to a CTO and information should be provided for patients and others about the CTO.

The chapter includes guidance on circumstances that might lead to recall to hospital and the procedure that should be followed and on revoking a CTO, reviewing a CTO and discharging patients from a CTO.

Purpose of a CTO

29.2 The purpose of a CTO is to allow suitable patients to be safely treated in the community rather than under detention in hospital, and to provide a way to help prevent relapse and any harm – to the patient or to others – that this might cause. It is intended to help patients to maintain stable mental health outside hospital and to promote recovery.

29.3 A CTO provides a framework for the management of patient care in the community and gives the responsible clinician the power to recall the patient to hospital for treatment if necessary.

29.4 For a discussion about when to decide on a CTO rather than either of the alternative community provisions available under the Act (guardianship and leave of absence under section 17 of the Act) see chapter 31. Chapter 31 also discusses when a deprivation of liberty authorisation (DoL authorisation) or deprivation of liberty order (DoL order) would be appropriate.
Who can be discharged using a CTO?

29.5 Only patients who are detained in hospital for treatment under section 3 of the Act, or are unrestricted part 3 patients, can be considered for a CTO. Patients detained in hospital for assessment under section 2 of the Act are not eligible (see also paragraphs 19.25 – 19.29 on children and young people).

29.6 A CTO is an option only for patients who meet the criteria set out in the Act, which are that:

- the patient is suffering from a mental disorder of a nature or degree which makes it appropriate for them to receive medical treatment
- it is necessary for the patient’s health or safety or for the protection of others that the patient should receive such treatment
- subject to the patient being liable to be recalled as mentioned below, such treatment can be provided without the patient continuing to be detained in a hospital
- it is necessary that the responsible clinician should be able to exercise the power under section 17E(1) of the Act to recall the patient to hospital, and
- appropriate medical treatment is available for the patient.

29.7 The decision as to whether a CTO is the right option for any patient is taken by the responsible clinician and requires the agreement of an approved mental health professional (AMHP). A CTO may be used only if it would not be possible to achieve the desired objectives for the patient’s care and treatment without it. Consultation at an early stage with the patient and those involved in the patient’s care will be important, including family and carers.

29.8 In assessing the patient’s suitability for a CTO, the responsible clinician must be satisfied that the patient requires medical treatment for mental disorder for their own health or safety or for the protection of others, and that appropriate treatment is, or would be, available for the patient in the community. The key factor in the decision is whether the patient can only be treated safely for mental disorder in the community if the responsible clinician can exercise the power to recall the patient to hospital for treatment if that becomes necessary (see paragraphs below 29.42 – 29.48).

29.9 In making that decision the responsible clinician must assess what risk there would be of the patient’s condition deteriorating after discharge, eg as a result of refusing or neglecting to receive treatment.

29.10 In assessing that risk the responsible clinician should take into consideration the patient’s history of mental disorder, previous experience of contact with services and engagement with treatment. A tendency to fail to follow a treatment plan or to discontinue medication in the community, and then relapsing may suggest a risk justifying use of a CTO.
29.11 Other relevant factors will vary but are likely to include the patient’s current mental state, the patient’s capacity to make decisions about their care and treatment and attitude to treatment, the circumstances into which the patient would be discharged, and the willingness and ability of family and/or carers to provide support.

29.12 Taken together, all these factors should help the responsible clinician to assess the risk of the patient’s condition deteriorating significantly after discharge, and inform the decision as to whether continued detention, a CTO or discharge would be the right option for the patient at that particular time. The responsible clinician should consider the likelihood that a CTO will benefit the patient and take account of the patient’s views about the use of a CTO.

29.13 A risk that the patient’s condition will deteriorate is a significant consideration, but does not necessarily mean that the patient should be discharged onto a CTO. The responsible clinician must be satisfied that the risk of harm arising from the patient’s disorder is sufficiently serious to justify the power to recall the patient to hospital for treatment. CTOs should only be used when there is reasonable evidence to suggest that there will be benefits to the individual. Such evidence may include:

- a clear link between non concordance with medication and relapse sufficient to have a significant impact on wellbeing requiring treatment in hospital
- clear evidence that there is a positive response to medication without an undue burden of side effects
- evidence that the CTO will promote recovery, and
- evidence that recall may be necessary (rather than informal admission or reassessment under the Act).

29.14 Patients do not have to give formal consent to a CTO. But in practice, patients must be involved in decisions about the treatment to be provided in the community and how and where it is to be given, and be prepared to co-operate with the proposed treatment. The principle of least restrictive option and autonomy must always be part of the consideration of the use of a CTO.

Action upon Tribunal recommendation

29.15 When a detained patient makes an application to the Tribunal for discharge, the Tribunal may decide not to order discharge, but to recommend that the responsible clinician should consider a CTO. In that event, the responsible clinician should carry out the assessment of the patient’s suitability in the usual way. It will be for the responsible clinician to decide whether or not a CTO is appropriate for that patient taking into account the factors outlined above.
Care planning and support in the community

29.16 Good care planning, in line with the care programme approach (CPA) will be essential to the success of a CTO (see chapter 34). A care co-ordinator will need to be identified.

29.17 Patients on a CTO are entitled to after-care services under section 117 of the Act. The after-care arrangements should be drawn up as part of the normal care planning arrangements. The clinical commissioning group and local authority must continue to provide after-care services under section 117 for as long as the patient remains on a CTO (see also chapter 33).

Role of the AMHP

29.18 The AMHP must decide whether to agree with the patient’s responsible clinician that the patient meets the criteria for a CTO, and (if so) whether a CTO is appropriate. Even if the criteria for a CTO are met, it does not mean that the patient must be discharged onto a CTO. In making that decision, the AMHP should consider the wider social context for the patient. Relevant factors may include any support networks the patient may have, the potential impact on the rest of the patient’s family, and their need for support in providing care, and employment issues.

29.19 The AMHP should consider how the patient’s social and cultural background may influence the family environment in which they will be living and the support structures potentially available. But no assumptions should be made on the basis of the patient’s ethnicity or social or cultural background about what care and support can be provided by the family.

29.20 The Act does not specify who this AMHP should be. It may (but need not) be an AMHP who is already involved in the patient’s care and treatment as part of the multi-disciplinary team. It can be an AMHP acting on behalf of any willing local authority, and local authorities may agree with each other and with hospital managers the arrangements that are likely to be most convenient and best for patients. But if no other local authority is willing, responsibility for ensuring that an AMHP considers the case should lie with the local authority which would become responsible under section 117 for the patient’s after-care if the patient were discharged.

29.21 If the AMHP does not agree with the responsible clinician that the patient should go onto a CTO, then the CTO cannot go ahead. A record of the AMHP’s decision and the full reasons for it should be kept in the patient’s notes. The responsible clinician should not approach another AMHP for an alternative view.
Making the community treatment order (CTO)

29.22 If the responsible clinician and AMHP agree that the patient should be discharged onto a CTO, they should complete the relevant statutory form and send it to the hospital managers. The responsible clinician must specify on the form the date that the CTO is to be made. This date is the authority for a CTO to begin, and may be a short while after the date on which the form is signed, to allow time for arrangements to be put in place for the patient’s discharge.

Conditions to be attached to the community treatment order

29.23 The CTO includes conditions with which the patient is required to comply. There are two conditions which must be included in all cases. Patients are required to make themselves available for medical examination:

- when needed for consideration of extension of the CTO, and
- if necessary, to allow a second opinion approved doctor (SOAD) to provide a part 4A certificate authorising treatment.

29.24 Responsible clinicians may also, with the AMHP’s agreement and following discussions with the patient, set other conditions which are identified as being necessary or appropriate to:

- ensure that the patient receives medical treatment for mental disorder
- prevent a risk of harm to the patient’s health or safety as a result of mental disorder, and
- protect other people from a similar risk of harm.

29.25 Conditions may be set for any or all of these purposes, but not for any other reason. The AMHP’s agreement to the proposed conditions must be obtained before the CTO can be made.

29.26 In considering what conditions might be necessary or appropriate, the responsible clinician should always keep in view the patient’s diverse needs and circumstances. The patient, and (subject to the normal considerations of patient confidentiality) any others with an interest such as a parent (and any others with parental responsibility) or carer, should be consulted.

29.27 The conditions should:

- be kept to a minimum number consistent with achieving their purpose
- restrict the patient’s liberty as little as possible while being consistent with their care plan and recovery goal
• have a clear rationale, linked to one or more of the purposes in paragraph 29.24 above
• be clearly and precisely expressed, so that the patient can readily understand what is expected.

29.28 The nature of the conditions will depend on the patient’s individual circumstances. They should be stated clearly having regard to the least restriction principle. Subject to paragraph 29.27, they might cover matters such as:
• where and when the patient is to receive treatment in the community
• where the patient is to live, and
• avoidance of known risk factors or high-risk situations relevant to the patient’s mental disorder.

29.29 The reasons for any condition should be explained to the patient and others, as appropriate, (eg the patient’s independent mental health advocate (IMHA), family and carers and, in the case of a child or young person, the person(s) with parental responsibility, see chapters 54, 5, 6 and 19 on children and young people) and recorded in the patient’s notes. It will be important, if the CTO is to be successful, that the patient agrees to keep to the conditions, or to try to do so, and that patients have access to the help they need to be able to comply. It is helpful if families can have access to support so they can help the patient to comply.

Information for patients on a CTO and others

29.30 As soon as the decision is made to discharge a patient onto a CTO, the responsible clinician should inform the patient and others consulted of the decision, the conditions to be applied to the CTO, and the services which will be available for the patient in the community, including the continuing right to an IMHA (see chapter 6).

29.31 There is a duty on hospital managers to take steps to ensure that patients understand what a CTO means for them and their rights to apply for discharge. This includes giving patients information both orally and in writing and must be done as soon as practicable after the patient goes onto the CTO. Hospital managers’ information policies should set out whether this information is to be provided by the responsible clinician, by another member of the professional team or by someone else. A copy of this information must also be provided to the nearest relative (subject to the normal considerations about involving nearest relatives – see paragraphs 4.29 – 4.34). (See also chapter 40 on information to be given to the victims of certain part 3 patients.)
Monitoring CTO patients

29.32 It will be important to maintain contact with a patient on a CTO and to monitor closely their mental health and wellbeing after they leave hospital. The type and scope of the arrangements will vary depending on the patient’s needs and individual circumstances and the way in which local services are organised. All those involved will need to agree to the arrangements. Respective responsibilities should be clearly set out in the patient’s care plan. The care co-ordinator would normally be responsible for co-ordinating the care plan, working with the responsible clinician (if they are different people), the team responsible for the patient’s care, family carers and any others with an interest.

29.33 Appropriate action will need to be taken if the patient becomes unwell, engages in high-risk behaviour as a result of mental disorder or withdraws consent to treatment (or begins to object to it). The responsible clinician should consider, with the patient (and others where appropriate), the reasons for this and what the next steps should be. If the patient refuses crucial treatment, an urgent review of the situation will be needed, and recalling the patient to hospital will be an option if the risk justifies it. If suitable alternative treatment is available which would allow the patient to continue safely on a CTO and which the patient would accept, the responsible clinician should consider such treatment if this can be offered. If so, the treatment plan, and if necessary the conditions of the CTO, should be varied accordingly (note that a revised part 4A certificate may be required).

29.34 If the patient is not complying with any condition of the CTO the reasons for this will need to be properly investigated. Recall to hospital may need to be considered if it is no longer safe and appropriate for the patient to remain in the community. The conditions may need to be reviewed – eg if the patient’s health has improved a particular condition may no longer be relevant or necessary. The responsible clinician may vary conditions as appropriate (see paragraphs 29.36 – 29.40 below). Changes may also be needed to the patient’s care or treatment plan.

29.35 Alternatively, after review it may be concluded that the CTO is failing to promote recovery and then consideration needs to be given to discharging the CTO and taking a different approach.

Varying and suspending conditions

29.36 The responsible clinician has the power to vary the conditions of the patient’s CTO, or to suspend any of them. The responsible clinician does not need to agree any variation or suspension with the AMHP. However, it would not be good practice to vary conditions which had recently been agreed with an AMHP without discussion with that AMHP. If changing conditions the responsible clinician should document the reasons for doing so in writing.
29.37 Suspension of one or more of the conditions may be appropriate to allow for a temporary change in circumstances, eg the patient’s temporary absence or a change in treatment regime. The responsible clinician should record any decision to suspend conditions in the patient’s notes, with reasons.

29.38 A variation of the conditions might be appropriate where the patient’s treatment needs or living circumstances have changed. Any condition no longer required should be removed.

29.39 It will be important to discuss any proposed changes to the conditions with the patient and ensure that the patient, and anyone else affected by the changes (subject to the patient’s right to confidentiality), knows that they are being considered, and why. As when the conditions were first set, the patient’s views about the changes should be sought and considered before a change is made; and the responsible clinician should discuss with the patient whether they will be able to keep to any new or varied conditions. Any help the patient needs to comply with them should be made available. Families and/or carers should also be supported to help the patient (see also paragraphs 10.10 – 10.13).

29.40 Any variation in the conditions must be recorded on the relevant statutory form, which should be sent to the hospital managers.

Responding to concerns raised by the patient’s carer or relatives

29.41 Particular and prompt attention should be paid to carers and relatives when they raise a concern that the patient is not complying with the conditions or that the patient’s mental health appears to be deteriorating. The team responsible for the patient needs to give due weight to those concerns and any requests made by the carers or relatives in deciding what action to take. Carers and relatives are typically in much more frequent contact with the patient than professionals, even under well-run care plans. Their concerns may prompt a review of how a CTO is working for that patient and whether the criteria for recall to hospital might be met or whether more support in the community should be put in place. The managers of responsible hospitals should ensure that local protocols are in place to cover how concerns raised should be addressed and taken forward (see also paragraphs 10.2 – 10.5).
Recall to hospital

29.42 The recall power is intended to provide a means to respond to evidence of relapse or high-risk behaviour relating to mental disorder before the situation becomes critical and leads to the patient or other people being harmed. The need for recall might arise as a result of relapse, or by a change in the patient’s circumstances giving rise to increased risk.

29.43 The responsible clinician may recall a patient on a CTO to hospital for treatment if:
• the patient needs to receive treatment for mental disorder in hospital (either as an in-patient or as an out-patient)
• there would be a risk of harm to the health or safety of the patient or to other persons if the patient were not recalled.

29.44 A patient may also be recalled to hospital if they break either of the mandatory conditions which must be included in all CTOs – that is, by failing to make themselves available for medical examination either to allow consideration of extension of the CTO or to allow a SOAD to give a part 4A certificate for proposed section 58 or section 58A treatment (see chapter 25). The patient must always be given the opportunity to comply with the condition before recall is considered, unless there is a risk of harm to their health or safety or to others. Before exercising the recall power for this reason, the responsible clinician should consider whether the patient has a valid reason for failing to comply, and should take any further action accordingly.

29.45 The responsible clinician must be satisfied that the criteria are met before using the recall power. Any action should be proportionate to the level of risk. For some patients, the risk arising from a failure to comply with treatment could indicate an immediate need for recall. In other cases, negotiation with the patient – and the nearest relative, family, carers and person(s) with parental responsibility in the case of children and young people (unless the patient objects or it is not reasonably practicable) – may resolve the problem and so avert the need for recall.

29.46 The responsible clinician should consider in each case whether recalling the patient to hospital is justified in all the circumstances. For example, it might be sufficient to monitor a patient who has failed to comply with a condition to attend for treatment, before deciding whether the lack of treatment means that recall is necessary. A patient might also agree to admission to hospital on a voluntary basis. Failure to comply with a condition (apart from those relating to availability for medical examination, as above) does not in itself trigger recall. Only if the breach of a condition results in an increased risk of harm to the patient or to anyone else will recall be justified.

29.47 It might be necessary to recall a patient whose condition was deteriorating despite compliance with treatment, if the risk cannot be managed otherwise.
Recall to hospital for treatment should not become a regular or routine event for any patient on a CTO. If recall is being used frequently, the responsible clinician should review the patient’s treatment plan to consider whether it could be made more acceptable to the patient, or whether, in the individual circumstances of the case, a CTO continues to be appropriate.

**Procedure for recall to hospital**

29.49 The responsible clinician has responsibility for co-ordinating the recall process, unless it has been agreed locally that someone else will do this. It will be important to ensure that the practical impact of recalling the patient on the patient’s domestic circumstances is considered and managed. For example, wherever possible the responsible clinician should give the patient (or arrange for the patient to be given) oral reasons for the recall before it happens, taking into account any risks arising from giving notice of the recall. The family and carers involved in providing support to the patient should also be informed.

29.50 In every case the responsible clinician must complete a written notice of recall to hospital, which is effective only when served on the patient. A copy of this should be kept in the notes so as to be available to the on call team who may be required to follow-up the recall process. It is important that, wherever possible, the notice should be handed to the patient personally. Otherwise, the notice is served by delivery to the patient’s usual or last known address (see paragraphs 29.52 – 29.53 below).

29.51 Once the recall notice has been served, the patient can, if necessary, be treated as absent without leave, and taken and transported to hospital (and a patient who leaves the hospital without permission can be returned there). The time at which the notice is deemed to be served will vary according to the method of delivery.

29.52 It will not usually be appropriate to post a notice of recall to the patient. This may, however, be an option if the patient has failed to attend for medical examination as required by the conditions of the CTO, despite having been requested to do so, when the need for the examination is not urgent (see paragraph 29.50 above). First class post should be used. The notice is deemed to be served on the second working day after posting, and it will be important to allow sufficient time for the patient to receive the notice before any action is taken to ensure compliance.

29.53 Where the need for recall is urgent, as will usually be the case, it will be important that there is certainty as to the timing of delivery of the notice. A notice handed to the patient is effective immediately. It may not be possible to achieve this if the patient’s whereabouts are unknown, or if the patient is unavailable or simply refuses to accept the notice. In that event the notice should be delivered by hand to the patient’s usual or last known address. The notice is then deemed to be served.
(even though it may not actually be received by the patient) on the day after it is delivered – that is, the day (which does not have to be a working day) beginning immediately after midnight following delivery.

29.54 If the patient’s whereabouts are known but access to the patient cannot be obtained, it might be necessary to consider whether a warrant issued under section 135(2) is needed (see chapter 16).

29.55 The patient should be transported to hospital in the least restrictive manner possible. If appropriate, the patient might be accompanied by a family member, carer or friend (see also chapter 17).

29.56 The responsible clinician should ensure that the hospital to which the patient is recalled is ready to receive the patient and to provide appropriate treatment. While recall must be to a hospital, the required treatment may then be given on an outpatient basis, if appropriate.

29.57 The hospital need not be the patient’s responsible hospital (that is, the hospital where the patient was detained immediately before going onto a CTO) or under the same management as that hospital. A copy of the notice of recall, which provides the authority to detain the patient, should be sent to the managers of the hospital to which the patient is being recalled.

29.58 When the patient arrives at hospital after recall, the clinical team will need to assess the patient’s condition, provide the necessary treatment and determine the next steps. The patient may be well enough to return to the community once treatment has been given, or may need a longer period of assessment or treatment in hospital. The patient may be detained in hospital for a maximum of 72 hours after recall to allow the responsible clinician to determine what should happen next. During this period the patient remains a CTO patient, even if they remain in hospital for one or more nights. The responsible clinician may allow the patient to leave the hospital at any time within the 72-hour period. Once 72 hours from the time of admission have elapsed, the patient must be allowed to leave if the responsible clinician has not revoked the CTO (see paragraphs 29.60 – 29.65 below). On leaving hospital the patient will remain on the CTO as before. Section 5(2) cannot be used to extend the 72-hour period.

29.59 In considering the options, the responsible clinician and the clinical team will need to consider whether a CTO remains the right option for that patient. They will also need to consider, with the patient, the nearest relative (subject to the normal considerations about involving nearest relatives), and any carers (and in the case of children and young people, those with parental responsibility), what changes might be needed to help to prevent the circumstances that led to recall from recurring. It may be that a variation in the conditions is required, or a change in the care plan (or both).
Revoking the CTO

29.60 If the patient requires inpatient treatment for longer than 72 hours after arrival at the hospital, the responsible clinician should consider revoking the CTO. The effect of revoking the CTO is that the patient will again be detained under the powers of the Act. It would generally be good practice for the responsible clinician and the AMHP to reassess the patient before revoking their CTO. They must do so if necessary to satisfy themselves that the patient again needs to be admitted to hospital for medical treatment under the Act.

29.61 The CTO may be revoked if:

- the responsible clinician considers that the patient again needs to be admitted to hospital for medical treatment under the Act, or
- an AMHP agrees with that assessment, and also believes that it is appropriate to revoke the CTO.

29.62 In making the decision as to whether it is appropriate to revoke a CTO, the AMHP should consider the wider social context for the person concerned, in the same way as when making decisions about applications for admissions under the Act (see chapter 14).

29.63 As before, the AMHP carrying out this role may (but need not) be already involved in the patient’s care and treatment, or can be an AMHP acting on behalf of any willing local authority. If no other local authority is willing, responsibility for ensuring that an AMHP considers the case should lie with the local authority which has been responsible for the patient’s after-care.

29.64 If the AMHP does not agree that the CTO should be revoked, then the patient cannot be detained in hospital after the end of the maximum recall period of 72 hours. The patient will therefore remain on a CTO. A record of the AMHP’s decision and the full reasons for it should be kept in the patient’s notes. It would not be appropriate for the responsible clinician to approach another AMHP for an alternative view.

29.65 If the responsible clinician and the AMHP agree that the CTO should be revoked, they must complete the relevant statutory form for the revocation to take legal effect, and send it to the hospital managers. The responsible clinician or the AMHP must give the patient (or arrange for the patient to be given) oral reasons for revoking the CTO before it is revoked. The patient is then detained again under the powers of the Act exactly as before going onto a CTO, except that a new detention period of six months begins for the purposes of review and applications to the Tribunal (see also paragraph 25.31).
Hospital managers’ responsibilities

29.66 It is the responsibility of the hospital managers (see chapters 37 and 38) to ensure that no patient is detained following recall for longer than 72 hours unless the CTO is revoked. The relevant statutory form must be completed on the patient’s arrival at hospital. Hospital managers should ensure arrangements are in place to monitor the patient’s length of stay following the time of detention after recall, as recorded on the form, so that the maximum period of detention is not exceeded (see also paragraphs 4.8 – 4.16 on information for patients).

29.67 The hospital managers should also ensure that arrangements are in place to cover any necessary transfers of responsibility between responsible clinicians in the community and in hospital.

29.68 If a patient’s CTO is revoked and the patient is detained in a hospital other than the one which was the responsible hospital at the time of recall, the hospital managers of the new hospital must send a copy of the revocation form to the managers of the original hospital.

29.69 The hospital managers have a duty to ensure that a patient whose CTO is revoked is referred to the Tribunal without delay.

Review of patient’s CTOs

29.70 In addition to the statutory requirements in the Act for review of CTOs, it is good practice to review the patient’s progress on their CTO as part of all reviews of the CPA care plan or its equivalent.

29.71 Reviews should cover whether the CTO is meeting the patient’s treatment needs and, if not, what action is necessary to address this. A patient who no longer satisfies all the criteria for being on a CTO must be discharged without delay.
Discharge from a CTO

29.72 It is very important that patients should not remain subject to a CTO once it is no longer necessary, if the answer to any of the following questions is ‘no’.

- Is the patient still suffering from mental disorder?
- If so, is the disorder of a nature or degree which makes it appropriate for the patient to receive medical treatment?
- If so, is it necessary in the interests of the patient’s health or safety or for the protection of other persons that the patient should receive such treatment?
- Is it still necessary for the responsible clinician to be able to exercise the power to recall the patient to hospital, if that is needed? (eg the longer a patient has been on a CTO without the need to exercise the power to recall them to hospital, the more important it will become to question whether this criterion is still satisfied).

29.73 CTO patients may be discharged in the same way as detained patients, by the Tribunal, the hospital managers, or (for part 2 patients) the nearest relative. The responsible clinician may also discharge a CTO patient at any time and must do so if the patient no longer meets the criteria for a CTO. A patient’s CTO should not simply be allowed to lapse.

29.74 The reasons for discharge should be explained to the patient, and any concerns on the part of the patient, the nearest relative or any carer (and in the case of children and young people, those with parental responsibility) should be considered and dealt with as far as possible. On discharge from a CTO, the team should ensure that any after-care services the patient continues to need under section 117 of the Act will be available.

Why read this chapter?

30.1 Guardianship enables patients to receive care outside hospital where it cannot be provided without the use of compulsory powers. This chapter provides guidance on guardianship, in particular, on the purpose of guardianship, assessing a patient for guardianship, the responsibilities of local authorities and the components of effective guardianship.

Purpose of guardianship

30.2 The purpose of guardianship is to enable patients to receive care outside hospital where it cannot be provided without the use of compulsory powers. Such care may, or may not, include specialist medical treatment for mental disorder.

30.3 A guardian may be a local authority or someone else approved by a local authority (a ‘private guardian’). Guardians have three specific powers as follows:

- they have the exclusive right to decide where a patient should live, taking precedence even over an attorney or deputy appointed under the Mental Capacity Act 2005 (MCA)
- they can require the patient to attend for treatment, work, training or education at specific times and places (but they cannot use force to take the patient there)
- they can demand that a doctor, approved mental health professional (AMHP) or another relevant person has access to the patient at the place where the patient lives.

30.4 Guardianship therefore provides an authoritative framework for working with a patient, with a minimum of constraint, to achieve as independent a life as possible within the community. Where it is used, it should be part of the patient’s overall care plan.

30.5 Guardianship must not be used to impose restrictions that amount to a deprivation of liberty.

30.6 Guardianship does not give anyone the right to treat the patient without their permission or to consent to treatment on their behalf.

30.7 While the reception of a patient into guardianship does not affect the continued authority of an attorney or deputy appointed under the MCA, such attorneys and deputies will not be able to take decisions about where a guardianship patient is to reside, or take any other decisions which conflict with decisions made by the guardian.
Assessment for guardianship

30.8 An application for guardianship may be made, in relation to a person who is aged 16 or over and who is not a ward of court, on the grounds that:

• the patient is suffering from mental disorder of a nature or degree which warrants their reception into guardianship

• it is necessary, in the interests of the welfare of the patient or for the protection of other persons, that the patient should be so received.

30.9 Guardianship is most likely to be appropriate where:

• the patient is thought to be likely to respond well to the authority and attention of a guardian and so be more willing to comply with necessary treatment and care for their mental disorder

• there is a particular need for someone to have the authority to decide where the patient should live or to insist that doctors, AMHPs or other people be given access to the patient.

30.10 As with applications for detention in hospital (see chapter 14), AMHPs and doctors making recommendations should consider whether the objectives of the proposed application could be achieved in another, less restrictive, way, without the use of guardianship.

30.11 Where patients lack capacity to make some or all important decisions concerning their own welfare, one potential alternative to guardianship will be to rely solely on the MCA – especially the protection from liability for actions taken in connection with care or treatment provided by section 5 of the MCA. While this is a factor to be taken into account, it will not by itself determine whether guardianship is necessary or unnecessary. AMHPs and doctors need to consider all the circumstances of the particular case.

30.12 Where an patient aged 16 or over is assessed as requiring residential care but lacks the capacity to make a decision about whether they wish to be placed there, guardianship is unlikely to be necessary where the move can properly, quickly and efficiently be carried out on the basis of:

• section 5 of the MCA or the decision of an attorney or deputy, and

• (where relevant) a deprivation of liberty authorisation (a DoL authorisation) (in relation to a patient aged 18 or over) or deprivation of liberty order (DoL order) under the MCA.

30.13 But guardianship may still be appropriate in such cases if:

• there are other reasons – unconnected to the move to residential care – to think that the patient might benefit from the attention and authority of a guardian

• there is a particular need to have explicit statutory authority for the patient to be returned to the place where the patient is to live should they go absent, or
it is thought to be important that decisions about where the patient is to live are placed in the hands of a single person or authority – eg where there have been long-running or particularly difficult disputes about where the person should live.

30.14 It will not always be best to use guardianship as the way of deciding where patients who lack capacity to decide for themselves must live. In cases which raise unusual issues, or where guardianship is being considered in the interests of the patient’s welfare and there are finely balanced arguments about where the patient should live, it may be preferable instead to seek a best interests decision from the Court of Protection under the MCA.

30.15 Where the relevant criteria are met, guardianship may be considered in respect of a patient who is to be discharged from detention under the Act. However, if it is thought that the patient needs to remain liable to be recalled to hospital (and the patient is eligible), a community treatment order (CTO) is likely to be more appropriate (see chapter 29).

Responsibilities of local social services authorities

30.16 Each local authority should establish a policy setting out the arrangements for:

- receiving, scrutinising and accepting or refusing applications for guardianship. Such arrangements should ensure that applications are properly but quickly dealt with
- monitoring the progress of each patient’s guardianship, including steps to be taken to fulfil the authority’s statutory obligations in relation to private guardians and to arrange visits to the patient
- ensuring the suitability of any proposed private guardian, and that they are able to understand and carry out their duties under the Act
- ensuring that patients under guardianship receive, both orally and in writing, information in accordance with regulations under the Act, including their right to have access to an independent mental health advocate (IMHA)
- ensuring that patients are aware of their right to apply to a Tribunal and that patients are given the name of someone who will give them necessary assistance, on behalf of the local authority, in making such an application
- authorising an approved clinician to be the patient’s responsible clinician
- maintaining detailed records relating to guardianship patients
- ensuring that the need to continue guardianship is reviewed in the last two months of each period of guardianship in accordance with the Act
- discharging patients from guardianship as soon as it is no longer required.
30.17 Patients may be discharged from guardianship at any time by the local authority, the responsible clinician authorised by the local authority, or (in most cases) the patient’s nearest relative.

30.18 Discharge decisions by local authorities may be taken only by the local authority itself, or by three or more members of the local authority or of a committee or sub-committee of the local authority authorised for that purpose. Where decisions are taken by three or more local authority members (or a committee or sub-committee), all three people (or at least three of them, if there are more) must agree.

30.19 Local authorities may consider discharging patients from guardianship at any time, but must consider doing so when they receive a report from the patient’s nominated medical attendant or responsible clinician renewing their guardianship under section 20 of the Act.

Components of effective guardianship

Care planning

30.20 An application for guardianship should be accompanied by a comprehensive care plan established on the basis of multi-disciplinary discussions in accordance with the care programme approach (or its equivalent).

30.21 The plan should identify the services needed by the patient and who will provide them. It should also indicate which of the powers that guardians have under the Act are necessary to achieve the plan. If none of the powers are required, guardianship should not be used.

30.22 Key elements of the plan are likely to be:

- suitable accommodation to help meet the patient’s needs
- access to day care, education and training facilities, as appropriate
- effective co-operation and communication between all persons concerned in implementing the care plan
- (if there is to be a private guardian) support from the local authority for the guardian.

30.23 A private guardian should be prepared to advocate on behalf of the patient in relation to those agencies whose services are needed to carry out the care plan. So should a local authority which is itself the guardian.
30.24 A private guardian should be a person who can appreciate any special disabilities and needs of a mentally disordered person and who will look after the patient in an appropriate and sympathetic way. The guardian should display an interest in promoting the patient’s physical and mental health and in providing for their occupation, training, employment, recreation and general welfare in a suitable way. The local authority must satisfy itself that a proposed private guardian is capable of carrying out their functions and it should assist them with advice and other forms of support.

30.25 Regulations require private guardians to appoint a doctor as the patient’s nominated medical attendant. It is the nominated medical attendant who must examine the patient during the last two months of each period of guardianship and decide whether to make a report extending the patient’s guardianship. (Where the patient’s guardian is the local authority itself, this is done by the responsible clinician authorised by the local authority.)

30.26 It is for private guardians themselves to decide whom to appoint as the nominated medical attendant, but they should first consult the local authority. The nominated medical attendant may be the patient’s GP, if the GP agrees.

Power to require a patient to live in a particular place

30.27 Guardians have the power to decide where patients should live. If patients leave the place they are required to live without the guardian’s permission, they can be taken into legal custody and brought back there (see chapter 28).

30.28 This power can also be used to take patients for the first time to the place they are required to live, if patients do not (or, in practice, cannot) go there by themselves.

30.29 Patients should always be consulted first about where they are to be required to live, unless their mental state makes that impossible. Guardians should not use this power to make a patient move without warning.

30.30 The power to take or return patients to the place they are required to live may be used, eg to discourage them from:

- living somewhere the guardian considers unsuitable
- breaking off contact with services
- leaving the area before proper arrangements can be made
- sleeping rough.

But it may not be used to restrict their freedom to come and go so much that they are effectively being detained.
30.31 The power to require patients to reside in a particular place may not be used to require them to live in a situation in which they are deprived of liberty. Guardianship will not be appropriate for a person who has the capacity to decide where to live and will not reside in the place they are required to live by their guardian, unless they were to be deprived of their liberty.

30.32 If the person lacks the capacity to decide where to live, they may be deprived of their liberty if this is authorised separately by either (a) a DoL authorisation in respect of a hospital or care home placement if they are 18 or over; or (b) by a DoL order made by the Court of Protection under the MCA in respect of other community settings if they are 16 or over. If it is appropriate for deprivation of liberty to be authorised under the MCA, the local authority should consider whether guardianship remains appropriate, bearing in mind the need to apply the least restrictive option and autonomy principle (see paragraphs 1.2 – 1.5 and guidance earlier in this chapter).

**Guardianship and hospital care**

30.33 Guardianship does not restrict patients’ access to hospital services on an informal basis. Patients who require treatment but do not need to be detained may be admitted informally in the same way as any other patient. This applies both to physical and mental healthcare.

30.34 Nor does guardianship prevent the deprivation of a person’s liberty being authorised under the MCA, if the person needs to be detained in a hospital in their best interests in order to receive care and treatment. A DoL authorisation or DoL order can be sought so long as:

- it would not be inconsistent with the guardian’s decision about where the patient should live
- the person does not object to being kept in hospital for treatment for mental disorder or to receiving that treatment.\(^69\)

30.35 Otherwise, guardianship should not be used to require a patient to reside in a hospital except where it is necessary for a very short time in order to provide shelter while accommodation in the community is being arranged.

30.36 Guardianship can remain in force if the patient is detained in hospital under section 2 or 4 of the Act for assessment, but it ends automatically if a patient is detained for treatment as a result of an application under section 3. Regulations also allow a patient to be transferred from guardianship to detention in hospital under section 3. The normal requirements for an application and medical recommendations must be met, and the transfer must be agreed by the local authority.

---

\(^{69}\) In these circumstances, a DoL authorisation or DoL order cannot be made because the person will be ineligible to be deprived of their liberty by the MCA: see paragraphs 12 and 17 of Schedule A1, read with paragraphs 2 (Case D), 3 and 5 of Schedule 1A, to the Mental Capacity Act 2005.
Patients who resist the authority of the guardian

30.37 If a patient consistently resists exercise by the guardian of any of their powers, it can normally be concluded that guardianship is not the most appropriate form of care for that person, and the guardianship should be discharged. The local authority should first consider whether a change of guardian – or change in the person who, in practice, exercises the local authority's powers as guardian – might be appropriate instead.

Guardianship orders under section 37

30.38 Guardianship may be used by courts as an alternative to hospital orders for offenders with mental disorders where the criteria set out in the Act are met. The court must first be satisfied that the local authority or named person is willing to act as guardian. In considering the appropriateness of the patient being received into their guardianship, local authorities should be guided by the same considerations as apply to applications for guardianship under part 2 of the Act.

30.39 The guidance in this chapter on components of effective guardianship applies to guardianship order patients in the same way as it applies to other guardianship patients. The main difference between applications for guardianship under part 2 of the Act and guardianship orders is that nearest relatives may not discharge patients from guardianship orders. Nearest relatives have rights to apply to the Tribunal instead (see paragraphs 12.5 – 12.8).

### 31 Guardianship, leave of absence or CTO?

#### Why read this chapter?

**31.1** An unrestricted patient may be subject to the powers of the Act while living in the community by one of three ways: guardianship, leave of absence or a community treatment order (CTO). This chapter provides guidance on deciding between these three options.

#### Deciding between guardianship, leave of absence and CTO

**31.2** There are three ways in which an unrestricted patient may be subject to the powers of the Act while living in the community: guardianship, leave of absence and CTO.

**31.3** Guardianship (section 7 of the Act) is social care-led and is primarily focused on patients with welfare needs. Its purpose is to enable patients to receive care in the community where it cannot be provided without the use of compulsory powers (see chapter 30).

**31.4** Leave of absence (section 17) is primarily intended to allow a patient detained under the Act to be temporarily absent from hospital where further in-patient treatment as a detained patient is still thought to be necessary. It may also be useful in the longer term where the clinical team wish to see how the patient manages outside hospital before making the decision to discharge. For a number of patients, a CTO may be a better option than longer-term leave for the ongoing management of their care. Reflecting this, whenever considering longer-term leave for a patient (that is, for more than seven consecutive days), the responsible clinician must first consider whether the patient should be discharged onto a CTO instead (see chapter 27).

**31.5** A CTO (section 17A) is used where it is necessary for the patient’s health or safety or for the protection of others to continue to receive treatment after their discharge from hospital. It seeks to prevent the ‘revolving door’ scenario and the harm which could arise from relapse. It is a more structured system than leave of absence and has more safeguards for patients. A key feature of the CTO framework is that it is suitable only where there is no reason to think that the patient will need further treatment as a detained in-patient for the time being, but where the responsible clinician needs to be able to recall the patient to hospital if necessary (see chapter 29).
31.6 Some pointers to the use of the three options are given in the following boxes:

**CTO or longer-term leave of absence: relevant factors to consider**

<table>
<thead>
<tr>
<th>Factors suggesting longer-term leave</th>
<th>Factors suggesting a CTO</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Discharge from hospital is for a specific purpose or a fixed period.</td>
<td>• There is confidence that the patient is ready for discharge from hospital on an indefinite basis.</td>
</tr>
<tr>
<td>• The patient’s discharge from hospital is deliberately on a ‘trial’ basis.</td>
<td>• There are good reasons to expect that the patient will not need to be detained for the treatment they need to be given.</td>
</tr>
<tr>
<td>• The patient is likely to need further in-patient treatment without their consent or compliance.</td>
<td>• The patient appears prepared to consent or comply with the treatment they need – but risks as below mean that recall may be necessary.</td>
</tr>
<tr>
<td>• There is a serious risk of arrangements in the community breaking down or being unsatisfactory – more so than for a CTO.</td>
<td>• The risk of arrangements in the community breaking down, or of the patient needing to be recalled to hospital for treatment, is sufficiently serious to justify a CTO, but not to the extent that it is very likely to happen.</td>
</tr>
</tbody>
</table>

**CTO or guardianship: relevant factors to consider**

<table>
<thead>
<tr>
<th>Factors suggesting longer-term leave</th>
<th>Factors suggesting a CTO</th>
</tr>
</thead>
<tbody>
<tr>
<td>• The focus is on the patient’s general welfare, rather than specifically on medical treatment.</td>
<td>• The main focus is on ensuring that the patient continues to receive necessary medical treatment for mental disorder, without having to be detained again.</td>
</tr>
<tr>
<td>• There is little risk of the patient needing to be admitted compulsorily and quickly to hospital.</td>
<td>• Compulsory recall may well be necessary, and speed is likely to be important.</td>
</tr>
<tr>
<td>• There is a need for enforceable power to require the patient to reside at a particular place.</td>
<td></td>
</tr>
</tbody>

Deprivation of liberty while on a CTO, leave or subject to guardianship

31.7 Patients who are on a CTO or on leave, and who lack capacity to consent to the arrangements required for their care or treatment, may occasionally need to be detained for further care or treatment for their mental disorder in circumstances in which recall to hospital for this purpose is not considered necessary. They might also need to be admitted to a care home or hospital because of physical health problems.

31.8 If they will be detained in a care home, a deprivation of liberty authorisation (DoL authorisation) or deprivation of liberty order (DoL order) under the Mental Capacity Act 2005 (MCA) must be obtained. Deprivation of liberty under the MCA can exist alongside a CTO or leave of absence, provided that there is no conflict with the conditions of the CTO or leave set by the patient’s responsible clinician.\(^{70}\)

31.9 However, if they will be detained in a hospital for further treatment for mental disorder (whether or not they will also receive treatment for physical health problems), they should be recalled to be treated under the Act. The MCA cannot be used to authorise the deprivation of their liberty.\(^{71}\)

31.10 For guidance on the use of a DoL authorisation or DoL order in relation to a patient who is subject to guardianship, see chapter 30 on guardianship.

\(^{70}\) If it would conflict with the conditions of a CTO or leave, the person would be ineligible to be deprived of their liberty under the MCA: see paragraphs 12 and 17 of Schedule A1, read with paragraphs 2 (Cases B and C), 3 and 4 of Schedule 1A, to the MCA.

\(^{71}\) Patients who are on a CTO or on leave are ineligible to be deprived of their liberty under the MCA for the purpose of being detained in a hospital to receive medical treatment for mental disorder: see paragraphs 12 and 17 of Schedule A1, read with paragraphs 2 (Cases B and C) and 4 of Schedule 1A, to the MCA.
32 Detention and CTO: renewal, extension and discharge

Why read this chapter?

32.1 A patient’s detention or community treatment order (CTO) may by extended or renewed by the responsible clinician. This must be done before the period of detention or CTO expires. This chapter provides guidance on how the procedures in the Act for renewing detention and extending a CTO should be applied. It also provides guidance on the role and responsibilities of the responsible clinician and the role of the patient’s nearest relative. Guidance is also given on a nearest relative’s power of discharge and an illustrative standard letter for nearest relatives to use to discharge a patient is provided.

Renewal of detention

32.2 Before it expires, responsible clinicians must decide whether patients’ current period of detention should be renewed. Responsible clinicians must examine the patient and decide within the two months leading up to the expiry of the patient’s detention whether the criteria for renewing detention under section 20 of the Act are met. They must also consult one or more other people who have been professionally concerned with the patient’s medical treatment.

32.3 Where responsible clinicians are satisfied that the criteria for renewing the patient’s detention are met, they must submit a report to that effect to the hospital managers.

32.4 But before responsible clinicians can submit that report, they are required to obtain the written agreement of another professional (‘the second professional’) that the criteria are met. This second professional must be professionally concerned with the patient’s treatment and must not belong to the same profession as the responsible clinician.

32.5 Apart from that, the Act does not say who the second professional should be. Hospital managers should determine their own local policies on the selection of the second professional. Policies should be based on the principle that the involvement of a second professional is intended to provide an additional safeguard for patients by ensuring that:

- renewal is formally agreed by at least two suitably qualified and competent professionals who are familiar with the patient’s case
- those two professionals are from different disciplines, and so bring different, but complementary, professional perspectives to bear
- the two professionals are able to reach their own decisions independently of one another.
Accordingly, second professionals should:

- have sufficient experience and expertise to decide whether the patient’s continued detention is necessary and lawful, but need not be approved clinicians (nor be qualified to be one)
- have been actively involved in the planning, management or delivery of the patient’s treatment
- have had sufficient recent contact with the patient to be able to make an informed judgement about the patient’s case.

Second professionals should satisfy themselves, in line with the local policies, that they have sufficient information on which to make the decision. Whether that requires a separate clinical interview or examination of the patient will depend on the nature of the contact that the second professional already has with the patient and on the other circumstances of the case.

Before examining patients to decide whether to make a renewal report, responsible clinicians should identify and record who the second professional is to be. Hospital managers’ policies may, if the hospital managers wish, say that the identity of the second professional is to be decided or agreed by a third party – such as a senior clinician or manager – but the Act does not require that.

Unless there are exceptional circumstances, the decision of the identified second professional should be accepted, even if the responsible clinician does not agree with it. If, in exceptional circumstances, it is decided that the agreement of a different second professional should be sought, that decision should be drawn to the attention of the hospital managers if, as a result, a renewal report is made.

Extending a community treatment order

Only responsible clinicians may extend the period of the community treatment order (CTO). To do so, responsible clinicians must examine their patient and decide, during the two months leading up to the day on which the patient’s CTO is due to expire, whether the criteria for extending CTO under section 20A of the Act are met. They must also consult one or more other people who have been professionally concerned with the patient’s medical treatment.

Where responsible clinicians are satisfied that the criteria for extending the patient’s CTO are met, they must submit a report to that effect to the managers of the responsible hospital.

But before responsible clinicians can submit that report they must obtain the written agreement of an approved mental health professional (AMHP).
32.13 This does not have to be the same AMHP who originally agreed that the patient should become a CTO patient. It may (but need not) be an AMHP who is already involved in the patient’s care and treatment. It can be an AMHP acting on behalf of any willing local authority. But if no other local authority is willing, responsibility for ensuring that an AMHP considers the case should lie with the local authority which is responsible under section 117 for the patient’s after-care.

32.14 When deciding whether to extend the period of a CTO the responsible clinician, second professional and AMHP should all consider carefully whether or not the criteria for extending the CTO are met and, if so, whether an extension is appropriate. For example, the longer patients have been on a CTO without the need to exercise the power to recall them to hospital, the more important it will become to question whether that criterion is still satisfied.

The responsible clinician’s power of discharge

32.15 Section 23 of the Act allows responsible clinicians to discharge part 2 patients and unrestricted part 3 patients and all CTO patients by giving an order in writing.

32.16 As responsible clinicians have the power to discharge patients, they must keep under review the appropriateness of using that power. If, at any time, responsible clinicians conclude that the criteria which would justify renewing a patient’s detention or extending the patient’s CTO (as the case may be) are not met, they should exercise their power of discharge. They should not wait until the patient’s detention or CTO is due to expire.

32.17 A decision by a second professional not to agree to the renewal of detention does not bring a patient’s current period of detention to an end before it is otherwise due to expire. Similarly, a decision by an AMHP not to agree to the extension of a patient’s CTO does not end the existing period of CTO. In both cases, it would normally be a reason for responsible clinicians to review whether they should use their power to discharge the patient.

The nearest relative’s power of discharge

32.18 Patients detained for assessment or treatment under part 2 of the Act may also be discharged by their nearest relatives (see chapter 5 on nearest relatives).

32.19 Before giving a discharge order, nearest relatives must give the hospital managers at least 72 hours’ notice in writing of their intention to discharge the patient.
32.20 During that period, the patient’s responsible clinician can block the discharge by issuing a ‘barring report’ stating that, if discharged, the patient is likely to act in a manner dangerous to themselves or others.

32.21 This question focuses on the probability of dangerous acts, such as causing serious physical injury or lasting psychological harm, not merely on the patient’s general need for safety and others’ general need for protection.

32.22 The nearest relative’s notice and discharge order must both be given in writing, but do not have to be in any specific form. In practice, hospital managers should treat a discharge order given without prior notice as being both notice of intention to discharge the patient after 72 hours and the actual order to do so.

32.23 Hospital managers should offer nearest relatives any help they require, such as providing them with a standard letter to complete. The following box illustrates what a standard letter might look like.

Discharge by the hospital managers and the Tribunal

32.24 Patients may also be discharged by the hospital managers and by the Tribunal (see chapter 38 and chapter 12 respectively).
Illustrative standard letter for nearest relatives to use to discharge a patient

To the managers of [insert name and address of hospital in which the patient is detained, or (for a patient on a community treatment order) the responsible hospital.]

Order for discharge under section 23 of the Mental Health Act 1983

My name is [give your name] and my address is [give your address]

[Complete A, B or C below]

A. To the best of my knowledge and belief, I am the nearest relative (within the meaning of the Mental Health Act 1983) of [name of patient].

or

B. I have been authorised to exercise the functions of the nearest relative of [name of patient] by the county court.

or

C. I have been authorised to exercise the functions of the nearest relative of [name of patient] by that person’s nearest relative.

I give you notice of my intention to discharge the person named above, and I order their discharge from [say when you want the patient discharged from detention or a community treatment order].

[Please note: you must leave at least 72 hours between when the hospital managers get this letter and when you want the patient discharged.

The time when:
- the notice is received by the hospital manager or an authorised person; or
- if the notice is sent by pre-paid post, the day service is deemed to have taken place [for first class post, service is deemed on the second business day following posting, and for second class post, service is deemed on the fourth business day following posting; or
- the notice is put into the internal mail system; and
- the time when you want the patient discharged.]

Date .....................................................
33 After-care

Why read this chapter?

33.1 Section 117 of the Act requires clinical commissioning groups and local authorities, in co-operation with voluntary agencies, to provide or arrange for the provision of after-care to particular patients detained in hospital for treatment who then cease to be detained. This chapter provides guidance on this duty of after-care. It should be read in conjunction with chapter 34 on the care programme approach. The guidance covers after-care planning and direct payments.

Mental health after-care

33.2 Section 117 of the Act requires clinical commissioning groups (CCGs) and local authorities, in co-operation with voluntary agencies, to provide or arrange for the provision of after-care to patients detained in hospital for treatment under section 3, 37, 45A, 47 or 48 of the Act who then cease to be detained. This includes patients granted leave of absence under section 17 and patients going on a community treatment order (CTO). It applies to people of all ages, including children and young people.

33.3 After-care services mean services which have the purposes of meeting a need arising from or related to the patient’s mental disorder and reducing the risk of a deterioration of the patient’s mental condition (and, accordingly, reducing the risk of the patient requiring admission to hospital again for treatment for mental disorder).72 Their ultimate aim is to maintain patients in the community, with as few restrictions as are necessary, wherever possible.

33.4 CCGs and local authorities should interpret the definition of after-care services broadly. For example, after-care can encompass healthcare, social care and employment services, supported accommodation and services to meet the person’s wider social, cultural and spiritual needs, if these services meet a need that arises directly from or is related to the particular patient’s mental disorder, and help to reduce the risk of a deterioration in the patient’s mental condition.

33.5 After-care is a vital component in patients’ overall treatment and care. As well as meeting their immediate needs for health and social care, after-care should aim to support them in regaining or enhancing their skills, or learning new skills, in order to cope with life outside hospital.

33.6 The duty to provide after-care services continues as long as the patient is in need of such services. In the case of a patient on a CTO, after-care must be provided for the entire period they are on the CTO, but this does not mean that the patient’s need for after-care will necessarily cease as soon as they are no longer on a CTO.

72 The definition of ‘after-care services’ was inserted into section 117 by the Care Act 2014.
33.7 All mental health after-care services should be jointly provided or commissioned by local authorities and CCGs. Services provided under section 117 can include services provided directly by local authorities or which local authorities commission from other providers. CCGs will commission (rather than provide) these services.

33.8 NHS Commissioning Board (NHS England) is responsible for a patient’s after-care if the after-services required are of the type that NHS Commissioning Board would be responsible for commissioning rather than a CCG. In these circumstances local authorities and CCGs should liaise with NHS Commissioning Board to ensure these services are commissioned promptly.

33.9 Where eligible patients have remained in hospital informally after ceasing to be detained under the Act, they are still entitled to after-care under section 117 once they leave hospital. This also applies when patients are released from prison, having spent part of their sentence detained in hospital under a relevant section of the Act.

After-care planning

33.10 Although the duty to provide after-care begins when the patient leaves hospital, the planning of after-care needs to start as soon as the patient is admitted to hospital. CCGs and local authorities should take reasonable steps to identify appropriate after-care services for patients in good time for their eventual discharge from hospital or prison.

33.11 When considering relevant patients’ cases, the Tribunal and hospital managers will expect to be provided with information from the professionals concerned on what after-care arrangements might be made if they were to be discharged. Some discussion of after-care arrangements involving local authorities, other relevant agencies and families or carers (where appropriate) should take place in advance of the Tribunal hearing.

33.12 Where a Tribunal or hospital managers’ hearing has been arranged for a patient who might be entitled to after-care under section 117 of the Act, the hospital managers should ensure that the relevant CCG and local authority have been informed. The CCG and local authority should consider putting practical preparations in hand for after-care in every case, but should in particular consider doing so where there is a strong possibility that the patient will be discharged if appropriate after-care can be arranged. Where the Tribunal has provisionally decided to give a restricted patient a conditional discharge, the CCG and local authority must do their best to put after-care in place which would allow that discharge to take place.

33.13 Before deciding to discharge or grant more than very short-term leave of absence to a patient or to place a patient onto a CTO, the responsible clinician should ensure that the patient’s needs for after-care have been fully assessed, discussed with the patient (and their family and carers, where appropriate) and addressed.
in their care plan. If the patient is being given leave for only a short period, a less comprehensive review may be sufficient, but the arrangements for the patient’s care should still be properly recorded.

33.14 After-care for all patients admitted to hospital for treatment for mental disorder should be planned within the framework of the care programme approach (see chapter 42). This applies whether or not they are detained or will be entitled to receive after-care under section 117 of the Act. But because of the specific statutory obligation it is important that all patients who are entitled to after-care under section 117 are identified and that records are kept of what is provided to them under that section.

33.15 In order to ensure that the after-care plan reflects the full range of needs of each patient, it is important to consider who needs to be involved, in addition to patients themselves. This may involve carers and a wide range of professionals (see the list in paragraph 34.11).

33.16 The issues likely to be covered by a thorough assessment are set out in paragraph 34.18.

**After-care payments**

33.17 A local authority may make direct payments to pay for after-care services under section 117 of the Act. An adult who is eligible for after-care can request the local authority to make direct payments to them, if they have capacity to do this. If the adult lacks capacity, the local authority can make direct payments to an authorised person or suitable person if certain conditions are met. A key condition is that the local authority must consider that making the direct payments to the ‘authorised person’ is an appropriate way to discharge their section 117 duty, and that they must be satisfied the ‘authorised person’ will act in the adult’s best interests in arranging for the after-care.

33.18 If a local authority is providing or arranging accommodation as part of a patient’s after-care, the patient and/or friends or relatives identified in regulations may make top-up payments to enable the patient to live in their preferred accommodation if certain conditions are met.

33.19 A CCG or NHS Commissioning Board may also make direct payments in respect of after-care to the patient or where the patient is a child or a person who lacks capacity, to a representative who consents to the making of direct payments in respect of the patient. A payment can only be made if valid consent has been given. In determining whether a direct payment should be made, a CCG or NHS Commissioning Board is required to have regard to whether it is appropriate for a person with that person’s condition, the impact of that condition on the person’s life and whether a direct payment represents value for money. A payment can also, in certain circumstances, be made to a nominee.73

---

73 The National Health Service (Direct Payments) Regulations. 2013. SI 2013/1617, as amended by the National Health Service (Direct Payments) (Amendment) Regulations. 2013. SI 2013/2354 prescribe the conditions for making a direct payment.
Ending section 117 after-care services

33.20 The duty to provide after-care services exists until both the CCG and the local authority are satisfied that the patient no longer requires them. The circumstances in which it is appropriate to end section 117 after-care will vary from person to person and according to the nature of the services being provided. The most clear-cut circumstance in which after-care would end is where the person’s mental health improved to a point where they no longer needed services to meet needs arising from or related to their mental disorder. If these services included, for example, care in a specialist residential setting, the arrangements for their move to more appropriate accommodation would need to be in place before support under section 117 is finally withdrawn. Fully involving the patient and (if indicated) their family, carer and/or advocate in the decision-making process will play an important part in the successful ending of after-care.

33.21 After-care services under section 117 should not be withdrawn solely on the grounds that:

- the patient has been discharged from the care of specialist mental health services
- an arbitrary period has passed since the care was first provided
- the patient is deprived of their liberty under the MCA
- the patient has returned to hospital informally or under section 2, or
- the patient is no longer on a CTO or section 17 leave.

33.22 Even when the provision of after-care has been successful in that the patient is now well-settled in the community, the patient may still continue to need after-care services, eg to prevent a relapse or further deterioration in their condition.

33.23 Patients are under no obligation to accept the after-care services they are offered, but any decisions they may make to decline them should be fully informed. An unwillingness to accept services does not mean that patients have no need to receive services, nor should it preclude them from receiving them under section 117 should they change their minds.

34 Care programme approach

Why read this chapter?

34.1 The care programme approach (CPA) is an overarching system for co-ordinating the care of people with mental disorders. The CPA requires identification of a named care co-ordinator. This chapter provides guidance on the key features of the CPA, when to use it, who should be involved, and on care planning. Guidance is also given on patients from Wales who are placed in England.

What is the care programme approach?

34.2 The CPA is an overarching system for co-ordinating the care of people with mental disorders. It requires close engagement with service users and their carers and includes arrangements for assessing, planning and reviewing care. Included within the CPA care plan (which may incorporate requirements for behaviour support plans – see paragraphs 26.13 – 26.16) are:

- a treatment plan which details medical, nursing, psychological and other therapeutic support for the purpose of meeting individual needs promoting recovery and/or preventing deterioration
- details regarding any prescribed medications
- details of any actions to address physical health problems or reduce the likelihood of health inequalities
- details of how the person will be supported to achieve their personal goals
- support provided in relation to social needs such as housing, occupation, finances etc
- support provided to carers
- actions to be taken in the event of a deterioration of a person’s presentation and
- guidance on actions to be taken in the event of a crisis.

34.3 The CPA also requires the clear identification of a named individual who has responsibility for co-ordinating the preparation, implementation and evaluation of the CPA care plan.

34.4 The CPA is the high level plan which incorporates elements of behaviour support plans across all domains. Treatment plans are specifically linked to the mental disorder and are supported by other elements of the CPA care plan.

34.5 Behaviour support plans would be concerned with those needs which drive behaviours – of course some needs may be associated with misery, depression, social withdrawal etc and therefore require broader treatment plans.
When to use the care programme approach

34.6 The CPA should be used in secondary mental healthcare to assess, plan, review and coordinate the range of treatment, care and support needs of those people in contact with secondary mental health services who have complex needs. Active involvement of and engagement with the patient are at the heart of the CPA, which focuses on reducing distress and promoting social inclusion and recovery.

34.7a The CPA should be used for individuals who are at high risk of suffering a deterioration in their mental condition and who need:

- multi-agency support
- active engagement
- intense intervention, and/or
- support with dual diagnoses.

34.7b This would include most people who are entitled to after-care under section 117 of the Act (see chapter 33) as well as all guardianship patients (see paragraphs 30.20 – 30.26) and everyone subject to a community treatment order (CTO – see chapter 29). Because of the specific statutory obligation, however, it is important that all patients who are entitled to after-care are identified and that records are kept of what is provided to them under that section.

34.8 Care plan under the CPA is likely to be appropriate for people who have been treated for mental disorder as informal hospital in-patients whenever they meet the criteria. It will also be appropriate for some who have been detained under section 2, whose needs may be equally complex but who do not qualify for support under section 117.

Who should be involved

34.9 Most importantly, the care plan should be prepared in partnership with the patient. It is also essential that a suitable care co-ordinator is identified. For patients who have been or continue to be subject to provisions in the Act, this is likely to be a different person from the responsible clinician, but need not be.

34.10 If a different responsible clinician is to take over responsibility for a formerly detained patient, it will be essential to seek the agreement of that clinician, and the community team, at an early stage. It is good practice for the clinician who will be the community responsible clinician and the community care co-ordinator to be present at the CPA assessment.
In order to ensure that the after-care plan reflects the needs of each patient, it is important to consider who needs to be involved, in addition to patients themselves. Subject to the patient’s views, this may include:

- the patient’s responsible clinician
- nurses and other professionals involved in caring for the patient in hospital
- a clinical psychologist, community mental health nurse and other members of the community team
- the patient’s GP and primary care team (if there is one). (It is particularly important that the patient’s GP should be aware if the patient is to go onto a community treatment order (CTO – see chapter 29). A patient who does not have a GP should be encouraged and helped to register with a practice)
- any carer who will be involved in looking after them outside hospital (including, in the case of children and young people, those with parental responsibility)
- the patient’s nearest relative (if there is one) or other family members
- a representative of any relevant voluntary organisations
- in the case of a restricted patient, MAPPA\textsuperscript{74} co-ordinator
- in the case of a transferred prisoner, the probation service
- a representative of housing authorities, if accommodation is an issue
- an employment expert, if employment is an issue
- the clinical commissioning group’s appointed clinical representative (if appropriate)
- an independent mental health advocate, if the patient has one
- an independent mental capacity advocate, if the patient has one
- the patient’s attorney or deputy, if the patient has one
- a person to whom the local authority is considering making direct payments for the patient
- any another representative nominated by the patient, and
- anyone with authority under the Mental Capacity Act 2005 (MCA) to act on the patient’s behalf.

The care plan

34.12 The care plan should set out the practicalities of how the patient will receive treatment, care and support from day-to-day, and should not place undue reliance on carers or members of the patient’s family. Where needed, arrangements should be made for a second opinion appointed doctor (SOAD) to provide the part 4A certificate to enable treatment to be given (see paragraphs 25.25 – 25.27). If the patient so wishes, help should be given to access independent advocacy or other support where this is available (see chapter 6).

34.13 The care plan should be recorded in writing. Once plans are agreed, it is essential that any changes are discussed with the patient as well as others involved with the patient before they are implemented.

34.14 The care plan should be regularly reviewed. It will be the responsibility of the care co-ordinator (or other officer responsible for its review) to arrange reviews of the plan until it is agreed between all parties, including the patient, that it is no longer necessary.

34.15 In particular, the care plan will need to be reviewed if the patient moves to another area. The care co-ordinator in the original area will be responsible for making transfer arrangements if commissioning responsibility consequently passes to authorities in the new area.

Care planning

34.16 The planning of after-care needs to start as soon as the patient is admitted to hospital. Clinical commissioning groups (CCGs) and local authorities should take reasonable steps to identify appropriate after-care services for patients in good time for their eventual discharge from hospital.

34.17 The professionals concerned should, in discussion with the patient, establish an agreed outline of the patient’s needs and agree a timescale for the implementation of the various aspects of the plan. All key people with specific responsibilities with regard to the patient should be properly identified.

34.18 Care planning requires a thorough assessment of the patient’s needs and wishes. It is likely to involve consideration of:

- continuing mental healthcare, whether in the community or on an outpatient basis
- the psychological needs of the patient and, where appropriate, of their family and carers
- physical healthcare
- daytime activities or employment
• appropriate accommodation
• identified risks and safety issues
• any specific needs arising from, eg co-existing physical disability, sensory impairment, learning disability or autistic spectrum disorder
• any specific needs arising from drug, alcohol or substance misuse (if relevant)
• any parenting or caring needs
• social, cultural or spiritual needs
• counselling and personal support
• assistance in welfare rights and managing finances
• involvement of authorities and agencies in a different area, if the patient is not going to live locally
• the involvement of other agencies, eg the probation service or voluntary organisations (if relevant)
• for a restricted patient, the conditions which the Secretary of State for Justice or the first-tier Tribunal has – or is likely to – impose on their conditional discharge, and
• contingency plans (should the patient’s mental health deteriorate) and crisis contact details.

34.19 Care planning should take particular account of the patient’s age.

• Where the patient is under the age of 18 the responsible clinician and the care co-ordinator should bear in mind that the most age-appropriate treatment should be that provided by a child and adolescent mental health service (CAMHS). It may also be necessary to involve the patient’s parent, or whoever will be responsible for looking after the patient, to ensure that they will be ready and able to provide the assistance and support which the patient may need (see also paragraphs 19.5 – 19.9 and 19.89 - 19.103).

• Similarly, specialist services for older people may have a role in the delivery of services for older patients. Particular care should be taken to ensure that the concepts of participation and proportionality are applied to older patients.

34.20 It is important that those who are involved are able to take decisions regarding their own involvement and, as far as possible, that of their organisation. If approval for plans needs to be obtained from more senior levels, it is important that this causes no delay to the implementation of the care plan.

34.21 If accommodation is to be offered as part of the after-care plan to patients who are offenders, the circumstances of any victim of the patient’s offence and their families should be taken into account when deciding where the accommodation should be offered. Where the patient is to live may be one of the conditions imposed by the Secretary of State for Justice or the Tribunal when conditionally discharging a restricted patient.
Patients from Wales placed in England

34.22 Local health boards and local authorities in Wales are under duties in the Mental Health (Wales) Measure 2010 to provide a care co-ordinator and a care and treatment plan for individuals for whom they are responsible for providing secondary mental health services (or who would be provided such services if the individuals co-operated) and patients under the guardianship of a local authority in Wales.

34.23 These statutory duties apply to patients who are placed in hospitals in England and who remain the responsibility of Welsh authorities. With agreement, this responsibility can be delegated to an eligible individual within the host organisation who can then become the care co-ordinator on behalf of the home authority.

34.24 The cross-border protocol75 applies to the commissioning of secondary mental health services in England by Welsh authorities.

34.25 Under part 3 of the Mental Health (Wales) Measure, patients discharged from secondary mental health services in England who become resident in Wales can directly request a re-assessment of their mental state for up to three years from their date of discharge. A Code of Practice to parts 2 and 376 of the Measure has been published.

35 Receipt and scrutiny of documents

Why read this chapter?

35.1 This chapter provides guidance on the receipt and scrutiny of documents under the Act. This chapter distinguishes between receiving documents and scrutinising them, and provides guidance on delegation by hospital mangers.

Statutory forms

35.2 Regulations require specific statutory forms to be used for certain applications, recommendations, decisions, reports and records under the Act. The forms are set out in the regulations themselves.

35.3 If no hard copies of the statutory forms are available, photocopies of the original blank forms can be completed instead, as can computer-generated versions. However, the wording of the forms must correspond to the current statutory versions of the forms set out in the regulations.

Applications for detention in hospital and supporting medical recommendations

35.4 Regulations say that applications for detention under the Act must be delivered to a person who is authorised by the hospital managers to receive them.

35.5 People who sign applications and make the supporting medical recommendations must take care to comply with the requirements of the Act. People who act on the authority of these documents should also make sure that they are in the proper form, as an incorrectly completed or indecipherable form may not constitute authority for a patient’s detention.

35.6 This chapter distinguishes between receiving admission documents and scrutinising them. For these purposes, receipt involves physically receiving documents and checking that they appear to amount to an application that has been duly made (since that is sufficient to give the managers the power to detain the patient). Scrutiny involves more detailed checking for omissions, errors and other defects and, where permitted, taking action to have the documents rectified after they have already been acted on.
35.7 Hospital managers should formally delegate their duties to receive and scrutinise admission documents to a limited number of officers, who may include clinical staff on wards. Someone with the authority to receive admission documents should be available at all times at which patients may be admitted to the hospital. A manager of appropriate seniority should take overall responsibility on behalf of the hospital managers for the proper receipt and scrutiny of documents.

35.8 Hospitals should have a checklist for the guidance of people delegated to receive documents ("receiving officers"), to help them detect those errors which fundamentally invalidate an application and which cannot be corrected at a later stage in the procedure.

35.9 When a patient is being admitted on the application of an approved mental health professional (AMHP), the receiving officer should go through the documents and check their accuracy with the AMHP.

35.10 Receiving officers should have access to a manager for advice outside office hours, especially at night.

35.11 Where the receiving officer is not also authorised by the hospital managers to agree to the rectification of a defective admission document, the documents must be scrutinised by a person who is authorised to do so. This scrutiny should happen at the same time as the documents are received or as soon as possible afterwards (and certainly no later than the next working day).

35.12 Documents should be scrutinised for accuracy and completeness and to check that they do not reveal any failure to comply with the procedural requirements of the Act in respect of applications for detention. Medical recommendations should also be scrutinised by someone with appropriate clinical expertise to check that the reasons given appear sufficient to support the conclusions stated in them.

35.13 If admission documents reveal a defect which fundamentally invalidates the application and which cannot, therefore, be rectified under section 15 of the Act, the patient can no longer be detained on the basis of the application. Authority for the patient’s detention can be obtained only through a new application (or, in the interim, by the use of the holding powers under section 5 if the patient has already been admitted to the hospital). Unless that authority is to be sought, the hospital managers should use their power under section 23 to discharge the patient.
Guardianship applications and supporting medical recommendations

35.14 Where a guardianship application is made, the person receiving the documents on behalf of the local authority should check them for inaccuracies and defects with the AMHP or nearest relative making the application.

35.15 Local authorities should prepare a checklist for the guidance of those delegated to receive guardianship applications on their behalf. That checklist should identify those errors which can be rectified and those which cannot.

Community treatment orders – documentation

35.16 There are no provisions in the Act for community treatment orders (CTOs) and related documents to be rectified once made. Hospital managers should nonetheless ensure that arrangements are in place to check that documents have been properly completed. Significant errors or inadequacies may render patients’ CTOs invalid, and errors in recall notices or revocations may invalidate hospital managers’ authority to detain.

35.17 To avoid errors being made, hospital managers should ensure that responsible clinicians have access to advice about how the relevant forms should be completed and the opportunity (where practicable) to have them checked in advance by someone else familiar with what the Act requires.

Audit

35.18 Hospital managers are responsible for ensuring that patients are lawfully detained or on a CTO. Local authorities are responsible for ensuring that guardianship is lawful.

35.19 Hospital managers and local authorities should ensure that the people they authorise to receive and scrutinise statutory documents on their behalf are competent to perform these duties, understand the requirements of the Act and receive suitable training.

35.20 Hospital managers and local authorities should also ensure that arrangements are in place to audit the effectiveness of receipt and scrutiny of documents on a regular basis.
36 Allocating or changing a responsible clinician

Why read this chapter?

36.1 This chapter deals with the identification of responsible clinicians for patients being assessed and treated under the Act, including on change of responsible clinician.

Allocating a responsible clinician

36.2 The responsible clinician is the approved clinician who will have overall responsibility for the patient’s case.

36.3 Hospital managers should have local protocols in place for allocating responsible clinicians to patients. This is particularly important when patients move between hospitals or from the hospital to the community and vice versa. The protocols should:

- ensure that the patient’s responsible clinician is the available approved clinician with the most appropriate expertise to meet the patient’s main assessment and treatment needs
- ensure that it can be easily determined who a particular patient’s responsible clinician is
- ensure that cover arrangements are in place when the responsible clinician is not available (eg during non-working hours, annual leave etc)
- include a system for keeping the appropriateness of the responsible clinician under review.

36.4 To ensure that the most appropriate available approved clinician is allocated as the patient’s responsible clinician, hospital managers should keep a register of approved clinicians to treat patients for whom they are responsible.

36.5 The selection of the appropriate responsible clinician should be based on the individual needs of the patient concerned. For example, where psychological therapies are central to the patient’s treatment, it may be appropriate for a professional with particular expertise in this area to act as the responsible clinician. There are special considerations for patients aged under 18 (see chapter 19).

36.6 Wherever possible, the clinician responsible for the care and treatment of children and young people should be a CAMHS child specialist. For further information please refer to chapter 19.

36.7 Even if the patient’s main treatment needs are not immediately clear, it will be necessary to allocate a responsible clinician promptly upon the patient’s detention in hospital.
Change of responsible clinician

36.8 As the needs of the patient may change over time, it is important that the appropriateness of the responsible clinician is kept under review through the care planning process. It may be appropriate for the patient’s responsible clinician to change during a period of care and treatment, if such a change enables the needs of the patient to be met more effectively. However, in considering such a change it is also important to take account of the need for continuity and continuing engagement with, and knowledge of, the patient.

36.9 Where a patient’s treatment and rehabilitation require movement between different hospitals or to the community, successive responsible clinicians need to be identified in good time to enable movement to take place. The existing responsible clinician is responsible for overseeing the patient’s progress through the system. If movement to another hospital is indicated, responsible clinicians should take the lead in identifying their successors, and hospital managers should respond promptly to requests to assist in this process.

36.10 There may be circumstances where the responsible clinician is qualified with respect to the patient’s main assessment and treatment needs but is not appropriately qualified to be in charge of a subsidiary treatment needed by the patient (eg medication which the responsible clinician is not qualified to prescribe). In such situations, the responsible clinician will maintain their overarching responsibility for the patient’s case, but another appropriately qualified professional will take responsibility for a specific treatment or intervention.

36.11 Where the person in charge of a particular treatment is not the patient’s responsible clinician, the person in charge of the treatment should ensure that the responsible clinician is kept informed about the treatment and that treatment decisions are discussed with the responsible clinician in the context of the patient’s overall case. Guidance should be available locally on the procedures to follow, including when to seek a second opinion, if there are unresolved differences of opinion.
Why read this chapter?

37.1 This chapter gives guidance on the responsibilities of hospital managers under the Act, and on specific powers and duties not addressed in other chapters.

It provides guidance on the identification of hospital managers, the exercise of hospital managers’ functions and on specific powers and duties of hospital managers, including admission, transfer between hospitals, transfers to guardianship, transfer and assignment of responsibility for CTO patients, information for patients and relatives, duties in respect of victims of crime, patients’ correspondence and the duty to refer cases to Tribunals. It also provides guidance on the Secretary of State for Health’s power to refer cases to a tribunal and hospital accommodation for children and young people.

Identification of hospital managers

37.2 In England, NHS hospitals are managed by NHS trusts and NHS foundation trusts. For these hospitals, the trusts themselves are defined as the ‘hospital managers’ for the purposes of the Act. In an independent hospital the person or persons in whose name the hospital is registered are the hospital managers.

37.3 It is the hospital managers who have the authority to detain patients under the Act. They have the primary responsibility for seeing that the requirements of the Act are followed. In particular, they must ensure that patients are detained only as the Act allows, that their treatment and care accord fully with its provisions, and that they are fully informed of, and are supported in exercising, their statutory rights.

37.4 As managers of what the Act terms ‘responsible hospitals’, hospital managers have equivalent responsibilities towards CTO patients, even if those patients are not actually being treated at one of their hospitals.

37.5 In practice, most of the decisions of the hospital managers are actually taken by individuals (or groups of individuals) on their behalf. In particular, decisions about discharge from detention and CTOs are taken by panels of people (‘managers’ panels’) specifically selected for the role.

37.6 In this chapter, unless otherwise stated, ‘hospital managers’ includes anyone authorised to take decisions on their behalf, except managers’ panels.
Exercise of hospital managers’ functions

37.7 Special rules apply to the exercise of hospital managers’ power to discharge patients from detention or CTOs. In broad terms, this power can be delegated only to managers’ panels made up of people (sometimes called ‘associate hospital managers’) appointed specifically for the purpose who are not officers or employees of the organisation concerned. For guidance on these powers see chapter 38.

37.8 Otherwise, hospital managers (meaning the organisation, or individual, in charge of the hospital) may arrange for their functions to be carried out, day-to-day, by particular people on their behalf. In some cases, regulations say they must do so.

37.9 The arrangements for who is authorised to take which decisions should be set out in a scheme of delegation. If the hospital managers are an organisation, that scheme of delegation should be approved by a resolution of the body itself. Unless the Act or the regulations say otherwise, organisations may delegate their functions under the Act to any one and in any way which their constitution or (in the case of NHS providers or NHS commissioners) NHS legislation allows them to delegate their other functions.

37.10 Organisations (or individuals) in charge of hospitals retain responsibility for the performance of all hospital managers’ functions exercised on their behalf and must ensure that the people acting on their behalf are competent to do so. The organisation (or individual) concerned should put in place appropriate governance arrangements to monitor and review the way that functions under the Act are exercised on its behalf. Many organisations establish a Mental Health Act steering or scrutiny group especially for that task, and whilst recognising that the Act is a legal framework for the delivery of care, also monitor and review via clinically-focussed forums.

Specific powers and duties of hospital managers

Admission

37.11 It is the hospital managers’ responsibility to ensure that the authority for detaining patients is valid and that any relevant admission documents are in order. Hospital managers should also have a clear system in place for notifying local authorities when the patient is a child or young person. For guidance on the receipt, scrutiny and rectification of documents see chapter 35.

37.12 Where a patient is admitted under the Act on the basis of an application by their nearest relative, the hospital managers must request the relevant local authority to provide them with the social circumstances report required by section 14.
Information about independent mental health advocates (IMHAs)

37.13 Hospital managers are required to take such steps as are practicable to ensure that community patients and certain patients who are liable to be detained understand the help is available from an IMHA and how to obtain that help. The hospital manager must give the patient this information (both orally and in writing) as soon as practicable after the patient becomes liable to be detained or becomes a community patient (as the case may be). IMHAs have a particularly important role in ensuring that children and young people understand, and are able to exercise, their rights under the Act (see chapter 6 on IMHAs).

37.14 If a patient lacks capacity to decide whether or not to obtain help from an IMHA, the hospital manager should arrange for an IMHA to attend the patient so that the IMHA can explain what they can offer to the patient directly.

Transfer between hospitals

37.15 The Act allows hospital managers to authorise the transfer of most detained patients from one hospital to another in accordance with the regulations. For restricted patients, the consent of the Secretary of State for Justice is also required (see paragraphs 22.23 – 22.27). Decisions on transfers may be delegated to an officer, who could (but need not be) the patient’s responsible clinician.

37.16 A hospital manager does not have the power to insist that another hospital accepts a patient, nor to insist that a proposed new placement is funded by a clinical commissioning group (CCG) or anyone else. Decisions about funding should be taken in the same way as for any other patient.

37.17 People authorising transfers on the hospital managers’ behalf should ensure that there are good reasons for the transfer and that the needs and interests of the patient have been considered. Transfers are potentially an interference with a patient’s right to respect for privacy and family life under article 8 of the European Convention on Human Rights (ECHR), and care should be taken to act compatibly with the ECHR when deciding whether to authorise a transfer.

37.18 Valid reasons for transfer might be clinical – the need, for example, for the patient to be in a more suitable environment or in a specialist facility. They could also be to move the patient closer to home. In some cases, a transfer may be unavoidable, because the hospital is no longer able to offer the care that the patient needs.

37.19 Wherever practicable, patients should be involved in the process leading to any decision to transfer them to another hospital. It is important to explain the reasons for a proposed transfer to the patient and, where appropriate, their nearest relative
37.20 Among the factors that need to be considered when deciding whether to transfer a patient are:

- whether the transfer would give the patient greater access to family or friends, or have the opposite effect
- what effect a transfer is likely to have on the course of the patient’s disorder or their recovery
- the availability of appropriate beds at the potential receiving hospital, and
- whether a transfer would be appropriate to enable the patient to be in a more culturally suitable or compatible environment, or whether it would have the opposite effect.

37.21 In the case of transfers to high security psychiatric hospitals, unless the circumstances are urgent or there would be clinical risks to the patient or others or there is some other significant reason to make it inadvisable, the relevant hospital managers should:

a. give the patient and/or their representative sufficient information and opportunity to make written representations to the admissions panel of the receiving hospital. At a minimum this will be a summary (if the documents are not provided) of:
   - the letter of reference from the hospital that wishes to transfer the patient to the high security hospital
   - the assessment by the clinician from the high security hospital; and any other accompanying reports/documents the hospital managers think should be shared in the interests of fairness

b. if the assessing doctor is invited to attend the deliberations of the admissions panel, the hospital should consider whether the patient and or their representative should be invited to attend or be represented at those deliberations.

37.22 Detained patients may themselves want a transfer to another hospital – in order to be nearer their family or friends, for example. Or they may have a reasonable wish to be treated by a different clinical team, which could only be met by a transfer.

37.23 The professionals involved in their care should always be prepared to discuss the possibility of a transfer, and should raise the issue themselves with the patient if they think the patient might be interested in, or benefit from, a transfer.

37.24 Requests made by, or on behalf of, patients should be recorded and given careful consideration. Every effort should be made to meet the patient’s wishes. If that cannot be done, the patient (or the person who made the request on the patient’s behalf) should be given a written statement of the decision and the reasons for it.
37.25 Nearest relatives’ consent to transfers is not a statutory requirement. But unless the patient objects, the patient’s nearest relative should normally be consulted before a patient is transferred to another hospital, and, in accordance with the regulations, they must normally be notified of the transfer.

37.26 When a patient is transferred, the documents authorising detention, including the authority for transfer, should be sent to the hospital to which the patient is transferred. The transferring hospital should retain copies of these documents.

Transfers to guardianship

37.27 Regulations allow hospital managers to authorise the transfer of most detained patients into guardianship instead, with the agreement of the relevant local authority. This is a procedural alternative to discharging the patient from detention then making an application for guardianship. This decision may be delegated to officers, including the patient’s responsible clinician.

37.28 As with transfers between hospitals, people taking decisions on behalf of hospital managers and local authorities should ensure that there are good reasons for any transfer and that the needs and interests of the patient have been considered.

Transfer and assignment of responsibility for CTO patients

37.29 The managers of a hospital to which a CTO patient has been recalled may authorise the patient’s transfer to another hospital during the 72-hour maximum period of recall. These decisions may be delegated in the same way as other transfer decisions described above. The people exercising this power on the managers’ behalf must ensure that the needs and interests of the patient are considered before a transfer is authorised, in the same way as when considering the transfer of a detained patient.

37.30 The hospital managers may also reassign responsibility for CTO patients so that a different hospital will become the patient’s responsible hospital. The same considerations apply.

Information for patients and relatives

37.31 Sections 132, 132A and 133 of the Act and regulations require hospital managers to arrange for detained patients, CTO patients and (where relevant) their nearest relatives, to be given important information about the way the Act works and about their rights. For further guidance on the exercise of these duties see chapter 4, and chapter 19 regarding children and young people.
37.32 Section 130D of the Act also imposes a duty on hospital managers to take such steps as are practicable to ensure that every patient understands that help is available from an independent mental health advocate (IMHA). If a patient lacks capacity to decide whether to seek help from an IMHA, an IMHA should be introduced to the patient so that the IMHA can explain what help they can offer.

**Duties in respect of victims of crime**

37.33 The Domestic Violence, Crime and Victims Act 2004 places a number of duties on hospital managers in relation to certain unrestricted part 3 patients who have committed sexual or violent crimes. This includes liaising with victims in order to:

- advise victims if the patient’s discharge is being considered or if the patient is about to be discharged
- forward representations made by victims to people responsible for making decisions on discharge or the need for a CTO and for passing information received from those people to the victim
- informing victims who have asked to be told if the patient is to become a CTO patient and of any conditions on the CTO relating to contact with them or their family, any variation of the conditions and the date on which the order will cease
- informing responsible clinicians of any representations made by the victim about the conditions attached to the CTO.

37.34 These duties complement similar arrangements for restricted part 3 patients, which are managed by the probation service rather than hospital managers.

37.35 Separate guidance on hospital managers’ duties under the Domestic Violence Crime and Disorder Act 2004 is issued by the Ministry of Justice.77 Details on support for victims is also included in chapter 40.

**Patients’ correspondence**

37.36 Section 134 allows hospital managers to withhold outgoing post from detained patients if the person to whom it is addressed has made a written request to the hospital managers, the approved clinician with overall responsibility for the patient’s case or the Secretary of State that post from the patient in question should be withheld. The fact that post has been withheld must be recorded in writing by an officer authorised by the hospital managers, and the patient must be informed in accordance with the regulations.

37.37 The managers of high-security psychiatric hospitals have wider powers under section 134 to withhold both incoming and outgoing post from patients in certain circumstances.78 Their decisions are subject to review by the Care Quality Commission (CQC). The hospital managers of high-security psychiatric hospitals should have a written policy for the exercise of these powers.

Duty to refer cases to Tribunals

37.38 Hospital managers are under a duty to refer a patient’s case to the Tribunal in the circumstances set out in section 68 of the Act, summarised in the following table. Children and young people who are detained under the Act have the same rights as other patients to apply to the Tribunal and further guidance can be found in chapter 19.

<table>
<thead>
<tr>
<th>Hospital managers must refer the following patients</th>

</tr>
</thead>
<tbody>
<tr>
<td>Patients who are detained under part 2 of the Act, and patients who were detained under part 2 but are now CTO patients</td>
<td>Six months have passed since they were first detained, unless:</td>
</tr>
<tr>
<td></td>
<td>• the patient applied to the Tribunal themselves after they became a section 3 patient</td>
</tr>
<tr>
<td></td>
<td>• the patient’s nearest relative applied to the Tribunal after the responsible clinician barred the nearest relative’s order to discharge a section 3 patient</td>
</tr>
<tr>
<td></td>
<td>• the patient’s displaced nearest relative has applied to the Tribunal after the displacement order is made</td>
</tr>
<tr>
<td></td>
<td>• the patient’s case was referred to the Tribunal by the Secretary of State for Health after the patient became a section 3 patient, or</td>
</tr>
<tr>
<td></td>
<td>• the managers have already referred the patient’s case to the Tribunal because their community treatment order was revoked (see below).</td>
</tr>
<tr>
<td></td>
<td>(If the patient is still a section 2 patient, pending the outcome of an application to the county court for a change in their nearest relative, there are no exceptions)</td>
</tr>
<tr>
<td>Patients who are detained under part 2 of the Act, or were detained under part 2 but are now CTO patients</td>
<td>Three years have passed since their case was last considered by the Tribunal (one year if they are under 18)</td>
</tr>
<tr>
<td>People who were CTO patients but whose CTOs have been revoked</td>
<td>As soon as practicable after the responsible clinician revokes the CTO</td>
</tr>
</tbody>
</table>

78 The Secretary of State for Health issued directions requiring the managers of these hospitals to take similar action in respect of correspondence between patients within the hospital, phone calls and items brought in for patients from outside. See https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/268545/HS_H_Directions_Signed_2_.pdf
Hospital managers must refer the following patients

| Patient was transferred from guardianship to a hospital | Six months have passed, unless the patient has already applied to the Tribunal after being transferred from guardianship to a hospital |
| Patients detained under hospital orders, hospital directions or transfer directions under part 3 of the Act without being subject to special restrictions (collectively, unrestricted part 3 patients), or who were detained under part 3 of the Act but are now CTO patients | Three years have passed without their case being considered by the Tribunal (one year if they are under 18) |

Note: for these purposes:
- detention under part 2 of the Act does not include any time spent detained under the ‘holding powers’ in section 5 (see chapter 18), and
- applications to the Tribunal do not count if they are withdrawn before they are determined.

37.39 Hospitals will be able to comply properly with these duties only if they maintain full and accurate records about:
- the detention and discharge of the patients for whom they are responsible;
- applications made by those patients to the Tribunal
- applications and references to the Tribunal made by other people in respect of those patients.

37.40 Hospital managers should ensure that they have systems in place to alert them (or the officers to whom the function is delegated) in good time to the need to make a reference. Officers exercising this function for the managers should be familiar with the relevant requirements of the Tribunal itself and the procedural rules by which it operates.

37.41 When hospital managers are required to refer the case of a patient whose CTO is revoked to the Tribunal, this must be done as soon as possible after the CTO is revoked.

37.42 Hospital managers should from time to time audit the timeliness with which they comply with their duties to refer patients to the Tribunal.
References by the Secretary of State for Health

37.43 The Secretary of State for Health may at any time refer the case of most detained patients, and all CTO patients, to the Tribunal. Anyone may request such a reference, and the Secretary of State will consider all such requests on their merits. Please see chapter 19 for further information regarding children and young people.

37.44 Hospital managers should consider asking the Secretary of State to make a reference in respect of any patients whose rights under article 5(4) of the ECHR might otherwise be at risk of being violated because they are unable (for whatever reason) to have their cases considered by the Tribunal speedily following their initial detention or at reasonable intervals afterwards.

37.45 In particular, they should normally seek such a reference in any case where:

- a patient’s detention under section 2 has been extended under section 29 of the Act pending the outcome of an application to the county court for the displacement of their nearest relative
- the patient lacks the capacity to request a reference
- either the patient’s case has never been considered by the Tribunal, or a significant period has passed since it was last considered.

Hospital accommodation for children and young people

37.46 Section 131A of the Act puts a duty on hospital managers to ensure that any children or young people aged under 18 receiving in-patient care for mental disorder in their hospitals are accommodated in an environment which is suitable for their age (subject to their needs)(see paragraphs 19.91 – 19.96). The duty applies to children and young people admitted informally to hospitals, as well as those detained under the Act.

This material does not form part of the Code. It is provided for assistance only.
38 Hospital managers’ discharge power

Why read this chapter?

38.1 Hospital managers have the power to discharge most detained patients and all patients subject to a community treatment order (CTO). This chapter provides guidance on the exercise of these powers. It includes matters relating to when to review detention or a CTO, the criteria to be applied, the procedure for reviewing detention or a CTO, how to conduct reviews where the detention or CTO is contested, uncontested renewals and recording the reasons for a decision.

The power to discharge

38.2 Section 23 of the Act gives hospital managers the power to discharge most detained patients and all CTO patients. They may not discharge patients who are held under the section 5 holding powers or in a place of safety under sections 135 or 136 or those remanded to hospital under sections 35 or 36 of the Act or subject to interim hospital orders under section 38, and they may not discharge restricted patients without the consent of the Secretary of State for Justice.

Exercise of power of discharge on behalf of managers

38.3 The hospital managers – meaning the organisation or individual in charge of the hospital – must either consider discharge themselves or arrange for their power to be exercised on their behalf by a ‘managers’ panel’.

38.4 A managers’ panel may consist of three or more people who are:

- members of the organisation in charge of the provider (eg the chair or non-executive directors), or
- members of a committee or sub-committee which is authorised for the purpose.

38.5 In the case of an NHS foundation trust, a panel can consist of any three or more people appointed for the purpose by the trust whether or not they are members of the trust itself or any of its committees or sub-committees.

38.6 In NHS bodies (including NHS foundation trusts) none of the people on managers’ panels may be employees (or the case of NHS trusts, officers) of the body concerned. People do not become employees or officers simply because they are paid a fee for serving on managers’ panels.

38.7 In independent hospitals, managers’ panels should not include people who are on the staff of the hospital or who have a financial interest in it.
38.8 In all cases, the board (or the equivalent) of the organisation concerned should ensure that the people it appoints properly understand their role and the working of the Act. It should also ensure that they receive suitable training to equip them to understand the law, work with patients and professionals, reach sound judgments and properly record their decisions. This should include training in understanding risk assessment and risk management reports.

38.9 Appointments to managers’ panels should be made for a fixed period. Reappointment (if permitted) should not be automatic and should be preceded by a review of the person’s continuing suitability.

**When to review detention or a CTO**

38.10 Hospital managers should ensure that all relevant patients are aware that they may ask to be discharged by the hospital managers and of the distinction between this and their right to apply for a Tribunal hearing (see chapter 12). Hospital managers should ensure that the appropriate level of support is provided to help the patient, which may be a child or young person, understand this right and distinction.

38.11 Hospital managers:

- may undertake a review of whether or not a patient should be discharged at any time at their discretion
- must undertake a review if the patient’s responsible clinician submits to them a report under section 20 of the Act renewing detention or under section 20A extending the CTO
- should consider holding a review when they receive a request from a patient (who may be supported by their independent mental health advocate (IMHA) (see chapter 6), independent mental capacity advocate (IMCA), or by their attorney or deputy (see chapter 7)
- should consider holding a review when the responsible clinician makes a report to them under section 25 barring an order by the nearest relative to discharge a patient.

38.12 In the last two cases, when deciding whether to consider the case, hospital managers are entitled to take into account whether the Tribunal has recently considered the patient’s case or is due to do so in the near future.

38.13 It is desirable that a managers’ panel considers a report made under section 20 or section 20A and decides whether to exercise its discharge power, before the current period of detention or the CTO ends. However, the responsible clinician’s report itself provides authority for the patient’s continued detention or period on a CTO, even if a managers’ panel has not yet considered the case or reached a decision.
Criteria to be applied

38.14 The Act does not define specific criteria that the hospital managers must use when considering discharge. The essential yardstick is whether the grounds for continued detention or continued CTO under the Act are satisfied. To ensure that this is done in a systematic and consistent way, managers’ panels should consider the questions set out below, in the order stated.

38.15 For patients detained for assessment under sections 2 or 4 of the Act:

• Is the patient still suffering from mental disorder?
• If so, is the disorder of a nature or degree which warrants the continued detention of the patient in hospital?
• Ought the detention to continue in the interests of the patient’s health or safety or for the protection of other people?

38.16 For other detained patients:

• Is the patient still suffering from mental disorder?
• If so, is the disorder of a nature or degree which makes treatment in a hospital appropriate?
• Is continued detention for medical treatment necessary for the patient’s health or safety or for the protection of other people?
• Is appropriate medical treatment available for the patient?

Consideration should also be given to whether the Mental Capacity Act 2005 can be used to treat the patient safely and effectively.

38.17 For patients on a CTO:

• Is the patient still suffering from mental disorder?
• If so, is the disorder of a nature or degree which makes it appropriate for the patient to receive medical treatment?
• If so, is it necessary in the interests of the patient’s health or safety or the protection of other persons that the patient should receive such treatment?
• Is it still necessary for the responsible clinician to be able to exercise the power to recall the patient to hospital, if that is needed? (For example, if a patient has been on a CTO for an extended period without the need to exercise the power to recall, it may not be appropriate to continue on a CTO)
• Is appropriate medical treatment available for the patient?
38.18 If three or more members of the panel (who between them make up a majority) are satisfied from the evidence presented to them that the answer to any of the questions set out above is ‘no’, the patient should be discharged. If so, where a patient lacks capacity to decide where to live, the hospital managers may request that consideration be given to making a DoL authorisation or a DoL order (see paragraphs 13.26 – 13.48).

38.19 Where the answer to all the relevant questions above is ‘yes’, but the responsible clinician has made a report under section 25 barring a nearest relative’s attempt to discharge the patient, the panel should also consider the following question:

- Would the patient, if discharged, be likely to act in a manner that is dangerous to other persons or to themselves?

38.20 This last question provides a more stringent test for continuing detention or period on a CTO (see chapter 29).

38.21 If three or more members of the panel (being a majority) disagree with the responsible clinician and decide that the answer to this question is ‘no’, the panel should usually discharge the patient. However, the hospital managers retain a residual discretion not to discharge in these cases, so panels should always consider whether there are exceptional reasons why the patient should not be discharged.

38.22 In all cases, hospital managers have discretion to discharge patients even if the criteria for continued detention or a CTO are met. Managers’ panels must therefore always consider whether there are other reasons why the patient should be discharged despite the answers to the questions set out above.

**Procedure for reviewing detention or a CTO**

38.23 The Act does not define the procedure for reviewing a patient’s detention or a CTO. However, the exercise of this power is subject to the general law and to public law duties which arise from it. Hospital managers’ conduct of reviews must satisfy the fundamental legal requirements of fairness, reasonableness and lawfulness. Managers’ panels should therefore:

- adopt and apply a procedure which is fair and reasonable
- not make irrational decisions – that is, decisions which no managers’ panel, properly directing itself as to the law and on the available information, could have made
- not act unlawfully – that is, contrary to the provisions of the Act and any other legislation (including the Human Rights Act 1998 (HRA) and the Equality Act 2010 – for further details see chapter 3).
Conduct of reviews where detention or CTO is contested

38.24 Reviews should be conducted in such a way as to ensure that the case for continuing the patient’s detention or CTO is properly considered against the questions set out above and in the light of all the relevant evidence. This means that managers’ panels need to have before them sufficient information about the patient’s past history of care and treatment, and details of any future plans. The main source of this is likely to be the patient’s documentation and care plan under the care programme approach (CPA) (or its equivalent) (see chapter 34). It is essential that panels are fully informed about any history of violence or self-harm and that a recent risk assessment and/or risk management plan is provided to the panel.

38.25 In advance of the hearing, managers’ panels should be provided with written reports from the patient’s responsible clinician and from other key individuals directly involved in the patient’s care who they think are appropriate, such as the patient’s care co-ordinator, named nurse, social worker, occupational therapist or clinical psychologist.

38.26 The patient should be provided with copies of the reports as soon as they are available, unless (in the light of any recommendation made by their authors) panels are of the opinion that disclosing the information would be likely to cause serious harm to the physical or mental health of the patient or any other individual. The patient’s legal or other representative (such as their donee or deputy), including their IMHA should also receive copies of these reports.

38.27 Reports should be provided in good time so that patients and their representatives can consider them and, where relevant, draw the panel’s attention to any apparent inaccuracies. Any decision to withhold a report (in whole or part) should be recorded, with reasons.

38.28 The nearest relative should normally be informed when managers’ panels are to consider a patient’s case, unless the patient objects, subject to the normal considerations about involving nearest relatives (see paragraphs 4.29 – 4.34).

38.29 Panels should be prepared to consider the views of the patient’s relatives and carers, and other people who know the patient well, either at the patient’s request or where such people offer their views on their own initiative. Relatives, carers and any other relevant people may be invited to put their views to the managers’ panel in person. If the patient objects to this, a suitable member of the professional care team should be asked to include the person’s views in their report.

38.30 Ideally, the report submitted by the responsible clinician should be in a similar format to those provided for Mental Health Tribunals and cover the history of the patient’s care and treatment and details of their care plan, including all risk assessments. Where the review is being held because the responsible clinician has made a report under section 20, 20A or 21B renewing detention or extending the...
CTO, panels should also have a copy of the report itself before them. This should be supplemented by a record of the consultation undertaken by the responsible clinician in accordance with those sections before making the report. The written reports should be considered by the panel alongside documentation compiled under the CPA (or its equivalent).

38.31 Where relevant, panels should also have in front of them any order made by the responsible clinician under section 25 barring a patient’s discharge by their nearest relative.

38.32 The procedure for the conduct of any hearing is for managers’ panels themselves to decide, but generally it needs to balance informality against the rigour demanded by the importance of the task. Key points are:

- the patient should be given a full opportunity, and any necessary help, eg from an IMHA, to explain why they should no longer be detained or on a CTO
- the patient should be allowed to be accompanied by a representative of their own choosing to help in putting their point of view to the panel. If the patient lacks capacity to put their point of view, their deputy, attorney or other representative of their choosing should be allowed to represent them
- the patient should also be allowed to have a relative, friend, carer, deputy, attorney or advocate attend to support them, and
- the responsible clinician and other professionals should be asked to give their views on whether the patient’s continued detention or a CTO is justified and to explain the grounds on which those views are based.

38.33 It is also for hospital managers themselves to decide where hearings should take place. For CTO patients, and patients currently on leave of absence from hospital, the hospital itself may not be the most convenient or acceptable place for the patient. Hospital managers should be prepared to consider whether there are more appropriate locations which it would be feasible to use.

38.34 The patient and the other people giving views to the panel should, if the patient wishes it, be able to hear each other’s statements to the panel and to put questions to each other, unless the panel believes that would be likely to cause serious harm to the physical or mental health of the patient or any other individual. Unless, exceptionally, it is considered too unsafe, patients should always be offered the opportunity of speaking to the panel alone (with or without their representative and anyone else they have asked to attend to support them at the hearing).

38.35 Member of managers’ panels will not normally be qualified to form clinical assessments of their own. They must give full weight to the views of all the professionals concerned in the patient’s care. If there is a divergence of views among the professionals about whether the patient meets the clinical grounds for continued detention or CTO, managers’ panels should consider adjourning to seek further medical or other professional advice.
38.36 In considering the questions set out earlier in this chapter and deciding in the light of them whether or not to discharge the patient from detention, managers’ panels need to consider very carefully the implications for the patient’s subsequent care. Before a managers’ panel considers a case, the responsible clinician, in consultation with the multi-disciplinary team, should have considered what services and other arrangements might be put in place for the patient if discharged and whether those arrangements would be sufficient to make continued detention or on a CTO (as the case may be) no longer necessary.

38.37 The presence or absence of adequate community care arrangements, including a DoL authorisation or DoL order may be critical in deciding whether continued detention (in particular) is necessary. If managers’ panels believe they have not been provided with sufficient information about arrangements that could be made were the patient discharged, they should consider adjourning and request further information.

38.38 If panels conclude that the patient ought to be discharged, but practical steps to put after-care in place, or obtain a DoL authorisation or a DoL order, need to be taken first, they may adjourn the panel for a brief period to enable that to happen before formally discharging the patient.

**Uncontested renewals**

38.39 If a patient’s detention or CTO is renewed or extended by their responsible clinician, the hospital managers must always decide whether the patient should be discharged anyway, even if the patient has indicated that they do not wish to challenge the renewal or extension.

38.40 It is for hospital managers to decide whether to adopt a different procedure in uncontested cases.

38.41 Where a different procedure is used, patients, if they request it, should be interviewed by at least one member of the managers’ panel considering their case, or if the panel thinks it desirable after reading the renewal or extension report.

38.42 Otherwise, hospital managers may consider the case on the papers, if they wish. But they should hold a full hearing if they have reason to suspect that the patient may, in fact, want to contest, or there are prima facie grounds to think that the responsible clinician’s decision that the statutory grounds to renew detention or extend a CTO are met, is not correct. The mere fact that patients have not said they object to the renewal or extension should not be taken as evidence that they agree with it, or that it is the correct decision.

38.43 In deciding whether or not to review the case on the papers, hospital managers should consider if previous reviews during the current period of compulsory powers have been ‘on the papers’.
Decisions

38.44 Hospital managers have a common law duty to give reasons for their decisions. The decisions of managers’ panels, and the reasons for them, should be fully recorded at the end of each review. The decision should be communicated as soon as practicable, both orally and in writing, to the patient and their representative, to the nearest relative (where relevant) and to the professionals concerned.

38.45 If the patient is not to be discharged, where practicable at least one member of the panel should offer to see the patient (or their representative) to explain in person the reasons for the decision. Copies of the papers relating to the review, and the formal record of the decision, should be kept in the patient’s notes.
39 Conflicts of interest

Why read this chapter?

39.1 Conflicts of interest may arise which prevent an approved mental health professional from making an application for a patient’s detention or guardianship, and a doctor from making a recommendation supporting the application. This chapter provides guidance on the circumstances that constitute a conflict of interest. These may be financial, business, professional or personal.

Conflict of Interest Regulations

39.2 The Mental Health (Conflict of Interest) (England) Regulations 2008 set out the circumstances in which a potential conflict of interest prevents an AMHP from making an application for a patient’s detention or guardianship and a doctor from making a recommendation supporting the application. AMHPs and these doctors are jointly referred to as ‘assessors’ in this chapter.

39.3 These potential conflicts of interest may concern the relationship of AMHPs and doctors to each other, to the patient, to the nearest relative or to the hospital where the patient is to be admitted. They concern potential conflicts of interest for financial, business, professional and personal reasons.

Financial conflict

39.4 The current regulations require that where the patient is to be admitted to an independent hospital and the doctor providing one of the medical recommendations is on the staff of that independent hospital, the other medical recommendation must be given by a doctor who is not on the staff of that independent hospital. That is, there will be a potential conflict if both doctors giving recommendations are on the staff of the independent hospital. It is also good practice for doctors on the staff of an NHS trust or NHS foundation trust to ensure that one of the recommendations is given by a doctor not on the staff of the organisation.

39.5 An assessor will have a conflict of interest for financial reasons if the assessor stands to make a financial benefit (or loss) for their decision. There will not be a potential conflict of interest for financial reasons where an assessor is paid a fee for making an application or giving a medical recommendation if it is paid regardless of the outcome of the assessment.
An assessor will have a potential conflict of interest if both that assessor and one of the other assessors, the patient or the nearest relative (if the nearest relative is the applicant) are closely involved in the same business venture. Being ‘closely involved’ is not defined in the regulations. Examples could include being a partner in a partnership, being a director or other office-holder of a company, or being a major shareholder in it. This will apply even if the business venture is not associated with the provision of services for the care and treatment of persons with a mental disorder.

Business ventures include any form of commercial enterprise from which the person concerned stands to profit. Such people include: directors and major investors in a company (of any size) which provides goods or services for profit; partners in a GP practice; partners in a business established as a limited liability partnership. Involvement in a business venture does not include involvement in societies and similar organisations which are essentially non-commercial, and from which the people concerned do not stand to profit.

Professional conflict

Regulations set out that a conflict of interest for professional reasons will occur where:

- the assessor is in a line management or employment relationship with one of the other assessors or the patient or the nearest relative (where the nearest relative is the applicant)
- the assessor is a member of the same team as the patient, or
- where there are three assessors, all of them are members of the same team.

A line management relationship will exist whether an assessor manages, or is managed by, one of the other assessors, the patient or the nearest relative (where the nearest relative is the applicant). Similarly an employment relationship will exist whether the assessor employs, or is employed by, one of the other assessors, the patient or the nearest relative (where the nearest relative is the applicant).

For the purposes of the regulations a team is defined as a group of professionals who work together for clinical purposes on a routine basis. That might include a community mental health team, a crisis resolution or home treatment team, or staff on an in-patient unit (but not necessarily the staff of an entire hospital).
Urgent necessity

39.11 If there is a case of urgent necessity all three assessors may be from the same team. However, this should happen only in a genuine emergency, where the patient’s need for urgent assessment outweighs the desirability of waiting for another assessor who has no potential conflict of interest. Any decisions made to proceed despite a potential conflict of interest should be recorded, with reasons, in case notes.

39.12 In a case of urgent necessity it is preferable to proceed with three assessors, despite a potential conflict of interest, rather than make the application under section 4 of the Act with only two assessors (one doctor and one AMHP) (see paragraphs 15.4 – 15.6).

39.13 There are no other circumstances in which potential conflict of interest can be set aside because of urgent necessity.

Other potential conflicts

39.14 There may be circumstances not covered by these regulations where the assessor feels, nonetheless, that there is (or could be seen to be) a potential conflict of interest. Assessors should work on the principle that in any situation where they believe that the objectivity or independence of their decision is (or could be seen to be) undermined then they should not become involved or should withdraw.

39.15 These regulations do not cover potential conflicts of interest relating to a community treatment order (CTO). The responsible clinician and the AMHP responsible for making the decision as to whether to place a patient on a CTO, or any decision to revoke a community treatment order, should not have any financial interest in the outcome of the decision, which includes having a financial interest in the hospital, care home, hostel or domiciliary care agency etc being considered. Similarly, neither the responsible clinician nor the AMHP should be a relative of the patient or of each other.

39.16 These regulations do not cover potential conflicts of interest relating to renewal of detention or guardianship. The persons involved in making the decision as to whether to renew the detention (the responsible clinician and other professionals consulted by the responsible clinician) or the guardianship (the appropriate practitioner) should not have any financial interest in the outcome of the decision.

39.17 The Act requires an AMHP to take an independent decision about whether or not to make an application under the Act. If an AMHP believes that they are being placed under undue pressure to make, or not make, an application, they should raise this through the appropriate channels. Local arrangements should be in place to deal with such circumstances.
40 Support for victims

Why read this chapter?

40.1 Under the Domestic Violence, Crime and Victims Act 2004 victims of serious violent and sexual offences have the right to engage with the Victims Contact Scheme (VCS). This chapter provides guidance on the statutory rights of victims to information about mentally disordered offenders. It outlines the relevant offences for which the police should send details of victims to the VCS, and the support provided by the VCS. It also provides guidance on the Victims’ Code.

The Victim Contact Scheme and the Victims’ Code

40.2 Under the Domestic Violence, Crime & Victims Act 2004 (DVCVA 2004) victims of serious violent and sexual offences have the right to engage with the Victim Contact Scheme (VCS). Under the VCS, these victims (‘statutory victims’) have a right to be informed of key developments in the care of the mentally disordered offender in question and to make representations about conditions that should be in place on discharge.

40.3 The Code of Practice for Victims of Crime (‘the Victims’ Code’) sets out the information, support and services that victims of relevant crimes can expect to receive from criminal justice agencies in England and Wales. The Victims’ Code also summarises the information victims are entitled to under the VCS, as set out in the DVCVA 2004.

40.4 The Victims’ Code and the VCS apply to victims in respect of restricted and unrestricted part 3 patients.

Victim Contact Scheme (VCS)

Restricted patients

40.5 For relevant offences committed on or after 1 July 2005, the police or joint police/ Crown Prosecution Service Witness Care Unit should send victims’ details to the appropriate National Probation Service Victim Liaison Unit (VLU). The VLU should offer victims the opportunity to engage with the VCS if the offender is:

• convicted of a specified sexual or violent offence and made the subject of a hospital order with a restriction order (section 37 and section 41 of the Act)
• found unfit to plead, but has committed and been charged with the offence
• found not guilty by reason of insanity under the Criminal Procedure (Insanity) Act 1964 in respect of a sexual or violent offence, and made subject to a hospital order with a restriction order (section 37 and section 41 of the Act)
• convicted of a sexual or violent offence and then made the subject of a hospital direction and limitation direction (section 45A and section 45B of the Act), or
• sentenced to 12 months imprisonment or more for a sexual or violent offence, and transferred to prison or hospital under a transfer direction and restriction direction (section 47 and section 49 of the Act).

Unrestricted patients

40.6 For offenders sentenced for a relevant offence on or after 3 November 2008, the police or joint police/Crown Prosecution Service Witness Care Unit should send victims’ details to the appropriate National Probation Service Victim Liaison Unit (VLU). The VLU should offer victims the opportunity to engage with the VCS if the offender is made subject to a hospital order without a restriction order (section 37 of the Act). Victims who agree to engage with the VCS will have their details passed to the hospital. The hospital manager or responsible clinician then becomes responsible for providing information to the victim.

40.7 Where an offender is transferred from prison to hospital with a restriction order (section 47 and section 49 of the Act), and subsequently reaches their sentence end date (ie they are a ‘notional section 37 patient’ – refer to paragraphs 22.63b – 22.63d on ‘Notional section 37 patients’), and there is a victim in the VCS, the VLU will send the victim’s details to the hospital. The hospital manager or responsible clinician then becomes responsible for providing information to the victim.

Relevant offences

40.8 For the purpose of this chapter, ‘relevant offences’ are those set out in the DVCVA 2004:
• murder or an offence specified in Schedule 15 to the Criminal Justice Act 200380
• an offence in respect of which the patient or offender is subject to the notification requirements of Part 2 of the Sexual Offences Act 2003, or
• an offence against a child within the meaning of Part 2 of the Criminal Justice and Court Services Act 2000.

80 The full list of offences can be found at: http://www.legislation.gov.uk/ukpga/2003/44/schedule/15. However, this list can change as new offences can be added. Practitioners can contact the Victims Team in the Ministry of Justice at VCSpolicy@noms.gsi.gov.uk if they wish to check if a new offence has been included in the Schedule.
Support from the VCS

40.9 Under the VCS, victims must, as a minimum, be:
- offered the opportunity to engage with the VCS by the VLU
- assigned a victim liaison officer (VLO) (for restricted patients)
- offered the right to make representations about the patient’s discharge conditions such as geographic exclusion zones or ‘no contact’
- informed of discharge conditions which relate to them
- informed about any other key information about the patient’s progress, which it is appropriate to share in all the circumstances of the case, and
- offered the opportunity to make representations (about the patient’s discharge conditions) to the Tribunal.

40.10 Victims can choose to opt in or out of the VCS at any time. If a victim was not identified at the time of sentencing, did not take up contact when it was offered, they may contact or be referred to the VLU at any time during the patient’s treatment and rehabilitation.

40.11 Information about restricted patients will come from the VLO. Information about unrestricted patients will come directly to the victim from hospital managers or clinicians.

Discretionary contact with non-statutory victims

40.12 Although some victims are ineligible (‘non-statutory victims’) under the DVCVA 2004 to contact under the VCS, it is good practice for the National Probation Service to consider providing VCS services to any victim of a restricted patient who requests information. Once the discretion has been exercised to offer such a victim contact under the VCS, non-statutory victims may otherwise be offered the same service as statutory victims. This means that, once the National Probation Service has decided to offer the VCS to these victims, they should be assigned a VLO, provided with the opportunity to make representations about discharge conditions, and provided with information which the probation trust considers to be appropriate in all the circumstances of the case, in the same way as statutory victims.

40.13 Information may also be provided on a discretionary basis to non-statutory victims of unrestricted patients by the responsible clinician or hospital manager.
European directive 2012/29/EU establishing minimum standards on the rights, support and protection of victims of crime

40.14 The European victims’ directive establishing minimum standards for victims of crime must be implemented by EU Member States by 16 November 2015. There are a number of requirements setting out the rights of and information afforded to victims. Hospital managers should ensure that they fulfil the terms specified in the directive in any of their interactions with victims of crime.

Restricted patients

40.15 The MHCS will, via the VLO, contact statutory victims, ie those who are eligible under the DVCVA 2004. Information will be shared on certain key stages of the patient’s progress, including:

- when the patient is transferred to hospital thus becoming a restricted patient
- when the Secretary of State for Justice is considering a proposal for discharge, to request representations from the victim
- if the Secretary of State decides to discharge the patient
- the conditions of discharge relating to the victim or their family
- any variation of conditions of discharge relating to the victim or their family
- if the restricted patient is recalled for further treatment under the Act
- if the offender is absolutely discharged, resulting in the cessation of conditions and the removal of the offender’s liability to be recalled to hospital
- when the patient’s restrictions are lifted or expire
- if the prisoner is transferred to hospital under section 47 of the Act
- if a patient previously found unfit to plead is remitted back to court to continue legal proceedings
- if a patient is to be remitted to prison
- if the MHCS has approved escorted or unescorted leave.

40.16 The MHCS may pass on additional information, eg a hospital transfer, to VLOs or directly to the victim (in the small number of cases where the victim is in direct contact with MHCS). Similarly the probation VLO may provide victims with more information. Information should be provided only if appropriate in all the circumstances of the case, and whilst being mindful of patient confidentiality including in respect of confidential medical information.
MHCS requirements in respect of victims

40.17 When considering leave or transfer, MHCS will take into account victim concerns. MHCS expects that, where the responsible clinician knows of VLO involvement, he or she contacts them to ensure that victim concerns are addressed in the application, eg ensuring patients are not allowed leave in the vicinity of the victim.

Unrestricted patients

40.18 It is important that clinical teams and hospital managers are aware of their obligations with respect to the victims of unrestricted patients.

40.19 Victims of unrestricted patients are entitled to the same information, listed above, as the victims of restricted patients. The probation VLO will pass details of victims who wish to receive information to the hospital, and liaison should then take place between the hospital and the patient. The VLO has no further role.

40.20 The statutory minimum of information that hospital managers will communicate to victims includes:

- whether the patient is to be discharged
- whether a community treatment order (CTO) is to be made, including allowing the victim to make representations about the conditions attached to the CTO
- what conditions of the CTO relate to the victim
- when the CTO ceases
- when authority to detain the patient expires
- when the offender is discharged, including allowing the victim to make representations about discharge conditions, and
- what conditions of discharge relate to the victim, and when these cease.

40.21 The information that can be provided to a victim will be limited if it relates to medical treatment, as this information will be confidential medical information.

Annex A

Key words and phrases used in this Code
<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Absent without leave (AWOL)</td>
<td>When a <em>detained patient</em> leaves hospital without getting permission first or does not return to hospital when required to do so. Also applies to <em>guardianship patients</em> who leave the place their <em>guardian</em> says they should live and to <em>CTO patients</em> and <em>conditionally discharged restricted patients</em> who don’t return to hospital when <em>recalled</em>, or who leave the hospital without permission after they have been recalled.</td>
</tr>
<tr>
<td>Advance decision to refuse treatment</td>
<td>A decision, under the <em>Mental Capacity Act 2005</em>, to refuse specified treatment made in advance by a person who has capacity to do so. This decision will then apply at a future time when that person lacks <em>capacity</em> to consent to, or refuse the specified treatment. The meaning and general effect of advance decisions are set out in sections 24 to 26 of the <em>Mental Capacity Act 2005</em>.</td>
</tr>
<tr>
<td>Advance statement</td>
<td>A statement made by a person, when they have capacity, setting out the person's wishes about medical treatment. The statement must be taken into account at a future time when that person lacks capacity to be involved in discussions about their care and treatment.</td>
</tr>
<tr>
<td>The Act</td>
<td>Unless otherwise stated, the Mental Health Act 1983 (as amended, including by the Mental Health Act 2007, the Health and Social Care Act 2012 and the Care Act 2014).^1^</td>
</tr>
<tr>
<td>Advocacy</td>
<td>Independent help and support with understanding issues and assistance in putting forward one's own views, feelings and ideas. See also <em>independent mental health advocate</em>.</td>
</tr>
<tr>
<td>After-care</td>
<td>Health, care and support services in the community following discharge from hospital; especially the duty of the responsible health services and <em>local authority</em> to provide after-care under <em>section 117</em> of the Act, following the discharge of a patient from <em>detention for treatment</em> under the Act. The duty applies to <em>community patients</em> and <em>conditionally discharged restricted patients</em>, as well as those who have been fully discharged.</td>
</tr>
<tr>
<td>Application for detention</td>
<td>An application made by an <em>approved mental health professional</em>, or a <em>nearest relative</em>, under <em>Part 2</em> of the Act for a <em>patient</em> to be <em>detained</em> in a hospital either for <em>assessment</em> or for <em>medical treatment</em>. Applications may be made under section 2 (application for admission for assessment), section 3 (application for admission for medical treatment) or section 4 (emergency application for admission for assessment).</td>
</tr>
<tr>
<td>Appropriate medical treatment</td>
<td><em>Medical treatment for mental disorder</em> which is appropriate taking into account the nature and degree of the person’s <em>mental disorder</em> and all the other circumstances of their case.</td>
</tr>
<tr>
<td>Appropriate medical treatment test</td>
<td>The requirement in some of the <em>criteria for detention</em>, and in the <em>criteria for a CTO</em>, that <em>appropriate medical treatment</em> must be available for the <em>patient</em>.</td>
</tr>
</tbody>

^1^ The majority of provisions of the Care Act are expected to come into force on 1 April 2015.
### Term Definition

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Approved clinician</strong></td>
<td>A mental health professional approved by the Secretary of State or a person or body exercising the approval function of the Secretary of State, or by the Welsh Ministers to act as an approved clinician for the purposes of the Act. Some decisions under the Act can only be taken by people who are approved clinicians. All responsible clinicians must be approved clinicians.</td>
</tr>
<tr>
<td><strong>Approved mental health professional (AMHP)</strong></td>
<td>A social worker or other professional approved by a local authority to carry out a variety of functions under the Act.</td>
</tr>
<tr>
<td><strong>Assessment</strong></td>
<td>Examining a patient to establish whether the patient has a mental disorder and, if they do, what treatment and care they need. It is also used to mean examining or interviewing a patient to decide whether an application for detention or a guardianship application should be made.</td>
</tr>
<tr>
<td><strong>Attorney</strong></td>
<td>Someone appointed under the Mental Capacity Act who has the legal right to make decisions (e.g., decisions about treatment) within the scope of their authority on behalf of the person (the donor) who made the power of attorney. Also known as a ‘donee of lasting power of attorney’.</td>
</tr>
<tr>
<td><strong>Blanket restrictions</strong></td>
<td>A blanket restriction or a blanket restrictive practice is any practice that restricts the freedom (including freedom of movement and communication with others) of all patients on a ward or in a hospital, which is not applied on the basis of an analysis of the risk to the individual or others.</td>
</tr>
<tr>
<td><strong>Capacity</strong></td>
<td>The ability to take a decision about a particular matter at the time the decision needs to be made. Some people may lack capacity to take a particular decision (e.g., to consent to treatment) because they cannot understand, retain, use or weigh the information relevant to the decision. A legal definition of lack of capacity for people aged 16 or over is set out in section 2 of the Mental Capacity Act 2005. See also competence to consent.</td>
</tr>
<tr>
<td><strong>Care programme approach (CPA)</strong></td>
<td>A system of care and support for individuals with complex needs which includes an assessment, a care plan and a care coordinator. It is used mainly for adults in England who receive specialist mental health care and in some CAMHS services. There are similar systems for supporting other groups of individuals including, children and young people (children’s assessment framework), older adults (single assessment process) and people with learning disabilities (person centred planning).</td>
</tr>
<tr>
<td><strong>Care Quality Commission</strong></td>
<td>The regulator established by the Health and Social Care Act 2008 of all providers of regulated health and social care. This includes care provided under the Mental Health Act 1983.</td>
</tr>
</tbody>
</table>

---

82 A person with whom the Secretary of State for Health has made an agreement under section 12ZA of the Act, or a body on whom the Secretary of State has imposed a requirement under section 12ZB of the Act.
<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Carer</td>
<td>Someone who provides voluntary care by looking after and assisting a family member, friend or neighbour who requires support because of their mental health needs.</td>
</tr>
<tr>
<td>Certificate required</td>
<td>Whether or not part 4A patients consent to treatment, there are certain treatments they can only be given if they have been approved by a SOAD on a ‘part 4A certificate’ (see paragraph 24.22). The Act refers to this as the ‘certificate requirement’, which is above and beyond the requirements described above, which the Act calls the ‘authority’ to give treatment. Broadly speaking, the certificate requirement applies to any treatment for which a certificate would be necessary under section 58 or 58A of the Act were the patient detained instead (see chapter 25).</td>
</tr>
<tr>
<td>Child (and children)</td>
<td>A person under the age of 16.</td>
</tr>
<tr>
<td>Child and adolescent mental health services (CAMHS)</td>
<td>Specialist mental health services for children and adolescents. CAMHS covers all types of provision and intervention from mental health promotion and primary prevention, specialist community-based services through to very specialist care as provided by in-patient units for children and young people with mental illness. It is mainly composed of a multi-disciplinary workforce with specialist training in child and adolescent mental health.</td>
</tr>
<tr>
<td>Children Act 1989</td>
<td>A law relating to children and young people and those with parental responsibility for them.</td>
</tr>
<tr>
<td>Clinical Commissioning Group (CCG)</td>
<td>The NHS body responsible for commissioning (arranging) NHS services for a particular part of England from NHS trusts, NHS foundation trusts and independent sector providers. CCGs replaced primary care trusts from 1 April 2013. CCGs’ commissioning plans are reviewed by the NHS Commissioning Board (NHS England). CCGs are generally responsible for commissioning mental health care, except for specialist care commissioned by the NHS Commissioning Board.</td>
</tr>
<tr>
<td>Community patient</td>
<td>A patient who is supervised on a community treatment order.</td>
</tr>
<tr>
<td>Community treatment order (CTO)</td>
<td>The legal authority for the discharge of a patient from detention in hospital, subject to the possibility of recall to hospital for further medical treatment if necessary. Community patients are expected to comply with the conditions specified in the community treatment order.</td>
</tr>
<tr>
<td>Competence to consent</td>
<td>Similar to capacity to consent, but specifically about children. As well as an inability to make particular decisions because of their mental condition, it also covers children who do not have the maturity to take the particular decision in question.</td>
</tr>
<tr>
<td>Compulsory measures</td>
<td>Things which can be done to people under the Act without their agreement. This includes detention in hospital, a community treatment order and guardianship.</td>
</tr>
<tr>
<td>Term</td>
<td>Definition</td>
</tr>
<tr>
<td>-------------------------------------------</td>
<td>----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Compulsory treatment</td>
<td><strong>Medical treatment for mental</strong> disorder given under the Act, which may be against the wishes of the <strong>patient</strong>.</td>
</tr>
<tr>
<td>Conditional discharge</td>
<td>The <strong>discharge</strong> from hospital by the <strong>Secretary of State for Justice</strong> or the <strong>Tribunal</strong> of a <strong>restricted patient</strong> subject to conditions. The patient remains subject to <strong>recall</strong> to hospital by the Secretary of State.</td>
</tr>
<tr>
<td>Conditionally discharged restricted patient</td>
<td>A <strong>restricted patient</strong> who has been given a <strong>conditional discharge</strong>.</td>
</tr>
<tr>
<td>Consent</td>
<td>Agreeing to allow someone else to do something to or for you. Particularly consent to treatment. Valid consent requires that the person has the <strong>capacity</strong> to make the decision (or the <strong>competence to consent</strong>, if a child), and they are given the information they need to make the decision, and that they are not under any duress or inappropriate pressure.</td>
</tr>
<tr>
<td>Convey (and conveyance)</td>
<td>Transporting a patient under the Act to hospital (or anywhere else), compulsorily if necessary.</td>
</tr>
<tr>
<td>Court of Protection</td>
<td>The specialist court set up under the <strong>Mental Capacity Act</strong> to deal with issues relating to people who lack <strong>capacity</strong> to take decisions for themselves.</td>
</tr>
<tr>
<td>Criteria for detention</td>
<td>A set of criteria that must be met before a person can be <strong>detained</strong>, or remain detained, under the Act. The criteria are different in different sections of the Act.</td>
</tr>
<tr>
<td>Deprivation of liberty</td>
<td>References to ‘deprivation of liberty’ in the <strong>Mental Capacity Act</strong> have the same meaning as Article 5 of the <strong>European Convention on Human Rights</strong> (ECHR). ‘Deprivation of liberty’ means the circumstances in which a person’s freedom is taken away. Its meaning has been developed through case law.</td>
</tr>
<tr>
<td>Deprivation of liberty authorisation (DoL authorisation)</td>
<td>An authorisation given under Schedule A1 to the <strong>Mental Capacity Act</strong> to authorise a deprivation of liberty. In the Code, this generally means a standard authorisation under that Schedule, but urgent authorisations may also be given.</td>
</tr>
<tr>
<td>Deprivation of liberty order (DoL order)</td>
<td>An order of the Court of Protection under section 16(2)(a) of the <strong>Mental Capacity Act</strong> to authorise a deprivation of liberty.</td>
</tr>
<tr>
<td>Deprivation of liberty safeguards</td>
<td>The framework of safeguards under the <strong>Mental Capacity Act</strong> (as amended by the Mental Health Act 2007) for people who need to be deprived of their liberty in their best interests for care or treatment to which they lack the <strong>capacity to consent</strong> themselves.</td>
</tr>
</tbody>
</table>
A person appointed by the Court of Protection under section 16 of the Mental Capacity Act to take specified decisions on behalf of someone who lacks capacity to take those decisions themselves. This is not the same thing as the nominated deputy sometimes appointed by the doctor or approved clinician in charge of a patient’s treatment.

Unless otherwise stated, a patient who is detained in hospital under the Act, or who is liable to be detained in hospital but who is (for any reason) currently out of hospital. In chapters 24 and 25, detained patients has a more specific meaning, explained in paragraphs 24.9 - 24.10.

Unless otherwise stated, being held compulsorily in hospital under the Act for a period of assessment or medical treatment. Sometimes referred to colloquially as ‘sectioning’.

The detention of a person in order to carry out an assessment. Can normally only last for a maximum of 28 days. Also known as ‘section 2 detention’.

The detention of a person in order to give them the medical treatment for mental disorder they need. There are various types of detention for medical treatment in the Act. It most often means detention as a result of an application for detention under section 3 of the Act. But it also includes several types of detention under part 3 of the Act, including hospital directions, hospital orders and interim hospital orders.

A risk for everyone with a mental disorder, but a particular danger for people with learning disabilities, that behavioural problems may be misinterpreted as symptomatic of mental disorder when they are in fact a sign of an underlying physical health problem.

Unless otherwise stated, a decision that a patient should no longer be subject to detention, supervised community treatment, guardianship, or conditional discharge. Discharge from detention is not the same as being discharged from hospital. The patient might already have left hospital on leave of absence, or might agree to remain in hospital as an informal patient.

The DBS was established by section 87(1) of the Protection of Freedoms Act 2012. DBS has taken over the functions of the Criminal Records Bureau (now abolished) to provide access to criminal record information and information in relation to the children’s barred list and adults’ barred list under the Safeguarding Vulnerable Groups Act 2006.

The provision under section 29 of the Act, under which the County Court can order that the functions of the nearest relative be carried out by another person or by a local authority (as defined by the Care Act 2014).
<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Doctor</td>
<td>A registered medical practitioner.</td>
</tr>
<tr>
<td>Doctor approved under section 12</td>
<td>A doctor who has been approved under the Act by the Secretary of State for Health as having special experience in the diagnosis or treatment of mental disorder, or by a body which the Secretary of State has authorised to exercise the approval function under the Act, or by Welsh Ministers. Some medical recommendations and medical evidence to courts under the Act can only be made by a doctor who is approved under section 12. (Doctors who are approved clinicians are automatically treated as though they have been approved under section 12.)</td>
</tr>
<tr>
<td>Donees (of lasting power of attorney)</td>
<td>An attorney appointed under the Mental Capacity Act to make decisions in relation to the welfare, property or affairs of a person subject to the Act who lacks capacity.</td>
</tr>
<tr>
<td>Electro-convulsive therapy (ECT)</td>
<td>A form of medical treatment for mental disorder in which a small, carefully controlled electric current is introduced into the brain. It is administered in conjunction with a general anaesthetic and muscle relaxant medications and is occasionally used to treat very severe depression.</td>
</tr>
<tr>
<td>Emergency application</td>
<td>An application for detention for assessment made under section 4 with only one supporting medical recommendation in cases of urgent necessity. The patient can only be detained for a maximum of 72 hours unless second medical recommendation is received. Also known as a section 4 application.</td>
</tr>
<tr>
<td>Equality Act 2010</td>
<td>A law making it unlawful (either directly or indirectly) to discriminate against a person on the basis of a protected characteristic (as defined in that Act). Imposes a public sector equality duty on public bodies.</td>
</tr>
<tr>
<td>Gillick competent</td>
<td>A child under the age of 16 who is considered to have sufficient understanding and intelligence to enable them to understand fully what is involved in a proposed intervention that requires consent, including admission to hospital and medical treatment, and who is therefore competent to consent to that intervention.</td>
</tr>
<tr>
<td>GP</td>
<td>A patient’s general practitioner (or ‘family doctor’).</td>
</tr>
<tr>
<td>Guardian</td>
<td>See guardianship.</td>
</tr>
<tr>
<td>Guardianship</td>
<td>The appointment of a guardian to help and supervise patients in the community for their own welfare or to protect other people. The guardian may be either a local authority or someone else approved by a local authority (a private guardian).</td>
</tr>
<tr>
<td>Term</td>
<td>Definition</td>
</tr>
<tr>
<td>-------------------------------------------</td>
<td>-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Guardianship application</td>
<td>An application to a local authority by an approved mental health professional or a nearest relative for a patient to become subject to guardianship.</td>
</tr>
<tr>
<td>Guardianship order</td>
<td>An order by the court, under part 3 of the Act that a mentally disordered offender should become subject to guardianship.</td>
</tr>
<tr>
<td>Guiding principles</td>
<td>The five principles set out in chapter 1 which have to be considered when decisions are made under the Act.</td>
</tr>
<tr>
<td>Habilitation</td>
<td>Equipping someone with skills and abilities they have never had. As distinct from rehabilitation, which means helping them recover skills and abilities they have lost.</td>
</tr>
<tr>
<td>Health action plan (HAP)</td>
<td>A plan which details the actions needed to maintain and improve the health of an individual with a learning disability and any help needed to achieve them. It links the individual with the range of services and supports they need in order to have better health. It is part of their broader person-centred plan.</td>
</tr>
<tr>
<td>Holding powers</td>
<td>The powers in section 5 of the Act which allow hospital in-patients to be detained temporarily so that a decision can be made about whether an application for detention should be made.</td>
</tr>
<tr>
<td></td>
<td>There are two holding powers. Under section 5(2) doctors and approved clinicians can detain patients for up to 72 hours. Under section 5(4), certain nurses can detain patients for up to 6 hours.</td>
</tr>
<tr>
<td>Hospital direction (or hospital and limitation direction)</td>
<td>An order by the court under part 3 of the Act for the detention for medical treatment in hospital of a mentally disordered offender. It is given alongside a prison sentence. Hospital directions are given under section 45A of the Act.</td>
</tr>
<tr>
<td>Hospital managers</td>
<td>The organisation (or individual) responsible for the operation of the Act in a particular hospital (eg an NHS trust, an NHS foundation trust or the owners of an independent hospital).</td>
</tr>
<tr>
<td></td>
<td>Hospital managers have various functions under the Act, which include the power to discharge a patient. In practice, most of the hospital managers’ decisions are taken on their behalf by individuals (or groups of individuals) authorised by the hospital managers to do so. This can include clinical staff. Hospital managers’ decisions about discharge are normally delegated to a ‘managers’ panel’ of three or more people.</td>
</tr>
<tr>
<td>Hospital order</td>
<td>An order by a court under part 3 of the Act for the detention for medical treatment in hospital of a mentally disordered offender, given instead of a prison sentence or other form of punishment. Hospital orders are normally made under section 37 of the Act.</td>
</tr>
<tr>
<td>Independent hospital</td>
<td>A hospital which is not managed by the NHS.</td>
</tr>
<tr>
<td>Term</td>
<td>Definition</td>
</tr>
<tr>
<td>-----------------------------------------------------------</td>
<td>-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Independent mental capacity advocates (IMCA)</td>
<td>An advocate able to offer help to patients who lack capacity under arrangements which are specifically required to be made under the Mental Capacity Act 2005.</td>
</tr>
<tr>
<td>Independent mental health advocate (IMHA)</td>
<td>An advocate available to offer help to patients under arrangements which are specifically required to be made under the Act.</td>
</tr>
<tr>
<td>Independent mental health advocate (IMHA) services</td>
<td>The services which make independent mental health advocates available to patients. The Act calls patients who are eligible for these services “qualifying patients.”</td>
</tr>
<tr>
<td>Informal patient</td>
<td>Someone who is being treated for a mental disorder and who is not detained under the Act. Also sometimes known as an informal patient.</td>
</tr>
<tr>
<td>Interim hospital order</td>
<td>An order by a court under part 3 of the Act for the detention for medical treatment in hospital of a mentally disordered offender on an interim basis, to enable the court decides whether to make a hospital order or deal with offender’s case in some other way. Interim hospital orders are made under section 38 of the Act.</td>
</tr>
<tr>
<td>Learning disability</td>
<td>In the Act, a learning disability means a state of arrested or incomplete development of the mind which includes significant impairment of intelligence and social functioning. Further guidance on the meaning of learning disability is provided in chapter 20.</td>
</tr>
<tr>
<td>Learning disability qualification</td>
<td>The rule which says that certain parts of the Act only apply to a learning disability if the learning disability is associated with abnormally aggressive or seriously irresponsible behaviour on the part of the person concerned.</td>
</tr>
<tr>
<td>Leave of absence</td>
<td>Permission for a patient who is detained in hospital to be absent from the hospital for short periods eg to go to the shops or spend a weekend at home, or for much longer periods. Patients remain under the powers of the Act when they are on leave and can be recalled to hospital if necessary in the interest of the patient’s health or safety or for the protection of other people.</td>
</tr>
<tr>
<td>Local authority</td>
<td>The local authority responsible for care and support services in a particular area of England, which is a local authority for the purpose of the Care Act 2013 (except where otherwise indicated).</td>
</tr>
<tr>
<td>Managers</td>
<td>See hospital managers.</td>
</tr>
<tr>
<td>Managers’ panel</td>
<td>A panel of three or more people appointed to take decisions on behalf of hospital managers about the discharge of patients from detention or supervised community treatment.</td>
</tr>
<tr>
<td>Medical recommendation</td>
<td>Normally means a recommendation provided by a doctor in support of an application for detention or a guardianship application.</td>
</tr>
</tbody>
</table>
In the Act, this covers a wide range of services. As well as the kind of care and treatment given by doctors, it also includes nursing, psychological therapies, and specialist mental health habilitation, rehabilitation and care.

Medical treatment which is for the purpose of alleviating, or preventing a worsening of, the mental disorder, or one or more of its symptoms or manifestations.

The Mental Capacity Act 2005. An Act of Parliament that governs decision-making on behalf of people who lack capacity, both where they lose capacity at some point in their lives, for example as a result of dementia or brain injury, and where the incapacitating condition has been present since birth.

Any disorder or disability of the mind. As well as mental illnesses, it includes conditions like personality disorders, autistic spectrum disorders and learning disabilities.

An illness of the mind. It includes common conditions like depression and anxiety and less common conditions like schizophrenia, bipolar disorder, anorexia nervosa and dementia.

A person who has a mental disorder and who has committed a criminal offence.

A professional team including staff from a range of different professions.

A person defined by section 26 of the Act who has certain rights and powers under the Act in respect of a patient for whom they are the nearest relative.

The National Health Service.

Clinical commissioning groups (CCGs) and the NHS Commissioning Board (NHS England) are responsible for commissioning NHS treatment and care under the Act.

The NHS Commissioning Board (also known as NHS England) reviews the commissioning plans of CCGs and assures the Secretary of State that the plans will deliver a comprehensive health service. The NHS Commissioning Board took over most of the functions of Strategic Health Authorities from 1 April 2013.

Types of NHS body responsible for providing NHS services in a local area.

A doctor or approved clinician who may make a report detaining a patient under the holding powers in section 5 in the absence of the doctor or approved clinician who is in charge of the patient’s treatment.
The Ombudsman investigates complaints that individuals have been treated unfairly or have received poor service from government departments, other public organisations and the NHS in England.

The part of the Act which deals with detention, guardianship and community treatment orders for civil (ie non-offender) patients. Some aspects of part 2 also applies to some patients who have been detained or made subject to guardianship by the courts or who have been transferred from prison to detention in hospital by the Secretary of State for Justice under part 3 of the Act.

A civil patient – ie a patient who became subject compulsory measures under the Act as a result of an application for detention or guardianship application by a nearest relative or an approved mental health professional under part 2 of the Act.

The part of the Act which deals with mentally disordered offenders and defendants in criminal proceedings. Among other things, it allows courts to detain people in hospital for treatment instead of punishing them, where particular criteria are met. It also allows the Secretary of State for Justice to transfer people from prison to detention in hospital for treatment.

A patient made subject to compulsory measures under the Act by the courts or by being transferred to detention in hospital from prison under part 3 of the Act. Part 3 patients can be either ‘restricted’ (ie subject to special restrictions on when they can be discharged, given leave of absence, and various other matters) or ‘unrestricted’ (ie treated for the most part like a part 2 patient).

The part of the Act which deals mainly with the medical treatment for mental disorder of detained patients (including community patients who have been recalled to hospital). In particular, it sets out when they can and cannot be treated for their mental disorder without their consent.

The part of the Act which deals with the medical treatment for mental disorder of community patients when they have not been recalled to hospital.

A SOAD certificate approving particular forms of medical treatment for mental disorder for a community patient.

In chapters 24 and 25 means a community patient who has not been recalled to hospital.

A person who is, or appears to be, suffering from a mental disorder. This use of the term is not a recommendation that the term ‘patient’ should be used in practice in preference to other terms such as ‘service user’, ‘client’ or similar terms. It is just a reflection of the terminology used in the Act itself.
<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Person-centred plan</td>
<td>An individual plan for each person with a learning disability, tailored to their needs and aspirations, which aims to help them to be a part of their community and to help the community to welcome them.</td>
</tr>
<tr>
<td>Place of safety</td>
<td>A place in which people may be temporarily detained under the Act. In particular, a place to which the police may remove a person under section 135 or 136 Act (may be a hospital, residential care home, police station, or any other suitable place).</td>
</tr>
<tr>
<td>Private guardian</td>
<td>An individual person (rather than a local authority) who is a patient's guardian under the Act.</td>
</tr>
<tr>
<td>Qualifying patients</td>
<td>Patients who are eligible for support from independent mental health advocate services.</td>
</tr>
<tr>
<td>Remand to hospital (and remanded to hospital)</td>
<td>An order by a court under part 3 of the Act for the detention in hospital of a defendant in criminal proceedings. Remand under section 35 is for a report on the person’s mental condition. Remand under section 36 is for medical treatment for mental disorder.</td>
</tr>
<tr>
<td>Recall (and recalled)</td>
<td>A requirement that a patient who is subject to the Act return to hospital. It can apply to patients who are on leave of absence, who are on a community treatment order, or who have been given a conditional discharge from hospital.</td>
</tr>
<tr>
<td>Regulations</td>
<td>Secondary legislation made under the Act. In most cases, it means the Mental Health (Hospital, Guardianship and Treatment) (England) Regulations 2008.</td>
</tr>
<tr>
<td>Rehabilitation</td>
<td>See habilitation.</td>
</tr>
<tr>
<td>Responsible clinician</td>
<td>The approved clinician with overall responsibility for a patient’s case. Certain decisions (such as renewing a patient’s detention or placing a patient on a community treatment order) can only be taken by the responsible clinician.</td>
</tr>
<tr>
<td>Responsible hospital</td>
<td>The hospital whose managers are responsible for a community patient. To begin with, at least, this is the hospital in which the patient was detained before being discharged onto a community treatment order.</td>
</tr>
<tr>
<td>Responsible local authority</td>
<td>For the purposes of guardianship, the local authority responsible for a patient who is subject to guardianship. The responsible local authority is normally the one for the area where the patient lives. But if the patient has a private guardian, it is the one for the area where the guardian lives.</td>
</tr>
</tbody>
</table>
A part 3 patient who, following criminal proceedings, is made subject to a restriction order under section 41 of the Act, a limitation direction under section 45A or a restriction direction under section 49. The order or direction will be imposed on an offender where it appears that it is necessary to protect the public from serious harm. One of the effects of the restrictions imposed by these sections is that restricted patients cannot be given leave of absence or be transferred to another hospital without the consent of the Secretary of State for Justice, and only the Tribunal can discharge them without the Secretary of State’s agreement. See also Unrestricted part 3 patient.

<tbody>
<tr>
<td>Restricted patient</td>
<td>A part 3 patient who, following criminal proceedings, is made subject to a restriction order under section 41 of the Act, a limitation direction under section 45A or a restriction direction under section 49. The order or direction will be imposed on an offender where it appears that it is necessary to protect the public from serious harm. One of the effects of the restrictions imposed by these sections is that restricted patients cannot be given leave of absence or be transferred to another hospital without the consent of the Secretary of State for Justice, and only the Tribunal can discharge them without the Secretary of State’s agreement. See also Unrestricted part 3 patient.</td>
</tr>
<tr>
<td>Revocation (and revoke)</td>
<td>Term used in the Act to describe the rescinding of a community treatment order (CTO) when a community patient needs further treatment in hospital under the Act. If a patient’s CTO is revoked, the patient is detained under the powers of the Act in the same way as before the CTO was made.</td>
</tr>
<tr>
<td>Second opinion appointed doctor (SOAD)</td>
<td>An independent doctor appointed by the Care Quality Commission who gives a second opinion on whether certain types of medical treatment for mental disorder should be given without the patient’s consent.</td>
</tr>
<tr>
<td>Secondary legislation</td>
<td>Delegated legislation made by ministers under powers given to them by Acts of Parliament in order to implement and administer the requirements of the Acts. It includes regulations.</td>
</tr>
<tr>
<td>Secretary of State</td>
<td>Cabinet ministers in the Government. In the Act, either the Secretary of State for Health or the Secretary of State for Justice, depending on the context.</td>
</tr>
<tr>
<td>Secretary of State for Health</td>
<td>The Secretary of State who is responsible, among other things, for the NHS and care and support services for adults. The Secretary of State for Health is supported by the Department of Health.</td>
</tr>
<tr>
<td>Secretary of State for Justice</td>
<td>The Secretary of State who is responsible, among other things, for courts, prisons, probation, criminal law and sentencing. The Secretary of State for Justice is supported by the Ministry of Justice.</td>
</tr>
<tr>
<td>Section 57 treatment</td>
<td>A form of medical treatment for mental disorder to which the special rules in section 57 of the Act apply, especially neurosurgery for mental disorder (sometimes called ‘psychosurgery’).</td>
</tr>
<tr>
<td>Section 58 treatment</td>
<td>A form of medical treatment for mental disorder to which the special rules in section 58 of the Act apply, which means medication for mental disorder for detained patients after an initial three month period.</td>
</tr>
<tr>
<td>Section 58A treatment</td>
<td>A form of medical treatment for mental disorder to which the special rules in section 58 of the Act apply, especially electro-convulsive therapy and medication as part of that therapy.</td>
</tr>
<tr>
<td>Section 117</td>
<td>See after-care.</td>
</tr>
</tbody>
</table>

83 Other forms of treatment may be added to section 57, section 58 or section 58A by regulations.
A section 135 warrant provided by a magistrate (which may be issued if certain circumstances are met) enables a police officer to enter premises to either: remove a person to a place of safety to make an application under part 2 or other arrangements for their care or treatment; or take or retake into custody a patient who is liable to be detained under the Act or relevant Scottish law.

A power which enables the police to remove to a place of safety a person found in a place to which the public have access who appears to the police officer to be suffering from mental disorder and to be in immediate need of care or control if the police officer thinks it necessary to do so in the interests of that person or for the protection of others. The purpose of detention is to enable the person to be examined by a registered medical practitioner and to be interviewed by an approved mental health professional and for making any necessary arrangements for his treatment and care.

A certificate issued by a second opinion appointed doctor (SOAD) approving particular forms of medical treatment for a patient.

A second opinion appointed doctor is required to consult two people (‘statutory consultees’) before issuing certificates approving treatment. The professional requirements for statutory consultees are set out in paragraph 25.49.

The First-tier Tribunal established under the Tribunals, Courts and Enforcement Act 2007. This is a judicial body which has the power to discharge patients from detention, community treatment orders, guardianship and conditional discharge.

A patient subject to a hospital order or guardianship order under part 3 of the Act, or who has been transferred from prison to detention in hospital under that part, who is not also subject to a restriction order or direction. For the most part, unrestricted patients are treated in the same way as part 2 patients, although they cannot be discharged by their nearest relative. See also restricted patients.

People who have been subject to serious violent or sexual offences who have the right under the Domestic Violence, Crime and Victims Act 2004 to be informed of key developments in the care of the mentally disordered offender and to make representations about conditions that should be in place on their discharge under the Victims Contact Scheme (see chapter 40).
The Mental Health (Wales) Measure 2010 places duties on local health boards and local authorities in Wales to provide a care coordinator and a care and treatment plan for people for whom they are responsible for providing secondary mental health services and patients under the guardianship of a local authority in Wales.
